(3) **The Arabian and Mediæval periods** (those of Alchemy): When the Arabs adopted the Greek word *chēmeia* or its analogue, and prefixed to it their article *al*=the, their inquiries took a new form, and were mainly those to which the term Alchemy is still applied. Suidas himself had defined *chēmeia* as "the making of silver and gold." The Moors introduced alchemy into Spain about A. D. 1150. For its further history see ALCHEMY.

(4) **The modern period** (that of Chemistry properly so called): As astronomy developed from astrology, so chemistry came forth from alchemy. The transition was gradual, but a considerable part of it was effected in the 15th century, though straggling alchemists flourished till the 18th.

Among the discoveries which have made chemistry what it now is, the following may be mentioned: Boyle, who published his "Sceptical Chemist" in 1669, introduced the use of chemical reagents or tests. In 1674 Mayow, of Oxford, perceived that respiration produced the same effect on atmospheric air as combustion did. In 1756 Dr. Black proved that an aeriform body (carbon dioxide) existed in carbonate of lime, thus distinguishing it from quicklime. About 1765 Mr. Cavendish brought to notice hydrogen gas. On August 1, 1774, Dr. Priestley discovered oxygen, and in the latter year Cavendish made known the constituent elements of water. In 1774 Scheele discovered chlorine, and in 1785 Berthollet pointed out the use which might be made of it in bleaching; the same year also he described the elements of ammonia. In 1797 Vanquelin discovered chromium. In 1803 Dalton introduced his atomic theory. In November, 1807, Sir Humphrey Davy intimated the existence of potassium and sodium. Klaproth during his life, which ended in 1817, analyzed nearly 200 minerals. The synthesis of urea by the molecular transformation of ammonium cyanate, by Wohler in 1828, also the discovery of the synthesis of cyanogen and alcohol, &c., showed that organic compounds could be formed without the aid of plants or animals. The discoveries of Wurtz, Berthelot, Kolbe, Baeyer, &c.; the researches of Williamson on ethers, Hoffmann on compound ammonias, Frankland on organic radicals Kekule on the benzene series, Bunsen's spectroscopic researches, leading to the discovery of the elements cesium and rubidium, followed by the discovery of thallium by Crookes, &c., and the synthesis of alizarin and indigo, may be mentioned to give some idea of the rapid progress of chemistry in recent years. (Consult Watt's *Dic. Chem.* and the papers of the American, English, German, and French Chemical Societies.)

2. **Modern divisions of chemistry:** It is divided into *inorganic* and *organic* chemistry, the former comprising the chemistry of inorganic bodies, and the latter of hydrocarbons and the compounds derived from them. Another classification is into pure or theoretical, analytical, and applied or practical chemistry. The latter may be sub-divided according to the arts or occupations which it is designed to benefit, as *agricultural chemistry*, &c.

chēm'-i-tŷpe, s. [Eng. *chemi(c)*, and *type* (q. v.).]

Engraving: A somewhat general term which includes a number of relief processes by which a drawing or impression from an engraved plate is obtained in relief, so as to be printed on an ordinary printing-press.

***chem-ne**, s. [CHIMNEY.]

chēm-nīt'-zī-ā, s. [Named after Chemnitz, a distinguished conchologist of Nuremberg, who published a work on shells in seven volumes between A. D. 1780 and 1795.]

Zool.: A genus of gasteropodous mollusks, family Pyramidellidae. The shell, which is slender, is many-whorled with a simple aperture closed by a horny subspiral operculum. The animal has a very short head, with a long proboscis. Recent species thirty-two; fossil 240, from the Silurian period onward. (*Woodward*, ed. Tate.)

chē mōl'-ŷ-sis, s. [Eng. *chem(ic)*, and Gr. *lysis*=a loosing.] The decomposition of organic substances by the use of chemical agents solely.

chē-mō'-sis, *s.* [Gr. *chēmōsis*=inflammation of the eyes; *chēmē*=a yawning, a gaping; *chainō*=to gape.]

Med.: An affection in which the conjunctiva, the membrane which lines the posterior surface of the eyelids, is continued over the forepart of the globe of the eye. Frequently lymph or blood is effused with the cellular substance connecting it with the eyeball, and so causes it to be elevated or projected toward the eyelids, giving it the appearance of a gap or aperture along the middle of the eye. The swollen conjunctiva sometimes overlaps the cornea altogether, and there is usually more or less purulent discharge, with severe pain, headache, and feverishness.

chēm-os-mō'-sis, *s.* [Eng. *chem(ical)*, and Gr. *osmosis*=osmose.] Chemical action operating through an intervening membrane, such as parchment, paper, &c.

chēm-os-mōt'-ic, *a.* Of or pertaining to chemosmosis.

chēm-ō-tāx'-is, *s.* [Eng. *chem(ical)*, and Gr. *tasso* (genit. *taxis*=to arrange.) The property of cellular attraction and repulsion displayed by the proteid constituents of the protoplasms of various species of bacteria, and by various proteids, towards chemical substances of various kinds.

chēm-ōt'-ic, *a.* [Gr. *chemosis*=inflammation of the eyes.] Pertaining to or of the nature of chemosis.

Chē-mūng', *a.* [Named from *Chemung* River.] A name given to the third period of the Devonian age in America.

chēn'-ē-vix-ite, *s.* [Named after its discoverer, and Eng. suff. *-ite* (Min.).]

Min.: A massive, compact, dark-green mineral, found in quartz rocks in small compact masses. Hardness, 4.5; specific gravity, 3.93. Composition: Arsenic acid, 32.20-33.5; phosphoric acid, 0.2-30; sesquioxide of iron, 25.10-27.5; oxide of copper, 22.5-31.70; lime, 0.0-34; water, 8.66-12. (*Dana*.)

cheng, *s.* [Chinese.] The Chinese organ, which consists of a series of tubes having free reeds. It is held in the hand and blown by the mouth. The introduction of this instrument into Europe led to the invention of the accordion and harmonium. (*Stainer & Barrett*.)

chē-nī'le, *s. & a.* [Fr. *chenille* = (1) a caterpillar, (2) fine velvet twist.]

A. As subst.: A round fabric or trimming, made by uniting with two or more sets of warps, either by weaving or twisting, a fine filling or weft, which is allowed to project beyond the warps. This filling is cut at its outer edges, and the fabric is then twisted, assuming a cylindrical shape with weft projecting radially from the central line of warps.

B. As adj.: (In compounds, as *Chenille-carpet*, *Chenille-machine*.)

chē-nō-cōp'-rō-lite, *s.* [Gr. *chēn*=a goose, and Eng. *coprolite* (q. v.).]

Min.: Dana's name for an impure iron-sinter, also called goose-dung ore. [*GANOMATITE*.]

chēn'-ō-pōd, *s.* [*CHENOPODIUM*.]

1. *Sing.*: A book-name for a plant of the genus *Chenopodium*, or of the order *Chenopodiaceae*.

2. *Pl. (Chenopods)*: The English equivalent of the Mod. Lat. term *Chenopodiaceae* (q. v.).

chēn-ō-pōd-ā-lēs, **chēn-ō-pōd-i-ā-lēs**, *s. pl.* [From Mod. Lat. *chenopodium* (q. v.), and fem. pl. adj. suff. *-ales*.]

Bot.: An alliance of hypogynous exogens. Lindley includes under it the orders *Nyctaginaceae*, *Phytolaccaceae*, *Amarantaceae*, and *Chenopodiaceae* (q. v.).

chēn-ō-pōd-i-ā'-cē-æ, *s. pl.* [Mod. Lat. *chenopodi(um)*; Lat. fem. pl. suff. *-aceae*.]

Bot.: The Goosefoot family, a natural order of monoclamydeous dicotyledons, characterizing Lindley's *Chenopodal* alliance. The species are inconspicuous herbs or undershrubs, found in waste places in all parts of the world, but abounding in extra-tropical regions. Some are used as potherbs, as spinach (*Spinacia oleracea*), orach (*Atriplex hortensis*), beet (*Beta vulgaris*), &c. The mangold-wurzel is a variety of beet used for the food of cattle. In 1866 there were 74 genera and 533 species known.

chēn-ō-pōd-i-ūm, *s.* [Gr. *chēn*=a goose; *pous*, genit. *podos*=a foot.]

Bot.: Goosefoot, a genus of annual and perennial herbs, the typical one of the order *Chenopodiaceae*, *Chenopods*, and chiefly remarkable for the weedy character of the species composing it. Perianth five-parted; stamens five; styles two, crowning the ovary, which contains a single round, flattened seed. The common Goosefoot is found everywhere.

It has triangular leaves, covered with a whitish mealiness, and numerous small flowers in terminal clusters. *C. atriplicis* is a tall-branched annual, growing four to five feet high. *C. Quinoa*, a native of the Pacific slopes of the Andes, is largely cultivated in Chili and Peru for the sake of its seeds, which are extensively used as an article of food. They are prepared either by boiling like rice, or are roasted like coffee, boiled in water, and strained. This brown-colored broth is called *carapul-gue*, and is a favorite. *C. Bonus-Henricus* is used as a potherb. *C. Vulvaria* or *olidum*, an evil-smelling plant, is employed as an antispasmodic and emmenagogue.

chep, *s.* [Etym. doubtful.] A piece of timber forming the sole of a turn-rest plow.

chèque (que as k), *s.* [*CHECK*.]

chēq'-uēr (u silent), *v.* [*CHECKER*, *v.*]

Fr. *cerise*; Prov. *serisia*; Sp. *cereza*; Port. *cereja*; Ital. *ciriogia*; Lat. *cerasus*; Gr. *kerasion*=a cherry, *kerasos*, *kerasea*=the cherry-tree, from *Cerasus* (now *Keresoun*), in Pontus, from which Lucullus is said to have first brought cherries to Italy about 68 B. C. So says Pliny, but as the cherry grew wild in Greece, it is more probable that the town was called from the tree rather than *vice versa*.]

A. As substantive:

I. Ordinary Language, Bot. & Hort.:

1. The name given to various species of the genus *Prunus* and sub-genus *Cerasus*, especially to certain trees which grow wild in America and various other portions of the Northern temperate zone. (1) *Prunus cerasus*, called also *Cerasus vulgaris*, (2) *P. Avium*, the Gean Cherry, called also the Small Cherry, and (3) *Prunus Padus*, the Bird Cherry or Bird's Cherry, called also the Cluster Cherry and the Fowl Cherry. Bentham and Sir Joseph Hooker consider Nos. 1 and 2 mere varieties or sub-species and not really distinct. From these came the cultivated garden cherry. [*CERASUS*.] Other species are the Bastard Cherry (*Cerasus Pseudo-cerasus*), the Choke Cherry (*C. virginiana*), &c. [*CHOKE*, &c.]

2. The drupe or stone-fruit of the cherry-tree. It is a superior one-celled, one-seeded, indehiscent fruit, having a fleshy or pulpy sarcocarp, a hard endocarp, and a pericarp.

3. The name given to various trees with resemblance often superficial to the cherry-tree. *Spec.*: The Barbadoes Cherry (*Malpighia glabra*), the

Hottentot Cherry (*Casine Maurocenia*), the native cherry of Australia (1) *Exocarpus cupressiformis*, (2) *Nelitris ingens*.

4. A number of cordials composed of cherry-juice and spirits sweetened and diluted.

II. *Metal.*: A spherical bar, used specially in running out the cavities of bullet-molds.

B. *As adjective*: Resembling a cherry in color.

"A cherry lip, a passing pleasing tongue."

Shakesp.: *Richard III.*, i. 1.

¶ Obvious compound: *Cherry-colored*.

cherry-bay, s. [LAUREL.]

cherry-bob, s. Two cherries, having the stalks united, used by children as earrings and in games.

cherry-bounce, s. Cherry-brandy and sugar.

"Burnt brandy very good I hold,
To keep in heat and force out cold;
And if you choose to drink it raw
Mix sugar which it down will draw;
When men together these do flounce,
They call the liquor *cherry-bounce*."

Poor Robin, 1740. (Nares.)

cherry-brandy, s. A favorite cordial, prepared by steeping freshly-gathered Morello cherries in brandy for one or two months, and then sweetening with powdered sugar or sugar-candy.

cherry-cheeked, a. Rosy-cheeked, ruddy.

cherry-crab, s.

Bot.: A variety of the Siberian crab, *Pyrus Malus baccata*.

***cherry-fair**, ***cherifeire**, ***chyrre feire**, s. A fair for the sale of cherries and other fruit.

"This worlde ys but a *chyrre feire*,"—*Lydgate: Minor Poems*, p. 231.

cherry-gum, s. [CERASIN.]

cherry-laurel, s.

Bot.: An evergreen shrub, *Cerasus Laurocerasus*, common in nurseries. The leaves have a flavor resembling that of bitter almonds.

cherry-pepper, s.

Bot.: A plant, *Capsicum cerasiforme*, so named from the appearance of the fruit.

cherry-pie, s.

1. *Ord. Lang.*: A pie containing cherries.

2. *Bot.*: A name given to two plants from the smell of the flowers: (1) *Heliotropium peruvianum*, (2) *Epilobium hirsutum*.

***cherry-pit**, s. A child's play, in which they throw cherry-stones into a small hole.

"I [Lord Falkland] see all parents labor to fix opinions into their children before they come to an age fit to judge of any greater doubts than what may happen at span-counter or *cherry-pit*."—*Hammond: Works*, vol. ii., p. 679.

cherry-rum, s. Rum in which cherries have been steeped.

cherry-stone, s. The hard endocarp of the drupe or fruit of the cherry-tree.

cherry-stoner, s. A domestic implement for stoning cherries. It works by introducing a forked prong, which pinches the cherry-stone out of the pulp.

cherry-tree, s. [CHERRY, 1.]

cherry-wine, s. A sweet wine made from cherries; a liquor, also called *Maraschino*, prepared from cherries in Italy and Dalmatia. [MAR-ASCHINO.]

cherry-wood, s.

Bot.: A plant, *Viburnum Opulus*.

"Two smelling, swelling, bashful *cherelettes*."

Herrick: *Appendix*, p. 434. (Davies.)

chěr'-sō-nēse, s. [Gr. *chersonēsos*, from *chersos* = land, and *nēsos* = an island; Fr. *chersonèse*.] A peninsula, a tract of land almost surrounded by the sea, but joined to the continent by a narrow neck or isthmus. Examples, the *Cimbric Chersonese*, now called *Jutland*, and the *Tauric Chersonese*, now the *Crimea*.

chěr'-sī-ans, **chěr'-sī-tēs**, s. pl. [From Gr. *chersinos* = pertaining to land tortoises (*Pliny*): *chersos* = dry land, and suff. -*ans* or -*ites*.]

Zoöl.: A name given to the division of the Chelonia containing the Land Tortoises.

chěrt, s. [Ir. *ceirthe* = stone.]

Min.: A name often applied to Hornstone and to any impure flinty rock, including the jaspers. (*Dana*.)

chěr'-tŷ, a. [Eng. *chert*; -*y*.] Like chert; flinty.

chěr'-ŭb, s. [Heb. *kerúb*, or *kerubim*. It is sometimes written in the plural, improperly, *cherubims*.] A celestial spirit which, in the hierarchy, is placed next in order to the seraphim. All the several descriptions which the Scripture gives us of cherubim differ from one another, as they are described in the shapes of men, eagles, oxen, lions, and in a composition of all these figures put together. The hieroglyphical representations in the embroidery upon the curtains of the tabernacle were called by Moses (*Exod.* xxvi. 1) cherubim of cunning work. (*Calmet*.)

"I have heard it said,
The seraphs love most—cherubim know most—
And this should be a cherub—since he loves not."

Byron: *Cain*, i. 1.

cherub-guarded, a. Guarded by cherubim.

"The cherub-guarded walls of Eden, . . ."

Byron: *Cain*, ii. 2.

cherub-hydra, s.

"A Cherub-hydra round us dost thou gape,
And mold to every taste thy dear delusive shape."

Byron: *Childe Harold's Pilgrimage*, i. 65.

chěr'-ŭ-bĭc, ***chěr'-ŭ-bĭck**, ***chěr'-ŭ-bĭc-al**, a. [Eng. *cherub*; -*ic*, -*ical*.] Of or pertaining to cherubs; angelic.

Eccles.: The *ter sanctus* or *trisagion* in the service

of the Holy Communion; "Holy, holy, holy," &c. (*Stainer & Barrett*.)

chěr'-ŭ-bĭm, s. pl. [CHERUB.]

***chěr'-ŭ-bĭm'-ic**, a. [Eng. *cherubim*; -*ic*.] Cherubic, angelic.

"With cherubimic smiles and placid brows."

Wolcot: *Pet. Pindar*, p. 6. (Davies.)

***chěr'-ŭ-bĭn**, a. & s. [CHERUB.]

A. *As adj.*: Cherubic, angelic.

"Hath in her more destruction than thy sword,
For all her cherubin look."

Shakesp.: *Timon of Athens*, iv. 3.

B. *As subst.*: A cherub.

"Whose face is paradise, but fenc'd from sin;
For God in either eye has plac'd a cherubin."

Dryden: *To the Duchess of Ormond*.

¶ To be in the cherubins: To be in the clouds, to have no reality.

"Soch quidifical trifles, that were al in the cherubins."

—*Udall: Apoph. of Erasmus*, p. 139. (Davies.)

***chěr'-vĕll**, s. [A corruption of Fr. *chèvrefeuille*; Lat. *caprifolium*, from *capra* = a goat, and *folium* = a leaf.]

1. Ordinary Language:

1. The game described in II.

"Me deth manye kueades ate *ches* other ate *tales*,"—*Ayenbite*, p. 52.

*2. A chess-board.

"His tables, his *ches* he bare."—*Tristram*, ii. 10.

3. The quarter or any smaller division of an apple, pear, &c., cut regularly into pieces; the chess or lith of an orange.

II. *Tech.*: The game of chess is of very great antiquity. Until recently it was thought to have been invented in China or India, but that idea has been recently shaken by the discovery at Sakkara, in Egypt, of a wall painting showing two chess-players belonging to the Government of King Teta of the sixth dynasty. Prof. Brugsch puts Teta at 3300 B. C., or 5,200 years ago. In India it has been from time immemorial known as *chaturanga*, i. e., the four *angas*, or members of an army, viz., elephants, horses, chariots, and foot-soldiers. This was by the Persians corrupted into *chatrang*, and by the Arabs into *shatrang*. By them it was introduced into Spain in the eighth century, and from thence it found its way into France, and was known in England before the Norman conquest. From the Arabic *shatrang* came the still further corrupted forms *scacchi*, *échecs*, and *chess*. In the modern European arrangement the idea of elephants, horses, chariots, and foot-soldiers has been abandoned, and, in their places, have been substituted a king, queen, knights, bishops, castles or rooks, and pawns, forming six distinct classes of pieces. [See these words.] The name *rook* is the Hindu *rat'h* = an armed chariot; Pers. *rokh*; the *pawns* are the foot-soldiers, Hindu *peon* = an attendant. The game is played on a board divided into sixty-four squares, colored alternately black and white. Each player has sixteen pieces, viz., a king, a queen, two bishops, two knights, two castles or rooks, and eight pawns. The manner of moving each piece is regulated by rule, and the object of each player is to checkmate the other. [CHECKMATE.]

¶ **Earth chestnut:** *Bunium flexuosum*.

III. As an exclamation:

Slang: When an individual persists in repeating stale witticisms, and hoary and decrepit anecdotes, the interjection "Chestnuts!" is used to remind him of the fact that the audience consider him a bore. One authority derives the usage from the similarity between the staleness of chestnuts exposed by street vendors and the staleness of an oft-told tale. Another account is that a certain produce dealer in an Eastern town, when he wished to get rid of a troublesome, talkative, traveling salesman, would pretend to be very busy getting together a large consignment of this particular commodity, and going to the elevator shaft in his store, would ring the signal bell of the elevator, and yell out "Chestnuts!" to an imaginary person above. The travelers spread the story, and the use of the word in that connection became general in this country.

B. As adj.: Of a deep and rich reddish-brown color.

"And the rings of *chestnut* hair

Curl'd half down his neck so bare."

chicken-pox, s.

Path.: The common name for *Varicella*, a contagious and infectious disease which in some respects resembles modified small-pox, and is characterized by a specific eruption, which breaks out over the whole body, and runs a definite course in about eight or ten days. The disease appears to be the result of a specific poison which, after a period of latency or incubation, develops into one of more or less feverishness. This lasts for two or three days, when an eruption of pimples appears, at first on the body, then on the face and head, the fever subsiding as the rash appears. These pimples soon fill up with lymph, and become vesicles which in their turn, two or three days later, shrivel up and fall off in the form of crusts or scabs, seldom, however, becoming purulent or pitting as in the eruption of small-pox. Chicken-pox appears to have obtained its name partly from the pulse or pea-like (Fr. *chiche*) character of the rash in the first instance, and partly from the mild nature of the complaint as compared with small-pox. Swine-pox, bastard-pox, hives, horn-pox, pearl or stone-pox, are the names popularly given to this disease, according to the character of the eruption, which varies somewhat in different cases. Adults seldom suffer from chicken-pox.

chīck'-ēt, s. [Etym. doubtful.] A fastening.

"... the green shutters and *chickets* [of the Escorial] are offensive."—*Ford in Ogilvie*.

"Diuretics evacuate the salt serum; as all acid diuretics, and the testaceous and bitter *chicoraceous* plants."—Sir J. Floyer.

chic-ō-rỹ, *chic-ō-rỹ, *s.* [O. Fr. *chicorée*, *cichorée*=succorie (Cotgrave); Fr. *chicorée*, from Lat. *cichorium*; Gr. *kichōrion*; *kichōra*=succory.] [SUCCORY.]

Bot. & Comm.: The root of the *Cichorium intybus*, Wild Succory or Chicory. The plant is cultivated in various parts of Europe and America, growing well in a gravelly and chalky soil. The roots were formerly used medicinally, possessing properties resembling those of the Dandelion. The root roasted has been employed as a substitute for coffee for more than a century. It is now used extensively as a mixture with genuine coffee. Its presence is easily detected by the microscope, and by the brown color which is immediately produced when a few grains are thrown into cold water. Chicory root is heated in iron cylinders, which are kept revolving as in the roasting of coffee. Usually about two pounds of lard are added to every hundred-weight of the kiln-dried root during the roasting process. Sometimes butter is used. By this a luster and color resembling that of coffee is imparted to it. When roasted the chicory is ground to powder and mixed with the coffee. As in the case of many other adulterants, chicory itself is sometimes adulterated, the adulterants being roasted pulse, damaged wheat, parsnips, carrots, logwood and mahogany dust, burnt sugar, dog-biscuit, and even baked livers of horses and bullocks. Venetian red and ruddle are used to color it. (Ure, &c.)

Chicory.

chī-cōt (*t* silent), *s.* [Fr.] The seed of a plant, *Moringa pterygosperma*.

chīd, *pret. & pa. par. of v.* [CHIDE.]

chīef, *chef, *cheffe, *cheefe, *chefe, *a., s. & adv.* [O. Fr. *chef*, *chief*=the head, from Lat. *caput*; Sp. *sæfe*; Ital. *capo*.]

A. *As adjective:*

1. The principal; the first; the head or highest in authority.

(1) *Of persons:*

"I schal mak him my *chef* stiward."

William of Palerne, 3,840.

(2) *Of things:*

"Then toun that was the *chef* cyte of the lasse Asye."—Robert of Gloucester, p. 395.

2. The most important; deserving of the greatest respect, opinion, or attention.

" . . . my *chief* care

Is to come fairly off from the great debts."

Shakesp.: *Merchant of Venice*, i. 1.

*3. Exceeding, extraordinary, very intimate or close.

"A froward man soweth strife, and a whisperer separateth *chief* friends."—Proverbs xvi. 28.

¶ Formerly the word was used in the comparative and superlative degrees.

"He sometimes denied admission to the *chiefest* officers of the army."—Clarendon.

¶ Crabb thus distinguishes between *chief*, *principal*, and *main*: "*Chief* respects order and rank; *principal* has regard to importance and respectability; *main* to degree or quantity. We speak of a *chief* clerk, a commander in *chief*; the *chief* person in a city; but the *principal* people in a city; the *principal* circumstances in a narrative, and the *main* object." (Crabb: *Eng. Synon.*)

B. *As substantive:*

I. *Ordinary Language:*

*1. The top, the highest part, the head.

"Upon the *chefe* of hur cholle
A padok pryketto on a polle."

Anturs of Arthur, ix.

2. The head or leader of any number of persons, as of an army, a political or social union, &c.

3. A prime mover or actor; the principal agent.

"I was the *chief* that raised him to the crown,
And I'll be *chief* to bring him down again."

Shakesp.: *Henry VI., Pt. III.*, iii. 3.

II. *Technically:*

1. *Old Law:*

(1) Used as a translation of the Latin *caput*. Persons who held their land by personal service direct from the king were called tenants *in chief*, in Latin, *in capite*, in French, *en chef*.

" . . . license of alienation to be made of lands holden *in chief*."—Bacon.

(2) Applied loosely to the holding of any estate direct from any person.

2. *Heraldry:*

(1) As the head is the chief part of the man, so the head or principal part of the escutcheon is called the chief, or chief point. It contains the upper third of the field, and is determined by one line, either drawn straight, or crenellé, or indented. Sometimes one chief is borne upon another, which is called surmounting, and is usually expressed by a line drawn across the uppermost part of the chief. When a chief is charged with anything it is said to be *on chief*, but when a thing is borne on the top of the escutcheon it is said to be borne *in chief*.

Chief.

"The *chief* is so called of the French word *chef*, the head or upper part; this possesses the upper third part of the escutcheon."—Peacham: *On Drawing*.

(2) The chief of an ordinary is a fess removed to the upper part of a coat.

¶ *In chief:*

1. *Law*: [II. 1.]

2. *Her.*: [II. 2.]

3. First, before all. Used in such compounds as

commander-in-chief, general-in-chief.

¶ Crabb thus distinguishes between *chief*, *leader*, *chieftain*, and *head*: "*Chief* respects precedence in civil matters; *leader* regards the direction of enterprises; *chieftain* is [or rather was once] employed for the superior in military rank; and *head* for the superior in general concerns. Among savages the *chief* of every tribe is a despotic prince within his own district. Factions and parties in a state, . . . must have their *leaders*. . . . Robbers have their *chieftains*, who plan and direct everything, having an unlimited power over the band. The *heads* of families were, in the primitive ages, the *chiefs*, who in conjunction regulated the affairs of state. *Chiefs* ought to have superiority of birth combined with talents for ruling; *leaders* and *chieftains* require a bold and enterprising spirit; *heads* should have talents for directing." (Crabb: *Eng. Synon.*)

†C. *As adv.*: Chiefly, especially.

"Then, issuing cheerful, to thy sport repair,
Chief, should the western breezes curling play."

Thomson: *Spring*.

chil'-blāin, **chīld-blāin*, **chīld-blāne*, s. [Eng. *chill*, and *blain* (q. v.).] A blain or sore on the hands or feet produced by cold, especially if the parts were previously much heated. There are three types of the disease. In the first or mildest, there are redness and swellings, with much heat and itching. In the second the affected part becomes greatly swelled, and of a red or blue, or even of a purple, hue. In the third, or severest type, vesicles rise on the swollen skin, which become sores, discharging irritating matter. The disease affects young people more frequently than adults, and girls oftener than boys. A cure of mild chilblains may sometimes be effected if they be rubbed with snow or ice-water, and finally immersed in it till the pain and itching cease. This should be repeated several times a day, the affected parts being dried and inclosed in leather casings.

"I remembered the cure of *chilblanes* when I was a boy (which may be called the children's gout), by burning at the fire."—*Sir W. Temple*.

**chil'-blain*, v. t. [CHILBLAIN, s.] To affect with chilblains; to raise chilblains upon.

child, **cild*, **childe*, **chylde* (Eng.) (pl. **cildru*, **childre*, **childir*, **chyldere*, **childire*, *children*), *chiēl* (*Scotch*), s. & a. [A. S. *cild* (pl. *cild* and *cildare*). *Mätzner* and *Mahn* compare Goth. *kilthei*=a womb, *in-kiltho*=with child. *Skeat* refers to Dut. and Ger. *kind*=a child.]

A. As substantive:

1. Ordinary Language;

1. Literally:

(1) A descendant in the first degree, whether male or female; a son or daughter.

(2) Extended to more remote descendants.

"Thus saith the Lord, Behold, a *child* shall be born unto the house of David, . . ."—1 *Kings* xiii. 2.

(3) Applied, in the plural, especially in Scripture, to all the members of a race.

" . . . the *children* of Reuben, and the *children* of Gad, and the half tribe of Manasseh, built there an altar by Jordan."—*Josh.* xxii. 10.

(4) A young girl. (Obsolete, except in provincial England.)

"Mercy on 's, a barne; a very pretty barne! A boy or a *child*, I wonder?"—*Shakesp.: Winter's Tale*, iii. 3.

(5) A young person generally, irrespective of any relationship or connection.

" . . . and his flesh came again like unto the flesh of a little *child*, and he was clean."—2 *Kings* v. 14.

†(6) [CHILDE.]

"And every *childe* ware of leaves grene

A fresh chapelet."

Chaucer. Flower and Leaf.

* (7) A servant, a page. (*Scotch*.)

(8) A fellow, a person, irrespective of age. (*Scotch*.)

"They're fools that slav'ry like, and may be free;

The *chiels* may a' knit up themselves for me."

Ramsay. Poems, ii. 77.

2. Figuratively:

(1) *Relig.*: Child of God.

(a) One owned by God as His child.

"Ye are all the *children* of God by faith in Christ Jesus."—*Gal.* iii. 26.

(b) A baptized Christian.

"In Baptism, wherein I was made a member of Christ, the *child* of God . . ."—*Church Catechism*.

(c) One who exhibits the character of a child; applied to—

(i) One who is weak in knowledge. (*Isaiah* iii. 12, 1 *Cor.* xiv. 20.)

(ii) One who is young in grace. (1 *John* ii. 13.)

(iii) One who is humble, docile, and obedient as a child. (*Matt.* xviii. 3, 4.)

(2) One who in manners or disposition exhibits the characteristics of a very young person; one who is innocent or ignorant as a child.

(3) Used as a term of endearment, or affection.

" . . . *Children*, how hard is it for them that trust in riches to enter into the kingdom of God!"—*Mark* x. 24.

†(4) The result, product, or effect of anything.

" . . . this noble passion,

Child of integrity, hath from my soul

Wip'd the black scruples."

Shakesp.: Macbeth, iv. 3.

¶ The plural was originally *cild* or *cildru*, and afterward *childer*, *childir*, *childre*, &c. The later addition of the plural suff. -(e)n consequently makes the modern *children* really a double plural.

"Fyue *childir* he had."—*Langtoft*, p. 19.

¶ The word occurs frequently in Scripture, in phrases with little more meaning than *persons* or *people* attached or belonging to some specified class; as, *children of the flesh*=those whose affections are set on the world; *children of the promise*=

those to whose ancestors the promise had been made; *children of wrath*=those liable to the wrath of God; *children of disobedience*=disobedient persons, &c.

¶ To be with child:

1. *Lit.*: To be pregnant.

"Therhuyle thet hi is mid *childe*."—*Ayenbite*, p. 224.

*2. *Fig.*: To be very anxious for anything.

"I sent my boy, who, like myself, is with *child* to see any strange thing."—*Pepys: Diary*, May 14, 1660.

From a child: From infancy.

"He that delicately bringeth up his servant from a *child* shall have him become his son at the length."—*Prov.* xxix. 21.

II. *Law*: Under seven a child is supposed to be incapable of committing felony. Between seven and fourteen it is held to be *doli incapax*, i. e., incapable of crime, while above fourteen it is *doli capax*, i. e., capable of crime. If, however, anything atrocious be done with obvious malice by a child, it may be held that *malitia supplet aetatem*, malice supplies [the want of] age. The age at which a child can be sworn as a witness depends on the education it has received and its apparent comprehension of the nature and obligation of an oath.

B. As adj.: (See the compounds.)

child-bearing, *child-beringe, a. & s.

A. As adj.: Bearing or bringing forth children.

B. As substantive:

1. The act of bearing children.

"To thee,
Pains only in *child-bearing* were foretold."
Milton P. L., x.

2. The quality of being able to bear children.

"The timorous and irresolute Sylvia has demurred till she is past *child-bearing*."—*Addison*.

3. The period of gestation.

"The period of *child-bearing* in women, which is 280 days, is usually spoken of by the ancient writers as consisting of ten months."—*Lewis: Astronomy of the Ancients* (ed. 1862), ch. 1, § 4, p. 21.

¶ The child-bearing period in healthy women is usually coincident with the menstrual period; or in temperate climates from 14 to 45-50.

child-crowing, s.

Med.: The name popularly given to an affection of the larynx, of which the most remarkable feature is a peculiar crowing or hissing sound caused by the breath being drawn with more or less violence into the windpipe in the effort to remove some impediment, which is usually of a spasmodic character, existing in that organ. The disease is peculiar to childhood, and is caused by reflected irritation from worms, teething, and other disorders upon the muscles of the larynx, through the recurrent laryngeal and pneumogastric nerves. The symptoms, which are those of impending suffocation, are most alarming and must be relieved instantly, but the attack is seldom fatal. Child-crowing, technically called *laryngismus stridulus* (q. v.), is also known as false-croup, from its resemblance in some respects to that disease. True croup is, however, quite a distinct affection, and a much more formidable one.

"There is a sort of bastard croup. . . . Spasmodic croup is the most common of its names. . . . My late colleague, Dr. Ley, in a volume upon this curious disorder . . . adopts from Dr. Mason Good the appellation of *Laryngismus stridulus*. Dr. Gooch called it *child-crowing*, a homespun term which I much prefer, . . ."—*Watson: Principles and Practice of Physic*, lect. xlv.

child's-play, s. A trifling, insignificant contest or operation; a trifle.

"No *child's-play* was it—nor is it! Till two in the afternoon the massacring, the breaking and the burning has not ended . . ."—*Carlyle: French Revolution*, pt. ii., bk. vi., ch. vii.

chil'-ī-ās-tic, **chil'-ī-ās-tic-al**, *a.* [Eng. *chiliast*; -*ic*; -*ical*.] Relating or pertaining to the chiliasts.

"As soon as the obstruction offered by the *chiliastic* errors disappeared."—J. A. Alexander.

chil'-ī-ō-phŷl'-lūm, *s.* [Gr. *chilias*=a thousand, and *phŷllon*=a leaf.]

Bot.: A genus of composite plants with yellow flowers. They are natives of Mexico.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

chill, ***chil**, ***chele**, *s. & a.* [A. S. *cýle*, *céle*=great cold, chilliness, from *célan*=to cool, *cól*=cool; Dut. *kill*=a chill, *killen*=to chill, *koel*=cool; Sw. *kyla*=to chill, *kulen*, *kylig*=chill, cool; Lat. *gelu*=frost.] [COOL, CHELE.]

A. As substantive:

I. Ordinary Language:

1. Literally:

(1) The state of being moderately cold; chilliness.
(2) A sudden sensation of coolness, generally accompanied with shivering; a sudden check to the circulation of heat.

2. Fig.: A sudden check to warmth of manner or feeling; a discouragement.

II. Technically:

1. Painting: A dullness or dimness in a painting; also called *blooming*.

"What artists call 'chill' is no doubt an effect of this description."—*Tyndall: Frag. of Science* (3d ed.), vii. 146.

2. Iron Manuf.: A piece of iron introduced into a mold so as to rapidly cool the surface of molten iron which comes in contact therewith. Cast-iron, like steel, is hardened by rapid cooling, and softened by the prolongation of the cooling process. The extreme in the former direction gives chilled iron the hardness of hardened steel; the extreme in the direction of softness is obtained by prolonging the heat, abstracting the carbon from the cast-iron, reducing it to a nearly pure crystalline iron. [MALLEABLE IRON.]

The chilled cast-iron plowshare has a hard under-surface, and the top wears away, leaving a comparatively thin edge of hardened metal. This resembles the natural provisions in the teeth of rabbits, squirrels, and other rodents, whereby the enamel remains in advance of the softer portion of the tooth, keeping a sharp edge. (*Knight*.)

3. Pathology: A colloquial name given in this country to the cold stage of ague (q. v.). Sometimes when excessively severe it is called "congestive chill," and is not infrequently fatal.

B. As adjective:

I. Literally:

1. Subjec.: Having a sensation of coolness; somewhat cold.

2. Objec.: Moderately cold; causing a sensation of coolness, generally accompanied with shivering; chilly.

II. Figuratively:

1. Subjec.: Cold and reserved in manners, temper, or feeling; distant, formal.

"But he is *chill* to praise or blame."

Tennyson: The Two Voices.

2. Objec.: Causing a discouragement to or checking warmth of feeling or manners; depressing, discouraging; distant, formal.

"Downward and ever downward, and deeper in age's *chill* valley."

Longfellow: Children of Lord's Supper.

¶ Crabb thus distinguishes between *chill* and *cold*: "*Chill* expresses less than *cold*, that is to say, it expresses a degree of cold. The weather is often *chilly* in summer; but it is *cold* in winter. We speak of taking the *chill* off water when the *cold* is in part removed; and of a *chill* running through the frame when the *cold* begins to penetrate the frame that is in a state of warmth." (*Crabb: Eng. Synon.*)

chill-cold, *a.* Very cold.

"A *chill-cold* blood . . . fleets through my veins." *Davies: Muse's Sacr.*, p. 49. (*Davies*.)

chill-hardening, *s.* A mode of tempering steel-cutting instruments, by exposing the red-hot metal to a blast of cold air.

chill, ***chyl-lyn**, *v. t. & i.* [CHILL, *s.*]

A. Transitive:

I. Ordinary Language:

1. Literally:

(1) To make cold or chilly; to strike with a chill.

" . . . when a body is said to be *chilled* . . ."—*Tyndall: Frag. of Science* (3d ed.), viii. 2. p. 178.

†(2) To blast with cold.

" . . . by snows immoderate *chill'd*."

Blackmore.

2. Fig.: To check warmth of feeling or manners; to discourage, to depress; to damp the spirits.

"As an icy touch had *chill'd* its heart."

Hemans: A Tale of the Secret Tribunal.

II. Iron Manuf.: To cause the surface of molten iron to cool suddenly by the introduction of a piece of cold iron, so as to increase the hardness. [CHILL, *s.*, B. 2.]

†**B. Intransitive:**

1. Lit.: To become cold, to shiver.

"*Chyllyn* for colde. *Frigutio*."—*Prompt. Parv.*

"Ready to *chill* for cold."—*Homilies against Excess of Apparel.*

2. Fig.: To become cold, distant, or formal in manners or feeling; to be discouraged, disheartened or downcast.

"Al chaunged her chere and *chylled* at the hert."

Allit. Poems: Patience, 367.

chilled, *pa. par. & a.* [CHILL, *v.*]

A. As *pa. par.*: (See the verb.)

B. As adjective:

***1. Ord. Lang.:** Chill, cold.

"He said, and Priam's aged joints with *chilled* fear did shake." *Chapman. (Rich.)*

2. Technically:

(1) **Iron Manuf.:** Made of iron which has been hardened by chilling. Chilled castings are used for axle-boxes, iron wheel-hubs, rolls for iron-rolling mills, plowshares, and mold-boards, stamp-heads, heavy hammers, and anvils for some kinds of work, and in many other instances. (*Knight*.)

(2) **Painting:** Dimmed, clouded; affected with blooming.

chilled-shot, *s.*

Military: Shot formerly made of very rapidly cooled or chilled cast-iron, which thus acquired a hardness of nearly equal efficiency with steel for penetrating iron plates, and yet produced at a very much less cost. Chilled cast-iron shot break up on passing through the plates, and the fragments are very destructive on crowded decks. Chilled steel projectiles are now used on naval vessels for penetrating armor of an enemy, and are made so hard that the same shell has been more than once fired through iron armor without injury to itself.

chill-li, *s.* [Sp. *chili*, *chile*.]

1. Sing.: The name of the American Red-pepper.

2. Pl.: The pods or fruit of the Capsicum (q. v.).

Spec., the dried ripe pod of *Capsicum fastigiatum*.

"*Chillies* . . . form the basis of Cayenne pepper and curry powder."—*Waterston: Cyclopædia of Commerce*.

Chilli or Chili Vinegar: Vinegar flavored with Capsicum pods.

chill-li-ness, *s.* [Eng. *chilly*; -ness.]

I. Literally:

1. The quality or state of being chilly.

"The *chilliness* of their waters."—*Locke: Education*, pt. ii.

2. Coolness; a moderate degree of cold.

II. Fig.: A sensation of discouragement or depression.

chill-liŋg, ***chyl-lyŋge**, *pr. par., a. & s.* [CHILL, *v.*]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As substantive:

I. Ordinary Language:

(1) The act of cooling or making chill (*lit. & fig.*).

***(2) The act or state of shivering.**

"*Chylllynge* of tethe or other lyke. *Frigidor*."—*Prompt. Parv.*

2. Iron Manuf.: The process of chill-hardening. [CHILL, *s.*, II. 2.]

Chill-liŋg ham, *s.* [A proper name, see A.]

A. As substantive:

Geog.: A parish in Northumberland, on the river Till, about four and a half miles south of Wooler, England.

B. As adj.: In any way pertaining to or connected with the parish described under A.

Chillingham bulls, Chillingham cattle, *s. pl.* Certain bulls, or rather cattle of both sexes, preserved in a semi-wild state in Chillingham Park, England. They are pure white, except the muzzle, which is black, and the horns, which are tipped with black. The white color on the body, however, is artificially produced, the owner causing all spotted calves to be killed. They are now generally believed to be the descendants of the mountain bull or Urus which were wild in Gaul at the time of Cæsar's invasion, and the stock whence modern breeds of domestic English cattle have been derived. Some writers have thought them descended from ordinary cattle which have become wild, and others have made them a distinct species, *Bos Scoticus*. Prof. W. Boyd Dawkins considers them the last surviving representatives of the gigantic Urus of the Pleistocene period, reduced in size and modified in every respect by their small range and their contact with man. (*Q. J. Geol. Soc.*, vol. xxii. (1866), pt. i., p. 398.)

chill-ŷ, *a. & adv.* [Eng. *chill*; -y.]

A. As adjective:

I. Literally:

1. Feeling a sensation of coldness or chilliness.

"Sir Charles, I'm as *chilly* as a bottle of port in a hard frost."—*Colman the younger: The Poor Gentleman*, iv. 1.

2. Causing a sensation of coldness or chilliness.

"A *chilly* sweat bedews

My shudd'ring limbs."

Philips.

II. Fig.: Cold in manners, distant, cool.

†**B. As adv.:** In a chill or cool manner (*lit. & fig.*)

chī-lō-car'-pūs, *s.* [Gr. *cheilos*=a lip, and *karpos*=a fruit.]

Bot.: An imperfectly known genus of climbing plants, natives of Java, having a salver-shaped corolla, capitate stigma, and capsular fruit. The genus is referred to the Apocynaceæ. (*Treas. of Bot.*)

chī-lō-chlō'-ā, *s.* [Gr. *chilos*=fodder, and *chloē* or *chloa*=young grass.]

Bot.: A genus of plants of the order Gramineæ, allied to *Phleum* and *Phalaris*.

chī-lō-dī'-ā, *s.* [Gr. *cheilos*=a lip, and *odous*=a tooth.]

Bot.: A genus of Labiatae, consisting of a single species from New Holland. It is a branched glabrous or slightly pubescent shrub. In habit and structure the genus is very near *Prostanthera*, differing only in having no appendages to the anther cell. (*Treas. of Bot.*)

chī-lō-dōn, *s.* [Gr. *cheilos*=a lip, and *odous*, genit. *odontos*=a tooth.]

Zool.: A genus of Infusoria, of the family Trachelina, having the body covered with cilia; mouth with teeth arranged in the form of a tube; fore part of the head produced into a broad membranous or car-like lip. The cilia form longitudinal rows. (*Griff. & Henfrey*.)

chī-lō-glōt'-tīs, *s.* [Gr. *cheilos*=a lip, and *glōssa* or *glōtta*=a tongue.]

Bot.: A small genus of terrestrial Australasian orchids, bearing radical leaves in pairs, and solitary paleate reddish flowers.

chī-lōg-nāth'-ī-form, *a.* [Eng. *chilognath*, and *form*.]

Entom.: A term applied to the larvæ of those coleopterous insects which are herbivorous, elongated, and sub-cylindrical, and resemble the genus *Jula*.

chī-lōg-nāths (Eng.), **chī-lōg-nā'-thā**, **chī-lōg-nā'-thēs** (Mod. Lat.), *s. pl.* [Gr. *cheilos*=a lip, and *gnathos*=a jaw.]

1. Entom.: An order of the Myriapoda, or Centipedes, distinguished by having the two mandibles and the tongue so united as to form a large lower lip; antennæ short with six or seven joints, body convexly cylindrical, legs short and slender. The segments of the body, from the fourth, fifth, or sixth from the head, have each of them two pair of legs. It contains the Millepedes and Galley-worms. At least seventy species are known. The order is also called Diplopoda. They are found beneath the bark of trees and in humid places, and feed both upon animal and vegetable productions.

2. Palæont.: The order began, as far as is known, in the Carboniferous period.

†**chī-lō-mā**, *s.* [Gr. *cheilōma*=a lip, rim, or edge. (*Septuagint*.)]

Zool.: The upper lip of a mammal when it is turned and continued uninterruptedly from the nostril. Example, the camel.

chī-lōm'-ō-nās, *s.* [Gr. *cheilos*=a lip, and *monas*=single, solitary.]

Zool.: A genus of Infusoria, of the family Monadina, possessing no tail or eye-spot; mouth oblique or lateral, and surmounted by a lip; either anterior cilia or one or two (?) very delicate flagelliform filaments present. (*Griff. & Henfrey*.)

Chī-lō-nī-an, **Chī-lōn'-īc**, *a.* [From Lat. *Chil(o)*, and Eng. suff. -ian, -ic.] Relating to Chilo, one of the seven sages of Greece. (*Smart in Worcester*.)

chīl-ōp'-ō-dā (Lat.), **chīl'-ō-pōds** (Eng.), *a.* [Gr. *chiliās*=a thousand, and *pous*, genit. *podos*=a foot.]

1. Entom.: An order of Myriapoda or Centipedes, the genera of which have elongated antennæ, with fourteen to forty or more joints, a depressed body covered with coriaceous plates, and legs of variable length. Each segment of the body has a single pair of legs. The order contains the Centipedes proper as distinguished from Millepedes, &c. It is sometimes called also Syngnatha. Nearly 100 species are known. They all run fast, are carnivorous, and nocturnal. They are principally found beneath stones, the bark of trees, and in loose, humid earth.

2. Palæont.: No species of the order have yet been found fossil.

chīl'-ō-pōd'-ī-form, *a.* [Eng. *chilopod*, -i- connective, and *form*.]

Entom.: A term applied to the larvæ of Coleopterous insects which are subhexapod, with a long, linear, depressed body, and bear a resemblance to the genus *Scolopodendra*. (*Kirby & Spence: Entomology*, III. xxix. p. 166.)

bōil, **bōy**; **pōut**, **jōwl**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **aş**; **expect**, **Xenophon**, **exist**. **ph**=f
-cian, -tian = şan. -tion, -sion = şün; -şion, -şion = zhün. -tious, -cious, -sious = şüş. -ble, -dle, &c. = bel, del.

†*chil-ō-pōd-i-mor'-phōūs*, *a.* [Eng. *chilopod*; -i-connective; Gr. *morphē*=form; Eng. suff. -ous.] Resembling chilopods in form.

"Those [larvæ] of the Gyronectima being the most perfect *chilopodimorphous* of the whole."—Kirby & Spence: *Entomology*, III. xxix, p. 166.

chī-lōp'-sis, *s.* [Gr. *cheilos*=a lip, *ops*, genit. *opsis*=face, appearance.]

Bot.: A genus of Bignoniaceæ, consisting of a single species of erect branching shrubs from Mexico. It has long linear entire alternate leaves, and beautiful flowers in terminal, dense, spicate racemes. (*Treas. of Bot.*)

Chil'-tērn, *s. & a.* [A proper name, see A.]

A. As substantive:

Geog.: The name of certain beech-clad hills in Buckinghamshire, England, formerly infested by robbers. To keep these in check, a functionary was appointed who was called Steward of the *Chiltern Hundreds* (q. v.).

B. As adj.: Pertaining to, or in any way connected with, the hills described under A.

Chiltern hundreds, *s.* A hilly district in Buckinghamshire, belonging to the Crown of England. The office of Steward of this district, although the duties have long ceased to be more than nominal, is still retained for a special purpose. No Member of Parliament is allowed to resign his seat, and if he wishes to vacate it he can only do so by accepting some office of profit under the Crown. The Stewardship of the Chiltern Hundreds is therefore applied for by any member desiring to retire, and its acceptance necessarily vacates his seat.

chī-mæ'-rā, *s.* [Lat. *chimæra*; Gr. *chimaira*=(1) a she-goat, (2) a fire-spouting monster with a lion's head, a serpent's tail, and a goat's body, killed by Bellerophon.] [CHIMERA.]

1. *Myth.*: [CHIMERA.]

2. *Ichthy.*: A genus of fishes, the type of the family Chimæridæ, having the tail ending in a slender thread, the head pointed, and spiracle single. *Chimæra monstrosa* is sometimes called the Sea-monster, and sometimes the King of the Herrings. It is a native of the Northern Seas, from which it straggles, following shoals of herrings as they move from the deep sea toward the shore. [CHIMÆRIDÆ.]

chī-mær'-ī-dæ, *s. pl.* [Lat. *chimæra*(a); fem. pl. suff. -idæ.]

1. *Ichthy.*: A family of cartilaginous fishes, distinguished by the head being furnished with appendages, and the tail terminating in a point. It contains two species, *Chimæra* and *Callorhynchus*.

2. *Palæont.*: The Chimæridæ begin with the Devonian rocks.

chī-mær'-ōld, *a. & s.* [Lat. *chimæra*; and Gr. *eidos*=form, appearance.]

A. As adj.: Pertaining to, or resembling the Chimæridæ.

B. As subst.: A fish belonging to the family Chimæridæ, or akin to Chimæra.

"In the Mesozoic and Kainozoic deposits, the remains of *Chimæroids* are not extremely rare, but they consist only of the jaws and teeth, along with fin-spines or ichthyodurites."—Nicholson: *Palæont.*, ii. 155.

chī-māph'-il-ā, *s.* [Gr. *cheima*=winter, and *phileō*=to love; from the leaves retaining their green color during winter.]

Bot.: A small genus of Pyrolaceæ, natives of Europe, Siberia, and North America. The plants, called Winter-greens in this country, have woody subterraneous shoots, and a short stem with a tuft of thick, shining, evergreen leaves, oblong, wedge-shaped, or lanceolate. The pedicles are one-flowered, bearing handsome bell-shaped, white flowers, tinged with purplish-red, and very sweet-scented. *Chimaphila umbellata* is a most active diuretic. *C. maculata* is used in strangury and nephritis.

chī-mār'-rhīs, *s.* [Gr. *cheimarros*=a torrent; from the plant growing on the banks of torrents.]

Bot.: Riverwood, a genus of white-wooded American trees, belonging to the order Rubiaceæ. The wood is used for beams and rafters.

chīm-bō-rāz'-ite, *s.* [From Chimborazo, where it is found, and Eng. suff. -ite (Min.).]

Min.: The same as ARAGONITE (q. v.).

chīme (1), **chīmbe*, **chymbe*, **chymme*, *s.* [A corruption of *chimbale* or *chymbale*, a dialectic form of O. Fr. *cimbale* or *cymbale*=a cymbal; Lat. *cymbalum*; Gr. *kymbalon*. Thus the true meaning is—a cymbal, and the true form *chimb* or *chymb* (Skeat); Dut. *kime*=a tolling of a bell, *kimen*=to chime; Sw. *kimma*, *kimba*.]

A. Ordinary Language:

I. Literally:

*1. A cymbal.

"As a *chymbe* or a brasen belle."

Cursor Mundi, 12, 193.

2. The harmonic or consonant sound of several instruments or bells. [B. I.]

†*II. Figuratively*:

1. Harmonized sounds of any instrument of music.

"The Minstrel waked his harp—three times

Arose the well-known martial *chimes*."

Scott: *The Lady of the Lake*, ii. 7.

2. Any sound in harmony or accord.

"A happy *chime* of many dancing feet."

Hemans: *Pauline*.

3. A correspondence in sound or proportion.

"Life and time

Ring all their joys in one dull *chime*."

Scott: *The Bridal of Triermain*, iii. 2.

B. Technically:

1. *Music*:

(1) A number of bells attuned to each other in diatonic succession. A peal consists of three or more bells in harmonic succession, which may be rung successively or simultaneously, but will not admit of a tune being played upon them. Thus a set embracing the eight notes of the common scale will constitute a chime, while a set upon the first, third, fifth, and eighth of the scale would be a peal. The smallest number of bells that can be said to constitute a chime is five, but the number may be increased indefinitely. The usual number is at least nine, which number embraces the eight notes of the natural scale, with the addition of a flat seventh. Apparatus for ringing chimes is said to have been first made at Alost, in East Flanders (Belgium), in 1487. Potthoff, the chime-player of Amsterdam, in the latter part of the eighteenth century, played pianoforte music with facility. Each key required a force equal to two pounds' weight.

(2) An arrangement of bells and strikers in an organ or musical box, operated in harmony with the reeds, pipes, or tongues, as the case may be.

2. *Coopering*: The rim of a cask or tub, formed by the ends of the staves which project beyond the heads. [CHIMB.]

† *Altar-chime*: A set of three small bells mounted in a stand for ringing by hand, used in the Roman Catholic church service.

chime-barrel, *s.*

Horol.: A prolongation of the rim of a striking-wheel, which is furnished with pins, like the barrel of a musical-box, the pin lifting the tails of the hammers, which are set on one axis and strike their respective bells when set in motion.

chime-bell, **chymbe belle*, *s.* A bell or set of bells harmonized.

"His *chymbe belle* he doth ryng."—*Alisaunder*, 1, 852.

chīme, **chī-men*, **chym-myn*, **chīmbe*, *v. i. & t.* [CHIME (1), *s.*]

A. Intransitive:

I. Literally:

1. To sound in harmony or accord; to give out a sound in harmony, as bells, they meanwhile remaining unmoved. It is opposed to ringing, in which the bell is raised, *i. e.*, swung round. (*Stainer & Barrett*.)

2. To cause bells to ring in harmony or accord.

"*Chymyn* or *chenken wythe bellys*. *Tintillo*."—*Prompt. Parv.*

II. Figuratively:

*1. To correspond or accord in rotation or proportion.

"Father and son, husband and wife, and such other correlative terms, do belong one to another; and, through custom, do readily *chime*, and answer one another, in people's memories."—*Locke*.

2. To agree, suit, or accord with.

"Any sect, whose reasonings, interpretations, and language, I have been used to, will, of course, make all *chime* that way . . ."—*Locke*.

3. To join or fall in with in accord; to join or interfere in a conversation; often followed by *in with*.

"He not only sat quietly and heard his father railed at, but often *chimed* in with the discourse."—*Arbuthnot: History of John Bull*.

*4. To make jingling rhymes.

*5. To clatter, to chatter.

"The sely tonge may wel ryng and *chime*

Of wreechednes that passed is ful yore."

Chaucer: *C. T.*, 3, 894.

†6. To give utterance to any harmonious sounds.

"Before the song of those who *chime* for ever

After the chiming of the eternal spheres."

Longfellow: *Dante's Purgatorio*, xxx. xxxi.

B. Transitive:

I. Literally:

1. To play a tune on bells, either by machinery or by hand, by means of hammers, or swinging the clappers, the bell remaining unmoved. It is opposed to ringing, in which the bells are raised, that is, swung round. (*Stainer & Barrett*.)

2. To cause to sound in harmony.

**II. Fig.*: To utter harmoniously.

"Let simple Wordsworth *chime* his childish verse,
And brother Coleridge lull the babe at nurse."
Byron: English Bards and Scotch Reviewers.

chimed, *pa. par. or a.* [CHIME, *v.*]

chīm'-ēr, *s.* [Eng. *chīm(e)*; -er.] One who or that which chimes.

chī-mēr'-ā, *chī-mær'-ā*, *s.* [Lat. *chimæra*; Gr. *chimaira*.] [CHIMÆRA.]

1. *Myth.*: A fabulous fire-breathing monster with a lion's head, serpent's tail, and goat's middle, killed by Bellerophon. According to Hesiod, it was the daughter of Typhaon and Echidria, with the heads of a lion, goat, and serpent.

2. *Ord. Lang. (Fig.)*: Any vain and idle fancy; a foolish and unreal creature of the imagination.

"Thou, whose whole existence hitherto was a *chimera* and scenic show, at length becomest a reality."—*Carlyle: French Revolution*, pt. i., bk. i., ch. iv.

chīm-ēr'e, **chym-er*, **chym-our*, *s.* [O. Fr. *chamarre*; Fr. *cimarre*, *simarre*; Ital. *zimarra*; Sp. *chamarra*, from *zamarro*=a shepherd's coat made of sheepskins, a sheepskin, from Arab. *sam-mar*=the Scythian weasel or marten, the sable. (*Mahn*.)]

1. *Eccles.*: (For definition see extract.)

"The *chimere* [is] the upper robe, to which the lawn sleeves are generally sewed; which before and after the reformation, till Queen Elizabeth's time, was always of scarlet silk; but Bishop Hooper scrupling first at the robe itself, and then at the color of it, as too light and gay for the episcopal gravity, it was changed for a *chimere* of black satin."—*Wheatley: On the Comm. Prayer*, ii. § 4.

*2. *Ord. Lang.*: A light gown of any kind.

"His *chymers* wer of chamalet purple broun."

Henryson: *Evergreen*, i. 186.

chī-mēr'-īc, *chī-mēr'-ī-cal*, *a.* [Eng. *chimer(a)*, and suff. -ical.] Imaginary, fanciful, having no reality or ground; existing solely in the imagination.

chī-mēr'-ī-cāl-lŷ, *adv.* [Eng. *chimerical*; -ly.] In a fanciful manner; vainly, fantastically. (*Johnson*.)

chī-mēr-in'-ā, *s.* [Lat. *chimer(a)*; and neut. pl. suff. -ina.]

Ornith.: A genus of birds, belonging to the Alcadæ, or Awks, and remarkable for a compressed, horn-like protuberance above the nostrils.

**chī-mēr-ize*, *v. i.* [Eng. *chimer(a)*; -ize.] To raise, create, or entertain chimeras or foolish, groundless fancies.

"What are all these but sophisticated dreams and *chimerizing* ideas of shallow imaginative scholars?"—*Transl. of Boccacini* (1626), p. 226.

chīm'-īng, *pr. par., a. & s.* [CHIME, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

I. Literally:

1. The act or practice of playing chimes.

2. The act of sounding harmonically; a chime.

II. Fig.: A joining or falling in with in accord.

chīm'-mīng, *s.* [Etymol. doubtful, but probably from Dut. *kim*. See CHIMB.]

Metal.: The operation of agitating ore in a keeve, or tub, by means of a stirrer, the keeve being inclined at an angle of 45°. The ore and water being placed in the tub, the whole mass is violently stirred until it all partakes of the gyration, when the stirring is stopped and the heavier particles first reach the bottom. The different strata of particles are then sorted according to quality. [KEEVE.]

chīm'-nēy, **chem-ne*, **chim-ne*, **chem-i-ney*, **chymp-ne*, **chym-ney*, **chym-en-ee*, **chym-en-eye*, **schim-nay*, *s. & a.* [Fr. *cheminée*; Sp. *chimenea*; Ital. *cammino*; Ger. *kamin*, from Gr. *kaminos*; Lat. *caminus*=a furnace.]

A. As substantive:

I. Ordinary Language:

*1. A furnace, a grate.

"And his feet [were] like to latoun as in a brennyng *chymeney*."—*Wycliffe: Rev. i. 15*.

*2. A fire-place, a stove, a hearth.

"A *schimnay* of charcole to chaufen the knyghte."
Anturs of Arthur, xxxv.

3. The flue, vent, or passage through which the smoke escapes from the fire into the open air.

4. A tube of glass placed over the flame of a lamp to increase the draught, improve the combustion, and protect the flame.

5. The portion of the flue standing above the roof. [CHIMNEY-SHAFT.]

II. In mining: A rich spot in a lode or vein.

III. Hist.: Down to the thirteenth century, the people seem to have been generally destitute of chimneys. The open hole for the emission of smoke

is referred to in Herodotus, viii. 137: "Now it happened that the sun was shining down the chimney into the room where they were; . . . the boy, who had a knife in his hand, made a mark with it round the sunshine on the floor of the room." In the Middle Ages people made fires in their house in a hole or pit in the center of the floor, under an opening formed in the roof; and when the family lay down for the night—for it can hardly be said that they went to bed—the hole was closed by a cover of wood. The laws of the feudal ages (*couvre-feu* of the French; curfew-bell of the English) ordered that such fires should be extinguished at a certain time in the evening. William I. introduced this law into England in 1068, and fixed the *ignitegium* at seven in the evening. The law was abolished by Henry I. in 1100. Chimneys, in the modern sense, were not common before the reign of Elizabeth. Thus Harrison, in his *Description of England* (ed. Furnivall), i. 338, says: "Now have we manie chimnies; and yet our tenderlings complaine of rheumes, catarrhs, and poses [colds in the head]; then had we none but reredosses [open hearths]; and our heads did never ake." A tax, called Chimney-money (q. v.), was imposed on each hearth or stove in a house in the reign of Charles II., and was abolished in the reign of William and Mary.

The following are the names of the various parts of the chimney: The opening into the room is the fireplace. The floor of the fireplace is the hearth. The paved portion in front of the hearth is the slab. At the back of the fireplace is the fire-back. The flaring sides of the fireplace are the covings. The vertical sides of the opening, a part of the wall of the apartment, are the jambs. The chimney-piece is the ornamental dressing around the jambs and mantel. The entablature resting on the latter is the mantel. The mantel-shelf, or mantel-piece, rests thereupon. The whole hollow space from the fireplace to the top of the wall is the funnel, or chimneyhood. The contracting portion of the funnel is the gathering. The narrowest part is the throat. The throat is closed (at times) by a damper. Above this is the flue. The wall above the mantel against the flue is the breast. The chimney above the roof is the shaft. This is sometimes surmounted by a chimney-pot, and that frequently by a hood, vane, or cowl. A cluster of chimneys is a stack. A chimney-board closes the fireplace in summer. A ciper-tunnel is a false chimney placed on a house as an ornament or to balance things. (*Knight*.)

B. As adjective: (See the compounds.)

chimney-arch, s. An arch turned over the fireplace.

chimney-board, s. A piece of board used to close up the fireplace.

chimney-cap, s.

1. An abacus or cornice forming a crowning termination for a chimney.

2. A device to render more certain the expulsion of smoke, by presenting the exit aperture to leeward, or by a rotatory device. [*COWL*.]

chimney-checks, s. pl. The jambs of a chimney-piece.

chimney-collar, s. A device to prevent the leakage of rain around a chimney-stack where it protrudes through a roof. The slates or shingles lie upon the slanting plates, and upright plates lie closely against the bricks.

chimney-hook, s. A hook suspended in a chimney from which to hang pots over the fire.

chimney-jack, s. A rotating chimney-head; a kind of revolving cowl.

chimney-jambs, s. pl. The jambs of a fireplace. [*JAMB*.]

***chimney-money, s.**

History of England: A tax paid for each chimney in a house. It was imposed by Act 14, Chas. II., c. 2, which enacted that every hearth and stove of every dwelling-house, "except such as pay not to church and poor, should pay two shillings per annum at Michaelmas and Lady-day." The tax was abolished in the reign of William and Mary. It was also called *HEARTH-MONEY*.

chimney-nook, s. The corner of the fireplace; the fireside.

chimney-piece, s. The ornamental frame round a fireplace, consisting of jambs and mantel.

chimney-plant, s.

Bot.: Campanula pyramidalis.

chimney-pot, s.

1. *Lit.:* A tube of pottery or sheet-metal, used to carry up a flue above the chimney-shaft. They are sometimes ornamental, and made to agree in design with the character of the building.

chimney-shaft, s. The portion of the chimney carried up above the roof.

chimney-swallow, s.

Ornith.: A species of swallow, *Hirundo rustica*, so called from its selecting chimneys, outhouses, ruins, &c., as the favorite sites for its nests. The forehead and throat are of a reddish-brown.

"The martin arrives in this country a little later than the chimney-swallow."—*R. Laishly: Popular History of British Eggs.*

chimney-sweep, s.

1. *Ord. Lang.:* A man whose occupation it is to clean the flues of chimneys of the accumulated soot.

2. *Bot.:* (*pl. Chimney-sweeps*): The same as *CHIMNEY-SWEEPER*, II. 2.

chimney-sweeper, s.

I. *Ordinary Language:*

1. *Literally:*

(1) A chimney-sweep.

"To look like her, are chimney-sweepers black."

Shakesp.: Love's Labor's Lost, iv. 3.

2. A machine for sweeping chimneys. It was invented in England by Smart, 1805, to supersede the climbing boys, who were so cruelly treated. A brush of rattan is fixed on the end of a rod which consists of jointed sections of cane.

*2. *Fig.:* Used proverbially for any one of a mean occupation.

"Goldon lads and girls all must,
As chimney-sweepers, come to dust."

Shakesp.: Cymbeline, iv. 2.

1. The heads of *Plantago lanceolata*. (*Britt. & Holland.*)

2. *Lazula campestris*. (*Britt. & Holland.*)

Chimney-sweeper's Cancer:

Med.: A disease, also called Soot-wart, or *Cancer scroti*.

chimney-top, s.

1. *Ord. Lang.:* The top of a chimney; a chimney-cap or cowl, a chimney-pot.

"Many a time and oft

Have you climb'd up to walls and battlements,

To towers and windows, yea, to chimney-tops."

Shakesp.: Julius Caesar, i. 1.

2. *Music:* In organ building, a metallic mouth-pipe whose otherwise closed upper end has an open tube of small dimension, which allows a part of the air to escape and has the effect of sharpening the note. [*MOUTh-PIPE*.]

chimney-valve, s. A device of Benj. Franklin for withdrawing the foul air from an apartment by means of the upward draft in the chimney. In its simplest form it consists merely of a metallic frame fitted in an aperture in the chimney and having a suspended flap opening inwardly to the chimney which allows a current to pass in that direction, but shuts off a down-draft into the room.

chī-mō-nān'-thūs, s. [*Gr. cheimōn*=winter, and *anthos*=a flower; in reference to its early flowering.]

Bot.: A genus of plants belonging to the Calycanthus family, and consisting of a single species, the Japan Allspice, *Chimonanthus fragrans*, well known in gardens for its early flowering and the sweet scent of its blossoms. It was introduced from China in 1766. It is a much-branched shrub, and is generally treated as a wall-plant in gardens. The flowers are sessile, about an inch in diameter, made up of a large number of pale yellow, waxy petals arranged in several rows. They appear in mild winters about Christmas, and last for a long time.

chīm-pān'-zēe, *chīm-pān'-sē, s. [*Fr. chimpanzé, chimpanzé, chimpanzée; Ger. schimpanse.*]

Zoöl.: A name formerly applied to more than one of the larger man-shaped apes, but properly belonging to the *Troglodytes niger*, a native of the equatorial parts of Western Africa. Its associate in the genus *Troglodytes* is the gorilla. The face is nearly hairless, the skin a dirty yellow ochre, teeth beautifully white, hair black and long. In the chimpanzee the arms are longer than the hind limbs, and when the animal is erect they reach below the knee. They are not, however, proportionately so long as in the gibbons and orangs. Its height is about five feet. The look is very much that of a very old child. In habits it is gentle and amiable, and easily makes friends. Little is known of the habits of the adults in their natural state. [*ORANG*.]

chīn, *chīnne, *chŷn, *chŷnne, s. & a. [*A. S. cin; Dut. kin* = the chin; *Icel. kinn; Dan. & Sw. kind* = the cheek; *Goth. kinus* = the cheeks; *O. H. Ger. chinni; M. H. Ger. kinne; Ger. kinn; Lat. genu*, all = the cheek; *Gr. genus; Sansc. kanu* = the jaw.]

A. As subst.: The lower portion of the face below the under lip.

"All naked up unto the chinne."

Gower: C. A., i. 275.

B. As substantive:

1. A native of China.

2. The language of China.

Chinese architecture. The architecture of China had its rise from Indian art introduced with the worship of Buddha. But diversities of treatment soon appeared, and instead of the Indian dagoba arose a tower-like construction of many stories, growing gradually smaller toward the top, and with each stage distinctly marked, and covered with many-colored curved roofs, to which bells were attached. These edifices were, for the most part, octagonal, and were constructed for religious purposes. Chinese structures have nothing durable about them, wood forming an essential element in their construction. They are more remarkable for their elegance and slender proportions than for size. The roofs are especially characteristic, the most striking peculiarities being that they are always curved, and have figures on them in high relief, as well as at the corners, from which hang bells, and that they are decorated with fantastic embellishments, such as dragons, &c. The Chinese do not possess the art of arching large spaces, and consequently numerous columns are introduced for the support of the ceilings and roofs; these are of wood, sometimes carved, but always painted. (*Rosengarten*, &c.)

Chinese-balance, s. A form of the steelyard having four points of suspension, and as many quadrated sides to the weight-arm of the lever. [*STEELYARD*.]

Chinese-blue, s. A mixture of ultramarine, or of cobalt blue, with flake white. (*Weale*.)

Chinese capstan, s. A differential hoisting or hauling device, having a vertical axis, and therein only differing from the differential windlass (q. v.).

Chinese-cherry, s.

Bot.: *Cerasus chinensis*.

Chinese-crab, s.

Bot.: (1) The fruit of a tree, *Pyrus spectabilis*, (2) the tree itself.

Chinese-fire, s. A pyrotechnic composition, consisting of gunpowder, 16; niter, 8; charcoal, 3; sulphur, 3; cast-iron borings (small), 10.

Chinese-glue, s. A superior glue and varnish, obtained from a species of algæ, which abounds on the shores of China. When once dried it resists the action of water, and is used by the Chinese to fill up the lozenge-shaped interstices in the network of bamboos of which their windows are frequently constructed, as well as to strengthen and varnish the paper of their lanterns. (*Ogilvie*.)

Chinese-grass, s.

Bot.: [*CHINA-GRASS*.]

Chinese indigo, s. A plant, *Isatis indigotica*.

Chinese lantern, s. [*LANTERN*.]

Chinese pavilion, s. [So called from the usual shape.]

Music: A pole with several transverse brass plates of some crescent or fantastic form, generally terminating at top with a conical pavilion or hat. On all these parts are hung small bells, which the performer causes to jingle by shaking the instrument held vertically up and down. It is used only in military bands, and more for show than use. (*Victor de Pontigny, in Grove's Dict. Mus.*)

Chinese pitcher-plant, s. A pitcher plant, *Nepenthes phyllanthophora*.

Chinese stones, s. pl. Certain stones consisting chiefly of silicate of alumina altered by heat so as to adapt the material to be used in making grotesque statuary.

Chinese swallows' nests, s. pl. These curious productions, which sell at such a high price in China, though they have no special points of recommendation beyond many other gelatinous ingredients in soups, were formerly supposed to be made of some species of the rose-spired Algæ, as *Sphaerococcus lichenoides*; but this is now ascertained to be a mistake, and it is known that they are formed of a secretion from the mouth of the bird itself. (*Treas. of Bot.*)

Chinese-tree, s.

Bot.: *Pæonia Montan.*

Chinese-varnish, s. *Rhus vernicifera*.

Chinese-wax, s. A secretion from a tree grown in China. [*CERYL CEROTATE*.]

Chinese-white, s. White oxide of zinc.

Chinese windlass, s. A differential windlass, in which the cord winds off one part of the barrel and on to the other, the amount of absolute lift being governed by the difference in the diameters of the respective portions. It is a good contrivance in the respect that great power may be attained without making the axle so small as to be too weak for its work. [*DIFFERENTIAL WINDLASS*.]

Chinese-yellow, s. A very bright sulphuret of arsenic, formerly brought from China. (*Weale*.)

***çhîn'-gîl-ÿ, *çhîn-glÿ, a.** [*SHINGLY*.]

chín'-ō-line, *s.* [From Eng. *quin*(ine); Lat. *oleum*=oil; and Eng. suff. -ine (*Chem.*).]

Chem.: C_9H_7N . A tertiary monamine formed by the distillation of quinine, cinchonine, strychnine, &c., with a concentrated solution of potash. It is a colorless oily basic liquid, boiling at 235°. It is slightly soluble in water, and dissolves in alcohol and ether.

chínse, *v. t.* [Probably from *chink* (1), *v.*]

Naut.: To stop a seam temporarily by crowding in oakum with a knife or chisel. A slight calking.

chín'-sīng, *pr. par. or a.* [CHINSE.]

chinsing-iron, *s.*

Naut.: A calker's edge-tool or chisel for chinsing seams.

chíntz, ***chínts**, *s.* [Hindu. *chhint*=spotted cotton cloth; *chhintā*=a spot; *chhintā*=to sprinkle. The simpler forms are *chhit*=chintz, a spot; *chhitki*=a small spot, a speck; *chhitnā*=to scatter, to sprinkle; Mod. Dut. *sits*; Ger *zitz*. (*Skeat*.)] A cotton cloth gaily printed with designs of flowers, &c., in five or six different colors. It was a favorite

in the time of Queen Anne, long before cotton prints became cheap. The name, being highly respectable, has since been applied to goods lacking the graceful and artistic character of the genuine article. The chintzes of the Coromandel coast were celebrated in the time of Marco Polo, thirteenth century. They are mentioned also by Odoardo Barbosa, a Portuguese, who visited India soon after the passage of the Cape of Good Hope by Vasco da Gama: "Great quantities of cotton cloths admirably painted, also some white and some striped, held in the highest estimation."

"Let a charming chintz, and Brussels lace,
Wrap my cold limbs, and shade my lifeless face."
Pope: *Moral Essays*, i. 248.

chī-ō-cōc'-ca, *s.* [Gr. *chiōn*=snow; *kokkos*=a berry.]

Bot.: The Snow-berry, a genus of the Cinchonaceae family, consisting of small shrubs, with a funnel-shaped, yellowish corolla, concealing the five stamens, which are provided with hairs. Ovary two-celled, with two inverted ovules. Fruit a berry with two seeds. The root of *Chiococca anguifuga*, a trailing herb, and that of *C. densifolia*, a woody bush, are held by the people of Brazil to be a remedy for snake-bite.

chī-ō-dēc'-tōn, *s.* [Gr. *chiōn*=snow, and *dektos*=received, acceptable.]

Bot.: A genus of Lichens (tribe Graphidei), of which one species, *Chiodecton myrticola*, has been found in Ireland; and its var. *sarniense* in the Channel Islands. (*Griff. & Henfrey*.)

chī-ō-lite, *s.* [Gr. *chiōn*=snow; *lithos*=a stone.]

Min.: A tetragonal, snow-white mineral, with a somewhat resinous luster, found in the Ilmen mountains near Miask. Composition: Fluorine, 58.0; aluminum, 18.6; sodium, 23.4. Hardness, 4.0. Specific gravity, 2.72-2.898. (*Dana*.)

chī-ō-nān'-thūs, *s.* [Gr. *chiōn*=snow; *anthos*=a flower, in allusion to the color of the flower.]

Bot.: The Snowdrop-tree of this country, or the Snow-flower, as the name implies, belongs to a genus of Oleaceae, and is distinguished by its deciduous leaves, and the long, narrow, ribbon-like segments of the corolla. The fruit is a drupe like that of the olive. *Chionanthus virginica* is a deciduous shrub, or small tree, with large smooth leaves like those of a Magnolia, and bearing flowers in terminal panicles. It blossoms in June, and is highly ornamental.

I. Ordinary Language:

1. Literally:

(1) A small piece of wood or stone detached by means of a cutting instrument.

"Chyppe. Quisquillie, assula."—*Prompt. Parv.*

(2) A small slice or paring of bread.

2. Figuratively:

(1) A small piece or fragment, however caused.

"To be so tickled, they would change their state

And situation with those dancing chips."

Shakesp. *Sonnets*, 128.

(2) A portion of an original stock.

"A chip of the old block: A child identical in character with his parent; a true child.

"Well dost thou now appear to be a chip of the old block."—*Milton. Apol. for Smectym.*

(3) Used contemptuously for anything dried up or withered, or of little value.

(4) A small disk of ivory or celluloid sometimes bearing figures engraven on them, and of different colors, used to represent money in a gambling game.

II. Technically:

1. *Naut.*: A piece of wood of the shape of a quadrant, of 6 inches radius, and $\frac{1}{4}$ inch thick, placed on the end of a log-line. The chip is loaded at the circular edge so as to float upright, about two-thirds being immersed in water. The knotted log-line is wound on a reel, and the chip or log being thrown overboard catches in the water and remains about stationary there, while the cord unwinds as the vessel proceeds. The number of knots passing the seaman's hand while the sand in the half-minute glass is running out, indicates the number of knots or nautical miles per hour of the vessel's speed. [Log.]

2. *Hat Manuf.*: A kind of straw plait, the leaves of *Thrinax argentea*, a Cuban palm, prepared for hats, &c. Also a kind of wood, split into thin slips for the same purpose.

8. Nobleness and gallantry of spirit; a high spirit.

"Her Beauty and her *Chivalry*, and bright
The lamps shone o'er fair women and brave men."
Byron: Child Harold's Pilgrimage, iii. 21.

II. Technically:

1. *Hist.*: The rise of chivalry has been placed by some as late as the crusades, but at that time it was in an advanced stage of development. From the 9th to the 12th century, a "miles," that is, one bearing a designation which in classical times meant simply a soldier, and in the mediæval period a knight, was one who held land in fee from a superior, and was in consequence bound to render him military service. When a young man who was heir to these responsibilities came of age enough to formally pledge himself to discharge them honorably, a ceremony of investiture took place. The Church, as was natural and right, sought to add solemnity to the interesting event, and made the investiture of a youthful knight an imposing religious ceremony, holding up, moreover, before him a high moral and religious ideal to which he was exhorted to aspire. Mercy to vanquished foes and purity in the youthful knight's relations to women were earnestly pressed upon him; and there was undoubtedly more of both than if the Christian Church had not interfered. Yet withal the ages of chivalry were marked to a frightful extent by cruelty and impurity. While the Church counseled and poets celebrated the religious and moral elevation of the true knight, that individual himself manifested little of either; his principles and his practice were wonderfully different. Chivalry declined and fell with the feudal system, of which it was a normal growth. The institution of the military orders, the Knights Templars, the Knights of St. John, and the Teutonic Knights, was an interesting development of chivalry. To a certain extent also it has a place in the present, its ceremonies being retained in the creation of modern knights, though some of them are all but meaningless. But whatever in the days of its vigor it effected in making society braver, more compassionate, and more pure, created for it a title to gratitude which should never pass away.

*2. *Law*: A tenure of land by knight's service; also called tenancy in chief, or in capite. [CHIEF, B., II. 1.]

"*Servitium militare*, of the French *chevalier*; a tenure of land by knight's service. There is no land but is holden mediately or immediately of the crown, by some service or other; and therefore are all our freeholds, that are to us and our heirs, called *feuda*, fees, as proceeding from the benefit of the king. As the king gave to the nobles large possessions for this or that rent and service, so they parceled out their lands, so received for rents and services, as they thought good: and those services are by Littleton divided into *chivalry* and socage. The one is martial and military; the other clownish and rustic. *Chivalry*, therefore, is a tenure of service, whereby the tenant is bound to perform some noble or military office unto his lord; and is of two sorts; either regal, that is, such as may hold only the king; or such as may also hold of a common person as well as of the king. That which may hold only of the king, is properly called *sergeantry*; and is again divided into grand or petit, i. e., great or small. *Chivalry* that may hold of a common person, as well as of the king, is called *scutagium*."—*Cowel.*

¶ *Tenure in Chivalry*: Tenure on condition of rendering knight's service. [II. 2.]

Toes long, compressed, scaly, and very unequal; claws hooked and horn-colored; neck covered with small scales, and furnished with a large plaited frill, rising from each ear. Each frill has four plaits which converge on the under part of the chin, and fold it up on the side, and a fifth where the two are united in lower part of the neck. Length, 22½ inches.

chlām-ýd-ō-thē-rī-ūm, s. [Gr. *chlamys*=a cloak, and *thērion*=a wild animal.]

Paleont.: A mammal of the order Edentata, found in late Pliocene or Post-tertiary deposits of South America.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trý, Sýrian. æ, œ = ē; ey = ā. qu = kw

chlām-ŷph'-ō-rūs (Mod. Lat.), **chlām'-ŷ-phore** (Eng.), s. [Gr. *chlamys*=a cloak, and *phoros*=bearing, *phērō*=to bear.]

Zoöl.: A genus of mammals of the order Edentata, consisting of a single species, *Chlamyphorus truncatus*. It resembles the Mole in some respects, and in others the Beaver or Sloth. Its length is 5½ inches. The body is covered with a shell of a consistence somewhat more dense and inflexible than sole-leather, of an equal thickness, and consisting of a series of plates of a square, rhomboidal, or cubical form, each row containing fifteen to twenty-two plates. The superior semicircular margin of the truncated surface, together with the lateral margins of the shell, are beautifully fringed with silky hair.

chlām'-ŷs, s. [Gr. *chlamys*=a cloak, from the scabrous covering of the body.]

*1. **Mil.**: A military cloak or mantle, worn especially by horsemen.
2. **Entom.**: A genus of coleopterous insects, belonging to the sub-tribe Cyclica, and the family Chrysomelidae.

chlē-nā'-cē-æ, s. pl. [CHLÉNACEÆ.]

chlī-dān'-thūs, s. [Gr. *chlidē*=softness, delicacy, and *anthos*=a flower.]

Bot.: A genus of South American amaryllids, having truncated bulbs, linear-lorate leaves, sheathing at the base developed after the flowers, and a scape (one and a half foot high) supporting an umbel of a few large fragrant flowers.

Chlamys (from Apollo Belvedere in Vatican).

chlō-ān'-thēs, s. [Gr.=budding, sprouting.]

Bot.: A genus of Verbenaceæ from extra-tropical New Holland, consisting of undershrubs thickly covered with opposite or ternate, sessile, linear, and revolute leaves, and having solitary axillary flowers with short peduncles.

chlō-ān'-thite, s. [Gr. *chloanthēs*=budding, sprouting, from its reticulations, and Eng. suff. *-ite* (Min.) (q. v.).]

Min.: A variety of Smeltito (q. v.), occurring at Chatham, Connecticut, in mica slate. (Dana.)

chlō-āš'-mā, s. [From Gr. *chloazō*=to be pale green; *chloos*=pale green.]

Med.: A discoloration of the human skin which occurs in greenish or yellowish-brown patches, and for the most part on those portions of the body which are covered by clothing. This affection is due to a fungus or confervoid, *Microspora furfur*. There is another manifestation of a similar affection upon the faces and bodies of pregnant women which has been ascribed to circulatory impediments due to the mechanical obstruction of the enlarged uterus.

chlō-ē'-ī-a, s. [Gr. *chloē*=the young shoots of grass, &c.]

Zoöl.: A genus of Annelids, belonging to the order Dorsibranchiata, in which the head is furnished with five tentacula, and the branchiæ resemble a tripinnate leaf.

chlōr'-a, s. [Gr. *chlōros*=green.]

Bot.: An annual herbaceous plant, well marked among Gentianaceæ by its eight-cleft flowers and eight stamens. *Chlora perfoliata*, called Yellowwort, is a singularly erect, slender plant, about a foot high, with but few root-leaves. The whole plant is perfectly smooth and of a decided glaucous hue. The flowers, which are rather large, and of a delicate clear yellow, expand only during the sunshine, like the genus *Erythraea*, to which *Chlora* is allied. The whole plant is intensely bitter, and may be employed with advantage as a tonic; it also dyes yellow. It is of tolerably common occurrence in chalky pastures, especially near the sea. It is often found on limestone. (Treas. of Bot.)

chlōr-āç'-ēt-āte, s. [Eng. *chloracet(ic)*; *-ate*.]

Chem.: A salt of chloracetic acid.

chlōr-ā-çēt'-ic, s. [From Eng., &c., *chlor(ine)*, and *acetic* (q. v.).] Acetic acid, in which hydrogen has been replaced by chlorine.

chloracetic acid, s.

Chemistry:

Monochloroacetic acid, $\text{CH}_2\text{Cl}.\text{COOH}$, is obtained by the action of chlorine on boiling glacial acetic acid. It boils at 186°, and solidifies at 64°. Soluble in water, and is gradually decomposed when the aqueous solution is boiled. Heated with KHO it is converted into potassium glycolate, $\text{KC}_2\text{H}_3\text{O}_3$.

Dichloroacetic acid, $\text{CHCl}_2.\text{COOH}$, is formed by the action of chlorine on monochloroacetic acid. It boils at 105°.

Trichloroacetic acid, $\text{CCl}_3.\text{COOH}$, is obtained by the action of excess of chlorine on glacial acetic acid in direct sunlight, or by oxidation of chloral hydrate with chromic acid or with nitric acid; also synthetically by the action of Cl and H_2O on C_2Cl_4 carbon dichloride. It is a colorless acid deliquescent substance. Nascent hydrogen reduces it to acetic acid. Boiled with excess of ammonia it yields ammonia carbonate and chloroform. By PCl_5 it is converted into trichloroacetyl chloride, $\text{CCl}_3.\text{CO}.\text{Cl}$.

chlōr'-ā-çēt-ōne, s. [Eng. *chlor(ine)*; and *acetone*.]

Chem.: Acetone in which the atoms of hydrogen have been replaced by those of chlorine. **Monochloroacetone**, $\text{CH}_3.\text{CO}.\text{CH}_2\text{Cl}$ is prepared by the action of hypochlorous acid on acetone. It is a colorless liquid, boiling at 119°.

chlōr'-æ-a, s. [Gr. *chlōros*=green.]

Bot.: An extensive genus of terrestrial orchids, exclusively found in the southern districts of South America. Their roots are coarse, fascicled, glutinous fibers. The leaves are all radical. The scape is clothed with thin herbaceous sheaths. The flowers grow in spikes or racemes in the manner of the Green Orchis, are greenish, whitish, or yellow, occasionally marked by deep brown specks. Some thirty or forty species are known, none of which are in cultivation. (Treas. of Bot.) It is thought in Chili that *Chloraea disoides* promotes the flow of milk.

chlōr'-al, s. [From Eng., &c., *chlor(ine)*; *-al*.]

Chem.: $\text{C}_2\text{HCl}_3\text{O}$ or $\text{CCl}_3.\text{CO}.\text{H}$ =trichloraldehyde. Chloral is a colorless, odorous, oily liquid, boiling at 94°. It is soluble in water, alcohol, and ether. Specific gravity 1.502. It is obtained by passing chlorine gas through absolute alcohol. By the action of caustic potash it is decomposed into chloroform and formate of potassium. It changes on keeping into a solid white modification, reconverted into a liquid by heat. With water it forms a crystalline compound called hydrate of chloral, $\text{CCl}_3.\text{HC}(\text{OH})_2$. It is used to adulterate beer.

chloral hydrate, s.

Pharm. (*Chloral Hydras*): A white crystalline substance, forming a neutral aqueous solution if free from HCl. Its solution in chloroform, when shaken up with sulphuric acid, remains colorless if no oily impurities are present; 100 grains of hydrate of chloral dissolved in an ounce of distilled water and mixed with thirty grains of slaked lime should yield, when carefully distilled, not less than seventy grains of chloroform. Chloral is used in medicine in the form of a syrup. It produces sleep, but only acts as an anodyne during sleep, the pain returning as soon as the patient wakes. It is used to quiet the agitation of delirium tremens, acute mania, and severe chorea; also to relax muscular spasms in tetanus and strychnia poisoning; also as a hypnotic in cases where opium is inadmissible. It checks nocturnal restlessness and sweating of phthisis, and gives relief in some cases of asthma and pertussis. But a full dose of chloral often gives rise to dangerous symptoms of cardiac depression, followed by giddiness, sickness, delirium, a weak and irregular pulse, pallor, coldness of the extremities, lividity, syncope, and death. The habitual use of this drug is followed by profound melancholy and enfeeblement of will, and muscular lassitude and suicidal insanity. It was discovered by Dr. O. Liebreich.

chlōr'-ā-nīl, s. [Eng. *chlor(ine)*, and *anil(ine)*.]

Chem.: $\text{C}_6\text{Cl}_4\text{O}_2$. Tetrachloroquinone. It is formed by the action of hydrochloric acid and chlorate of potassium, on aniline, phenol, isatin, &c. It crystallizes in golden-yellow laminae, which are insoluble in water, soluble in hot alcohol and ether; it sublimes at 150°, and is converted by PCl_5 into perchloro-benzene, C_6Cl_6 . The potassium salt of chloranilic acid, $\text{C}_6\text{Cl}_2\text{O}_2(\text{OK})_2$, is formed by dissolving chloranil in strong potash; it crystallizes in dark-red needles, sparingly soluble in water.

chlōr-ā-nīl'-ic, a. [Eng. *chloranil*; and *-ic*.]

chloranilic acid, s.

Chem.: Chloranilic acid, dichloro-dioxy-quinone, $\text{C}_6\text{Cl}_2(\text{OH})_2\text{O}_2$, is formed by decomposing the potassium salt by acids. It forms reddish crystalline scales.

chlōr-ān'-ī-line, s. [Eng. *chlor(ine)*, and *aniline* (q. v.).] [ANILINE.]

Chem.: By the action of chlorine on aniline, monochloroaniline, $\text{C}_6\text{H}_4\text{Cl}(\text{NH}_2)$, dichloroaniline, $\text{C}_6\text{H}_3\text{Cl}_2\text{NH}_2$, and trichloroaniline, $\text{C}_6\text{H}_2\text{Cl}_3\text{NH}_2$, are obtained. (Watts: Dict. Chem.)

chlōr-ān-thā'-cē-æ, s. pl. [From Mod. Lat. *chloranthus* (q. v.), and Lat. fem. pl. adj. suff. *-acēæ*.]

Bot.: A small family of Dicotyledons, with flowers of a very simple structure, allied to those of Piperaceæ and Saururaceæ. They are trees, shrubs, or

rarely herbs, with opposite leaves connected by sheathing stipules. The minute flowers are in simple or branched terminal spikes, often articulate as in Gnetum.

chlōr-ān'-thūs, s. [Gr. *chlōros*=green, and *anthos*=a flower.]

Bot.: A genus of plants, the type of the order Chloranthaceæ, the only floral envelope of which is a very small calyx, consisting of one scale adhering to the side of the ovary. The apparently single stamen, which is the most remarkable part of its structure, consists of three, the central one of which has a perfect two-celled anther, and the other two, one on each side of it, have only half an anther, so that they are only one-celled, or the two lateral half-anthers may be deficient, leaving a single perfect stamen. They are attached to the side of the ovary immediately above the calyx. They are natives of Japan and China, where they are called Chu-han. (Treas. of Bot., &c.)

chlōr-ān'-thŷ, s. [CHLORANTHUS.]

Bot.: The tendency in brightly colored petals when decaying to become green. (Thomé.)

chlōr-āp'-a-tite, s. [Eng. *chlor(ine)*, and *apatite* (q. v.).]

Min.: A variety of Apatite (q. v.), in which the proportion of chlorine is excessive.

chlōr-ar'-gŷr-ite, s. [Gr. *chloros*=green; *argyros*=silver; and Eng. suff. *-ite* (Min.).]

Min.: A mineral consisting of silver and chlorine. (Brit. Mus. Cat.)

chlōr-ās'-tēr, s. [Gr. *chlōros*=green, and *astēr*=a star.]

Zoöl.: A genus of Infusoria, of the family Monadina, having a single mouth (?) terminal, a single frontal eye-spot, no tail, and the middle of the body with radiate warty processes. (Griff. & Henfrey.)

chlōr-ās'-trō-lite, s. [Gr. *chlōros*=green, *aster* or *astron*=a star, and Eng. suff. *-lite* (Min.), from *lithos*=a stone.]

Min.: A light bluish-green mineral, found on the banks of Lake Superior, in small rounded pebbles. It receives a fine polish. Hardness, 5.5-6; specific gravity, 3.180.

chlōr'-ate, s. [In Fr. *chlorate*, from Eng., &c., *chlor(ine)*, and suff. *-ate* (Chem.) (q. v.).] [CHLORIC ACID.]

Chlorate of potassium:

1. **Chem.**: KClO_3 . Obtained by passing a current of chlorine gas through a mixture of carbonate of potassium and slaked lime, $\text{K}_2\text{CO}_3 + 6\text{Ca}(\text{OH})_2 + 6\text{Cl}_2 = 2\text{KClO}_3 + 5\text{CaCl}_2 + \text{CaCO}_3 + 6\text{H}_2\text{O}$. The carbonate of calcium is removed by filtration, and on evaporating the solution the potassium chlorate separates out in colorless transparent anhydrous six-sided plates; water dissolves only 3.3 parts of the salt at 0°C. It is insoluble in alcohol. When heated, potassium chlorate is decomposed thus $2\text{KClO}_3 = \text{KClO}_4 + \text{KCl} + \text{O}_2$; on increasing the heat the potassium perchlorate is decomposed— $\text{KClO}_4 = \text{KCl} + 2\text{O}_2$. [CHLORIC ACID.]

2. **Pharm.** (*Potassæ Chloras*): It is given in the form of *Trochisci Potassæ Chloratis* (Chlorate of Potassium Lozenges). Chlorate of potassium acts as a refrigerant and diuretic; it exerts a powerful action upon the mucous membranes when used as a gargle in cases of severe tonsillitis, &c. It is the best remedy for salivation whether produced by mercurial agency or from use of other drugs. In such cases it should be freely taken into the system both in solution and by use in lieu of salt on the food.

reduction of the corresponding chloroquinones with sulphurous acid. $C_6H_2Cl_2(OH)_2$ melts at 158° ; $C_6HCl_3(OH)_2$ at 134° ; and $C_6Cl_4(OH)_2$ at 200° .

chlör'-ic, a. [Eng. *chlor(ine)*; -ic.] Pertaining to or containing chlorine.

chloric acid, s.

Chem.: $HClO_3$. A monobasic acid obtained by decomposing barium chlorate, $Ba(ClO_3)_2$, by dilute sulphuric acid, and decanting the clear liquid. It oxidizes organic matter rapidly. When boiled it gives off O_2 and Cl_2 , and perchloric acid is formed. It forms salts called chlorates; they are soluble, and give no precipitate with $AgNO_3$. Potassium chlorate explodes when triturated with sulphur or phosphorus in a mortar. It is used in the manufacture of fireworks, percussion caps, and lucifer matches. Chlorates when heated on charcoal deflagrate. When heated strongly they give off oxygen and are converted into chlorides which give a white precipitate with argentic nitrate. Heated with strong H_2SO_4 they give off Cl_2O_4 with explosive violence. Hydrochloric acid liberates euchlorine, an explosive mixture of chlorine and chlorine tetroxide; it is a powerful oxidizing agent, used to destroy organic matter.

chloric ether, s.

1. **Chem.:** C_2H_5Cl , or $CH_3.CH_2Cl$. Ethyl chloride, Chloroethane, also called Hydrochloric ether, a monatomic haloid ether formed by substitution of an atom of chlorine for an atom of hydrogen in the hydrocarbon ethane by the direct action of chlorine. It also can be prepared by the union of hydrochloric acid with ethene, C_2H_4 , and by distilling at a gentle heat alcohol saturated with dry hydrochloric acid gas. It is a thin, colorless, volatile liquid, boiling at 12.5° . By the action of hot aqueous caustic potash, it is resolved into ethyl alcohol and potassium chloride; with alcoholic potash it forms ethylic ether, $C_2H_5.O.C_2H_5$. Heated with soda-lime, it yields ethene, C_2H_4 .

2. **Pharm.** The so-called chloric ether, used in medicine, is only a solution of one fluid ounce of chloroform in nineteen fluid ounces of rectified spirit of wine. It is given as a narcotic and antispasmodic, and is a valuable sedative in neuralgia.

chlō'-ri-dāte, v. t. [Eng. *chlorid(e)*, and verbal suff. -ate.] To treat or prepare with a chloride.

chlör'-ide, s. [Eng. *chlor(ic)*, and suff. -ide (q. v.).]

Chem.: A compound of chlorine with an element, or radical. Hydrogen chloride, $H.Cl$ =Hydrochloric acid=Chlorhydric acid=Muriatic acid. Hydrochloric acid is a colorless gas. It is very soluble in water; 450 volumes dissolve at 15° . It fumes strongly in damp air. It is formed by the action of diffused daylight on a mixture of H and Cl, also by the action of strong sulphuric acid on sodium chloride; it can be collected over mercury; it is condensed into a colorless liquid by a pressure of 40 atmospheres at $10^\circ C$. Specific gravity, 1.27. Its solution in water (commonly called hydrochloric acid) is easily obtained by distilling common salt $NaCl$ with sulphuric acid. Muriatic acid is an impure solution of HCl , containing iron, arsenic, organic matter, and sulphuric acid. It is obtained in large quantities in the preparation of sodium carbonate. The hydrogen in hydrochloric acid can be replaced by metals, forming metallic chlorides (see the different metals). Soluble chlorides are detected by their giving a white precipitate with silver nitrate which is insoluble in nitric acid but soluble in ammonia. Chlorides heated with strong H_2SO_4 and MnO_2 give off chlorine.

Chloride of antimony solution:

Pharm.: *Antimonii Chloridi Liquor*. A heavy yellowish-red liquid. Specific gravity, 1.47. It consists of terechloride of antimony, $SbCl_3$, dissolved in hydrochloric acid; on the addition of water it gives a precipitate of oxychloride, $SbOCl$; this, treated with sodium carbonate, is converted into the oxide Sb_2O_3 . [ANTIMONY.] Chloride of antimony is a powerful caustic and escharotic, and is applied to cancerous growths and poisonous wounds. The oxide of antimony, mixed with twice its weight of calcium phosphate, is a substitute for "James' powder." It is given when the diaphoretic and slightly alterative effects of antimony are required in a mild form.

Chloride of nitrogen:

Chem.: NCl_3 . An oily explosive liquid, specific gravity 1.65, obtained by the action of excess of chlorine on ammonium chloride solution; also by suspending a piece of ammonium chloride in a solution of hypochlorous acid, $NH_4Cl + 3HClO = HCl + NCl_3 + 3H_2O$. This dangerous substance is decomposed violently by gentle heat, or by contact with fat, &c. By some chemists it is thought to contain hydrogen. It is ammonia NH_3 in which the H is replaced by Cl.

Chloride of sodium:

1. **Chem.:** $NaCl$, sodium chloride or common salt. [SODIUM.]

2. **Pharm.:** *Sodii Chloridum*. It occurs in transparent cubes or in small white grains. It is soluble in three parts of cold water, and its solubility increases very slightly with rise of temperature; it is partly precipitated by HCl . It is nearly insoluble in alcohol, and fuses at 776° , and at higher temperatures volatilizes. It is a necessary article of food, and occurs in the blood and other animal fluids; a deficiency causes disease. Chloride of sodium in large doses acts as an emetic, purgative, and anthelmintic; in milder doses it is a slight stimulant and alterative. Externally it is applied as a stimulant and rubefacient. Sponging with salt water is good for rheumatism and joint affections.

Chloride of zinc solution:

Pharm.: *Liquor Zinci Chloridi*. A solution of chloride of zinc, $ZnCl_2$, which applied externally acts as an irritant and astringent; when mixed into a paste with gypsum it is applied as a powerful escharotic to malignant ulcers. A solution of chloride of zinc, specific gravity 2, is used as a deodorizer and disinfectant under the name of "Sir W. Burnett's solution." Jonas Hutchinson has propounded the use of a solution of chloride of zinc in cases of gonorrhoea and in various specific diseases the origin and continuance of which are dependent upon the presence of bacilli.

chlör'-id'-ic, a. [Eng. *chlorid(e)*; -ic.] Pertaining to or containing chloride.

chlör'-id-ize, v. t. [Eng. *chlorid(e)*; -ize.] The same as CHLORIDATE (q. v.).

chlör'-im'-ët-rÿ, chlör'-öm'-ët-rÿ, s. [Eng. *chlorine*; Gr. *metron*=a measure.] The method of determining the amount of chlorine in a sample of bleaching powder.

"He [Gay-Lussac] now prescribes as the preferable plan of *chlorometry*, to pour very slowly from a graduated glass tube a standard solution of the chloride, to be tested upon a determinate quantity of arsenious acid dissolved in muriatic acid, till the whole arsenious be converted into the arsenic acids."—*Ure, Dictionary of Arts, Manufactures and Mines*.

chlör'-in-ä-tëd, a. Impregnated with chlorine.

chlorinated lime, s.

Pharm.: *Calx Chlorata*. A mixture of calcium hypochlorite, $Ca(ClO)_2$, with calcium chloride, $CaCl_2$. A whitish powder is obtained by passing chlorine gas over loosely-spread-out hydrate of calcium. Its solution (*Liquor Calcis Chloratæ*) is formed by adding one pound of the solid to 160 fluid ounces of distilled water. It is used as a disinfectant and in the preparation of chloroform.

chlör'-in-ä'-tion, s. [Eng. *chlorin(e)*; -ation.] A process for the extraction of gold by exposure of the auriferous material to chlorine gas. First introduced by Plattner. The following conditions are necessary: (1) The gold must be in a metallic state. (2) There must be no other substance in the charge which would combine with free chlorine. (3) The chlorine must have no impurities which would dissolve other metals or bases. (4) No reaction must be induced which would cause precipitation of the gold before the termination of the process. The process with quartz and free gold does not involve roasting, but the latter process is necessary with ores containing sulphurets and arseniurets. In the chlorination process, the ore is sifted into a wooden vat lined with pitch, and having a false bottom, beneath which the gas is admitted. The top is luted on and the gas admitted, when the gas begins to escape at a hole of observation in the lid, it is the signal that the air is ejected and the hole is then closed. The gas is continually passed into the mass for (say) eighteen hours, according to the coarseness of the gold; the cover is removed and water introduced, and the solution drawn off into the precipitation vat. The gold is precipitated by sulphate of iron, the supernatant liquor decanted. The sediment is a brown powder which is filtered upon paper dried in an iron or porcelain vessel, smelted to a metallic regulus in clay crucibles, a little borax, salt, and nitrate of potash being used as fluxes.

chlör'-in-din, s. [CHLORISATYDE.]

chlör'-ine, s. [Ger. *chlor*; Fr. *chlorie*, from Gr. *chlōros*=pale-green, light-green, greenish-yellow, and Eng. suff. -ine (Chem.).]

1. **Chem.:** A monatomic element. Symbol Cl. Atomic weight, 35.5. Discovered by Scheele in 1774. It was thought by Berthollet to contain oxygen, and was called by him *oxymuriatic acid*. It was found to be an element by Davy in 1810. Chlorine is a yellow-green incombustible gas. It has a powerful irritating smell, and attacks violently the mucous membranes and the lungs. It is very soluble in water, acts strongly on metals, and is best collected by displacement. Specific gravity, 2.47. At the pressure of five atmospheres it is condensed into a heavy yellow liquid. It is obtained by heating common salt, sodium chloride, with sulphuric acid and black oxide of manganese. It combines with hydrogen to form hydrochloric acid, with an

explosion in direct sunlight or when fire is applied to a mixture of the two gases, but slowly in diffused daylight. A solution of it in water is gradually converted in the sunlight into HCl with liberation of oxygen. A lighted candle burns in Cl with a smoky flame. Phosphorus, antimony, arsenic, and turpentine take fire in chlorine. Chlorine destroys animal and vegetable matter; and forms addition and substitution compounds with organic compounds; an aqueous solution of it has powerful bleaching properties. It is also a powerful disinfectant. It occurs in nature in the form of metallic chlorides. Three oxides of chlorine are known, Cl_2O ; Cl_2O_3 ; Cl_2O_4 .

2. **Pharm.:** Chlorine is used in pharmacy as *Liquor Chlori*, a solution of chlorine in water; and as *Vapor Chlori*, inhalation of chlorine. Free chlorine gas acts as a powerful stimulant or irritant, according to its state of dilution; it is used in cases of chronic bronchitis and phthisis. A diluted solution is used as a gargle for ulcerated tonsils; and as a lotion to foul ulcers, and in some skin diseases.

chlorine monoxide, s.

Chem.: Cl_2O . A colorless gas obtained by the action of chlorine on cooled precipitated mercuric oxide; it can be condensed to a red liquid, which explodes on elevation of temperature. It has powerful bleaching properties. It dissolves in water and forms hypochlorous acid; this acid forms salts called hypochlorites. These salts can also be obtained by passing chlorine gas into cold solutions of alkalies, or alkaline carbonates, or over hydrates of calcium, &c. Bleaching-powder is thus prepared.

chlorine tetroxide, s.

Chem.: Cl_2O_4 , a dark yellow explosive gas, which can be condensed to a red liquid. It is obtained by the action of strong sulphuric acid on chlorate of potassium. It is absorbed by caustic potash solution, forming a chlorate and a chlorite.

chlorine trioxide, chlorous oxide, chlorous anhydride, s.

Chem.: Cl_2O_3 , a greenish-yellow gas, obtained by heating a mixture of potassium chlorate, nitric acid, and arsenic trioxide. It can be condensed into a very explosive liquid; the gas explodes at 50° , and is decomposed by sunlight. It is soluble in water, forming a crystalline hydrate which is gradually converted into chlorous acid.

chlör'-in-ize, v. t. [Eng. *chlorin(e)*; -ize.] To treat or prepare with chlorine.

chlör'-in-ized, pa. par. or a. [CHLORINIZE.]

***chlör'-i-ō-dine, s.** [Eng. *chlor(ine) iodine*.]

Chem.: A compound of chlorine and iodine, as iodine chloride, ICl . [IODINE.]

chlör'-is, s. [Gr. *chlōris*=a bird with a greenish belly, from *chlōros*=green.]

Bot.: A genus of grasses, the typical one of the tribe Chlorideæ, distinguished chiefly by the spikes of inflorescence being in finger-like fascicles, rarely two, or only one. Flowers polygamous; glumes two, containing from two to six florets; lower flowers one to three, hermaphrodite; stamens three, and styles two. Sixty-two species are described in Steudel's "Synopsis," and these are mostly natives of warm, dry countries. *Chloris radiata* is a pretty annual grass, frequently cultivated in greenhouses for the sake of its ornamental and curious appearance.

chlör'-is-ät'-ic, a. [Eng. *chlorisat(in)*; -ic.] Pertaining to chlorisatin (q. v.).

chlorisatic acid, s.

Chem.: $C_8H_6ClNO_5$. The potassium salt of this acid is obtained by mixing solutions of caustic potash and chlorisatin. It crystallizes in yellow needles, which are decomposed by hydrochloric acid with precipitation of chlorisatin.

chlör'-is-ä'-tin, s. [Eng. *chlor(ine)*, and *isatin*.] [ISATIN.]

Chem.: $C_8H_4ClNO_2$. Obtained by passing chlorine into tepid water in which isatin, or powdered indigo, is suspended. It is purified by crystallization from alcohol. It crystallizes in orange prisms, having a disagreeable odor.

chlör'-is-ä'-tÿde, s. [Eng., &c., *chlor(ine)*; *isatÿde* (q. v.).]

Chem.: A white or yellowish powder, deposited on cooling when chlorisatin has been dissolved, with heat, in hydrosulphuret of ammonia. It is sparingly soluble in water, and by heat is resolved into chlorisatin water, a new compound appearing as a violet-colored powder, and termed Chlorindin.

chlör'-i-sō'-mā, s. [Gr. *chlōros*=green, and *sōma*=a body.]

Ornith.: A sub-genus of the Myotherinæ, or Anthrushes, separated by Swainson from the Pitta of Temminck. (*Craig*.)

fāte, fāt, färe, amidst, whāt, fäll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trÿ, Sÿrian. æ, œ = ē; ey = ā. qu = kw.

chlör'-ite, *s.* [Gr. *chlōritis*=a grass-green stone, from *chlōros*=green, and Eng., &c., suff. *-ite* (*Min.*) (q.v.).]

1. *Mineralogy*:

- (1) The same as RAPIDOLITE (q.v.).
- (2) The same as PENNINITE (q.v.).
- (3) The same as CLINOCHLORE (q.v.).

Ferruginous Chlorite:

Min.: The same as DELESSITE (q.v.).

2. *Chem. (Pl.)*: Salts of chlorous acid. They can be obtained by passing chlorine trioxide into alkaline solutions; also by the action of Cl_2O_4 on bases. They are mostly soluble in water. Chlorites of lead and silver are insoluble, and are obtained by double decomposition.

chlorite schist, *s.*

Geol.: A green slaty rock, in which chlorite is abundant in foliated plates, usually blended with minute grains of quartz or sometimes with felspar or mica. It is often associated with or even gradates into gneiss and clay-slate. (*Lyell*.)

chlorite slate, *s.*

Geol.: The same as chlorite schist, or if there is any difference, then in the slates the laminations are finer.

chlorite spar, *s.* [In Ger. *chloritspath*.]

Min.: An old name for Chloritoid (q.v.).

chlör-it'-ic, *a.* [Eng. *chlorit(e)*; *-ic*.] Pertaining to or containing chlorite.

chloritic sand, *s.*

Geol.: Sand colored by an admixture of the simple mineral glauconite.

chloritic series, *s.*

Geol.: A name sometimes given to the Greensand beds, but the mineral is glauconite.

chlör-it'-id, *s.* [Eng. *chlorite*, and Gr. *eidos*=appearance.]

Min.: A monoclinic or triclinic chlorite-like mineral, of a dark-gray, greenish-gray to black color. It is brittle, and has a double refraction. Hardness, 5.5-6; specific gravity, 3.5-3.6.

chlör'-ō, *in compos.* [Gr. *chlōros*=green.]

1. *Nat. Science*: In composition frequently used as a prefix to scientific words, and indicating a bright grass-green color.

2. *Chem.*: Compounds in which chlorine has replaced some other element, as hydrogen, without altering the constitution of the compound, as chloro-benzene, $\text{C}_6\text{H}_5\text{Cl}$. The *o* is often omitted, and chlor is used.

chloro-argentotype, *s.*

Photog.: A photographic agent prepared by moistening a sheet of paper with a solution of common salt, and then dipping it in a bath of nitrate of silver. Taking out a thin film of the latter substance it becomes extremely sensitive to light.

chloro-benzene, *s.*

Chem.: Monochlor-benzene or phenyl chloride, $\text{C}_6\text{H}_5\text{Cl}$. It is prepared by the action of chlorine on benzene, or of PCl_5 on phenol. It boils at 132° . (Consult *Watts: Dict. Chem.*)

chloro-calcite, *s.*

Min.: Calcite with chlorine in its composition. (*Brit. Mus. Cat.*)

chloro-naphthalene, *s.*

Chem.: Monochloronaphthalene, $\text{C}_{10}\text{H}_7\text{Cl}$, dichloronaphthalene $\text{C}_{10}\text{H}_6\text{Cl}_2$, &c. The chloronaphthalenes are obtained by boiling the chlorides of naphthalene with alcoholic potash, which removes HCl . These, when subjected to the action of chlorine, form addition products, and by again boiling these with alcoholic potash it removes more HCl , and a more highly chlorinated substitution compound is obtained.

chloro-phenol, *s.*

Chem.: Phenol $\text{C}_6\text{H}_5(\text{OH})$, in which hydrogen has been replaced by chlorine, as Monochlorophenol $\text{C}_6\text{H}_4\text{Cl}(\text{OH})$. Dichlorophenol $\text{C}_6\text{H}_3\text{Cl}_2(\text{OH})$, and Trichlorophenol $\text{C}_6\text{H}_2\text{Cl}_3(\text{OH})$ are obtained by action of chlorine on phenol. Pentachlorophenol or perchlorophenol, $\text{C}_6\text{Cl}_5(\text{OH})$, crystallizes in long colorless needles soluble in alcohol and in ether. It melts at 187° . Concentrated nitric acid converts it into tetrachlorquinone $\text{C}_6\text{Cl}_4<\text{O}>$. When distilled with PCl_5 it yields C_6Cl_6 hexa-chlor benzene.

chloro-picrin, *s.*

Chem.: A compound formed by distilling picric acid with chloride of lime and water. Chloro-picrin, Nitro-trichlor-methane, Nitro-chloroform $\text{C}(\text{NO}_2)\text{Cl}_3$. Also obtained by distilling chloral with strong nitric acid; also by distilling a mixture of methyl alcohol and sulphuric acid over a mixture of sodium chloride and potassium nitrate. It is an oily liquid, boiling at 112° . It is reduced to methylamine $\text{CH}_3\cdot\text{H}_2\text{N}$ by the action of iron filings and

acetic acid. Chloro-picrin heated with alcoholic ammonia is converted into guanidine hydrochloride $\text{CH}_5\text{N}_3\cdot\text{HCl}$. When heated with sodium ethylate it is converted into ethylic orthocarbonate $\text{C}(\text{O}\cdot\text{C}_2\text{H}_5)_4$.

chloro-quinones, *s. pl.*

Chem.: Substances formed by the action of chlorine on quinone, $\text{C}_6\text{H}_4<\text{O}>$; monochloroquinone, $\text{C}_6\text{H}_3\text{ClO}_2$. Dichloroquinone, $\text{C}_6\text{H}_2\text{Cl}_2\text{O}_2$, is formed by action of hypochlorous anhydride, Cl_2O , on benzene; and by heating trichlorophenol, $\text{C}_6\text{H}_2\text{Cl}_3(\text{OH})$, with nitric acid, it forms large yellow prisms, melting at 120° . Trichloroquinone, $\text{C}_6\text{HCl}_3\text{O}_2$, is obtained by the action of chromyl chloride, CrO_2Cl_2 , on benzene, C_6H_6 . It crystallizes in large laminae, melting at 166° . Tetrachloroquinone, $\text{C}_6\text{Cl}_4\text{O}_2$. [CHLORANIL.]

chloro-toluene, *s.*

Chem.: Chlorotoluene, or Toly Chloride, $\text{C}_6\text{H}_4\text{Cl}\cdot\text{CH}_3$, occurs in three modifications. Parachlorotoluene, 1-4, is formed by the action of chlorine on toluene at ordinary temperatures; it is a liquid, boiling at 160° . By oxidation with chromic acid mixture it yields parachlorobenzoic acid. When chlorine acts on boiling toluene, benzyl chloride, $\text{C}_6\text{H}_5\cdot\text{CH}_2\text{Cl}$, is formed. (See *Watts: Dict. Chem.*)

chlör-ō-bēn-zō'-ic, *a.* [Eng. *chlor(ine)*, and *benzoic*.]

chlorobenzoic acid, *s.*

Chem.: $\text{C}_6\text{H}_4\text{Cl}\cdot\text{CO}\cdot\text{OH}$. Benzoic acid in which hydrogen is replaced by chlorine.

chlör-ō-chrōm'-ic, *a.* [From Eng. *chloro*, and *chromic*.] Having chromium and chlorine in its composition.

chlorochromic acid, *s.*

Chem.: CrO_2Cl_2 . Dioxychloride of chromium, chromyl chloride, obtained by the action of sulphuric acid on a dry mixture of potassium dichromate and chloride of sodium. A heavy red liquid, giving off red vapors. Specific gravity, 1.71; boiling at 118° , decomposed by water into chromic and hydrochloric acids. Slowly passed through a glass tube heated to low redness it deposits rhombohedral, dark-green, hard crystals of sesquioxide of chromium.

chlör-ō-chrō'-ūs, *s.* [Gr. *chlōros*=pale-green; *chroia*, *chrōs*=skin.] Having a green skin.

chlör-ō-cōc'-cūm, *s.* [Gr. *chlōros*=pale-green, and *kokkos*=a kernel.]

Bot.: A genus of Algae, order Palmellaceæ. *Chlorococcum vulgare* consists of extremely minute cells, multiplying into twos and fours, with no gelatinous substratum and no zoospores. It often covers pieces of unpainted timber and the trunks of old trees, 300 millions of individuals on a square inch. (*Griff. & Henfrey*.)

chlör'-ō-form (Eng.), **chlör-ō-fōr'-mūm** (Mod. Lat.), *s.* [Eng., &c., *chlor(ine)*, and *form(ic)*, from Lat. *formica*=an ant.]

1. *Chem.*: CHCl_3 , trichloromethane, methenyl chloride, terchloride of formyl. Chloroform is formed by the action of the sun's rays on a mixture of chlorine and marsh gas; also by the action of caustic potash on chloral or chloroacetic acid, or by the action of nascent hydrogen on tetrachloride of carbon. It is prepared on a large scale by distilling water and alcohol with bleaching-powder. Chloroform is a colorless, mobile, heavy, ethereal liquid. Specific gravity, 1.5. It boils at 62° ; its vapor density is four times that of air; it is nearly insoluble in water, but dissolves readily in alcohol. It has a sweet taste. It dissolves caoutchouc, resins, fats, alkaloids, &c. It should not be exposed to the light, as it may decompose, hydrochloric acid and chlorine being set free.

2. *Pharm.*: Chloroform is used in medicine, dissolved in alcohol, under the name of chloric ether, as a stimulant. Chloroform taken internally acts as a narcotic, sedative, and antispasmodic, and is given in cases of asthma, colic, and cholera, also for neuralgia. *Linimentum Chloroformi*, equal parts of chloroform and camphor liniment, is used externally to allay pain and irritation in neuralgia and itching.

3. *Surgery & Midwifery*: The vapor of chloroform, when inhaled for some time, produces a temporary insensibility to pain. Inhaled in small doses it produces pleasurable inebriation, followed by drowsiness; in larger doses it causes loss of voluntary motion, suspension of mental faculties, with slight contraction of the muscles and rigidity of the limbs; then if the inhalation is continued a complete relaxation of the voluntary muscles takes place, but if carried too far it causes dangerous symptoms of apnoea or of syncope, and the patient must be restored by artificial respiration. Chloroform should not be administered to persons suffering from cerebral disease or organic cardiac affection. Dr. Simpson, of Edinburgh, in 1847, began

to employ the vapor as a means of producing anaesthesia or insensibility, partial or complete, in certain surgical operations and painful diseases, as well as in ordinary obstetric practice. Its use in the latter class of cases, unless in extreme instances, is to be reprobated.

chlör-ō-form-ī-zā'-tion, *s.* [Eng. *chloroform*; *-ization*.]

Surg.: The aggregate of anæsthetic phenomena resulting from the inhalation of chloroform. (*Ogilvie*.)

chlör-ō-gō'-nī-ūm, *s.* [Gr. *chlōros*=pale-green, and *gōnia*=an angle.]

Zool.: A genus of the infusorial family Astasiæa of Ehrenberg. It consists of a red eye-spot, a tail, and two anterior filaments. *Chlorogonium euchlorum* is found in enormous numbers in pools and puddles, sometimes as many as 10,000 being in a single drop. (*Griff. & Henfrey*.)

chlör-ō-mēl'-an, *s.* [Gr. *chlōros*=green, and *melas*, neut. *melan*=black.]

Min.: The same as CRONSTEDTITE (q.v.).

chlör-ōm'-ēt-ēr, *s.* [Eng. *chlor(ide)*; Gr. *metron*=a measure.] An instrument for testing the decolorizing or bleaching powers of samples of chloride of lime. Ure's process consists in adding liquor of ammonia of a known strength, tinged with litmus, to a solution of a given weight of the chloride under examination until the whole of the chlorine is neutralized, which is known by the color being destroyed. From the quantity of ammonia consumed the strength of the sample is estimated.

chlör-ō-mē-thāne, *s.* [Eng. *chloro*; *meth(yl)*; *-ane*.]

Chem.: CH_3Cl . A colorless, odorous gas, obtained when equal volumes of marsh gas CH_4 and Cl are exposed to reflected sunlight, or by heating a mixture of NaCl , wood spirit, and sulphuric acid. Exposed to sunlight with excess of chlorine, it is converted into CH_2Cl_2 , then CHCl_3 , and finally into CCl_4 .

chlör-ōm'-ēt-rŷ, *s.* [CHLORIMETRY.]

chlör-ō-mŷs, *s.* [Gr. *chlōros*=green; and *mŷs*=a mouse.] [AGOUTY.]

chlör-ō-pal, *s.* [Gr. *chlōros*=green, and Eng. *opal* (q.v.).]

Min.: A compact massive mineral, with an opal-like appearance; color greenish-yellow to pistachio-green. Hardness, 2.5-4.5; specific gravity, 1.727-1.870. It occurs in Saxony, Hungary, &c. Composition: Silica, 46; sesquioxide of iron, 33; alumina, 1; magnesia, 2; water, 18. (*Dana*.)

chlör-ō-phæ'-ite, **chlör-ō-phā'-çite**, *s.* [Gr. *chlōros*=green; *phaios*=brown, and Eng. suff. *-ite* (*Min.*).]

Min.: A chlorite-like mineral from the Western Isles of Scotland. Hardness, 1.5-2; specific gravity, 2.02; color, dark or olive-green, changing to dark-brown on exposure.

chlör-ō-phāne, *s.* [Gr. *chlōros*=green, and *phainō*=to appear.]

Min.: A variety of Fluorite (q.v.), affording a green phosphorescent light, sometimes called *pyro-emerald*. It is found in Connecticut with topaz in gneiss.

chlör-ō-phān'-ēr-ite, *s.* [Gr. *chlōros*=green; *phainō*=to appear, and Eng. suff. *-ite* (*Min.*) (q.v.).]

Min.: A greenish variety of Glauconite (q.v.).

chlör-ō-phē-nēs'-ic, *a.* [Eng. *chloro*; *phen(ol)*, and suff. *-esic* (*Chem.*).]

Chem.: Composed of phenol and chlorine.

chlorophenesic acid, *s.*

Chem.: Dichlorophenol, $\text{C}_6\text{H}_4\text{Cl}_2\text{O}$, is a volatile oil, insoluble in water, soluble in alcohol and ether, obtained by the dry distillation of dichlorosalicylic acid.

chlör-ō-phēn-ī'-sīc, *a.* [Eng. *chloro*; *phen(ol)*, and suff. *-isic*.]

Chem.: Composed of phenol and chlorine.

chlorophenistic acid, *s.*

Chem.: Trichlorophenol, $\text{C}_6\text{H}_3\text{Cl}_3\text{O}$, obtained by the action of chlorine on phenol. It crystallizes in colorless silky needles, which have a strong odor, and are slightly soluble in water, soluble in alcohol and ether.

chlör-ō-phēn-ū'-sīc, *a.* [Eng. *chloro*; *phen(ol)*, and suff. *-usic* (*Chem.*).]

Chem.: Composed of phenol and chlorine.

chlorophenusic acid, *s.*

Chem.: The same as pentachlorophenol, $\text{C}_6\text{HCl}_5\text{O}$, obtained by the action of an excess of chlorine on an alcoholic solution of trichlorophenol.

¶ The letters a, e, i, o, u are used to distinguish the compounds formed by replacing respectively 1, 2, 3, 4, or 5 atoms of H in phenol $\text{C}_6\text{H}_5\text{O}$ by the same number of monatomic elements or monatomic radicals. See also the nitrophenols.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aș; expect, Xenophon, exist. ph = f -cian, -tian = șan. -tion, -sion = șhūn; -țion, -șion = zhūn. -tious, -cious, -sious = șhūș. -ble, -dle, &c. = beł, deł.

chlör'-ô-phÿll, **chlör'-ô-phÿlle**, *s. & a.* [Gr. *chlōros*=green, and *phÿllon*=a leaf; Fr. *chlorophylle*.]

A. As substantive:

1. *Bot. Physiol.*: The name given to the green-coloring matter of plants. Its nature is still doubtful. It is ordinarily stated that it exists under the form of globules or granules, and occasionally as an amorphous granular substance. It presents itself in the form of distinct corpuscles in the cells of the flowering plants generally.

"The color of plants, especially the green color, is produced by the presence of *chlorophyll*, which may be considered a vital secretion."—*Lindley: Introduction to Botany*, bk. i., sect. 7, § 83.

2. *Animal Physiol.*: Chlorophyll exists in *Hydra viridis*, the Green Fresh-water Polype, one of the Cœlenterata, and in Stentor, an infusorian animalcule. (*Nicholson*.)

B. As adj.: Colored by chlorophyll; composed of chlorophyll.

chlorophyll bodies, *s. pl.* Particles of protoplasm of definite form colored green by chlorophyll. (*Thomé*.)

chlör'-ô-phÿl-lā'-çë-ous, *a.* [Eng. *chlorophyll*; -aceous.] Of the nature or character of chlorophyll; containing chlorophyll.

"The affinities exhibited by many *chlorophyllaceous* and colorless *Thallophytes*."—*Nature*, Feb. 26, 1880, p. 291.

†chlör'-ô-phÿl-lī-an, *a.* [Eng. *chlorophyll*; -ian.] Pertaining to, or containing chlorophyll.

"*Chlorophyllian cells*."—*Allman*, in *Ogilvie*.

chlör'-ô-phÿl'-līte, *s.* [Gr. *chlōros*=green, *phÿllon*=a leaf, and Eng. suff. -ite (*Min.*) (q. v.).] *Mineralogy*:

1. The same as *IOLITE* (q. v.).

2. A variety of *Fahlunite* (q. v.), from Unity, Maine.

chlör'-ô-pīc'-rīn, *s.* [Eng., &c., *chloro*; and *picrin*.]

Chem.: CNO_2Cl_3 is obtained by distilling picric acid with potassium chlorate and hydrochloric acid. It is an oily odorless liquid. Specific gravity, 1.665. It boils at 115°.

chlör'-ô-pro-tē'-ic, *a.* [Eng. *chlorine*, and *proteic* (q. v.).] Compounded of chlorine and proteine.

chloroproteic acid, *s.*

Chem.: A name given to the white flocks which are deposited when chlorine is passed through a solution containing proteine= $\text{C}^{40}\text{H}_{31}\text{N}_5\text{O}_{12}$.

chlör'-ôp-sīs, *s.* [Gr. *chlōros*=green, and *opsis*=face, appearance.]

Ornith.: A genus of birds belonging to the *Merulidæ* or *Thrushes*. The bill is long and hooked.

chlör'-ô-pÿg'-ī-a, *s.* [Gr. *chlōros*=green, and *pygē*=the rump, the tail.]

Ornith.: A genus of birds belonging to the *Meropidæ* or *Bee-eaters*. They are natives of Madagascar.

chlör'-ô-rhōd'-ic, *a.* [Gr. *chlōros*=green, and *rhodon*=a rose.]

chlrorrhodic acid, *s.*

Chem.: An acid obtained from pus. It crystallizes in fine needles, is soluble in water and alcohol, but not in ether. Chlorine water in dilute solutions of chlrorrhodic acid gives a rose-red color.

chlör'-ô-sīs, *s.* [Gr. *chlōros*=green.]

1. *Bot.*: One of the most formidable diseases to which plants are liable, and often admitting of no remedy. It consists in a pallid condition of the plant, in which the tissues are weak and unable to contend against severe changes, and the cells are more or less destitute of chlorophyll. It is distinct from blanching, because it may exist in plants exposed to direct light on a south border, but is often produced or aggravated by cold ungenial weather and bad drainage. The most promising remedy is watering them with a very weak solution of sulphate of iron. Many forms of the disease exist, of which those of clover, onions, cucumbers, and melons are best known.

2. *Med.*: An affection in which the skin of the body, and especially that of the face, assumes a peculiar greenish cast, and hence is popularly known as green-sickness (q. v.). The condition is closely allied to anæmia, and menstrual disturbances of variable nature, sometimes assuming the form of amenorrhœa and again that of menorrhagia, and is due to deficiency of the coloring matter of the blood. Chlorosis occurs chiefly among young and delicate women who lead sedentary lives under unwholesome conditions.

"But the man without sin, the Moravian rabbi,
Has perfectly cured the chlorosis of Tabby."

Anstey: Bath Guide.

chlör'-ô-spēr'-mē-æ, *s. pl.* [Gr. *chlōros*=green, and *sperma*=a seed.]

Bot.: One of the three great divisions of *Algæ* characterized by the green color of the spores. The

spores of most members of this great division, when they are first liberated, are endowed with active motion, which is produced by long, thorny-like appendages and by short cilia. [*CLIA*.] Such spores are called, from their resemblance to Infusoria, *Zoöspores* (q. v.). The green powdery or gelatinous productions so common upon damp walls or rocks; the curious microscopic few-celled productions which abound in our pools or infest other *Algæ*; the green floating masses which form a scum upon our pools, or the shrubby tufts of the same color in running streams or on sea-rock, &c., are so many members of the division.

chlör'-ô-sphær'-a, *s.* [Gr. *chlōros*=green, and *sphaira*=a ball, a sphere.]

Bot.: A genus of *Unicellular Algæ*, probably related to *Cedogoniæ* (*Rabenhorst* places it among the *Palmellacæ*), of which one species, *Chlorosphaera Oliveri*, is known, consisting of a single globular cell about $\frac{1}{16}$ inch in diameter densely filled with green contents, sometimes exhibiting a radiate appearance.

chlör'-ô-spin'-ēl, *s.* [Gr. *chlōros*=green, and Eng. *spinel* (q. v.).]

Min.: A variety of *Spinel* (q. v.), of a grass-green color, due to the presence of copper. Also called *Magnesia-iron Spinel*. Specific gravity, 3.591-3.594.

chlör'-ô-s'-tōm-a, *s.* [Gr. *chlōros*=green, and *stoma*=a mouth.]

Zool.: A genus of *Mollusca* belonging to the family *Trochidæ*. Shell deeply umbellated almost to the top of the spire; inner lip forming a semi-margin to the umbilicus; outer angulated at the base; aperture remarkably oblique.

chlör'-ôt'-ic, ***chlör'-ôt'-ick**, *a.* [Fr. *chlorotique*, from *chlorosis* (q. v.).] Affected with or relating to chlorosis.

"The ecstasies of sedentary and *chlorotic nuns*."—*Battie*.

chlör'-ô-tÿl'-ī-ūm, *s.* [Gr. *chlōros*=green, and *tylē*=a swelling, a knob.]

Bot.: A genus of *Confervoid Algæ* belonging to the family *Chaetophoracæ*. Filaments jointed, repeatedly dichotomous, parallel; joints of two kinds, some elongate and colorless, and others swollen, abbreviate, and with green endochromes. (*Griff. & Henfrey*.)

chlör'-ous, *a.* [Eng. *chlor(ine)*; -ous.]

Chem.: Pertaining to chlorine.

chlorous acid, *s.*

Chem.: HClO_2 . An acid obtained by condensing chlorous oxide in water or by action of dilute sulphuric acid on a metallic chlorite. Its solution is a greenish-yellow liquid, having strong bleaching property; its salts are called *chlorites*.

chlorous oxide, *s.* [*CHLORINE*.]

chlorous pole, *s.*

†*Elect.*: A term applied on a certain electrical hypothesis to the negative pole of a galvanic battery, because of its exhibiting the same attraction as chlorine. On the same hypothesis the positive one is called the zincous or zincoid pole.

chlör'-ox'-ÿ-lōn, *s.* [Gr. *chlōros*=green, and *xylon*=wood.]

Bot.: A genus of *Cedrelacæ*, generically distinguished by its fruit having only three cells, and splitting into three parts instead of five. The *Satin-wood tree* of India, *Chloroxylon Swietenia*, forms a fine tree fifty or sixty feet in height. It is a native of Ceylon and the Coromandel coast. It furnishes a handsome light-colored hard wood with a satiny luster, and sometimes beautifully mottled or curled, bearing some resemblance to boxwood, but rather deeper in color. It is used for articles of turnery, for the backs of brushes, and as veneering for cabinet-work.

***chlör'-ū-rēt**, *s.* [Eng. *chlor(ine)*, and suff. -uret (*Chem.*).]

Chem.: A compound of chlorine; a name formerly given to what is now termed chloride.

çhōak, *v. t. & i.* [*CHOKE*.]

çhōaked, *a.* [*CHOAK*.]

Printing: A term applied to the press, when, for want of proper washing, the ink gets into the hollow of the face of the type.

cho'-an-īte, *s.* [Gr. *choanē*=a funnel.]

Palæont.: A genus of fossil *Zoophytes*, placed between *Alcyonium* and *Ventriculites*. They have a central cavity at the upper part, and outer surface not reticulated. Skeleton generally funnel-shaped.

çhōck, *s. & adv.* [A mere variant of *choke* (q. v.).]

A. As substantive:

1. *Shipbuilding*:

(1) A block, preferably wedge-shaped, driven behind the props of a cradle to prevent it from slipping on the ways before the ship is ready to launch.

(2) A piece of timber framed into the heads and heels of ships' timbers at their junctions to act as a lap to the joint, and make up the deficiency at the inner angle, as in the stem-piece and the main-piece of the head; in the dead wood, &c.

2. *Navigation*: A wedge used to secure anything with, or for anything to rest upon. The long-boat rests upon two large chocks when it is stowed. (*Weale*.)

3. *Cooperage*: A wedge-shaped block placed beneath and against the bilge of a cask to keep the latter from rolling.

4. *Carriage-building*: A piece of wood by which the wheel of a carriage is prevented from moving forward or backward.

5. Loose pieces of wood or stone placed in or upon any machine to add to its weight and steadiness; as stones placed in a mangle, weights laid on a harrow, roller, &c.

B. As adv.: Quite, full.

"I drew a shaft,

Chock to the steel."

Taylor: Philip Van Art, II. iii. 1.

¶ *Chock and block*, *chock-a-block*:

1. *Naut. & Min.*: A term signifying closely-wedged.

2. *Fig.*: Choke-full.

chock-full, *a.* [*CHOKE-FULL*.]

çhōck, *v. t. & i.* [*CHOCK*, *s.*]

A. Transitive:

1. To fasten or stop with a wedge.

*2. To heap up (?).

"And in the tavern in his cups doth roar,
Chocking his crowns."

Drayton: Agincourt, p. 79. (*Latham*.)

B. Intrans.: To fill up; to fit into exactly.

"The woodwork thereof . . . exactly *chocketh* into the joints again."—*Fuller: Worthies*, i. 149.

çhōc'-ō-late, *s. & a.* [Sp. & Port., from Mexican *cacuatl*=cacao.]

A. As substantive:

1. The nut of the cacao-tree. [*CACAO*.]

2. A paste or cake made from the roasted kernels of the *Theobroma cacao*.

¶ The roasted and crushed seeds of the cacao-nut tree are ground between two horizontal millstones, which are kept at a temperature of about 200° F., by means of a steam-jacket. The nibs pass down from the hopper into the shoe, which is shaken by a damsel on the spindle of the runner so as to discharge the nibs into the eye which leads them to the space between the stones. The heat and friction liberates the oil, which is one-third of the weight, and the cacao issues as a paste from the spout and is conducted to a second and similar mill where the stones are similarly heated but are closer set, so as to still farther reduce the paste. It is discharged from the second grinding in a liquid condition and is collected in a pan, where it hardens into a cake. To enable it to form an emulsion with water, it receives additional substances. Sugar, honey, molasses, gum, starch, flour, rice, and arrowroot are adapted for this purpose. Spices and flavoring extracts are added for some markets.

3. The drink made by dissolving chocolate in boiling water and milk or cream.

B. As adj.: Composed of, relating to, or of the color of chocolate.

***chocolate-house**, *s.* A house of entertainment where chocolate was prepared and sold.

chocolate-mill, *s.* A mill in which the roasted and crushed seeds of the cacao plant are ground between two horizontal millstones kept at a temperature of about 200° Fahr. This liberates the oil, which is about one-third of the weight, leaving the cocoa to issue as a paste from the spout in the machine.

chocolate-nut, *s.* The nut of the cacao-tree. [*CHOCOLATE*, *s.*]

chocolate-root, *s.* The root of a plant, *Geum canadense*.

chocolate-tree, *s.* The tree, *Theobroma cacao*, from the seeds of which chocolate is made.

chōd'-nēf-fīte, *s.* [Named after the discoverer, Herr Chodnef, and suff. -ite (*Min.*).]

Min.: A mineral much resembling *Chiolite*, found in the Ilmen Mountains at Miask. Composition: Fluorine, 56.4; aluminum, 16.3; sodium, 27.3. Specific gravity, 2.62-2.77.

chær-ā-dō'-dī-a, *s.* [*CHÆRADODIA*.]

Acquiescence suits thee best."

Cowper: *Walking with God*, No. 2.

*3. Care or discrimination in choosing; judgment, skill.

" . . . I imagine they were collected with judgment and choice."—Bacon: *Apoph.*

4. A number of things proposed or offered for selection or discrimination.

"A braver choice of dauntless spirits
Did never float upon the swelling tide,"

Shakesp.: *King John*, ii. 1.

5. The thing chosen or elected; selection, preference.

"Oh! hearken, stranger, to my voice!

This desert mansion is my choice!"

Campbell: *O'Connor's Child*, v.

6. That which would be chosen or preferred; the best part of anything; the best.

" . . . in the choice of our sepulchers bury thy dead . . ."—Gen. xxiii. 6.

¶ **A matter of choice:** One in which there is freedom of choice or election as to the course to be pursued or preferred.

"This was indeed scarcely matter of choice . . ."—Macaulay: *Hist. Eng.*, ch. xi.

To make choice of: To choose; to select one from two or more things offered.

"Wisdom of what herself approves makes choice,
Nor is led captive by the common voice,"

Denham: *Of Prudence*, 11.

B. As adjective:

I. Of things:

1. Worthy of being chosen or preferred; of superior merit; excellent, select.

"He was a man of a choice spirit, only he was always kept very low, . . ."—Bunyan: *The Pilgrim's Progress*, pt. ii.

*2. Carefully chosen or selected; fit, appropriate.

II. Of persons: Careful or discriminating in choosing or preserving; difficult to please; chary, frugal.

choir (pron. kwīr), **quire**, ***queer**, ***queere**, ***queir**, s. & a. [Fr. *chœur*; Sp. & Ital. *coro*; Lat. *chorus*=a band of singers; Gr. *choros*=a dance in a ring, a band of singers.] [**CHORUS**, **QUIRE**.]

A. As substantive:

I. Ord. Lang.: A number of singers. [II. 1.]

"Had vanish'd from his prospects and desires;

Not by translation to the heavenly choir."

Wordsworth: *Excursion*, bk. vi.

II. Technically:

1. **Eccles.:** The organized body of singers in church services.

¶ In ceremonial Christian religions, and more particularly in the ordering of services in the Church of England, the minor canons, choral vicars, and choristers, or other singers taken collectively, are spoken of as the choir. The choral body in the latter church is usually divided into two sets of voices, the one sitting on the north and the other on the south side of the chancel, and are known by the respective titles of Cantoris and Decani, from their nearness to the Cantor (or Precentor) and to the Decanus (or Dean). In most cathedrals and collegiate chapels, the Decani side is held to be the side of honor, the best voices are placed there, and all the "verses" or soli parts, if not otherwise directed, are sung by that side, which is also considered the "first choir" (*coro primo*) in eight-part music. (Stainer & Barrett.)

Ground-plan of Choir of a Cathedral.

2. **Ecccl. Archit.:**

The part of the building in a cathedral or collegiate chapel set apart for the performance of the ordinary daily service. The choir is generally situated at the eastern end of the building, and is frequently inclosed by a screen, upon which the organ is placed. (Stainer & Barrett.)

" . . . with the crown on his head, returned public thanks to God in the choir . . ."—Macaulay: *Hist. Eng.*, ch. xvi.

B. As adjective: (See the compounds.)

¶ Obvious compound: *Choir-boy*.

choir-man, s. An adult male member of a choir. (Stainer & Barrett.)

choir-organ, s.

Music: One of the three aggregated organs which are combined in an organ of large power. The other two are the *great-organ* and the *swell*. The great organ has its large pipes in front and its bank of keys occupies the middle position; it contains the most important and powerful stops. The *choir-organ* has its key-board below that of the *great-organ*, and contains stops of a light character and solo stops. The *swell* has its bank of keys the highest of the three, and has lower boards which may be opened and shut by means of a pedal, so as to produce *crescendo* and *diminuendo* effects.

choir-screen, s.

Arch.: An ornamental open screen of wood or stone, dividing the choir or chancel from the nave, but not obstructing sight or sound.

choir-service, s. The part of the church service sung by the choir.

"That part of our choir-service called the motet or anthem."—Warton: *Hist. of Eng. Poetry*, iii. 183.

Zool.: A genus of Suidæ found in Africa. *Choiropotamus africanus* is the Bosch-Vark.

chōised, pa. par. & a. [Eng. *choise*; -ed.] Chosen, picked.

"Choised seede to be picked and trimly well fide."—Tusser, p. 133.

chok, s. [Icel. *kok*=the gullet.] The throat, the gullet.

chok-band, s. The small strip of leather by which a bridle is fastened around the jaws of a horse.

chōke, ***cheke**, ***choak**, v. t. & i. [A. S. *aceocan*=to suffocate (Somner); Icel. *koka*=to gulp; *kok*=the gullet.]

A. Transitive:

I. Lit.: To suffocate, to strangle, to destroy by stopping the passage of the breath.

"The herd ran violently down a steep place into the lake and were choked."—Luke viii. 33.

II. Figuratively:

1. To obstruct or stop up any passage, to block, to clog.

" . . . the sandhills near the sea threatened to choke the channel . . ."—London Times.

¶ Frequently with the adverb *up*.

"Then Commerce brought into the public walk

The busy merchant; the big warehouse built;

Rais'd the strong crane; chok'd up the loaded street."

Thomson: *Autumn*.

2. To stifle; to hinder or check the growth or spread of anything; to overpower, to suppress, to destroy.

"And some fell among thorns; and the thorns sprang up with it, and choked it."—Luke viii. 7.

"Confess thee freely of thy sin:

For to deny each article with oath

Cannot remove nor choke the strong conception

That I do groan withal." Shakesp.: *Othello*, v. 2.

†3. To irritate or offend, so as almost to prevent the use of words.

"I was choked at this word."—Swift.

*4. To vanquish in argument or by a statement.

"What, have I choked you with an argosy?"

Shakesp.: *Taming of the Shrew*, ii. 1.

B. Intransitive:

I. Literally: To be suffocated, strangled, or stifled.

"Who eats with too much speed may hap to choak."—Heywood: *Dialogues*, p. 323.

II. Figuratively:

*1. To be hindered or checked.

"The words choked in his throat."—Sir W. Scott.

†2. To be irritated or offended exceedingly.

A. *As substantive*:

Med.: One of two or three diseases more or less akin to each other. They are:

1. *Pseudo Cholera or Cholera Morbus*: A severe form of diarrhoea, somewhat resembling but quite distinct from Asiatic Cholera. [2.] It occurs usually during the summer months, and is due for the most part to deleterious food or drink taken into the body exciting the purging, vomiting, and cramps which characterize the complaint. Various remedies have been proposed for cholera, and while some of them are efficacious in cases of the pseudo-cholera described above, no reliance can be placed upon them in cases of genuine Asiatic or sporadic cholera. The formulæ of some of these compounds have been widely published, especially at times when this country has been threatened with an epidemic of the scourge. One of the best known of these prescriptions is the "New York Sun" Cholera Mixture. This famous remedy for bowel complaints is composed of equal parts of tincture of opium, tincture of rhubarb, tincture of cayenne, essence of peppermint and spirits of camphor, mixed well together. The dose is 15-30 drops in water every 15-20 minutes. Children fed on artificial food often succumb to this disease; adults rarely. The childish disease is called *Cholera infantum*.

2. *Asiatic or Malignant Cholera*: A malignant disease due to a specific poison which, when received into the human body through the air, water, or in some other way, gives rise to the most alarming symptoms and very frequently proves fatal to life. An attack of cholera is generally marked by three stages, though these often succeed each other so rapidly as not to be easily defined. There is first a premonitory diarrhoea stage, in which the stools soon become very copious, watery, and rice-colored; there is also occasional vomiting, with severe cramps in the abdomen and legs, and great muscular weakness. This condition is succeeded, and often within a remarkably short period, by the second stage, which is one of collapse, and is called the algid or cold stage. This is characterized by intense prostration, suppression of urine, great thirst, feebleness of circulation and respiration, with coldness and blueness of the skin, iciness of the breath, and loss of voice. Should death not take place at this the most fatal period, the sufferer will then pass into the third or reaction stage of the disease. This, though very frequently marked by a high state of fever, with a tendency to congestion of internal organs, as the brain, lungs, kidneys, &c., is a much more hopeful stage than that which has preceded it, and the chances of recovery are very much increased. Asiatic Cholera is so called from having had its home, so to speak, in the East, and more especially in India, for centuries, though there is little doubt that under other names it had been previously epidemic in various portions of the world. The nature of the disease was not recognized until the outbreak of 1831 occurred. Similar epidemics in 1848-49, 1853-54, 1865-66, and in 1892-94 have increased our knowledge of the mode of propagation of choleraic poison, and proven that strict attention to the laws of sanitation will do much if not all to prevent it finding that habitat which appears necessary for its development into epidemic activity. The quarantine regulations adopted in New York during 1892-93, and the energetic measures pursued by the health officers, notable among them being Dr. Jenkins, have indisputably settled the fact that the disease can be stamped out, as an epidemic, by proper attention to isolation and sanitation. As to other methods of prevention propounded during that epidemic, advocated by Dr. Lee and others, and consisting of inoculation or irrigation of the

intestinal tract, etc., medical opinion is much divided, the various methods each having warm partisans. Several experiments were made, among them one by a newspaper man, which seemed to be a fair test, and to demonstrate that the body can be fortified against the scourge. But until more extended knowledge shall have accrued, the judgment of the more conservative medical men will be reserved. This is but natural when we remember that our knowledge of the disease is yet very limited, and within the past sixty years opinions have undergone most radical changes many times, without apparently arriving nearer the truth than before.

† *Spasmodic Cholera* is another name for Asiatic Cholera.

"The malady known by the name of *spasmodic cholera* . . . had been known in India from the remotest periods, and had at times committed fearful ravages. Its effects, however, were in general restricted to particular seasons and localities, and were not so extensively diffused as to attract notice or excite alarm. In the middle of 1817, however, the disease assumed a new form, and became a widely spread and fatal epidemic. It made its first appearance in the Eastern districts of Bengal in May and June of that year, and after extending itself gradually along the north bank of the Ganges, through Tirhut to Ghazipur, it crossed the river, and passing through Rewa, fell with peculiar virulence upon the center division of the grand army, in the first week of November . . . During the week of its greatest malignity it was ascertained that seven hundred and sixty-four fighting men and eight thousand followers perished."—*Mill: Hist. India*, Continuation by H. H. Wilson, viii. 253.

B. *As adj.*: Pertaining to cholera; designed for use in cholera, &c., as *Cholera poison*, *cholera mixture*.

cholera asphyxia, s. Also called Asiatic cholera, the more malignant form of cholera.

cholera-fly, s. A peculiar fly, the excretions of which swallowed were in one case followed, probably accidentally, by cholera. (*Knox in Lancet*, vol. ii. (1853), p. 479.)

cholera-mixture, s. [See CHOLERA, A. 1.]

cholera-pill, s. A pill containing one grain each of camphor, cayenne, and opium.

chōl'-ēr-ā'-īc, a. [Eng. *cholera*; -ic.] Pertaining to, producing or produced by cholera, as, "choleraic poison," "choleraic discharges."

chōl'-ēr-īc, *chōl'-ēr-īck, a. [Fr. *cholérique*, from Lat. *cholericus*; Gr. *cholērikos*, from *cholē*=the bile.]

chōl'-ēr-īne, s. [Eng. *choler(a)*, and suff. -ine (q. v.).]

Medical:

1. The precursory symptoms of cholera.

2. The first stage of epidemic cholera, in which individual cases are not usually marked by the severity apparent later, when the epidemic is prevalent.

chōl'-ēr-ōid, a. [Gr. *cholēra*, *cholērā*=cholera, and *eidos*=appearance.] Resembling, but milder than, cholera, as *choleroïd discharges*.

chōl'-ēs'-tēr-āte, s. [Eng. *cholester(ic)*; -ate (*Chem.*).]

Chem.: A salt of cholesteric acid.

chōl'-ēs'-tēr-īc, a. [Fr. *cholesterique*.] Pertaining to or obtained from cholesterine.

cholesteric acid, s.

Chem.: An acid formed by treating cholesterine with nitric acid. It is in yellowish-white crystals, slightly soluble in water, but abundantly so in boiling alcohol.

chōl'-ēs'-tēr-īne, chōl'-ēs'-tēr-īn, s. & a. [Fr. *cholesterine*, from Gr. *cholē*=the bile, and *stear*=fat.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

A. As substantive:

Chem.: $C_{26}H_{44}O = C_{26}H_{43}(OH)$. A monatomic aromatic alcohol, which occurs in small quantities in the bile, brain and nerves. It forms the chief part of biliary calculi, obtained by boiling these in alcohol. It crystallizes in colorless plates, which melt at 137° and sublime at 200° . It exists naturally in most animal liquids in a state of solution; also in many animal solids, as in the blood, the bile, the meconium, the brain and spinal cord. As an abnormal product it occurs in the crystalline form in the bile, biliary calculi, various dropsical effusions, the contents of cysts, pus, old tubercles, malignant tumors, the excrements, and expectoration of phthisis. In the vegetable kingdom it occurs in peas, beans, almonds, many seeds, &c. Cholesterol is insoluble in water and solution of potash, even when boiling; but soluble in ether and boiling alcohol, crystallizing on cooling. It is most easily procured from gall-stones (of which it is the chief constituent), by finely powdering them, then boiling the powder in alcohol, and filtering when hot, when the cholesterol will deposit on cooling in pearly scales. The crystals thus obtained are usually thicker than the natural plates. It is very sparingly soluble in cold alcohol, and not at all in water.

B. As adj.: (See the compound.)**cholesterine infiltration.**

Med.: A form of degeneration which occurs for the most part in the liver, spleen, and heart, and which is characterized by the development of infiltration into these organs of a certain peculiar fatty or lardaceous matter, said by some to be of the nature of cholesterol, by others to be of a starchy or albuminous character. The terms lardaceous, albuminoid, and amyloid are used to express the same conditions.

chōl-ēs-trō, in compos. as a prefix. [From Eng., &c., *cholest(er)ine*, with *o* connective.]

Chem.: Having cholesterol as the less abundant chemical substance in its composition.

chōl-ēs-trō-phāne, s. [From Eng., &c., *cholestro* (q. v.); and Gr. *phainō*=to make to appear.]

Chem.: $C_5H_6N_2O_3$. A dimethyl-parabanic acid, obtained by the oxidation of caffeine, and by digesting silver parabanate with methyl-iodide.

chōl-ē-vā, s. [From Gr. *chōlēō*=to become lame.]

Entom.: A genus of coleoptera, family Silphidae.

chōl-i-amb, **chol-i-ām'-bic**, s. [Fr. *choliambique*, from Lat. *choliambus*; Gr. *chōliambos*, from *chōlos*=lame, and *iambos*=an iambus.]

Poet.: A verse having an iambus in the fifth foot, and a spondee in the sixth or last.

chōl-īc, a. [Gr. *cholē*=the bile, and Eng. suff. *-ic*.] Pertaining to, or obtained from bile.

cholic acid, s.

Chem.: $C_{24}H_{40}O_5$. Obtained by boiling the resinous mass precipitated by ether from an alcoholic solution of bile, with a dilute solution of potash for several hours, and decomposing the potassium salt by HCl. Cholic acid crystallizes in tetrahedra. It gives a purple-violet color with sugar and sulphuric acid.

chōl-in, **chōl-īne**, s. [Gr. *chole*=the bile; *-in*; or *-inē*.] A substance ($C_6H_5NO_2$) found in the bile, and in the extracts of the suprarenals of various animals.

chōl-in-āte, s. [*Cholin(ic)*]; and suff. *-ate* (*Chem.*) (q. v.).]

Chem.: A term for a combination of cholinic acid with a salifiable base.

chol-in'-īc, a. [Gr. *cholē*=the bile.] Pertaining to bile or obtained from it.

cholinic acid, s.

Chem.: A distinct substance obtained by digesting bilin with dilute hydrochloric acid. It is insoluble in water.

chōl-ō-chrōme, s. [Gr. *cholē* or *cholos*=bile, and *chroma*=color.] The coloring matter of bile. [**BILIRUBIN**.]

chōl-ō-pūs, s. [**CHOLÆPUS**.]

chōl-ōi'-dīc, a. [Gr. *choloeidēs*=like bile, from *cholē*=the bile, and *eidos*=appearance, form; and Eng. suff. *-ic*.] Pertaining to bile.

choloidic acid, s.

Chem.: $C_{24}H_{38}O_4$. A white amorphous acid, obtained by boiling glycocholic or tarrocholic acid with concentrated sulphuric acid.

chōl-ō-phōe'-in, s. [Gr. *cholos*=bile, and *phaios*=brown.] The same as **BILIRUBIN** (q. v.).

chō-lūm, s. [Hindustani.]

Bot. & Hort.: Indian Millet, *Sorghum vulgare* (formerly *Holcus Sorghum*), a grain commonly cultivated in India and some other parts of the East.

chōm-ē'-lī-a, s. [Named in honor of Dr. J. B. Chomel, physician to Louis XV.]

Bot.: A genus of native shrubs, belonging to the order Cinchonaceæ.

cho-mo-ro, s. [Javanese.]

Bot.: *Podocarpus cupressina*, a taxaceous plant, one of the best timber trees of Java.

chō'-nā, s. [Gr. *chōnē*=a funnel, from the shape of the flowers.]

Bot.: A genus of plants belonging to the order Ericaceæ, and consisting of a single small shrub with blood-red flowers. It is a native of the Cape of Good Hope.

chōn-dēs'-tēs, s. [From Gr. *chondros*=grain, and *hēstos*=glad, rejoicing (?).]

Ornith.: The Larkfinch, a genus of finches placed next to *Emberiza* by Swainson. (*Craig*.)

chōn-dra'-cān'-thūs, s. [Gr. *chondros*=cartilage, and *akantha*=a spine.]

Zoöl.: A genus of Crustacea of the order Siphonostoma, and family Lernæopoda. *Chondracanthus Zei* is found upon the gills of Zeus (the Common Dory). The body is covered with short reflexed spines.

chōn-drar'-sēn-īte, **chōn-drō-ar'-sēn-īte**, s. [Gr. *kondroarsenit*; so named from its similarity to *Chondrodite* (q. v.), while differing from it in being an arsenate.]

Min.: A yellowish mineral, found in the Paisberg mines, Wornland. It is an arsenate of manganese. It is translucent and brittle.

chōn-dri'-ā, s. [Gr. *chondros*=cartilage, from the cartilaginous structure.]

Bot.: A genus of marine Algæ, belonging to the tribe Florideæ.

chōn-drīl'-lā, s. [From Lat. *chondrilla*, *chondrillon*; Gr. *chondrillē*=a plant which exudes a gum; *chondros*=grain, cartilage, a small, roundish mass.]

Bot.: A genus of composite plants, nearly allied to the lettuce (*Lactuca*). It has the achenes rough, and furnished at the base with five small scales. The plants are herbs, natives of South Europe, the East, and Siberia. The flowers are yellow and solitary. About twenty species are known. A gum like *lactucarium* is obtained in Lemnos from *Chondrilla juncea*.

chōn-drīne, **chōn-drīn**, s. [Gr. *chondros*=cartilage, and Eng. suff. *-in*, *-ine*.]

Chem.: A variety of gelatine obtained from the cartilage of the ribs and joints. It is less soluble in boiling water, and is precipitated from its solution by acetic acid, alum, and by acetate of lead. Its chemical formula is doubtful; it contains nearly fifteen per cent. of nitrogen.

"*Chondrine* is a substance in many respects similar to gelatine. It is obtained in a state of solution, by boiling water, from the permanent cartilages and from the cornea; also from the temporary cartilage prior to ossification; it gelatinizes on cooling, and when dry assumes the appearance of glue. It differs from gelatine in not being precipitated by tannin, and in yielding precipitates to acetic acid, alum, acetate of lead, and the protosulphate of iron, which do not disturb a solution of gelatine."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. i., pp. 42-3.

chōn-drī'-tēs, s. [Mod. Lat. *chondrus* (q. v.), and Gr., &c., suff. *-ites* (q. v.).]

Palæont.: A temporary genus of plants, alliance Algae. It consists of plants somewhat resembling the sea-weeds of the recent genus *Chondrus*. *Chondrites verisimilis* is found in the Upper Silurian formation. An alleged fucoid, *Chondrites acutangulus* of Mr. Coy, is found in Lower Silurian rocks.

chōn-drō-dēn'-drūm, s. [Gr. *chondros*=grain, cartilage, and *dendron*=a tree.]

Bot.: A genus of climbing shrubs, belonging to the Menispermaceæ. *Chondrodendrum convolvulaceum* is called by the Peruvians the Wild Grape, on account of the form of the fruits, and their acid and not unpleasant flavor. The bark is esteemed as a febrifuge.

chōn-drō-dīte, s. [Gr. *chondros*=a grain, from the granular structure; and Eng. suff. *-ite* (*Min.*) (q. v.).]

Min.: An orthorhombic whitish or pale-yellowish mineral, sometimes red, apple-green, or black. It was first discovered in New Jersey by Dr. Bruce.

chōn-drō-glōs'-sūs, s. [Gr. *chondros*=cartilage, and *glōssa*=the tongue.]

Anat.: An epithet applied to a fasciculus of muscular fiber, extending from the lesser corner of the hyoid bone to the tongue, and forming a part of the hyo-glossus. (*Craig*.)

chōn-drō-grā'-dā, s. pl. [From Gr. *chondros*=gristle, cartilage, and Lat. *gradus*=a step, from *gradior*=to go.]

Zoöl.: An order of animals, of the sub-kingdom Radiata and the class Siphonophora. It is so called because the circular or oval disk is supported upon a somewhat cartilaginous plate. The lower

surface of this disk has cirri. There are cells in it which, on being filled with air, aid the animal in rising to the surface of the water. All are marine. Genera *Porpita*, *Velella*, &c.

chōn-drōg'-ra-phỹ, s. [Gr. *chondros*=gristle, cartilage, and *graphē*=a delineation, a description.] A treatise on cartilages. (*Dunlison*.)

chōn-drōid, a. [Gr. *chondros*=cartilage, and *eidos*=form, appearance.] Resembling or of the nature of cartilage.

chōn-drōl'-ō-gỹ, s. [Fr. *chondrologie*, from Gr. *chondros*=grain, cartilage, and *logos*=a speech, a discourse.]

Med.: A discourse or treatise on the nature of cartilages. (*Brande*.)

chōn-drōm'-ē-tēr, s. [Gr. *chondros*=grain, and *metron*=a measure.] A steelyard or balance for weighing grain. (*Francis*.)

chōn-drōp-tēr-ỹg'-ī-an, a. & s. [Gr. *chondros*=a cartilage, and *pteryx*, genit. *pterygos*=a fin, in allusion to the gristly nature of the fins.]

A. As adj.: Characterized by cartilaginous fins and skeleton.

B. As substantive:

Ichthy.: One of the Chondropterygii.

chōn-drōp-tēr-ỹg'-ī-i, s. pl. [Fr. *chondropterygien*; Gr. *chondros*=cartilage, and *pterygion*=a little wing, a fin, dim. of *pteryx*=a wing.] The name given by Cuvier to one of the great sections into which the class Pisces or fishes are divided. It includes all those species, the bones and fin spines of which are cartilaginous, or formed of gristle, such as the Sturgeon, Shark, Ray, Lamprey, &c. The same as **CARTILAGINEI**.

chōn-drō-sē'-pī-a, s. [Gr. *chondros*=cartilage, and Lat. *sepia* (q. v.)=an allied genus.]

Zoöl.: A genus of Cephalopods, in which the whole margin of the sac is bordered with fins, as in *Sepia*, but the shell is horny, as in *Loligo*.

chōn-drō-spēr'-mūm, s. [Gr. *chondros*=cartilage, and *sperma*=a seed.]

Bot.: A genus of climbing evergreen shrubs, natives of India. The yellow flowers and climbing stems, together with the erect ovules, have caused this genus to be referred to the *Jasminaceæ* (*Jasmines*), but the whole structure of the flower seems to unite it more closely to the *Oleaceæ*.

chōn-drōs'-tē-a, s. pl. [From Gr. *chondros*=gristle, cartilage, and *ostēa*, pl. of *osteon*=a bone.]

Ichthy. & Palæont.: The name given by Professor Müller to a sub-order of ganoid fishes, in which the vertebral column consists only of a simple and soft *chorda dorsalis*, in place of being divided into separate vertebrae. The dermal covering of these fishes, consists of large, bony plates. The tail is heterocercal. The sub-order is sometimes called *Loricata*. It contains the families *Cephalaspidae*, *Acipenseridae*, and *Spatularidae* (q. v.). The second and third contain recent species, the first only fossil.

chōn-drōs-tē'-ī-dæ, s. pl. [From Mod. Lat. *chondrosteus* (q. v.), and Lat. fem. pl. adj. suff. *-idæ*.]

1. **Ichthy.:** In some classifications a family of fishes, sub-order Placoganoidei. It is synonymous with the Sturionidae, the latter being made comprehensive enough to include both the Sturgeons proper (*Acipenseridae*), and the Paddle-fishes (*Spatularidae*), but excluding the *Cephalaspidae*. [**CHONDROSTEA**.]

2. **Palæont.:** It is not known prior to the Eocene of the London Clay, where a sturgeon, *Acipenser toliapicus*, is found.

chōn-drōs-tē-ō-sāu'-rūs, s. [From Mod. Lat. *chondrostea* (q. v.), and Gr. *sauros*=a lizard.]

Palæont.: A genus of dinosaurian reptiles found in cretaceous rocks in this country and England. Some species must have been sixty or seventy feet long.

chōn-drōs'-tē-ūs, s. [**CHONDROSTEA**.]

Ichthy. & Palæont.: A genus of fishes, the typical one of the family Chondrosteidae and the sub-order Chondrostea (q. v.). It is found in the Lias.

chōn-drō-tōme, s. [Gr. *chondros*=cartilage, and *tomē*=a cutting, *temnō*=to cut.]

Surg.: A knife specially adapted to dissecting cartilage.

chōn-drōt'-ō-mỹ, s. [Gr. *chondros*=cartilage, and *tomē*=a cutting, *temnō*=to cut.]

Anat.: The dissecting of cartilage.

chōn-drūs, s. [Gr. *chondros*=grain, cartilage, mucilage.]

Bot.: A genus of Cryptonemiaceæ (Florideous Algæ), composed of cartilaginous sea-weeds, with flat dichotomously-divided fronds, the cellular structure of which exhibits three layers—a central of longitudinal filaments, an intermediate of small roundish cells, and an outer of vertical colored and

beaded rows of cells, the whole imbedded in a tough inter-cellular matrix. *Chondrus crispus* becomes horny when dry, and is the Irish Moss or Carrageen of the shops.

chōn-ē-mor'-pha, s. [Gr. *chōnē*=a funnel, and *morphē*=form, appearance, in reference to the form of the corolla.]

Bot.: A genus of erect or twining Indian shrubs, belonging to the order Apocynaceæ, closely allied to *Echites*, from which it differs in the funnel-shaped corolla. The flowers are showy, yellow or white. The root and leaves of *Chonemorpha malabarica*, a plant of Malabar, are used medicinally by the natives. (*Treas. of Bot.*, &c.)

chōn-ē-tēs, s. [Gr. *chōnē*, contracted from *choanē*=a melting-pot, . . . a funnel.]

Palæont.: A genus of brachiopod mollusks, family Productidæ. The shell is concavo-convex, with the hinge-line straight. The ventral valve is convex, and the dorsal one concave. All are fossil. In 1875 Tate estimated the known species at forty-seven, all from the Silurian and the Carboniferous rocks.

chōn-ī-crite, s. [Gr. *chōneia* = a fusion, and *kritos*=a test; its fusibility distinguishing it from some allied species.]

Min.: A massive, crystalline, granular, or compact mineral from Elba and Finland. It is of a whitish color, sometimes with yellowish or grayish spots. It is a lime pyrosclerite. Hardness, 2.5-3; specific gravity, 2.91. (*Dana*.)

***chōp**, ***chōops**, s. [A. S. *heope*, *hiope* = a hip, the fruit of the dog-rose.] [*HIP*, *CHOUPS*.] The fruit of *Rosa canina*. (*Parts of Eng. & Scotland*.)

choop-rose, s. *Rosa canina*.

choop-tree, s. The same as *CHOOP-ROSE* (q. v.).

chōo'-pa, s. [A Malacca word.] The Malacca name of a fruit, that of *Pierardia dulcis*, a sapindaceous tree.

chōoše, ***cheese**, ***chese**, ***cheose**, ***chæs**, ***chuse**, v. t. & i. (pt. t. **chese*, **ches*, **cheas*, **chure* **chus*, *chore*; pa. par. **coren*, **icoren*, *chosen*.) [A. S. *ceosan*, *ciosan*; O. Sax. *kiosan*, *keosan*; O. Fris. *kiasa*; O. H. Ger. *chiosan*, *chiusan*; Goth. *kiosan*; O. Icel. *kjosa*; Sw. *keza*; Dut. *kiesen*; Ger. *kiesen*.]

A. Transitive:

I. Ordinary Language:

1. To take by preference one out of several things offered; to select.

"Of harmes two the lesse is for to cheese."
Chaucer: *Troilus*, ii. 470.

2. To accept when offered; not to reject.

*3. To take, to adopt, to apply one's self to.

"William his way to Scotland ches."
Langtoft, p. 146.

4. To elect, to wish; to prefer a certain course.

"Let us choose to us judgment; let us know among ourselves what is good."—*Job*. xxxiv. 4.

*5. To obtain.

"Such strengthe he him tho ches
That prince of al the world he wes."
Castle of Love, p. 1,317.

II. Technically:

1. *Scrip.*: To adopt or select for a special purpose or position. [*CHOSEN*.]

"He chose David also his servant."—*Psalms* lxxviii. 70.

2. *Theol.*: To elect for eternal happiness.

B. Intransitive:

1. To make one's choice; to select, elect, or prefer.

"Thou may haf thi wille if thou to love chese."—*Langtoft*, p. 116.

2. To have the power or freedom of choice (generally with a negative, and meaning that the person spoken of has no alternative).

"Knaves abroad,
Who having by their own importunate suit
Convinced or supplied them, they cannot choose
But they must blab." *Shakesp.*: *Othello*, iv. 1.

¶ To choose: By or of choice.

"Be a lord to choose."—*Farquhar*: *Twin Rivals*, ii. 2.

¶ (1) Crabb thus distinguishes between *to choose* and *to prefer*: "*To choose* is to prefer as the genus to the species; we always choose in preferring, but we do not always prefer in choosing. *To choose* is to take one thing instead of another; to prefer is to take one thing before or rather than another. We sometimes choose from the bare necessity of choosing; but we never prefer without making a positive and voluntary choice. When we choose from a specific motive, the acts of choosing and preferring differ in the nature of the motive. The former is absolute, the latter relative. We choose a thing for what it is, or what we esteem it to be of itself; we prefer a thing for what it has, or what we suppose it has, superior to another. . . . We

calculate and pause in choosing; we decide in preferring; the judgment determines in making the choice; the will determines in giving the preference. . . . A wise prince is careful in the choice of his ministers; but a weak prince has mostly favorites whom he prefers."

(2) He thus discriminates between *to choose*, *to pick*, and *to select*: "*Choose* is as in the former case the generic; the others are specific terms: *pick* and *select* are expressly different modes of choosing. We always choose when we pick and select; but we do not always pick and select when we choose. *To choose* may be applied to two or more things; to *pick* and *select* can be used only for several things. . . . *To choose* does not always spring from any particular design or preference; to *pick* and *select* signify to choose with care."

†**chōoše'-a-ble**, a. [Eng. *choose*; -able.] Fit or proper to be chosen.

†**chōoše'-a-ble-ness**, s. [Eng. *chooseable*; -ness.] The quality of being chooseable.

1. *Anat.*: Any chord or chord-like structure. [CHORDA DORSALIS.]

2. *Bot.*: A genus of Laminariaceæ (Fucoid Algæ), with fronds of a peculiar, simple, cylindrical form. Two species, *Chorda filum* and *C. lomentaria*, are found between tide-marks on British coasts. The former grows from one to twenty or even forty feet long, with the greatest diameter at half its length, of 1-4 to 1-2". The chord-like frond is tubular, but has at intervals thin diaphragms, formed by interwoven transparent filaments.

3. *Music*: [CHORD-MUSIC.]

chorda characteristica, *s.* with *a.*

Music: A chord of the seventh, in which a leading note appears. (*Stainer & Barrett*.)

chorda dorsalis, *s.* with *a.*

Anat.: The embryonic representative of the spinal column of the Vertebrata; the permanent spinal column of the Cartilaginous fishes. It sometimes forms a spindle-shaped, transparent, gelatinous-looking cord, with the broadest part near the tail; at others it is cylindrical or conical, rounded anteriorly and tapering posteriorly. It usually consists of an outer comparatively thick and firm structureless membrane, forming a sheath, and of pale nucleated cells, which fill the sheath. In some instances, however, its structure is fibrous, and that of the sheath fibro-membranous. The cells are mostly angular or polyhedral, and closely crowded. The Chorda Dorsalis is called also the Notochord, which is from two Greek roots, whereas Chorda Dorsalis is Latin.

"... the permanent chorda dorsalis or rudimentary spinal column of the early embryo."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. iv., p. 89.

chorda tympani, *s.*

Anat.: A small branch connected with the seventh or facial nerve.

chor'-dæ, *s. pl.* [Pl. of Lat. *chorda* (q. v.).]

A. As adjective:

Anat.: Resembling the chorion; an epithet applied to several membranes, especially to the plexus and web of the *pia mater*, and to the inner tunic of the eye.

"The choroid coat of the eye."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. ii., p. 60.

"The choroid arteries which supply the choroid plexus."—*Ibid.*, ch. x., p. 293.

B. As substantive:

Anat.: The vascular, as opposed to the specially nervous, portion of the retina.

"The optic nerve penetrates the sclerotic. . . . The choroid is thick, and colored by a deep-brown pigment."—*Owen: Anatomy of Vertebrates.*

choroid coat, s.

Anat.: A vascular membrane, black on the inner side, lining the sclerotic portion of the eyeball.

choroid membrane, s.

Anat.: A thin membrane which extends from the entrance of the optic nerve to near the anterior margin of the sclerotic, where, thickening, it becomes the ciliary body, and is continued into the iris.

choroid plexus, s.

Anat.: A congeries of blood-vessels upon the lateral ventricle of the brain. (Often in the plural *plexuses*.)

"In the lateral and fourth ventricles it [the spinal membrane] forms projecting processes or folds, somewhat fringed, highly vascular, and invested by epithelium derived from the membrane which lines the ventricles. These processes are called the *choroid plexuses*."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. x., p. 254.

chör'-ōi'-dal, a. [Eng. *choroid*; -al.] The same as CHOROID, a. (q. v.).

choroidal fold, s.

Anat.: A fold appearing to inclose the lens of the eye, but so as to leave an aperture or depression below. (*Quain*.)

choroidal fissure, s.

Anat.: The same as choroidal fold (q. v.). (*Quain*.)

chör'-ōi'-di-tis, s. [From Gr. *choroeidēs*, for *choroeidēs* [CHOROID], and suff. *itis*, denoting inflammation.]

Med.: Inflammation of one of the investing tissues of the eyeball, called the choroid. This highly vascular and pigmentary membrane is seldom the seat of inflammation, but when it does occur it is characterized by pain in and around the eye, intolerance of light, tearfulness, displacement of the pupil, and, as the disease proceeds, the cornea and the whole eyeball swell and protrude. Hectic and emaciation are the common accompaniments of the latter condition, and the digestion throughout is very much impaired. Chronic choroiditis is marked by a very peculiar alteration and variation which takes place in the color of the eye, and which has been called by Desmarres *choroide tigrée*.

chör-rō-lōg'-ī-cal, a. [Eng. *chorolog(y)*; -ical.] Of or pertaining to chorology.

"Chorological difficulties."—*Lingard: Hist. Anglo-Sax. Church*, vol. i., p. 349.

chör-rōl'-ō-gỹ, s. [Gr. *chōrē* = a district, county; *logos* = a discourse, *legō* = to tell, to describe.]

1. The science or act of describing localities; chorography.

2. The geographical and topographical distribution of animal and vegetable species.

"The answer . . . would represent its distribution or chorology."—*Huxley: Crayfish*, p. 46.

chör-ōm'-ēt-rỹ, s. [From Gr. *chōra* = a place . . . a country; o connective, and *metron* = a measure.] The art of surveying a country. (*Nuttall*.)

chör-ōs'-is, s. [From Gr. *chōrizō* = to separate.]

Bot.: Deduplication, the division of an organ into a pair or cluster. It may be produced in two ways, the first, called *collateral chorosis*, takes place when an organ is replaced by two or more situated on the same plane, and in which case the organs stand side by side as in tetradynamous stamens; and *vertical chorosis*, when the organs produced stand one before the other, as in the "crown," or two-lobed appendage, inside the blade of the petals of *Silene*. [CHORIZATION.]

chör-ō-zē'-ma, s. [Gr. *choros* = a dance, and *zēma* = a drink; said to have been so named by its discoverer, M. Labillardière, in allusion to the joyful feelings of the party which he accompanied in the exploration of Western Australia, on meeting with a supply of water, in the vicinity of which he discovered the plant.]

Bot.: A genus of pretty bushes, natives of Western Australia, belonging to the pea-flowered Leguminosæ. The plants are often to be met with in greenhouses, more than a dozen species being in cultivation, of which the most beautiful are *Chorozema Henclimanni*, with long terminal leafy racemes of a beautiful red color; *C. spectabile*, a twiner of great beauty, producing long drooping racemes of orange-colored flowers, which appear in the winter months; *C. cordatum*, a plant very common in gardens: the flowers, in loose racemes, are red, the standard spotted with yellow at the base; and *C. Dicksoni*, a handsome plant with larger flowers than the others: there are upward of twenty species known.

chör'-tōn, s. [Ger.]

Music: The ancient ecclesiastical pitch in Germany. It was supposed to be higher than that employed for secular music by about a tone. The terms *Kammerton* and *Chorton* were used to signify the difference between a high and a low pitch for the same denominated sound. (*Stainer & Barrett*.)

chör'-ūs, s. [Lat., from Gr. *choros* = a dance in a circle, accompanied with song; a chorus.]

I. Ordinary Language:

1. Literally:

(1) In the same sense as II. 1.

"The Grecian tragedy was at first nothing but a chorus of singers; afterward one actor was introduced."—*Dryden*.

(2) A number of persons singing in concert.

"My melancholy voice the chorus join'd."

Wordsworth: Excursion, bk. iii.

(3) A concerted piece of music, sung by a number of singers together.

(4) The verses of a song, &c., in which an audience or company joins the singer.

"Each boatman, bending to his oar,
With measured sweep the burthen bore,
In such wild cadence, as the breeze
Makes through December's leafless trees,
The chorus first could Allan know."

Scott: The Lady of the Lake, li. 18.

2. Figuratively:

(1) A unanimous and loudly-expressed declaration of opinions or sentiments.

(2) An interpreter of events; one who explains.

"Ophe. You are a good Chorus, my Lord.

Ham. I could interpret between you and your love: if I could see the puppets dallying."

Shakesp.: Hamlet, iii. 2.

II. Technically:

1. *Gr. Drama*: The chorus was probably originally a company of dancers in a ring. In later times a choric performance implied the singing or musical recitation of a poetical composition, accompanied by appropriate dancing and gesticulation. As choral performances were especially cultivated in all the Dorian states, and particularly in Sparta, the Dorian dialect came to be regarded as the appropriate dialect for such compositions. Arion, a contemporary of Periander, first gave the chorus a regular choral form. It consisted of about fifty men or youths, who danced round the altar of Dionysus. From these cyclic choruses was developed the Attic tragedy. [TRAGEDY.] The exact number of the chorus in the times of the earlier tragic poets is uncertain; from Sophocles onward the regular number was fifteen. It was arranged in a quadrangular form, and entered the theater by a passage to the right of the spectators in three lines. To guide them in their evolutions lines were marked upon the boards of the orchestra. The functions of the chorus in the Greek tragedy were very important. It acted the part (1) of a dispassionate and right-minded spectator, inculcating the lessons of morality and resignation to the will of heaven, as taught in the piece being acted; and (2) of a guide to explain events supposed to happen in the intervals between the acts and scenes. In comedy the number of the chorus was twenty-four, consisting half of males and half of females.

2. *Music*: (1), (2), & (3). The same as I. 1, (2), (3), & (4).

(4) The name given to the mixture and compound stops in an organ. (*Stainer & Barrett*.)

*3. *Astron.*: An attendant or encircling group of planets.

"Every fixed star is incircled with a chorus of planets."—*Ray: Creation*, p. 18.

chör'-ūs, v. t. [CHORUS, s.] To join in, as in a chorus; to utter in concert.

"To this lamentation, which one or two of the assistants chorused with deep groan, our hero thought it unnecessary to make any reply."—*Scott: Waverley*, ch. xxxvi.

chōse, s. [Ital. & Sp. *cosa*; Port. *cousa* = a thing suit, or cause, from Lat. *causa*.]

Law: A thing, a chattel, a piece of property; the subject-matter of an action.

"Chose is used in divers senses, of which the four following are the most important: (1) *Chose local*, a thing annexed to a place, as a mill, &c. (2) *Chose transitory*, that which is movable, and may be taken away, or carried from place to place. (3) *Chose in action*, otherwise called *chose in suspense*, a thing of which a man has not the possession or actual enjoyment, but has a right to demand it by action or other proceeding. . . . (4) *Choses in possession*, where a person has not only the right to enjoy, but also the actual enjoyment of a thing."—*Wharton: Law Lexicon*.

chōse, pret. & pa. par. of v. [as pa. par. now obsolete, its place being taken by *chosen* (q. v.).] [CHOOSE.]

Entom.: A genus of Dipterous insects, belonging

to the family Tanystoma. (*Craig*.)

Christ, s. [Lat. *Christus*; Gr. *christos*=anointed, and *chrīō*=to anoint.]

THE ANOINTED ONE: The appellation given to Our Lord as His official title, and corresponding to the Hebrew Messiah (q. v.).

"And He saith unto them, But whom say ye that I am? And Peter answereth and saith unto Him, Thou art the *Christ*."—*Mark* viii. 29.

† Used in the plural to signify persons who would pretend to be the true Christ.

"For false *Christs* and false prophets shall rise, . . ."—*Mark* xiii. 22.

† The two names, *Jesus Christ*, are not analogous to a modern Christian name and surname; in reality the great Being so designated had but one personal appellation—*Jesus*: Christ being super-added at a later period to designate His office, function, or mission. *Jesus*, Gr. *Iēsous*, is the equivalent of the Heb. *Yehoshua*, i. e., Joshua, meaning Jehovah-Savior, Deliverer, or Helper. [JESUS.] It was borne by the military leader in the wars of Canaan (Josh. i.-xxiv., actually called *Jesus* in the authorized version of Acts vii. 45, and Heb. iv. 8), by *Jesus* surnamed *Justus*, a fellow-laborer with Paul (Col. iv. 11), and by about a dozen of other persons figuring in the pages of Josephus; in fact the name seems to have been not uncommon among the Jews. But we learn from St. Matthew that in this particular case the appellation was given previous to birth by Divine authority. "... thou shalt call his name *Jesus*, for he shall save his people from their sins." The year [CHRISTIAN ERA], the month, and the day [CHRISTMAS], when the child *Jesus* was born are matters of more or less uncertainty, not having been recorded with precision at the time. The salient features, however, of the life thus begun were narrated by four evangelists [EVANGELISTS], who are believed by the immense majority of Christians to have written with infallible accuracy and trustworthiness under the guidance or inspiration of the Spirit of God. [INSPIRATION.]

The circumstances heralding or attendant upon the birth of John, afterward the Baptist, and the miraculous conception and nativity of *Jesus*, the last-named event at Bethlehem, are told at length by St. Luke (Luke i.-ii.); while St. Matthew relates the visit of the Magi, the slaughter of the infants at Bethlehem, and the flight of the holy family to Egypt (Matt. ii.).

These occurrences took place while Augustus, the second Roman Emperor, was upon the throne (Luke ii. 1). Thirty years later, under the reign of Tiberius, John, now grown to full manhood, appeared in the wilderness of Judea, as an ascetic and preacher of repentance, the necessity of which he urged on the ground that the kingdom of heaven was at hand. Those who confessed their sins he baptized in the river Jordan, and thus a new religious community arose, separated to a certain extent from the ordinary professors of Judaism (Matt. iii. 1-10, Luke iii. 1-14). Some suspected that he might be the "Christ" or "Messiah" of ancient prophecy, but he disclaimed the honor, indicating that he was but the forerunner of another who should baptize with the Holy Ghost and with fire, that is, as with fire. (Matt. iii. 11, 12; Luke iii. 16; John i. 20-23.)

Meanwhile *Jesus*, now about thirty years of age, had come forth from the obscurity in which he had hitherto resided at Nazareth. (Luke ii. 51, iii. 23.) Having sought and obtained baptism from John, with Divine recognition as the Son of God, and having overcome temptation in the wilderness, He without further delay addressed Himself to His life-work in the world. (Matt. iii. 13-17, iv. 1-11; Luke iii. 21, 22, iv. 1-14.) He claimed to be the Messiah spoken of by holy men of old (Dan. ix. 25, 26, &c.), nay more, to be, in one sense, the subordinate (John x. 29), and in another the equal of His Heavenly Father (v. 30). His ministry, while not ignoring repentance (Luke xiii. 3-5), was one chiefly of faith (John iii. 14-19) and love (John xiii. 34; Matt. v. 43-46). Twelve apostles (Matt. x. 1-6), and afterward seventy other disciples, were chosen to aid him in his ministry (Luke x. 1, &c.), the former baptizing converts as they arose (John iv. 2). John the Baptist saw his own reputation pale away under the greater glory of his Divine successor, but never allowed this to evoke jealousy within his breast (Matt. iii. 11; Luke iii. 15; John i. 15, 27, 29, iii. 28-31), and when his faithfulness in reproving sin, even in high places, led to his suffering a martyr's death (Matt. xiv. 3-12), his baptized followers, either at once or gradually, transferred themselves to *Jesus* (John i. 35-37; Acts xix. 1-5).

The latter holy teacher thus left alone, continued His ministry, it is believed, for about three years in all, chiefly at Capernaum and other places near the Lake of Galilee (Matt. iv. 13; Luke vii. 1), as well as in other places of that province (Luke vii. 11, &c.; Matt. xvi. 13), in Perea beyond Jordan (Matt. xix. 1; Mark x. 1; Luke viii. 37), in Samaria (John iv. 1-42), beyond the Holy Land in Phenicia (Mark vii. 24), and chiefly on occasions of the great festivals,

fāte, fāt, fāre, amldst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pā or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw

at Jerusalem, which necessitated His visiting other parts of Judea (Matt. xx. 29; John ii. 23, vii. 1, 2, 10). He supported His claims to be the Messiah by miracles of knowledge, *i. e.*, prophecies (Matt. xx. 19, &c.; Luke xix. 41-44) and miracles of power, such as healing the sick (Matt. ix. 35, &c.), nay, even raising the dead (Mark v. 22-43; Luke viii. 41-56; John xi. 1-44).

The chief priests and other dignitaries who held sway in the Jewish synagogues, were stirred up nearly to madness by jealousy of His success, and eagerly accepted the offer of an unworthy apostle, Judas Iscariot (*i. e.*, apparently of Kerioth in Judea) to betray his Lord. A manufactured charge of blasphemy led to the condemnation of Jesus by His deadly foe, the high priest, but as the power of life and death now rested not with the Jewish authorities, but with the Roman governor, Pontius Pilate, a charge of disaffection to the imperial government was manufactured, as it was felt that the heathen Roman would not attach any weight to the alleged blasphemy. The procurator had discernment to see clearly that what he was required to do was to sanction a judicial murder, and for some time refused to become partner in the Jewish ruler's guilt. But as the cry, "Crucify him," "crucify him," continued to rise from the multitude, he resolved to avoid unpopularity at the expense of moral principle, and gave sentence that it should be as the Jews required. The crucifixion therefore took place (Matt. xxvii.; Mark xv.; Luke xxiii.; John xix.). Friday was the day when the nefarious deed was done, and three days later, or early on Sunday morning, news was brought to the Apostles, and the Church generally, by certain women of their company who had visited the sepulchre, that a resurrection had taken place (Matt. xxviii.; Mark xvi.; Luke xxiv.; John xx. xxi.). At a subsequent interview with their risen Lord He gave the Apostles and their successors a commission to make disciples of all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost (Matt. xxviii. 19, &c.); and about forty days after the crucifixion He led them out as far as Bethany and lifted up His hands and blessed them. "And it came to pass, while He blessed them, He was parted from them, and carried up into heaven" (Luke xxiv. 50, 51.). He had predicted His cruel death, His resurrection on the third day (Matt. xx. 19), and His ascension (John xx. 17), and had intimated that at a future period He would again return to the earth in glory (Matt. xxvi. 64, &c.). For the leading dates connected with the life of Christ, see CHRISTIAN ERA; for more details regarding the doctrines, and for the subsequent history of the Christian Church, see CHRISTIANITY.

Christ: Personal appearance: In the days of Christ it was a custom of the Roman governors of Judea to keep the government of Rome well informed on all important events. One of the letters sent to the Senate of Rome by Publius Lentulus in the days of Tiberius Cæsar is said to have been largely concerned about Jesus Christ the new Prophet of Truth. The letter is very interesting on account of the description it gives of the personal appearance of Jesus Christ. It runs thus:

"Conscript Fathers: There appeared in these our days a man of great virtue, named Jesus Christ, who is now living among us. Of the Gentiles he is accepted as a Prophet of Truth; but his own disciples call him the Son of God. He raiseth the dead and cureth all manner of diseases. A man of stature somewhat tall and comely, with a very reverend countenance, such as beholders may both love and fear. His hair is of the color of a filbert fully ripe, plain to the ears, whence downward it is more orient of color, somewhat curled and waved about his shoulders. In the midst of his head is a seam or partition of his hair, after the manner of the Nazarites. His forehead is smooth and delicate, his face without spot or wrinkle, beautiful with a comely red; his nose and mouth exactly formed; his beard thick, the color of his hair, not of any great length, but forked; his look innocent; his eyes gray, clear and quick; in reproving, terrible; in administering, courteous; in speaking, very modest and wise; in proportion of body, well shaped. None have ever seen him laugh, but many have seen him weep; a man for his singular beauty surpassing the children of men."

Christ-cross, ***criss-cross**, ***crist-cross**, *s.* Mark of the cross, as cut, painted, written, or stamped on certain objects.

1. As the sign of twelve o'clock.

"Fall to your business soundly; the fescue of the dial is upon the *christ-cross* of noon."—*The Puritan*, iv. 2. (Nares.)

2. Probably the Alpha and Omega, or beginning and end.

"Christ's cross is the *crist-cross* of all our happiness."—*Quarles: Emblems*. (Nares.)

Christ-cross-row, **criss-cross-row**, *s.* The alphabet; so called according to some because a cross

was placed at the beginning of it, or according to others, because it was frequently from superstitious ideas written or printed in the form of a cross.

"From infant conning of the *Christ-cross-row*
Or puzzling through a primer, line by line."
Wordsworth: Excursion, bk. viii.

Christ's-eye, *s.*

Bot.: A plant, *Inula Oculus Christi*.

Christ's-hair, *s.*

Bot.: *Scolopendrium vulgare*.

Christ's-herb, *s.*

Bot.: *Helleborus niger*.

Christ's-ladder, ***Christis-leddere**, *s.*

Botany:

Erythraea Centaurium. Prior suggests that it was originally called *Christ's-gall* or *Christis schale* = Christ's-cup, which being mistaken for *Christi scala* gave rise to the latter popular name.

Christ's-thorn, *s.*

Bot.: *Paliurus aculeatus*, a plant so called from its being believed by many to be the plant from which the crown of thorns was made which was placed on the head of our Savior. It is a common plant in Palestine, and being very pliable, is capable of being woven into any shape. The fruit has a singular appearance, resembling a head with a broad-brimmed hat. The spines are long and sharp, the flower rose-shaped.

Christ's-wort, ***Christes-wurte**, *s.*

Bot.: *Helleborus niger*; also called *Christmas-rose* (q. v.).

"*Christes wurte* flowreth al bytimes about Christmas."—*Lyte*, p. 351.

Christ-tide, *s.* [Eng. *Christ*, and *tide* (q. v.).] Christmas; the season of Christmas.

"Let *Christ-tide* be thy fast."

Cartwright: The Ordinary, 1651.

christ-a-dēlph'-i-ang, *s. pl.* [Gr. *Christos* = Christ, and *adelphoi* = brethren.] A sect of Christians calling themselves the brethren of Christ, and as such claiming to take their origin from the Apostles themselves. [THOMASITE.]

***christ'-al**, ***christ'-all**, *a. & s.* [CRYSTAL.]

"And in his waters, which your mirror make,
Behold your faces as the *christall* bright."

Spenser: Epithalamion.

***Christ'-dōm**, *s.* [Eng. *Christ*; suff. -dom.] The rule of Christ; Christendom.

"Slaves without the liberty in *Christdom*."—*Mrs. Browning: Cry of the Children*.

christ'-en, ***crist'-en** (*t* silent), *v. t. & i.* [A. S. *cristnian*=to make a Christian; *cristen*=a Christian; O. F. *chrestienner*.]

A. Transitive:

1. To receive into the Christian Church by baptism, at which a Christian name is given to the child baptized.

¶ The term is limited by some to the portion of the church service at which the reception into the church is made. Thus a child may be baptized privately, but the ceremony of receiving into the church or christening is done publicly in a consecrated building.

"... children might be *christened*, if such were the wish of their parents, . . ."—*Macaulay: Hist. Eng.*, ch. ix.

*2. To christianize; to convert to Christianity.

"I am most certain this is the first example in England since it was first *christened*."—*Jeremy Taylor: Discourse on Extempore Prayer*.

3. To name, to denominate; to give a name to.

"Where such evils as these reign, *christen* the thing what you will, it can be no better than a mock millenium."—*Burnet*.

4. To use for the first time. (Often said of a cup.)

B. Intrans.: To be competent to administer the rite of baptism.

"This should not exempt them . . . nay, though they should *christen* and receive the sacrament therein."—*Ayliffe: Parergon*, 456.

christ'-en-dōm, ***crist'-en-dōm**, ***crist-in-dom**, ***cryst-yn-dame**, ***crist-ene-dom** (*t* silent), *s.* [A. S. *cristendom*, *cristenandom*.]

*1. Baptism, from the idea, formerly almost universally entertained, that the administration of baptism made a man a Christian.

"Sothli me ben togedere biried with him be *Christendom*. [Vulg. per baptismum.]"—*Wycliffe: Rom.* vi. 4.

*2. Christianity, the Christian religion.

"Er Seint Austyn to Engelande broughte *cristendom*."—*St. Dunstan*, 60.

*3. The name received at baptism; a Christian name; hence, any appellation or name.

4. That portion of the world in which Christianity is the recognized or prevailing religion, or which is governed in accordance with Christian doctrines, as opposed to heathen or Mohammedan countries.

"Like a tench? by the mass, there is ne'er a king in *Christendom* could be better bit than I."—*Shakesp.: Henry IV.*, ii. 1.

5. The members of the Christian Church; the whole body of Christians collectively.

"The destruction of Jerusalem is the only subject now remaining for an epic poem; a subject which, like Milton's Fall of Man, should interest all *Christendom*, as the Homeric War of Troy interested all Greece."—*Coleridge: Table Talk*.

***chrīs'-tēn-ēr** (*t* silent), *s.* [Eng. *christen*; -er.] The priest who performs the ceremony of baptism. (*Latimer*.)

chrīs'-tēn-ing (*t* silent), *pr. particip.*, *a. & s.* [CHRISTEN.]

A. As pr. par.: (See the verb.)

B. As particip. adj.: Pertaining to, or connected with, the ceremony of christening.

"My thoughts no *christening* dinners crost,
No children cry'd for butter'd toast."

T. Warton: Progr. of Discontent.

C. As subst.: The act or ceremony of admitting into the Christian Church, or of naming generally.

"The success of the launch was most complete, and the *christening* of the ship . . . was followed by hearty cheering."—*London Times*, December 2, 1875.

***Chrīs'-tēn-tēe**, *s.* [CHRISTIANITY.] Christendom.

"Some publique officers of *Christentee*."—*Udall: Apoph. of Erasmus*, p. 118.

***Christ'-hood**, *s.* [Eng. *Christ*; -hood.] The state or condition of being the Christ. (*Chester Plays*, ii. 33.)

Christ'-i-an, ***chist-en**, ***cryst-yne**, **crist-ene**, *s. & a.* [A. S. *cristen*; O. Sax. *kristin*; O. Fris. *kristen*; O. Icel. *kristinn*; Sw. *kristen*; Da. *christen*; O. Fr. *christian*, *christien*; Fr. *chrétien*, all from Lat. *christianus*; Gr. *christianos*, from *christos*=Christ. Trench draws attention to the fact that we never in the New Testament find the word applied to the followers of Jesus, except by their adversaries, and that it was not introduced till the preaching of Paul to the Gentiles of Antioch, and other causes, showed that the disciples of the Crucified One indicated by their devout Master aimed at making their religion that of the entire world. The application of the name Christian showed that the faith so designated was perceived to be not a Jewish sect, but a religion freed from nationality or from locality, that it might better discharge its mission to the world. (*Trench: On the Study of Words*, pp. 99, 100.)]

A. As substantive:

1. One who believes or professes the religion of Christ; a follower of Christ.

"This Makometh was a *cristene*."—*Langland: P. Plowman*, 10,418.

"The disciples were called *Christians* first in Antioch."—*Acts* xi. 26.

2. One who is born in a Christian country or of Christian parents.

3. *Plural*:

(1) A name assumed by a denomination in this country, to express their alleged renunciation of all sectarianism. They are rather numerous. They have no creed, nor authority in matters of doctrine, but leave to each individual the interpretation of Scripture, and the determination thereby of his belief. They may be regarded as a sect of Baptists.

(2) In the British Registrar-General's lists for 1881 of religious denominations having certified places of worship in England and Wales, the two following occur—(a) Christians owning no name but the Lord Jesus; and (b) Christians who object to be otherwise designated.

B. As adjective:

1. Believing in or professing the religion of Christ.

"*Cristene* men ogen ben so fagen."—*Genesis and Exodus*.

"... the most *Christian* barbarian who had perpetrated on Christians outrages of which his infidel allies would have been ashamed."—*Macaulay: Hist. Eng.*, ch. xi.

2. Pertaining to Christ or his religion.

3. Pertaining to the Church of Christ; ecclesiastical.

"In briefly recounting the various species of ecclesiastical courts, or, as they are often styled, *Courts Christian*, I will begin with the lowest."—*Blackstone: Commentaries*.

4. Civilized.

¶ The most *Christian king*, a title bestowed by Pope Gregory the Great upon Charles Martel, and retained by subsequent French kings, as the great supporters of the Church.

"William declared aloud at his table before many persons that he would make the most *Christian King* repent the outrage, . . ."—*Macaulay: Hist. Eng.*, ch. vii.

Christian architecture, s. The introduction of Christianity naturally had its effect on the style of architecture adopted for religious buildings. The Roman Early Christian style appeared first in basilicas and circular churches. The former were, doubtless, originally built on the model of the Roman basilicas [BASILICAS], but the requirements of the new religion soon necessitated various modifications in the original plan. The Christian basilicas were constructed generally with three aisles: the central one broader than the others, the left or north being reserved for males and the right or south for females. Sometimes we find five aisles. The building terminated in a semi-circular apse. The decorations consisted of paintings and mosaics, used mainly in the apse. The pillars were generally of the Corinthian order. [CORINTHIAN.] Symbols were largely introduced. These were the cross, the monogram of Christ, a lamb or a dove, as typifying the Holy Spirit, and a fish, used as a symbol of Christ from the letters of the Greek word *ichthys*=a fish, forming the initials of the titles of our Lord, *Iēsous Christos, Theou huios, sōtēr*=Jesus Christ, the Son of God, the Savior. The roofing was of beams with flat paneling, frequently gilt. The altar stood at the east end in front of the apse. The space round the altar was raised off and called the sanctuary. Adjoining the entrance was generally a narrow space called the Narthex. [NARTHEX.] In the middle of a portico in front of the building was a bowl for washing the hands. [CANTHARUS.] A crypt was constructed under the altar for the reception of the bones of the patron-saint.

Christian Endeavor, Young People's Society of, s. A non-sectarian evangelical organization of young people connected with various evangelical churches throughout the world, having for its motto "For Christ and the Church." The first society was formed February 2d, 1881, in the Williston Church, Portland, Me., by Rev. Francis E. Clark. In November, 1896, the organization had increased to 47,009 societies, with a membership of 2,800,000, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan, and in all missionary lands. The general organization or United Society is simply a bureau of information for all the societies, each local society managing its own affairs in its own way. It is controlled by a board of trustees, representing the great evangelical churches, who meet quarterly.

Christian courts, s. pl.

Law: The same as ECCLESIASTICAL COURTS.

Christian era, s.

Chron.: The era or epoch introduced by the birth of Christ. It was calculated back about the year 532, by a monk, Dionysius Exiguus (the latter word, meaning little, being assumed either because his stature was diminutive or because he modestly believed his mental powers small, which they were not). It is thought that he fixed the advent too late by four years, and that consequently Jesus was born, if the contradiction in terms can be permitted, in B. C. 4. Mr. J. W. Bosanquet considers that it was in B. C. 3. On these views the year 1894 of the Christian era is really 1897 or 1898. The Christian era is sometimes called the Dionysian era.

Christian name, s. The name given to a child on its admission into the Christian Church at baptism, as distinguished from the surname or family name.

Christian period, s.

Archæol.: The period from the introduction of Christianity till now. It varies in different countries.

Christian Science, s. A religious system discovered and founded by Rev. Mary Baker Eddy, of Boston, in 1866. The growth of the denomination has been rapid and in 1905 there are about 850 organized societies or churches in America and Europe. The extract below, written by Mr. Edward A. Kimball, one of its adherents, will give some idea of its claims and tenets:

Christian Science is the explication of Truth or the Science of Being, reducing to human apprehension and demonstration the Divine Nature and Law, manifested in the annihilation of sin, sickness and death.

Christian Science is Christ Science, or "God with us," and involves the ultimate of all reason, revelation and inspiration. This church is built upon the spiritual interpretation of the Scriptures.

In *Christian Science* God is revealed and demonstrated as omnipresent, omnipotent and omniscient Spirit; as infinite Life, Intelligence, Love and Substance. It reveals God-created and God-governed man as His likeness, having dominion over evil. This at-one-ment of man with God, Jesus demonstrated. *Christian Science* unites true science and true Christianity, basing its Scientific character on demonstrable truth. In theology it includes the worship of one infinite individual God. It acknowledges the divinity and Messiahship of Christ. It accepts the Bible as containing the inspired word of God, and holds to every essential belief of true Christianity.

It differs from all other phases of Christianity by claiming that the efficacy of its theology heals sickness as well as sin according to the command and example of Jesus.

In verification of this it is claimed that hundreds of thousands of instances of disease pronounced incurable have been healed thereby. The only text book of *Christian Science*, is "Science and Health, With Key to the Scriptures," by Rev. Mary Baker Eddy.

Christian Scientist, s. A believer in the doctrines outlined under Christian Science. *Supra.*

Chris'-ti-an, v. t. [CHRISTEN.] To convert to Christianity; to baptize.

"You allege the practice of all churches *christianed* to the contrary."—*Falke: Against Allen* (1886), p. 252.

Chris'-ti-an'-i-ty, *cris'-ti-en-te, *crys-ty-an-te, *cris-tan-te, s. [O. Fr. *crestientet*, *crestiente*; Fr. *chrétienté*, from Lat. *christianitas*.]

1. Christendom; the professors of the Christian religion.

"There was never no better in *crystyante*"—*Nugæ Poeticæ*, p. 57.

2. The Christian religion; the doctrines and precepts taught by Christ.

"What make ye of your *Christianities*, and Chivalries, and Reformations, and Marsellise Hymns, and Reigns of Terror?"—*Carlyle: Sartor Resartus*, bk. iii., ch. iii.

¶ To take a comprehensive view of Christianity, attention should be given to (1) its doctrines, (2) its government and discipline, and (3) its history from the time that it was introduced into the world until now.

(1) *The Doctrines of Christianity:* Though the professors of Christianity have separated into many sects, as have the Mohammedans, the Brahmanists, and others, yet all but a small minority are really at one with respect to certain great fundamental doctrines. Christians believe in a Supreme Being—the one living and true God. The immense majority hold that it is not inconsistent with monotheism to accept the tenet that in the Divine Unity there is a Trinity, the Father, the Son, and the Holy Spirit, to all of whom worship of the highest kind can be paid. Jesus Christ is identified by them with the second person of the Godhead, and is held to be at once God and Man. As God He existed from eternal ages, and was not first brought into being when born at Bethlehem. They consider that He was miraculously conceived by the Holy Ghost, and that His mother remained the Virgin Mary after having brought Him into the world. The reason why He came to this earth is held to have been that He had been commissioned by His Eternal Father to undertake a mission of mercy to the earth. Another tenet of their faith represents man as having been created innocent, but to have fallen, and now to be guilty and in need of a Savior. Christ is believed to have been that Divine Savior. His life on earth is regarded as having been perfect, so that He constitutes the exemplar for all mankind. His death is held to have been an atonement for sins not His own, and to have been so important that to it all Jewish ceremonies and symbols and all Messianic prophecy, as with a finger, pointed. Faith in His Divine mission and work, and specially on the efficacy of His death, are insisted on to put sinners in possession of the benefits purchased by their Redeemer's death. The historic facts of His resurrection and ascension are pointed to as evidences of the sanction and acceptance of His work by His Heavenly Father, and implicit trust is expressed in His coming again agreeably to His promise to earth, and in His ultimately becoming the Judge of the world. At the final assize it is believed that those whose good deeds show that they have believed in Him, shall be rewarded by eternal felicity, while everlasting misery shall be in store for those who have been faithless and wicked. The acceptance of this creed by man in his fallen state, is held to be

impossible without Divine assistance, and it is considered that the Holy Ghost, if solicited, will give the requisite spiritual power to produce faith in the most unbelieving heart. The Scriptures of the Old and New Testaments are regarded as possessing inspiration in a sense in which no other book has it, and as being, therefore, in the highest degree fitted to enlighten inquiring minds as to religious duty.

A. As substantive:

1. The festival of the Nativity of Christ, observed by the Christian Church yearly on the 25th of December.

¶ Augustine considered the festivals, Good Friday, Easter Sunday, Ascension Day, and Whitsuntide, as the only festivals which had an Apostolic origin and the sanction of a general council. Christmas he deemed to be of later origin and lesser authority. When the first efforts were made to fix the period of the year when the advent took place, there were, as we learn from Clement of Alexandria, advocates for the 20th of May and for the 20th or 21st of April. The Oriental Christians generally were of opinion that both the birth and baptism of Jesus took place on the 6th of January. Julian I., bishop of Rome from A. D. 337-352, contended for the 25th of December, a view to which the Eastern Church ultimately came round, while the Church of the West adopted from their brethren in the East the view that the baptism was on the 6th of January. When the festival was at length placed in December, it afforded a substitute to the various nations who had observed a festival of rejoicing that the shortest day of the year had passed, besides spanning over the great interval between Whitsuntide of one year and Good Friday of the next. Coming to the Roman Christian converts, in lieu of the saturnalia, to which they had been accustomed while yet they were heathens, its purity became sullied almost at the first by revelry which had crept into it from this source. Similarly the Yule log, the mistletoe, &c., among English speaking peoples, are relics of Druidism.

2. The season of Christmas, *i. e.*, from Christmas-eve to Old Christmas-day, or Twelfth-night, January 6th.

"Ine zuyche festes ase at Cristesmesse."—*Ayenbite of Inweyt*, p. 213.

†Chrīs-tōl'-ō-gy, s. [Gr. *Christos*=Christ; *logos*=a discourse, *legō*=to tell, to discourse.] A discourse concerning Christ, or the doctrines of the Christian Church.

"The reader will find in this author an eminent excellence in that part of divinity which I make bold to call *Christology*, in displaying the great mystery of goodness, God the Son manifested in human flesh."—Trench; *On the Study of Words*, p. 132.

chrīs-tō-lyte, s. [Gr. *Christos*=Christ, and *lyō*=to lose.] One of a sect of Christians in the sixth century, who held that, when Christ descended into hell He left both His body and soul there, and rose with His Divine nature alone. (Ogilvie.)

chrīs-tōph'-an-ŷ, s. [Gr. *Christos*=Christ, and *phainō*=to bring to light, to make to appear.] An appearance of Christ, used especially of His several appearances to His disciples between His resurrection and His ascension.

"The order in which he enumerates his *christophanies*."—Strauss; *Life of Jesus*; Trans. (1846), § 138.

chrīst'-ō-phīte, s. [From St. Christophe mine at Breitenbrunn, where it is found; and suff. -ite (Min.) (q. v.).]

Min.: A brilliant black blende, a variety of Sphalerite or Blende (q. v.). Specific gravity, 3.91-3.923.

chrō-ās'-ta-gēs, s. pl. [Gr. *chroa* or *chroia*=color, and *astakos*=a crab.] A variety of semi-transparent gems, comprehending all those of variable colors, when viewed in different lights.

chrō'-ma-scōpe, s. [Gr. *chrōma*=color; *skopeō*=to view, to examine.] An instrument to exhibit the three optical effects of colors: (1) The refraction of prisms and lenses; (2) The transmission of light through transparent media; (3) The reflection of speculums.

chrō'-māte, s. [CHROMIUM.]

Chromate of iron:

Min.: The same as *Chromite* (q. v.).

Chromate of lead:

1. Chem.: PbCrO₄. A lead salt of chromic acid. [CHROMIUM.]

2. Min.: The same as *CROCOITE* (q. v.).

3. Dyeing, &c.: The various chromates of lead are used to give yellow and red colors.

Chromate of lead and copper:

Min.: The same as *VAUQUELINITE* (q. v.).

Chromate of potassium:

Chem., &c.: The potassium salt of chromic acid, much used, as is the bichromate, in calico-printing, and for making pigments. Soluble chromates are detected by giving a yellow precipitate with plumbic acetate, a crimson red precipitate with argentic nitrate.

chrō-māt'-ic, *chrō-māt'-ick, a. [Fr. *chromatique*; Lat. *chromaticus*, from Gr. *chrōmatikos*=suited for color; *chrōma*=color.]

1. Relating to color, or colors; colored.

"These actions often display themselves in *chromatic* phenomena of great splendor."—Tyndall; *Frag. of Science*, 3d ed., vi. 116.

2. Pertaining to a scale of semitones in music; including notes not belonging to a diatonic scale. [CHROMATIC SCALE.]

chromatic aberration, s.

Optics: (See extract.)

"In the refracting telescopes . . . the different refrangibility of the different colored rays presents an obstacle to the extension of their power beyond very moderate limits. The focus of a lens being shorter as its refractive index is greater, it follows, that one and the same lens refracts violet rays to a focus nearer to its surface than red. . . . If the paper be held in the focus for mean rays, or between the vertices of the red and violet cones, these will then form a distinct image, being collected in a point; but the extreme, and all the other intermediate rays, will be diffused over circles of sensible magnitude, and form colored borders, rendering the image indistinct and hazy. This deviation of the several colored rays from one focus is called *chromatic aberration*."—*Encyclopedia Metropolitana*; *Light*.

chromatic chord, s.

Music: A chord which contains a note or notes foreign to diatonic progression. (Stainer & Barrett.)

chromatic harmony, s.

Music: Harmony made up of chromatic chords. (Stainer & Barrett.)

chromatic interval, s.

Music: An interval which is augmented or diminished. (Stainer & Barrett.)

chromatic modulation, s.

Music: Modulation in which, by means of chromatic harmony, there is a passing into an extreme key. (Stainer & Barrett.)

chromatic printing, s. The art of printing in colors. [CHROMO-TYPE.] (For a description of the process, see *Knight*; *Dict. of Practical Mechanics*, 1. 544.)

chromatic scale, s.

Music: A scale which proceeds by semitones.

chromatic thermometer, s. When the edge of a rectangular plate of glass is applied to a piece of heated metal, or other substance having a temperature different from that of the glass, and exposed to a beam of polarized light, colored fringes are developed. As the different tints depend on the different temperatures of the glass (which is supposed to be known), and that of the object to which it is applied, the color of the central fringe affords a means of inferring approximately the temperature of the substance. (Knight.)

chromatic type, s. Type made in parts, which are inked of various colors and separately impressed, so as to unite into a variegated whole.

*chrō-māt'-ī-cal, a. [CHROMATIC.]

chrō-māt'-ī-cal-ly, adv. [Eng. *chromatical*; -ly.] In a chromatic manner.

chrō-māt'-icē, s. [Eng. *chromatic*, with sign of plural in Gr. *chrōmatika*.] (See extract.)

"The science which examines and explains the various properties of the colors of light and of natural bodies, and which forms a principal branch of optics, has been properly denominated *chromatics*, from the Greek word *chrōma*, which signifies color."—Rees; *Cyclopædia*; *Color*.

chrō-ma-tid'-ī-ūm, s. [Gr. *chrōma*, genit. *chrōmatoes*=color; *eidos*=appearance.] The coloring matter of plants.

chrō'-ma-tin, s. [Gr. *chrōma*=color.] The tingible portion of the protoplasm, forming a delicate plexus of fibrils permeating the achromatin of a typical cell in process of division.

chrō'-ma-tism, s. [Gr. *chromatizmos*=a coloring, a dyeing.]

Bot.: The same as *CHROMISM* (q. v.).

chrōm-a-tō-dys-ōps'-ī-a, s. [Gr. *chrōma*, *chrōmatoes*=color; *dys*=bad, and *ops*=the eye.]

Med.: The same as *CHROMATOPSEUDOPSIA* (q. v.).

chrō-ma-tōg'-raph-ŷ, s. [Gr. *chrōma*=color; *graphē*=a writing, a treatise, *graphō*=to write, to describe.] A discourse or treatise on chromatics.

chrō-ma-tōl'-ō-gy, s. [Gr. *chrōma*=color; *logos*=a discourse.] A treatise on colors. (Field.)

chrōm-a-tō-mēt-a-blēps'-ī-a, s. [Gr. *chrōma*, *chrōmatoes*=color, and *metablepō*=to look from one place to another.]

Med.: The same as *CHROMATOPSEUDOPSIA* (q. v.).

chrō-ma-tōm'-ē-tēr, s. [Gr. *chrōma*=color, and *metron*=a measure.] A scale for measuring the degrees of colors.

chrō-māt'-ō-phōres, s. pl. [Gr. *chrōma*, *chrōmatoes*=color, and *phorēō*=to bear.]

Zoöl.: Little sacs with pigment granules in the integument of cuttle-fishes and other animals. These pigment cells being movable enable some animals to vary their colors under the influence of excitement or other causes. (Nicholson.)

chrōm-a-tō-pseū-dōp'-sī-a, s. [Gr. *chrōma*, *chrōmatoes*=color, and *pseudo* in compos.=false, &c.]

Med.: A term used synonymously with *chromatodysopsia* and *chromato-metabepsia* to signify a defect in the power of distinguishing different colors. [COLOR-BLINDNESS.]

chrō'-ma-trōpe, chro'-mō-trōpe, s. [Gr. *chrōma*=color; *tropē*=a turning, *trepō*=to turn, to twist.] An arrangement in a magic-lantern similar in its effect to the kaleidoscope. The pictures are produced by brilliant designs being painted upon two circular glasses, and the glasses being made to rotate in different directions. An endless variety of changes in the pattern are caused by turning the wheel, sometimes slowly, then quickly, backward and forward. (Knight.)

chrō'-ma-type, s. & a. [Gr. *chrōma*=color; *typos*=type.]

A. As substantive:

Photography:

(1) A process in which the chromic acid is deoxidized. There are several modes of getting photographs by the chromic salts, preferably the bichromate of potash. The process in itself is simple. Suppose a landscape in colors is desired. In the camera is placed a sensitive plate which will absorb only the yellow rays of light coming from the subject. No matter how minute the quantity, the yellow in each of the different colors will affect the plate in due proportion. This plate is then exposed and is replaced by another so sensitized that it will only take the red rays in the various colors; then another affected only by the blue rays is exposed. In this way the exact proportions of yellow, red and blue, the combinations of which will produce any color, are obtained. Half-tone printing blocks are made from these negatives, and the completion of the work is merely a matter of printing. The yellow is printed first; then the red, and finally the blue completes the picture, reproduced in exactly the same colors, with all the shadings, as in nature. It is a mechanical method of making color blocks by which the primary colors are so delicately divided that the combinations reproduce all the shadings, thus making effects in three printings that formerly required from ten to twenty impressions. The eye of man is not so exact in analyzing the compositions of colors as the sensitive plates which have recently been discovered.

(2) A photographic picture in the natural colors produced by the chromatype process.

B. As *adj.*: Of or pertaining to the process described under A; executed by that process.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șūn; -țion, -șion = zhūn. -tious, -cious, -sious = șūș. -ble, -dle, &c. = bel, del.

chrōm'-chlōr-īte, *s.* [Gr. *chrōma*=color; and Eng. *chlorite*.]

Min.: A reddish-violet micaceous mineral from Texas; a variety of Penninite (q. v.). (*Dana*.)

chrōme, *s. & a.* [CHROMIUM.]

chrome-alum, *s.*

Chem.: $K_2SO_4 \cdot Cr_2(SO_4)_3 \cdot 24H_2O$. It is a crystallizable purple double salt of sulphate of chromium and sulphates of potassium, sodium or ammonium, having the formula of common alum, the alumina being replaced by sesquioxide of chromium.

chrome-color, *s.* Properly, any color prepared from the salts of chromium, but generally applied to any color which, when dry, is of a soft powdery consistence, and may be mixed with oil without grinding. (*Ogilvie*.)

chrome-green, *s.* A pigment of a beautiful dark-green color, prepared from the oxide of chromium.

chrome-iron, chromiron, *s.*

Min.: FeO, Cr_2O_3 , the ore from which chromium is obtained. [CHROMIUM.]

chrome-ochre, *s.*

Min.: A clayey material, containing some oxide of chrome. It is of a bright-green shade of color. Composition. Silica, 57.0-64.0; alumina, 22.5-30.00; oxide of chromium, 2.00-10.5; sesquioxide of iron, 0.00-3.5; water, 0.00-11.0. (*Dana*.)

chrome-orange, *s.* A pigment of a dark-orange color, prepared from the subchromate of lead.

chrome-red, *s.* A pigment of a beautiful red color; a basic red chromate.

chrome-yellow, *s.* A yellow pigment prepared of lead chromate. It is of various shades, from deep orange to pale yellow. [CHROMIUM.]

chro-mēid'-ō-scōpe, *s.* [Gr. *chrōma*=color; *eidos*=form, appearance; *skopeō*=to see.] The same as DEBUSCOPE (q. v.).

chrō-mic, *a.* [Eng. *chrom(e)*; -ic.] Pertaining to chrome, or prepared from it.

chromic acid, *s.*

Chem.: Chromium trioxide, $CrO_3 + H_2O$, a substance obtained from chromium, much used by dyers and calico-printers for dyeing orange or red colors. It may be prepared by adding gradually from 120 to 180 parts, by volume, of pure concentrated sulphuric acid to 100 parts of a cold saturated solution of bichromate of potash. The crystals of the trioxide separate as the solution cools. The mother liquor should be poured off, and the crystals dried upon a tile; they may be purified by recrystallization from solution in water. With excess of sulphuric acid, chromic acid is a valuable reagent for dissolving the intercellular substance of plants; it is also much used in organic chemistry as a powerful oxidizing agent. Chromic acid is readily decomposed by organic matter, as dust, &c., and must therefore be preserved in a well stoppered bottle. Its aqueous solution, which should be of a pale-yellow color, is used for hardening and preserving nervous and muscular tissues, &c. It should be prepared when required. Chromic acid, H_2CrO_4 , only exists in solution. It dyes wool and silk yellow, but will not dye cotton. Chromic acid boiled in wine dyes wool a clear brown color, if no coloring matter, acted upon by the acid, has been added to the wine.

chromic iron, chromic iron ore, *s.*

Min.: The same as CHROMITE (q. v.).

chromic mica, *s.*

Min.: The same as FUSCHITE (q. v.).

chrōm'-ī-dæ, *s. pl.* [From Mod. Lat. *chromis* (q. v.), and fem. pl. adj. suff. -īdæ.]

Ichthy.: A family of Pharyngognathous fishes. They have fleshy lips, and the lateral line interrupted. They are found mostly in fresh water in the hotter parts of the world, though one species is in the Mediterranean. [CHROMIS.]

chrō-mī-ōm'-ē-tēr, *s.* [Gr. *chrōma*=color, and *metron*=a measure.] An instrument for determining the purity of water by its colorlessness. It consists of a glass tube of about a yard in length, closed at the end by a cork, and resting upon a white dish of porcelain. A green tinge is produced by minute algæ, a white opacity often by fungoid growths; iron salts are indicated by a peculiar ochry color.

chrōm'-īr-ōn, *s.* [CHROME-IRON.]

chrō-mis, *s.* [Gr. *chrōma*=color.]

Ichthy.: A genus of fishes belonging to the Chaetodonts; sub-family, Labrinæ.

chrōm'-īsm, *s.* [Gr. *chrōma*=color, and Eng. suff. -ism.]

Bot.: An abnormal coloring of plants. It is called also Chromatism.

chrō'-mīte, *s.* [Eng. *chrome*, and suff. -ite (Min.).]

Min.: An isometric mineral of a submetallic luster; color between iron-black and brownish-black, streak brown; opaque, and brittle. It is widely distributed in America, Asia Minor, &c. Hardness, 5.5; specific gravity, 4.321. Composition: Protoxide of iron, 18.0-38.95; magnesia, 0.0-18.13; oxide of chromium, 39.51-63.38; alumina, 0.0-19.84; silica, 0.0-10.60. (*Dana*.)

chrō'-mī-ūm, *s.* [Gr. *chrōma*=color.]

Min.: A metallic tetrad element discovered by Vauquelin in 1797; symbol, Cr.; atomic weight, 52.2; specific gravity, 6. The chief ore of this metal is chrome-iron, FeO, Cr_2O_3 , found in the Shetland Islands, and a lead chromate $PbCrO_4$. The metal is obtained by the action of sodium vapor on red-hot chromium trichloride. It forms hard gray cubic crystals, infusible, insoluble in concentrated acids. Chromium forms with oxygen the following oxides: CrO , Cr_2O_3 , Cr_3O_4 , CrO_3 . All compounds of chromium are prepared from the *chromates*. Chrome-iron ore is fused with carbonate of potassium and chalk, and the fused mass is treated with water, and a soluble yellow chromate of potassium, K_2CrO_4 , is obtained; it crystallizes in yellow rhombic anhydrous crystals, isomorphous with potassium sulphate; it dissolves in 2 parts of water at 16°; its solution is of a strong yellow color, even when dilute. *Chromium dichromate*, or bichromate of potassium, $K_2Cr_2O_7$, is obtained by adding sulphuric acid to the chromate; it crystallizes in red triclinic crystals; it is used for making pigments. It dissolves in 10 parts of water at 16°. Lead chromate, $PbCrO_4$, a fine yellow precipitate, is obtained by adding a soluble lead salt to a solution of potassium chromate; it is called *chrome-yellow*. By heating it with saltpeter it is converted into a basic red chromate, called *orange-chrome* or *chrome-orange*. Chromium trioxide CrO_3 is formed by adding excess of H_2SO_4 to potassium chromate; it forms soluble red needle crystals, which are reduced by organic matter to *sesquioxide of chromium*. By heating to redness potassium dichromate it is converted into neutral chromate and *sesquioxide of chromium*, Cr_2O_3 , which is a beautiful green powder, giving a green color to glass and porcelain; it is nearly insoluble in acids. The pigment used to produce a pink color on earthenware is made by heating to redness a mixture of thirty parts of peroxide of tin, ten of chalk, and one of potassium chromate; the product is powdered, and washed with hydrochloric acid. The hydrated oxide can be obtained as a green precipitate by adding ammonia to one of its salts. Chromic chloride Cr_2Cl_6 and chromic sulphate $Cr_2(SO_4)_3$ are obtained by dissolving the hydrated oxide in the acid. The salts of chromium sesquioxide exist in green and in violet-red modifications. Potassium dichromate is easily reduced by boiling it with hydrochloric acid and alcohol to chromium sesquichloride and chloride of potassium. When sulphuric acid is used, chrome-alum, a double sulphate of chromium and potassium, is obtained, which has a deep violet tint. *Chromium monoxide* chromous oxide, CrO , absorbs oxygen rapidly; it is only known in the form of hydrate $Cr(OH)_2$. *Chromium dichloride*, $CrCl_2$, is a powerful deoxidizer. Chromium salts are easily detected by giving in both the inner and outer blow-pipe-flame green beads with borax, by forming a yellow soluble salt when fused with an alkali, which is converted into a green solution by reducing agents. Ammonia gives a green precipitate with the sesqui-salts. Potash and soda hydrates give a precipitate of $Cr_2(OH)_6$, soluble in excess, re-precipitated on boiling. Ammonium sulphide precipitates the hydrated green sesquioxide of chromium $Cr_2(OH)_6$. Chromium can be detected in the presence of the other metals of this group, by fusing the precipitate with KNO_3 , or platinum-foil, treating the fused mass with water, filtering, acidifying with acetic acid, and adding plumbic acetate, which precipitates yellow plumbic chromate.

chrō'-mō (1), *in compos.* [Gr. *chrōma*=color.]

chromo-lithograph, *s.* A lithograph printed in colors.

chromo-lithographer, *s.* A printer of chromo lithographs.

chromo-lithography, *s.* The art of printing chromo-lithographs.

(1) *Hist.*: Color-printing was first used in Europe in illuminating missals and making playing-cards, but it was not successful till it was combined with lithography, invented between A. D. 1796 and 1800 by Alois Senefelder of Prague.

(2) *Present Process*: An outline-drawing is first traced, then various stones are taken, one for each color, to which the drawing is transferred. Then the artist puts in the colors, with soap, of the tints required. Next the slab is put upon the press and carefully damped with a sponge, after which the oil color is applied with a leathern roller; the parts

of the slab which contain no drawing, being wet, resist the ink, while the drawing itself, being oily, repels the water while retaining the color.

chromo-scylograph, *s.* A colored picture produced by a succession of wooden blocks, each bearing its separate color. [CHROMATIC PRINTING.]

chrō'-mō (2), *s.* [See def.] A contraction of chromo-lithograph, first made by Mr. L. Prang, of Boston, Mass.

chromo-type, *s.*

1. *Printing*: A sheet printed in colors. The modes are various, but the usual plan is to prepare a block for each color, or a form for each color, and to place the paper upon each in succession, the exact place being preserved at each impression by means of register pins or a similar device. [CHROMATIC PRINTING; CHROMO-LITHOGRAPHY.]

2. A photographic picture produced in the natural colors. This was long sought by Niepce de St. Victor, and he announced his success even with yellow, but no way has been discovered of fixing these heliochromic pictures.

chrōm'-ō-gen, *s.* [Gr. *chrōma*=color, and *gen-ao*=to produce.]

Chem.: The compound which requires only the presence of a salt-forming group to convert it into a dye-stuff. [CHROMOPHORE.]

chrō-mō-gēn'-ic, *a.* [Eng. *chromogen*; -ic.]

1. Pertaining to chromogen.

2. Color-producing.

chromogenic-bacteria, *s.* Bacteria that produce color or pigment.

chrō'-mō-grāph, *s.* [Gr. *chrōma*=color, and *graphō*=to write.] An instrument used for obtaining several copies of written matter. A substance is prepared by heating gelatine and water with glycerine, and then adding any insoluble white powder to make it firm. It is poured while hot into a shallow tin, and it sets on cooling into a firm mass. It is used as follows: The letter, &c., is written on paper, and a solution of aniline dye is used instead of ink. This is then pressed on the slightly damped surface of the chromograph. On removing the paper the ink has been transferred to the surface, and by pressing sheets of paper on it, many copies of the original writing can be obtained. Common forms of chromographs have been formed by using glue and molasses, &c.

chrō-mō-lēp'-tīs, *s.* [Gr. *chrōma*=color; *leptos*=small.]

Ichthy.: A genus of fishes, belonging to the sub-family Serraninæ, and family Percidæ, or Perches. The body is usually covered with colored spots.

chrō-mō-lith'-ic, *a.* [Gr. *chrōma*=color, and *lithos*=a stone.] (See extract.)

"An impression of a drawing on stone, printed at Paris in colors, by the process termed *chromolithic*."—*Proceed. of Soc. of Antiquaries*, i. 22 (1844). (*Davies*.)

chrō'-mō-phōre, *s.* [Gr. *chrōma*=color; *phōrēō*=to bear, to produce.]

Chem.: The body whose presence in conjunction with a salt-forming group determines the possession of tinctorial power. NO_2 is the chromophore of nitraniline and nitrophenol, and nitrobenzene is their chromogen. (*Watts: Dict. Chem.; Dye-Staffs*, vol. viii., pt. i., p. 696.)

chrō-mo-pho-tōg'-ra-phy, *s.* [Gr. *chrōma*=color, and Eng. *photography*.] The art of producing colored photographs.

chrō'-mō-sphēre, *s.* [Eng. *chromo* (1); *sphere* (q. v.).] The gaseous envelope of the sun, through which the light of the photosphere passes.

¶ *Stellar chromosphere*: The gaseous envelope supposed to exist round each star.

chrō-mō-sphēr'-ic, *a.* [Eng. *chromospher(e)*; -ic.] Of or pertaining to a chromosphere.

chrō'-mōus, *a.* [Eng. *chrōm(e)*, and suff. -ous.] Of the nature of or pertaining to chrome. [CHROMIUM.]

chromous chloride, *s.*

Chem.: $CrCl_2$, a white powder obtained by heating chromic chloride in a stream of hydrogen.

chrō'-mūle, *s.* [Gr. *chrōma*=color; *kylē*=matter as a principle of being.] Any other coloring matter than green; the coloring matter of petals. (*Brown*.)

chrōn'-ic, ***chrōn'-ī-cal**, *a.* [Fr. *chronique*; Lat. *chronicus*; Gr. *chronikos*=pertaining to time, *chronos*=time.]

1. *Ord. Lang.*: Relating or pertaining to time.

2. *Pathol.*: Applied to diseases of long duration, in opposition to *acute* (q. v.).

"... cases which hold an equivocal rank, which are neither decidedly acute nor plainly chronic."—*Watson: Principles and Practice of Physic*, lect. viii.

chrōn'-ī-cle, ***cron-i-cle**, ***cron-y-kylle**, *s.* [Formed as a dimin. from Mid. Eng. *cronique* or *cronike*, used by Gower; from O Fr. *cronique*,

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

pl. *croniques* = chronicles, annals; from Low Lat. *chronica* = a catalogue; from Gr. *chronica* = annals, neut. pl. of *chronikos* = pertaining to time; *chronos* = time. (*Skeat*.)

I. Ordinary Language:

1. Literally:

(1) A register or history of events in regular order of time, a diary, annals. It differs from a history proper in that the events are set down in order of succession barely and simply without any attempt at connection, coloring, or philosophic treatment.

"Old men, for the most part, are like old *chronicles*, that give you dull, but true accounts of times past, and are worth knowing only on that score."—Pope: *Thoughts on Various Subjects*.

(2) A history; a narrative of events (generally in the plural).

"If from the field I shall return once more
To kiss these lips, I will appear in blood;
I and my sword will earn our *chronicle*."

Shakesp.: *Antony and Cleopatra*, iii. 11.

2. *Fig.*: Anything which conveys or suggests the course of events in history.

"Every moldering stone is a *chronicle*."—Irving.

II. *Scripture Canon (Pl.)*: A name applied to two books of the Canonical Old Testament, which immediately follow 1 and 2 Kings. In the Hebrew Bible they form but a single composition, entitled *Dibre Hayamim* = words of days, *i. e.*, diaries or journals. The Septuagint translators were the first to divide the one volume into two, which they called *Paraleipomenōn prōton* and *Paraleipomenōn deuterōn* = the first and the second of things left over, *i. e.*, passed by or omitted by the writers of the books of Samuel and Kings. In the Vulgate, Wycliffe, and the earlier printed versions, they are termed 1 and 2 Paralipomenon (q. v.). Jerome called the undivided book *Chronicon*, and the Vulgate *Chronica* or *Chronicorum liber* [CHRONICON], from the former of which two appellations we derive the name *Chronicles*. To a certain extent the *Chronicles* are supplementary to the books of Samuel and Kings, but in part they also travel over the same ground, the books of Kings, however, regarding events from the prophetic standpoint, while the *Chronicles* do so from the Levitical point of view. The traditional opinion, both among Jews and Christians, regards Ezra as having been the author or compiler of the books of *Chronicles*. If so, then a later hand must have added ch. iii. 19-24, where the descendants of Zerubbabel are enumerated apparently to the third generation. If, on the contrary, that passage was penned by the writer of the other parts of the book, then the composition of the volume itself must be brought down to B. C. 330, if not to 300—nay, there have been advocates for even a lower date, viz., 270 or 260. At even the earliest of these dates the Jewish commonwealth consisted chiefly of the two tribes of Judah and Benjamin, the ten tribes not having returned from captivity. In the books of *Chronicles*, consequently, the former kingdom of Israel holds but slight prominence, while that of Judah, to which the writer was passionately attached and of which to a certain extent he was the apologist, is treated at length. He shows that Judah was prosperous when it followed Jehovah, and fell into misery and decay whenever it rejected Him as its king.

The writer of the books of *Chronicles* seems to copy or allude to Genesis, Exodus, Numbers, Joshua, Ruth, 1 and 2 Samuel, 1 and 2 Kings, Ezra, and Nehemiah; between xi. 3-24 of the last-named of these books and 1 Chron. ix. 2-34 there is a striking parallelism.

Some of the numbers in *Chronicles* differ from those in Kings, possibly from errors of copyists, figures in the very nature of things being much more liable than words to undergo alteration. Where Kings and *Chronicles* differ in this respect, the numbers in the former books are to be preferred.

chrōn'ī-cle, **cron-ī-cle*, **cron-ī-cal*, *v. t.* [CHRONICLE, *s.*] To record in a chronicle or in history; to register.

"In Rome thys geste *cronycald ys*."

Sir Eglamour, 1339.

chrōn'ī-cled, *pa. par.* or *a.* [CHRONICLE, *v.*]

chrōn'ī-clēr, **cron-y-clere*, *s.* [Eng. *chronicler* (*e*); -*ist*.] A writer of a chronicle or history; a historian.

"*Cronyclere*. *Cronicus*, *historicus*."—Prompt. Parv.

**chrōn'ī-clēr*, **cron'ī-clēr*, *v. i.* [CHRONICLER, *s.*] To chronicle, to relate in history.

"Out of an anonyal *croniclering* manuscript."—Fuller: *Worthies*; Lincoln, ii. 9.

chrōn'ī-clīng, *pr. par.*, *a. & s.* [CHRONICLE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of recording in a chronicle or a history; the writing of a history or chronicle.

†chrōn'ī-clīst, **cron'ī-clīst*, *s.* [Eng. *chronicler* (*e*); -*ist*.] A chronicler. (*Skelton*.)

chrōn'ī-cōn, *s.* [Gr. *chronicon*, neut. of *chronikos* = concerning time; *chronos* = time.]

Literature, Ch. Hist., &c.: A chronicle, as *Chronicon Alexandrinum*, the Alexandrian Chronicle; *Chronicon Paschale*, the Paschal Chronicle.

chrōn'ī-que, **cron'ī-que* (*que as k*), **cron-yke*, *s.* [O. Fr. *cronique*.] [CHRONICLE.] A chronicle; a record of events.

"The best *chronique* that can be now compiled of their late changes, . . ."—L. Addison: *West Barbary*.

chrōn'ō-grām, *s.* [Fr. *chronogramme*, from Gr. *chronos* = time; *gramma* = a writing, *graphō* = to write.] An inscription in which a certain date is included and expressed in numeral letters. (See an example under the following word.)

chrōn'ō-grām-māt'īc, *chrōn'ō-grām-māt'ī-cal*, *a.* [Fr. *chronogrammatique*, from *chronogramme*.] Pertaining to, or of the nature of, a chronogram.

chrōn'ō-grām-māt'ī-cal-lŷ, *adv.* [Eng. *chronogrammatical*; -*ly*.] In a manner of a chronogram.

"These elegies and epitaphs are printed in several formes, some like pillars, some circular, some *chronogrammatically*."—Wood: *Athenæ Oxonienses*, ii. 111.

chrōn'ō-grām-ma-tīst, *s.* [Eng. *chronogrammatist* (*ic*); -*ist*.] A writer of chronograms.

"There are foreign universities, where, as you praise a man in England for being an excellent philosopher, or poet, it is an ordinary character to be a great *chronogrammatist*."—Addison.

chrōn'ō-grāph, *s.* [Fr. *chronographe*, from Gr. *chronos* = time; *graphē* = a writing, *graphō* = to write.]

*1. A chronogram.

2. A time indicator. Astronomical intervals are noted by pressing a key which makes one dot or puncture on a traveling strip of paper and another at the end of the observation. Such a time-paper becomes a record. The racer's chronograph is one which deposits ink-spots on a traveling paper at the start and arrival of the horses. (See *Chronometer* and *Chronoscope*.)

chronograph watch, *s.* A kind of stop-watch especially made to enable trained nurses to take accurately the pulse of their patients. The moment the pulse has been taken, the large sweep second-hand can be instantly stopped by a slight pressure upon the stem of the watch.

"The properly equipped, trained nurse, whether at the seat of war, wearing the badge of the Red Cross, or waiting upon the afflicted at home, carries a *chronograph watch*."—New York Sun, Aug. 23, 1898.

†chrōn'ōg'ra-phēr, *s.* [Eng. *chronograph(y)*; -*er*.] A writer of chronography; a chronologer.

"Dionysius compares them with the Greek *chronographers*."—Lewis: *Cred. Early Roman Hist.* (1855), ch. iii., § 11, vol. i., p. 91.

chrōn'ōg'ra-phŷ, *s.* [Gr. *chronographia*, from *chronos* = time; *graphē* = a writing, *graphō* = to write.] An account or description of past time; a history.

chrōn'ōl'ō-gēr, *s.* [Gr. *chronologos*, from *chronos* = time, *logos* = an account, *legō* = to tell.] One who devotes himself to, or is skilled in the chronology of history.

" . . . that is to say 300 years before the foundation of Naxos, which is fixed by the ancient *chronologers* at 136 B. C."—Lewis: *Cred. Early Roman Hist.* (1855), ch. vii., § 2, vol. i., p. 275.

chrōn'ō-lōg'īc, **chrōn'ō-lōg'īck*, *a.* [Fr. *chronologique*; Gr. *chronologikos* = pertaining to chronology (q. v.).] Chronological.

"May *chronologic* spouts

Contain no cypher legible!"

T. Warton: *Epist. from T. Hearne*.

chrōn'ō-lōg'īc-al, *a.* [Eng. *chronologic*; -*al*.]

1. Pertaining to chronology; containing an account of events in the order of time.

" . . . the *chronological* account of some times and things past, . . ."—Hale: *Origin of Mankind*.

2. Arranged according to order of time.

"They are not arranged in logical or in *chronological* order."—London Times.

chrōn'ō-lōg'ī-cal-lŷ, *adv.* [Eng. *chronological*; -*ly*.] In a chronological manner; according to chronology or the succession of time.

chrōn'ōl'ō-gīst, *s.* [Fr. *chronologiste*; Gr. *chronologos*.] The same as CHRONOLOGER (q. v.).

"According to these *chronologists*, the prophecy of the Rabin, that the world should last but six thousand years, has been long disproved."—Browne: *Vulgar Errors*.

chrōn'ōl'ō-gŷ, *s.* [Fr. *chronologie*; Gr. *chronologia* = computation of time, *chronology*; *chronos* = time; *logos* = a discourse.] The science of comput-

ing and adjusting dates and periods of time by divisions and periods, and of assigning to events their proper dates.

" . . . the system, or many systems, of *chronology* framed out of the Egyptian monuments, . . ."—Milman: *Hist. of Jews* (3d ed.), Pref., vol. i., p. xxix.

" . . . by a mere random assertion, and without any accurate knowledge of the *chronology*."—Lewis: *Cred. Early Roman Hist.* (1855), ch. xii., pt. ii., § 19, vol. ii., p. 94.

¶ The following are the leading systems of chronology existing among the several nations of the world. Want of space forbids that the list should be exhaustive:

1. *Chinese and Japanese Chronology*: In these calculation is made by cycles of sixty years, each year of the cycle separately named.

2. *Hindoo Chronology*:

(1) *Historical*: No system is universal in India or exclusive. Two of the chief are the era of Salivahana (A. D. 77), and that of Vicramaditya (B. C. 57).

(2) *Astronomical*: The Hindoos have four ages [YOOGA]. We are now in the Kali Yooga, beginning 3101 B. C.

3. *Egyptian Chronology*:

(1) *Historical*: Julius Africanus and Eusebius have preserved some fragments of a work by Manetho, an Egyptian priest, who lived in the time of Ptolemy Lagus, in the third century B. C. In these fragments the successive rulers of Egypt, from the very first to nearly the time of Alexander the Great in the fourth century B. C., are arranged in thirty or thirty-one dynasties. Increasing importance has been given to his work, as it has been found that one after another of his statements, once unsupported, have been confirmed by the hieroglyphics of the monuments. A long period is, of course, requisite for so many dynasties. Lane, Stuart Poole, and others largely reduce this by making certain of the first seventeen dynasties contemporaneous, while Bunsen, Lepsius, and their followers make them successive, and contend for a lengthened chronology.

(2) *Astronomical*: The Egyptians, moreover, calculated by a tropical cycle of 1,500, and a Sothic cycle of 1,460 Julian years. [CYCLE.]

4. *Greek Chronology*: In the time of Herodotus, and subsequently in that of Thucydides, the Greeks had no chronology spanning wide intervals of time. It was not till B. C. 194 that Eratosthenes, the "father" of Greek chronology, began to count by Olympiads, the first of which was dated from what we now should call B. C. 776. He was followed by Apollodorus, B. C. 115, Censorinus A. D. 238, &c. There were other Greek methods of computation than by Olympiads; thus the era of the Seleucidæ was B. C. 324.

5. *Roman Chronology*: The method of Roman reckoning was by the consulships, which, of course, could give no indication of time unless their order was carefully preserved, and even then was clumsy. A much simpler and better plan was by calculating years from the building of the city. This Varro, whom the moderns follow, placed in what would now be called B. C. 753, while Cato preferred 752. It does not materially diminish the value of this date that Rome would seem to have come into existence earlier than that year. It is enough for chronology that the date to be reckoned from is a fixed one.

6. *Jewish Chronology*: Up till the 15th century the Jews followed the era of the Seleucidæ [4]. Since then they have dated from the creation of the world, which they fix 3760 years and three months before the commencement of the Christian era.

7. *Mohammedan Chronology*: Dates are counted from the Hegira, *i. e.*, the time of Mohammed's flight from Mecca to Medina, 16th or 15th July, A. D. 622.

8. *Christian Chronology*: Since the 6th century dates have begun to be reckoned from the birth of Christ [CHRISTIAN ERA], though the system did not become universal in Europe till many centuries subsequently. The chief disadvantage of this method is that it requires a counting backward as well as forward; its advantage is that it evades dating the creation of man and of the earth, though, of course, investigations have been made as to how many years B. C. these events, formerly believed to have occurred almost at the same time, took place. Hales brought together 120 opinions on the subject, the extremes varying by 3,268 years, while it has been affirmed that even 300 diverse views on the subject exist. One great reason of the discrepancy is that the Hebrew, the Samaritan, and the Greek Pentateuchs all differ as to certain numbers in Genesis v. and elsewhere, so that Archbishop Ussher, following the Hebrew, makes the creation B. C. 4004, while Hales, preferring the Septuagint Greek, fixes the date at 5,411.

9. *Scientific Chronology*: Wherever the occurrence of an eclipse of the sun or moon has been noted by an ancient or other historian in the annals of any year, which he accurately notes, astronomy will ultimately fix that eclipse with unerring exactitude to the day, hour, minute, and second. The

bōl, bōy; pōut, jōw1; cat, çall, chorus, çhin, bench; go, gem; thin, țhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -țion, -șion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

only uncertainty at present is that the value of certain tables, called Hansen's, by which the moon's motion is computed, has excited differences of opinion. Geology has proved finally and irreversibly that the world was in existence many millions of years before man came upon the scene, and that the two events must not be confounded by chronologists. Occurrences marking the several stages in the earth's past history, it has hitherto dated by geological periods, or subdivisions of them, not by historic time. It is only now beginning cautiously to feel its way to date in years a few events of the Post-Pliocene, or at furthest, of the Newer Pliocene periods. [GLACIAL PERIOD.] The first appearance of man (a very recent geological event) it carries back further than history has as yet ventured to do. [ANTIQUITY OF MAN, PALEOLITHIC, &c.]

chrōn-ōm'-ē-tēr, s. [Fr. *chronomètre*, from Gr. *chronos*=time, and *metron*=a measure.]

1. *Horol.*: An instrument for the exact measurement of time. This general meaning would include clocks, watches of all kinds, clepsydras, and some other devices, such as hourglasses and the graduated candles of the famous King Alfred. The term is, however, applied in a restricted sense to those having adjustments and compensations for the fluctuations of temperature. Chronometers are known as ship's and pocket. The rating of chronometers is usually conducted at government observatories. The instruments are sent from the different watch-makers and received at stated periods. They remain the greater part of a year, their rates being noted daily by two persons. The best receive prizes and are purchased for the navy; others receive certificates of excellence; others are unrewarded. On their arrival in January, they are left to the ordinary atmospheric temperature for some months; their rates are taken under these conditions. The apartment is then heated to a tropical temperature, and the rate taken. They are then placed for a certain period in trays over the stove, and the rate taken. They are then placed in a refrigerating chamber cooled by a freezing mixture, and the rate taken under this artificial arctic temperature. Their capacity to stand these variations constitutes their value, and their actual range of exposure may be estimated at 180°: from the +120° of Aden and Fernando Po to the -60° of the Arctic regions when frozen in the pack of ice and watching through the long, long night.

2. *Musical*: An instrument to indicate musical time; a metronome.

"An instrument under the . . . name *chronometer* is also used by musicians for the accurate measurement of time. Two sorts have been invented for different purposes. The first supplies the motion of the conductor, and regularly beats time. . . . The second is used by tuners of instruments to measure the velocity of beats."—*Encyclopædia Metropolitana*.

chronometer-escapement, s. An escapement invented by Berthoud, and improved by Harrison, Arnold, Earnshaw, and Dent. It is the most perfect, delicate, and satisfactory in its operation of all the escapements. It is also kept more carefully, at least in marine chronometers, as the gimbal-joint hanging enables it to maintain a constant position relatively to the horizon, and it is carefully guarded from jars.

chrōn-ō-mēt'-ric, **chrōn-ō-mēt'-ri-cal**, a. [Fr. *chronométrique*.] Pertaining to a measurer or the measurement of time; pertaining to, or measured by, a chronometer.

" . . . to carry a chain of *chronometrical* measurements round the world."—*Darwin: Voyage round the World* (ed. 1870), ch. i. 1.

chronometric-governor, s. A device by which a time-measurer set to work at a prescribed and equable rate is made to regulate the motion of an engine. Invented by Wood, and improved by Siemens.

chrōn-ōm'-ēt-ry, s. [Fr. *chronométrie*.] The art or science of the division and measurement of time. (*Maunder*.)

chrōn-ō-scōpe, s. [Gr. *chronos*=time; *skopeō*=to see, to examine.]

1. An instrument invented by Prof. Wheatstone in 1840, to ascertain the velocity of projectiles by measuring small intervals of time. Two wire targets are placed, one about twenty yards from the gun, and the second about the same distance farther on. These are connected by a fine insulated wire with the instrument, which is about 400 yards in the rear of the ordnance. The instrument is adjusted on a plan similar to an electro-ballistic machine. When the shot is fired it cuts the wire in the first target, and then in like manner cuts the wire in the second target, the instant each wire is severed being recorded by the instrument. The interval of time occupied by the ball in passing from one target to the other furnishes the data for obtaining the initial velocity of the shot.

2. An instrument to measure the duration of luminous impressions upon the retina. (*Nichol*.)

3. A metronome. (*Craig*.)

chrō-ō-cōc'-cā-çē-æ, s. pl. [Gr. *chrōs*, Ep. & Ion. genit. *chroos*=color; *kokkos*=a kernel, and Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: An order of Algae containing those which bear the Lichen fungi. (*Rossiter*.)

chrō-ō-lēp'-ōid, a. [From Gr. *chrōs*=color; *lepis*=a scale; *eidos*=form, appearance.]

Bot.: Made up of small yellow scales. (*R. Brown*, 1874.)

chrō-ō-lēp'-ūs, s. [Gr. *chrōs*=color, and *lepis*=a rind, husk, shell.]

Bot.: A generic name applied to certain byssoid structures found on rocks, bark of trees, &c. *Chroolepus aureum* is composed of rigid opaque, ultimately brittle filaments, forming soft cushions of a yellowish color; *C. Jolithus*, *odoratum*, *lichenicola* are of orange or fulvous color. Another series of species, *C. ebenea*, &c., are black. These plants have been regarded sometimes as Fungi and sometimes as Algae. Rabenhorst describes eleven species. The genus forms the type of the family Chroolepidæ. Reproduction by biciliated zoöspores. (*Griffith & Henfrey*.)

chrÿs'-a-lid (pl. **chrÿs'-āl'-i-dēs**), s. & a. [Fr. *chrysalide*; Lat. *chrysalis*; Gr. *chrysalis*=the gold-colored sheath of some butterflies, a chrysalis, from *chrysos*=gold.]

*A. As subst.: [CHRYSALES.]

B. As adj.: Pertaining to or resembling a chrysalis.

chrÿs'-al-i-dī'-nā, s. [Eng. *chrysalid*; and Lat. neut. pl. adj. suff. *-ina*.]

Zoöl.: A Textularian Foraminifer, with a triserial arrangement of chambers and with large pores, and sometimes tubes, opening from chamber to chamber. *Chrysalidina gradata* is from the Cretaceous strata of France. A dimorphous form, which is uniserial in its old state, lives in the Indian Ocean and Panama Bay. (*Griffith & Henfrey*.)

chrÿs'-a-lis, (pl. **chrÿs'-āl'-i-dēs**), s. [CHRYSALES.]

1. *Nat. Hist.*: The last stage through which a lepidopterous insect passes before becoming a perfect insect. It is also called Pupa (q. v.). In this stage the insect is inactive, takes no food, and is inclosed in a transparent case, often of a metallic luster, and composed of a fiber spun by the larva.

2. *Fig.*: Applied to the state of man while in this world: the soul inclosed in the body being compared to the perfect insect inclosed in its case.

"This dull chrysalis
Cracks into shining
wings, and hope
ere death."
Tennyson: St. Simeon Stylites.

chrÿs'-ām'-ic, a. [Gr. *chrysos*=gold; Eng. *am-* contr. for *ammonia*; and suff. *-ic*.]

These various chemical terms compounded with *chrys* owe their derivation from Gr. *chrysos*=gold, to the fact of their golden or rich yellow color.

chrysamic acid, s.

Chem.: Tetranitro-chryszazin, or tetranitrodioxy-anthraquinone, $C_{14}H_2(NO_2)_4(OH)_2O_2$. An acid obtained by heating aloes with strong nitric acid. It crystallizes in golden yellow scales. It is slightly soluble in water, and has a bitter taste; its potassium salt resembles purpate of ammonia. It is converted by chloride of lime into chloro-pierin. With ammonia it forms chrysammate of ammonia, consisting of black adamantine crystals; with potash, a beautiful carmine-red powder called chrysammate of potash.

chrÿs'-ām-ide, s. [Gr. *chrysos*=gold, and Eng. *amide* (q. v.).]

Chem.: The same as tetra-amido-chryszazin, $C_{14}H_2(NH_2)_4(OH)_2O_2$. It is obtained by the action of reducing agents on chrysamic acid. Chrysamide forms indigo-blue needle crystals having a metallic copper luster.

chrÿs'-ām-māte, s. [Gr. *chrysos*=gold; *amm-* contr. for *ammonia*; and suff. *-ate* (Chem.).]

Chem.: A salt of chrysamic acid.

Chrysanmate of ammonia (Chem.): [CHRYSAMIC ACID.]

Chrysanmate of potash (Chem.): [CHRYSAMIC ACID.]

chrÿs'-ā-nīs'-ic, a. [Gr. *chrysos*=gold, and Eng. *anistic* (q. v.).]

Chem.: Of golden hue, and having anisic acid in its composition.

chrysanic acid, s.

Chem.: Dinitro-paramidobenzoic acid. $C_6H_2(NO_2)_2(NH_2)CO_2OH$. It is prepared by heating dinitro-anisic acid with aqueous ammonia. It crystallizes in yellow needles, which melt at 259°. It is a strong monobasic acid.

chrÿs'-ān'-thē-mūm, s. [Gr. *chrysos*=gold, and *antheion*=a flower.]

Bot.: A genus of herbaceous or slightly shrubby plants, belonging to the corymbiferous group of the order Compositæ. The family is represented in this country by the well-known Ox-eye Daisy, *Chrysanthemum leucanthemum*, and the Corn Marigold, *C. Segetum*, besides which many varieties have been introduced from other countries and are cultivated here. *C. Sinense* is the plant commonly known as the Chrysanthemum, and so much prized for its flowering in November and December.

Chrysanthemum (Ox-eye Daisy).

1. Floret of the ray. 2. Floret of the disk.

chrÿs'-a-or, s. [Gr. *chrysos*=gold; *aor*=a sword.]

Zoöl.: A name given by De Montfort to a genus of Belontiæ.

chrÿs'-ā-ō-ra, s. [Gr. *chrysos*=gold; *aor*=a sword.]

Zoöl.: A genus of Medusæ belonging to the family Pelagiæ.

chrÿs'-a-zin, s. [Gr. *chrysos*=gold; *az(ite)*, and suff. *-in*.]

Chem.: A chemical compound which crystallizes in red needles, melting at 191°.

chrÿs'-ēl-ē-phān'-tine, a. [Gr. *chrysos*=gold; *elephantinos*=made of ivory, *elephas*=an elephant.] Made partly of gold and partly of ivory.

" . . . a Doric edifice in which the celebrated *chryselephantine* statue of the god by Phidias was placed about B. C. 433."—*Mr. Newton, of British Museum: On Discoveries at Olympia*, in *Times*, Feb. 1, 1876.

chrÿs'-ēne, s. [Gr. *chrysos*=gold.]

Chem.: C_6H_4-CH or $C_{18}H_{12}$, an aromatic hydrocarbon, $C_{18}H_{12}$. It is obtained along with benzene by heating diphenyl in a sealed tube with hydrogen. Also obtained in the distillation of tar, pitch, &c. Chrysene is insoluble in alcohol and ether, but crystallizes from boiling oil or turpentine. It is a golden yellow color when pure.

chrÿ'-šē-ōne, s. [Gr. *chryseos*=golden.]

Chem.: An orange-colored substance, $Si_4H_4O_3$. It is obtained by digesting calcium silicide with strong hydrochloric acid. It is insoluble in water, alcohol, and in nearly all solvents. Exposed to sunshine it becomes lighter in color, gives off hydrogen, and is converted into leukone, or silico-formic acid, $H'SiO_2OH$.

chrÿs'-i-dī-dæ, **chrÿs'-i-dēs**, s. pl. [From *chrysis*, the typical genus, and Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of Hymenopterous insects, distinguished by being furnished with a tubuliferous ovipositor. They are all parasitic, and colored with the richest metallic hues.

chrÿs'-i-mē'-nī-a, s. [Gr. *chrysos*=gold, and *menō*=to remain (?)]

Bot.: A genus of Sauranciæ (Florideous Algae). *Chrysimenia clavellata* is a rare seaweed, three to twelve inches high, forming a feathery frond composed of a branched, tubular, long, not constricted or chambered, cellular structure, filled with a watery juice. The spores are angular, and are contained in dense tufts, in ceramidia borne on the sides of the branchlets. The tetraspores are tripartite and immersed in the branchlets. (*Griffith & Henfrey*.)

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trÿ, Sÿrian. æ, œ = ē; ey = ā. qu = kw.

chrýs'-in, s. [Gr. *chrysos*=gold, and Eng. suff. *-in* (Chem.).]

Chem.: A substance obtained from the buds of species of *Populus* (Poplars). Chrysin when pure forms bright yellow shining plates, which melt and sublime at 275°. Ferric chloride gives a violet color with an alcoholic solution of chrysin; it is insoluble in water. It forms a yellow solution with alkalies; on boiling this solution it is decomposed into phoroglucin, acetic and benzoic acids, and methyl-phenylketone.

chrýs'-ip'-tēr-a, s. [Gr. *chrysos* = gold, and *pteron*=a wing, a fin.]

Ichthy.: A genus of oval-bodied fishes, belonging to the family Chætodontidæ. They have large pectoral fins.

chrýs'-is, s. [Gr. *chrysos*=gold.]

Entom.: The Golden Wasp, or Ruby-tail fly, a genus of Hymenoptera. They are magnificently colored with metallic hues. They are parasitic, depositing their eggs in the nests of the solitary Mason-bees or other Hymenoptera, on the larvæ of which their larvæ live. *Chrysis ignita* has the head, thorax, and legs of a rich blue or green, and the abdomen copper colored. It is constantly in motion. It may be seen in summer on sunny walls poking into holes in quest of the nest of other hymenopterous insects, of which its larvæ may make a prey.

chrýs'-ō-băc'-trôn, s. [Gr. *chrysos*=gold, and *baktron*=a staff, a stick.]

Bot.: A genus of liliaceous plants from the Auckland and Campbell Islands, New Zealand. They have linear leaves, and racemose flowers (occasionally dioecious) of a bright yellow color.

chrýs'-ō-băl-ān-ā'-çē-æ, s. pl. [From Mod. Lat. *chrysobalan(us)*=the type, and Lat. fem. pl. adj. suff. *-acē-æ*.]

Bot.: An order of dicotyledons, closely allied to Rosaceæ, and containing about twelve genera. They are all trees or shrubs with alternate stipulate leaves, and several of them produce edible fruits. They are classed by Lindley in his "Rosal Alliance" between Calycanthaceæ and Fabaceæ.

chrýs'-ō-băl'-a-nūs, s. [Gr. *chrysos*=gold, and *balanos*=an acorn, in reference to the yellow fruit of some species.]

Bot.: A genus of trees, the typical one of the order Chrysobalanaceæ, with simple leaves, and racemes or panicles of insignificant flowers. The fruit of *Chrysobalanus Icaco*, the cocoa-plum, is eaten in the West Indies, as is another species, *C. luteus*, in Sierra Leone.

chrýs'-ō-băd'-yl, s. [Lat. *chrysoberyllus*, from Gr. *chrysos*=gold, and *beryllos*=a beryl.] A green, greenish-white, or yellowish-green orthorhombic mineral, of which there are two varieties: (1) Ordinary Chrysoberyl, and (2) Alexandrite (q. v.).

chrýs'-ō-chlōr'-a, **chrýs'-ō-chlōre'**, s. [Fr. *chrysochlore*, from Gr. *chrysos*=gold, and *chlōros*=green.]

Entom.: A genus of Dipterous insects, belonging to the family Notacanthæ. They are of a beautiful golden-green color. The larvæ live in cow-dung.

chrýs'-ō-chlōr'-is, s. [Gr. *chrysos*=gold, and *chlōros*=green.]

Zoöl.: A genus of Talpidæ (Moles), the fur of which reflects most brilliant hues of green and gold. *Chrysochloris aureus*, or *aurea*, is the Golden Mole of Africa. [CHRISOCHLORIS.]

chrýs'-ō-chrō'-ūs, a. [Gr. *chrysos*=gold, and *chros*, Ep. & Ion. *chroōs*=the skin.]

Bot.: Having a yellow skin.

chrýs'-ō-cōl'-la, ***chrýs-o-cholle**, s. [Gr. *chryso-kolla*=gold solder; from *chrysos*=gold, and *kolla*=glue.]

Mineralogy:

1. A name of borax.

2. A silicate of protoxide of copper of a fine emerald-green color, apparently produced from the decomposition of copper ores, which it usually accompanies. It derives its name from the weak resinous luster, and the peculiar transparency of the fractured edges. (Page.)

"Much Chrysocholle and also silver fire."—*Sylvester: Magnificence*, 601. (Davies.)

chrýs'-ō-cō'-ma, s. [Gr. *chrysos*=gold, and *komē*=hair.]

Bot.: A genus of South African shrubs or undershrubs of the composite family, nearly allied to *Linosyris*, from which it differs in the hairs of its pappus being in a single series. About fifteen species are enumerated. The leaves in most cases are linear in form and entire. The yellow nearly spherical flower-heads are about the size of a pea, and single on the ends of the branches. *Chrysocoma aurea* is in cultivation, and is said to be a very common species about Cape Town. Its leaves are linear, and about half an inch long. (Treas. of Bot.)

chrýs'-ōc'-or-ŷne, s. [Gr. *chrysos*=gold, and *korynē*=a club.]

Bot.: A curious genus of small annual Australian plants, belonging to the composite family. They are branched from the base, and seldom exceed three inches in height. The leaves are small, linear, and covered with loose white wool; but the most marked feature in the plants is the arrangement of the flower-heads. These are disposed in short yellow club-shaped spikes, and each flower-head is almost hidden by a yellow bract and contains but two florets. Five species are known; they are chiefly found in the western and southern parts of Australia.

chrýs'-ōd'-ō-mūs, s. [Gr. *chrysos*=gold, and *domos*=a house, a building.]

Zoöl.: A genus of Mollusca, the shells of which are large, and of a beautiful orange color. The basal channel is comparatively short, and the body whorl ventricose. Family, Muricidæ. It is now reduced to a sub-genus of *Fusus*.

chrýs'-ō-gās'-tēr, s. [Gr. *chrysos*=gold, and *gaster*=a stomach.]

Entom.: A genus of Dipterous insects, belonging to the family Syrphidæ. *Chrysogaster splendens* has the head and thorax green and the abdomen purple-black, the sides greenish, the antennæ yellow. It is half an inch long.

chrýs'-ō-gēn, s. [Gr. *chrysos*=gold, and *gennaō*=to produce.]

Chem.: An orange-colored hydrocarbon, contained in crude anthracene. It melts at 290°, and is soluble in concentrated sulphuric acid. Traces of this substance give a yellow color to colorless aromatic hydrocarbons.

chrýs'-ōg'-raph-ŷ, s. [Gr. *chrysographia*, from *chrysos*=gold; *graphē*=a writing, *graphō*=to write.]

1. The art of writing or illuminating in letters of gold.
2. A letter or other writing executed in letters of gold.

chrýs'-ōi-dīne, s. [Gr. *chrysos*=gold; *eidōs*=like, and Eng. suff. *-ine* (Chem.).]

Chem.: Metadiamidazobenzene, $C_{12}H_{12}N_4$ or $C_6H_5-NNC_6H_3(NH_2)_2$. The hydrochloride is sold commercially as chrysoidine. It is an orange-yellow coloring matter. Chrysoidine is prepared by mixing a one per cent. solution of a diazobenzene salt with a ten per cent. solution of metadiamidabenzene; the resulting blood-red precipitate is dissolved in boiling water, the solution is cooled to 50°, and precipitated with ammonia, and then crystallized from alcohol of 30 per cent., then from boiling water. Chrysoidine forms golden needles, soluble in alcohol, melting at 117°. It is a base from monoacid salts which dissolve in water forming a yellow solution, which is turned crimson by excess of acid. By the action of tin and hydrochloric acid it is resolved into aniline $C_6H_5NH_2$ and triamidobenzene, $C_6H_3(NH_2)_3$.

chrýs'-ō-lēp'-tic, a. [Gr. *chrysos*=gold, and *lepis*=a scale.] Resembling golden scales.

chrysoleptic acid, s.

Chem.: An acid obtained in beautiful golden-yellow scales from the mother liquid and washings of chrysamic acid. It has been discovered to be the same as picric acid. [CARBAZOTIC ACID.]

chrýs'-ō-lite, s. [Fr. *chrysolithe*; Lat. *crusolitus*; Gr. *chrysolithos*, from *chrysos*=gold, and *lithos*=a stone.]

Mineralogy:

1. A green-colored orthorhombic mineral of a vitreous luster, transparent or translucent. Hardness, 6-7; specific gravity, 3.33-3.5. Composition: Silica, 31.63-44.67; protoxide of iron, 6.0-29.71; protoxide of manganese, 0.1-81; magnesia, 32.40-50.49. It is generally divided into two classes: (1) *Precious*: Of a pale yellowish-green color and transparent, so as to be fit for jewelry. This is found in the Levant. (2) *Common*: Dark yellowish-green to olive, or bottle-glass green; common in basalt and lavas, at times in large masses, having a rectangular outline. The *chrysolithus* of Pliny was probably our topaz, and his topaz our chrysolite. It frequently changes color, becoming brownish or reddish-brown through the oxidation of the iron. Under the action of carbonated waters, the iron is carried off instead of being peroxidized, and also some of the magnesia is removed at the same time; and thus may come serpentine and picrosmine, which often retain the crystalline form of chrysolite.

2. The same as ZIRCON (q. v.).

3. The same as TOPAZ (q. v.).

4. A variety of Tourmaline, also called Brazilian Emerald or Peridot of Brazil. It is green and transparent.

5. The same as APATITE (q. v.).

Iron chrysolite:

Min.: The same as FAYALITE (q. v.).

Iron manganese chrysolite:

Min.: A mineral near Fayalite, but containing besides protoxide of iron, some protoxide of manganese and lime and a little magnesia, thus approaching hyalosiderite. Composition: Silica, 29.16; alumina, 1.56; protoxide of iron, 55.87; protoxide of manganese, 8.47; magnesia, 3.23; lime, 2.29. It occurs in a gneissoid rock consisting partly of augite and garnet at Tunaberg, in Sweden.

Titaniferous chrysolite:

Min.: A massive reddish-brown mineral from the talcose schist of Pfunders, in the Tyrol, having some resemblance to boltonite; specific gravity, 3.25. It contains 3.5 to 5.3 of titanic acid, with 6 per cent. of protoxide of iron.

chrýs'-ōi'-ō-gŷ, s. [Gr. *chrysos*=gold, money, and *logos*=a discourse.] A discourse or treatise on wealth. (Brande.)

chrýs'-ōi'-ō-phūs, s. [Gr. *chrysos*=gold, and *lophos*=a crest.]

Ornith.: The Walking Tyrants, a genus of birds belonging to the Tyrant Shrikes. Family, Laniadæ. They are natives of Brazil.

chrýs'-ōi'-ō-pūs, s. [Gr. *chrysos*=gold, and *lopos*=a piece, a slice.]

Entom.: A genus of Coleopterous insects, belonging to the family Rhynchophora.

chrýs'-ō-ma, s. [Gr. *chrysos*=gold, and *sōma*=a body.]

Bot.: A genus of North American plants of the Composite family, considered by the authors of the "Flora of North America" to be the same as that of the Golden Rod (*Solidago*). The species are perennial plants, with alternate lance-shaped entire or serrated leaves, sometimes furnished with pellucid dots; and they bear terminal corymbs of yellow flower-heads, each of which contains from six to eight florets, one to three of them being strap-shaped.

***chrýs'-ō-măg'-net**, s. [Gr. *chrysos*=gold, and Eng. *magnet* (q. v.).] The load-stone.

chrýs'-ōm'-ēl-a, s. [Gr. *chrysos*=gold, and *melos*=a limb.]

Entom.: A genus of Coleopterous insects, the typical one of the family Chrysomelidæ (q. v.).

chrýs'-ō-mēl'-i-dæ, s. pl. [Mod. Lat. *chrysomel* (a); and fem. pl. adj. suff. *-idæ*.]

Entom.: A family of Coleopterous insects, tribe Cychia. They have ovate, convex bodies; tarsi four-jointed; antennæ not clavate; larvæ generally naked. They live on the leaves of plants. These insects are often very brilliantly colored green, purple, blue, brown, &c., a commixture of colors.

chrýs'-ō-phāne, s. [Gr. *chrysos*=gold, and *phainō*=to appear.]

Min.: A variety of Seybertite, occurring in reddish-brown to copper-red brittle foliated masses. Specific gravity 3.148.

chrýs'-ō-phān'-ic, a. [Gr. *chrysos*=gold; *phainō*=to appear; suff. *-ic*.] Appearing like or resembling gold in color.

chrysophanic acid, s.

Chem.: Parietic acid, rheic acid. A modification of the substance dioxymethylanthraquinone $C_{15}H_{10}O_4=C_{14}H_5CH_3(OH)_2O_2$. Chrysophanic acid occurs in the lichen *Parmelia parietina*, in senna leaves, and in rhubarb root, and is extracted by ether. It forms golden yellow prismatic crystals, which melt at 162°, and is reduced by zinc-dust to methyl-anthracene. It dissolves in alkalies, forming a red solution.

***chrýs'-ōph'-il-ite**, s. [Gr. *chrysos*=gold, and *philos*=a lover.] A lover of gold. (Lamb.)

chrýs'-ōph'-ōr-a, s. [Gr. *chrysos*=gold; *phoros*=bearing; *pheroō*=to bear.]

Entom.: A genus of Coleopterous insects, belonging to the family Lamellicornes. The species are of most beautiful golden and green colors.

chrýs'-ō-phrŷs, s. [Gr. *chrysos*=gold, and *ophrŷs*=the brow.]

Ichthy.: A genus of fishes belonging to the family Chætodontidæ, having bodies attenuated at each end.

chrýs'-ō-phŷll, s. [From Gr. *chrysos*=gold, and *phyllon*=a leaf.] A golden coloring matter found in leaves. (Rossiter.)

chrýs'-ō-phŷl'-lūm, s. [Gr. *chrysos*=gold, and *phyllon*=a leaf; in allusion to the golden color on the under side of the leaves.]

Bot.: A genus of Sapotaceæ, consisting of trees with milky juice, alternate leaves with numerous transverse closely-aggregated ribs, and golden hairs on the under surface. The fruit of *Chrysophyllum Cainito* is in the West Indies esteemed a delicacy under the name of the Star-apple.

chrýs'-ō-pi-a, s. [Gr. *chrysos*=gold, and *opos*=juice.]

Bot.: A genus of beautiful trees, natives of Madagascar. When the bark is cut they emit a yellow juice.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aš; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şhñ; -tion, -şion = zhñ. -tious, -cious, -sious = şhş. -ble, -dle, &c. = beł, deł.

chrȳs'-ō-prāse, ***crȳs'-ō-pāse**, ***cris'-ō-pāce**, *s.* [Fr. *chrysoprase*; Gr. *chrysoprasos*, from *chrysos* = gold, and *prason* = a leek, from the color.]

Mineralogy:

1. An apple-green variety of chalcedony, the color due to the presence of oxide of nickel.

2. A variety of beryl, of a pale yellowish-green color.

"The *chrysopase* the tenth is tyght."—E. E. Allit. *Poems*; Pearl, 1012.

chrysoprase earth, *s.*

Min.: A variety of Pimelite (q. v.).

chrȳs-ōp'-ra-sūs, *s.* [Lat.] [CHRYSOPRASE.] The tenth of the precious stones with which the walls of the New Jerusalem were to be adorned (Rev. xxi. 20, A. V.). Probably the Chrysoprase (q. v.), as it is rendered in the Revised Version.

chrȳs'-ōps, *s.* [Gr. *chrysos* = gold, and *ops* = the face.]

Entom.: A genus of Dipterous insects, belonging to the family Tabanidæ. They are known as cleg-flies or gad-flies. They are all blood-suckers, and are exceedingly troublesome to cattle and horses in summer.

chrȳs-ōp'-sis, *s.* [Gr. *chrysos* = gold; and *opsis* = a face, appearance.]

Bot.: A genus of annual or perennial North American plants of the Composite family, the greater portion of the species having all their parts covered with villous or silky hairs. *Chrysopsis villosa*, a plant with oblong hairy leaves about an inch and a half long, and numerous yellow flower-heads, half an inch in diameter, is said to be one of the commonest plants on the prairies of the Saskatchewan. *G. graminifolia* extends southward to Mexico; its leaves are clad with beautiful close-pressed silvery hairs.

chrȳs-ōp'-tēr-is, *s.* [Gr. *chrysos* = gold, and *ptēris* = a kind of fern.]

Bot.: A synonym of *Phlebodium*, a genus of ferns, which includes Linnaeus's *Polypodium aureum*, the specific appellation seeming to have suggested this generic name.

chrȳs-ōp'-tēr-ŷx, *s.* [Gr. *chrysos* = gold, and *ptērŷx* = a wing.]

Ornith.: A genus of birds belonging to the subfamily Ampelinae, or Typical Chatterers, and family Ampelidæ, or Chatterers.

chrȳs-ōp'-tīl-ūs, *s.* [Gr. *chrysos* = gold, and *ptilon* = a wing or plume.]

Ornith.: A genus of birds belonging to the subfamily Picinae and family Picidæ, or Woodpeckers. They are natives of tropical America.

chrȳs'-ō-quin-ōne, *s.* [Eng. *chryse* (ene), and *quinone*.]

Chem.: C₁₈H₁₀O₂. It is obtained by the action of chromic acid on chrysene dissolved in acetic acid. It crystallizes in red needles, melting at 235°. It dissolves in a solution of sodium disulphite and the concentrated solution deposits colorless crystals which are decomposed by water with liberation of chrysoquinone. The reactions of chrysoquinone resemble those of phenanthrenequinone. It yields when heated with soda-lime a hydrocarbon C₁₆H₁₂.

chrȳs-ōr'-rhō-ē, *s.* [Gr. *chrysos* = gold; and *rhoē* = a stream, a flowing, *rhoēō* = to flow.]

Bot.: A genus of Chamelaucaceæ, consisting of a rigid shrub from the Swan river, with narrow terete leaves and terminal corymbs of a bright-yellow flower.

***chrȳs'-ō-spērm**, *s.* [Gr. *chrysos* = gold, and *sperma* = a seed.] A means of creating gold. (*B. Jonson*: *Alchemist*.)

chrȳs-ō-splē-ni-ūm, *s.* [Gr. *chrysos* = gold, and *splēnē* = the spleen; in reference to its supposed efficacy in diseases of the spleen.]

Bot.: Golden Saxifrage. A small genus of unimportant herbaceous plants, belonging to the Saxifragaceæ, among which they are discriminated by their one-celled seed-vessel, and by being destitute of petals.

chrȳs-ōs'-tach-ŷs, *s.* [Gr. *chrysos* = gold, and *stachys* = an ear or spike of corn.]

Bot.: A genus of climbing shrubs, belonging to the order Combretaceæ. They are natives of Brazil.

chrȳs'-ō-tile, *s.* [Gr. *chrysos* = gold, and *tilos* = fine hair.]

Min.: A delicately fibrous variety of Serpentine. Color, greenish-white, green, olive-green, yellow, and brownish. Specific gravity, 2.219. It often constitutes seams in Serpentine. It includes most of the silky amianthus of serpentine rocks. The original chrysotile was from Reichenstein. (*Dana*.)

chrȳs-ō-tis, *s.* [Gr. *chrysos* = gold, and *ous*, genit. *ōtos* = an ear.]

Ornith.: A genus of American parrots, having the face and ears yellow.

chrȳs-ō-tōx'-ūm, *s.* [Gr. *chrysos* = gold, and *toxōn* = an arrow, a shaft.]

Entom.: A genus of Dipterous insects.

chrȳs-ō-tūs, *s.* [Gr. *chrysos* = gold, and *ous*, genit. *ōtos* = an ear.]

Entom.: A genus of Dipterous insects, belonging to the family Tanystoma.

chrȳs'-ō-tȳpe, *s.* [Gr. *chrysos* = gold, and *typos* = an impression.]

Photography:

1. A process discovered by Sir John Herschel, in which a sheet of paper is saturated with a solution of ammonio-citrate of iron dried in the dark. Exposed in a camera or printing-frame, the faint picture is developed by brushing over with a neutral solution of chloride of gold washed in water repeatedly, fixed by a weak solution of iodide of potassium and then finally washed and dried. (*Knight*.)

2. A picture obtained by the process described in 1.

chrȳs-ōx'-ŷ-lōn, *s.* [Gr. *chrysos* = gold, and *xylon* = wood.]

Bot.: The name of a South Bolivian tree, now referred to *Howardia* (q. v.). It derived its name from the yellow color of its wood.

chrȳs-tāl'-lō-tȳpe, *s.* [Eng. *chrysal* = crystal, and *type*.]

Phot.: A name given to a kind of picture on a translucent material; an opalotype.

chrȳs'-ūr-ūs, *s.* [Gr. *chrysos* = gold, and *oura* = a tail.]

Bot.: A genus of grasses belonging to the tribe Festuceæ. Only one species is described, *Chrysurus cynosuroides*, which is the *Lamarckia aurea* of some authors. This handsome dwarf-habited annual grass is a native of the south of Europe and north of Africa, and is occasionally cultivated in botanical gardens, where it makes a pretty appearance during the summer months. (*Treas. of Bot.*)

chthō'-nī-an, *a.* [Gr. *chthonios* = earthly.]

Belonging to the earth.

"The terrestrial Earth-mother and her *chthonian* and telluric daughter."—R. Brown: *Great Dionysias Myth*, i. 290.

chūb, ***chūbbe**, *s. & a.* [Cf. Dan. *kobbe* = a seal; Sw. *kubb* = a block, a log. (*Skeat*.)]

A. As substantive:

Ichthy.: A river fish, *Leuciscus cephalus*, belonging to the genus *Leuciscus* and family Cyprinidæ. It is a coarse-fleshed fish, full of bones, very timid, and frequenting the deepest holes of rivers. It is also called a cheven or chevin.

B. As adj.: (See the compounds.)

***chub-cheeked**, *a.* Having chubby or fat cheeks.

chub-faced, *a.* Having a chubby or fat face. (*Marston*: *Antonio's Revenge*, iv. 2.)

chubbed, *a.* [Eng. *chub*; -ed.] Chubby, chub-faced.

"Young Skinker . . . a chubbed unlucky boy."—H. Brooke: *Fool of Quality*, i. 22. (*Davies*.)

chūb'-bēd-ness, *s.* [Eng. *chubbed*; -ness.] The quality or state of being chubby or chub-faced.

chūb'-bŷ, *a.* [Eng. *chub*; -y.] Fat and plump like a chub, especially said of the face.

chūck (1), ***chūck**, *v. i. & t.* [A variant of *cluck* (q. v.).]

I. Intransitive:

1. To cluck or make a noise like a hen when calling her chickens together.

"He *chukkith* when he hath a corn i-founde, And to him rennen than his wives alle." *Chaucer*: *Nonne Prestes Tale*, v. 16,668.

2. To laugh in a suppressed or convulsive manner, to chuckle.

"But, bold-fac'd Satyr, strain not over high, But laugh and *chuck* at meaner gullery." *Marston*: *Satires*, ii.

II. Trans.: To call, as a hen her chickens.

"Then crowing clapped his wings, th' appointed call, To *chuck* his wives together in the hall." *Dryden*: *Cock and Fox*, 430.

chūck (2), ***chock**, *v. t.* [Fr. *choquer* = to give a shock to; Dut. *schokken* = to jolt, to shake; *schok* = a shock, a jolt.] [*CHOCK*, *SHOCK*.]

1. To strike gently under the chin.

†chūm-shīp, s. [Eng. *chum* and *ship*.] The state or condition of being a chum with another; close intimacy. (*De Quincey*.)

chūn, s. [CHUN, v.] A term applied to the sprouts or germs of barley, in the process of making malt; also to the shoots of potatoes, when they begin to spring in the heap.

chūn, v. t. [Mæso-Goth. *keinan*=to sprout, to germinate.

† To *chun* potatoes: To prevent vegetation in turning them; to nip off the shoots which break out from what are called the eyes.

chū-nām', s. [Anglo-Indian; Hind. *chūnā*.] Lime or anything made of it, as stucco, &c. The Madras *chunam*, made of calcined shells, is considered the best.

"The walls and columns are covered with *chunam*, prepared from calcined shells, which in whiteness and polish rivals the purity of marble."—*Sir E. Tennent: Ceylon*, ii. 203.

chūn-cō-a, s. [Peruvian *arbol de chunchu*, the name of one of the species.]
Bot.: A genus of trees belonging to the order Combretaceæ. They are natives of Peru.

chūnk, s. [Probably a variant of *chump* (q. v.).] A short thick lump of anything.

chūn-kŷ, a. [Eng. *chunk*; -y.] Thick and short, chunky.

"... a tough and *chunky* body, broad and deep, like a Normandy mare's, . . ."—*London Daily News*.

chū-pāt-tŷ, s. [Anglo-Ind., from Hind. *chupatee*.] An unleavened cake made of flour, water, and salt.

"Tea, and beer . . . and plenty of hot *chupatties*."—*W. H. Russell, in Ogilvie*.

chū-prās-sēe', s. [Hind. *chuprasee*, *chaprāsī*, from *chupras*, *chaprās*=a badge. Anglo-Indian.] One wearing an official badge, generally a broad and conspicuous belt passing over one shoulder and around the side opposite to it. A *chuprassee* in India somewhat resembles a beadle here, at other times he acts as a police officer.

"... sneaking into camp, he will drag a *chuprassee* out of the rowtinent . . ."—*London Daily Telegraph*, December 5, 1865.

chūrche, *chirche, *chyrche, *cherche, *churche (Eng.), kirk, *kirke, *kyrke (*Mid. Eng. & Scotch*). s. & a. [Gr. *kyriakon*=pertaining to the Lord, from *kyrios*=the Lord; A. S. *circe*, *cirice*, *cyrc*; O. Sax. *kirika*; O. H. Ger. *chirikkā*; M. H. Ger. *kirche*; Ger. *kirche*; Dut. *kerk*; Dan. *kirke*; Sw. *kyrka*; Icel. *kirkja*.] It is believed that the word *kyriakē* originally passed over from the Greeks to the Goths, the first Teutonic tribe converted to Christianity. From the Goths it diffused itself over the other Teutonic tribes, ultimately reaching the Saxons, and through them becoming introduced into the English tongue. Walafrid Strabo, who wrote about A. D. 840, gave this explanation of the origin of the word "kyrch." (*Trench: On the Study of Words*, pp. 67, 68.)

A. As substantive:

*1. Originally used in a wide sense for a Christian church, a Jewish synagogue, or a heathen temple.

"And lo the veil of the *church* was torn in two parts from the top downwards."—*Matt. xxvii. 51.* (*Sir John Cheke*.)

"To all the gods devoutly she did offer frankincense, But most above them all the *church* of Jesus she did cense."—*Golding: Ovid's Metamorphoses*, bk. xi.

2. A building set apart and consecrated for Christian worship.

"*Chireche* is holi Godes hus and is cleped in boc *kiriake* i. dominicalis."—*O. Eng. Homilies* (ed. Morris), ii. 23.

"It comprehends the whole *church*, viz., the nave, or body of the *church*, together with the chancel, which is even included under the word *church*."—*Ayliffe: Parergon*.

3. A body of Christian believers, worshipping together in one place, under the same minister, and with the same form of worship.

"They ordained them elders in every *church*."—*Acts xiv. 23.*

4. The whole body of Christians collectively.

"It is certainly lawful not to worship images, not to pray to Angels, or Saints, or the blessed Virgin; otherwise the primitive *church* would not have forbore these practices for three hundred years, as is acknowledged by those of the church of Rome."—*Tillotson* (3d ed. 1722), vol. i., ser. ix.

"The visible *Church* of Christ is a congregation of faithful men, in the which the pure Word of God is preached."—*Book of Common Prayer*, Art. xix.

5. A distinct section or division of Christians organized for worship under a certain form. Thus we speak of the Roman Catholic, the Presbyterian, the Greek, the Latin Churches, &c.

6. The religious influence exercised by Christians in the aggregate; ecclesiastical authority or influence, as distinguished from the civil power.

"The same criminal may be absolved by the *church* and condemned by the state; absolved or pardoned by the state, yet censured by the *church*."—*Leslie*.

¶ *Church of England*: The foregoing designation is used in two senses: first, a general one signifying the Church regarded as continuous, which, from the first triumph of Christianity till now, has been that of the English people, and secondly, in a more specific sense, the Protestant Church now established in England as distinguished from the Church of Rome.

The Saxons were gradually converted by Augustin and his companions sent from Rome for the purpose, and by the early part of the 7th century, the seven kingdoms of the heptarchy were all nominally Christian. In England, as elsewhere, the centuries between the 7th and the 13th were marked by the growth and ultimate domination of the Papacy, and in 1213, King John, to the disgust of his subjects, surrendered his crown to the Roman legate. But the submission was never complete, and certain Parliamentary measures in the 14th century, designed to protect the civil power against the encroachments of the Church, look as if they had been proposed at a much later period. In the same century, Wycliffe on the one hand, and Chaucer and the author of "Piers Plowman" on the other, inflicted heavy blows upon the Church's reputation. Thoroughly alarmed in the 15th century for its supremacy, it became increasingly cruel in its treatment of "heretics," and in the 16th the Reformation came. In 1531 the royal supremacy, which was intended to supersede the papal one, was imposed on the clergy by Henry VIII., and was made use of to produce other changes. In the same year Coverdale's Bible was appointed to be read in the churches. In 1549 the first book of Common Prayer was published, and permission given to the clergy to marry. In the reign of Edward VI., A. D. 1547 to 1553, more sweeping measures of reform were carried out under the auspices of foreign rather than English Protestant leaders, but these were completely swept away in the great reaction in favor of Roman Catholicism which arose when Mary came to the throne. The work of reformation was resumed under Queen Elizabeth, and in 1563 the thirty-nine articles became, as they still continue to be, the authoritative statement of the Church's creed. Two parties subsequently came into antagonism in the Church; the Puritans, who wished to constitute it on a basis like that of the churches of Geneva and of Scotland; and an Anglican party, who were reluctant to break so completely with the past. A conference, held from 14th to 16th January, 1604, at Hampton Court, between the leaders on each side, failed to effect their reconciliation, and they went their separate ways. In 1611 was published the version of the Bible which is now called the authorized one, that which maintains its place at present, notwithstanding the issue of the revised version. The disputes between the Puritans and the Anglicans continued during the remainder of the reign of Elizabeth, and during those of James I. and Charles I. During the Civil War, which commenced in 1640, it was a great object with the Parliamentary party to obtain assistance from the Scotch, who had preceded them in rebellion by three years, having risen in 1637 against an effort to force upon them a liturgy which they abhorred. An ecclesiastical, as well as a political, union was proposed by the Scotch, who were then, as now, Presbyterian; and in 1644, the Book of Common Prayer

was suppressed and the directory of public worship produced by the Westminster Assembly of divines substituted in its room. A reaction against the new arrangements was not long in arising, and with the return of monarchy episcopacy was restored. In 1662, the Act of Uniformity was passed, which compelled about 2,000 clergymen, mostly Presbyterian in sentiment, to resign their livings, and laid the foundation of modern Nonconformity. The Act is still in force. The effort of James II., in violation of his coronation oath, to undo the reformation in the English Church, injured not it but himself, and the attempt has never been renewed on the part of any subsequent sovereign. The evangelistic zeal of Whitfield, Wesley, and various other clergymen, in the 18th century, awoke the Church to new life, which did not pass away even when the followers of the two great preachers just named ceased to belong to the English Church. The evangelical party, still the most numerous in the Establishment, is, in large measure, the fruit of 18th century revival effort. In the 19th, the movement has been in other directions. With 1833, just after the passing of the first Reform Bill, the first of a series of "Tracts for the Times" came forth, and ninety, in all, were issued within the next eight years. The ritualistic party, at a later date, carried on the work which the tractarians had begun. In 1860 the *Essays and Reviews*, and in 1862 a work by Bishop Coleuso on the Pentateuch, gave prominence to the opposite pole of thought, being what theologians call strongly rationalistic. Church Congresses, bringing the representatives of these three parties face to face, softened their antagonisms, and fear of common danger renders them more united than they otherwise would be.

In the English Church, at present, there are two archbishops and twenty-nine bishops, both of the former and twenty-four of the latter having seats in the House of Lords; subordinate to these are thirty deans, eighty-two archdeacons, 613 rural deans, and about 13,500 beneficed clergy, the whole clerical staff of all grades being about 23,000. Including infants, it is believed to have above 13,000,000 adherents in England and Wales. Previous to 1871, the English Church and the Established Church of Ireland constituted but a single body, called the United Church of England and Ireland. It is powerful also in the Colonies, and by means of its two great societies, the Propagation and the Church Missionary Societies, acts powerfully on nearly every part of the heathen world.

Church of Ireland, Irish Church: A popular name sometimes given, prior to 1871, to what was not an independent denomination, but was an integral part of the United Church of England and Ireland. It constituted the Established Church of the two countries. When on 1st January, 1871, the Act of Parliament, disestablishing and disendowing the portion of the United Church which was in Ireland, took effect, those affected by the measure, rejecting the name proposed by the Government for the new organization, adopted that of the Irish Church or the Church of Ireland. It comprehends within its pale about one-eighth of the Irish people.

Church of Scotland: The original Scottish Church seems to have been that of the Culdees, then in mediæval times the Roman Catholic Church was, to a certain extent, the national church in Scotland, not merely as having within its pale at least by profession all the people, but as maintaining its independence of its powerful southern neighbor. The church resisted the claims to supremacy over it put forth at one time by the Archbishop of York, at another by the Archbishop of Canterbury; and, in 1176, in self-defense cast itself into the arms of the Roman Pontiff. When the sixteenth century opened, the royal power in Scotland was weak and was jealous of, and in conflict with, a very powerful nobility. When the Reformation struggle began, the Crown remained adherent to the old faith, while the nobility tended to adopt the new. From the war of independence, Scotland had considered it good policy to guard against any aggression on the part of England by a close alliance with France, and when the Reformation began there were actually French troops in Scotland. On these the Crown rested to resist the religious movement which had been begun, but the Protestant "Lords of the Congregation," who had taken up arms to defend their cause, applied for aid to Queen Elizabeth, who sent troops to aid them in expelling the French. By a treaty signed on the 7th July, 1560, it was stipulated that both the French and the English troops should withdraw from Scotland. On the 24th August, of the same year, the Scottish Parliament abolished the papal jurisdiction, prohibited the celebration of the mass, and rescinded all the laws made in favor of Roman Catholicism. The reformers adopted what is now called Presbyterian Church government, though certain superintendents were appointed, with the sanction of John Knox, the great Scottish reformer, whose offices after a time were swept away. [CHURCH GOVERNMENT, PRESBYTERIANISM.] The first General Assembly was held on 20th December, 1560. When the victory over the

Church of Rome was complete, the alliance between the nobility and the Protestant preachers which had effected the triumph, showed symptoms of dissolving, and a large section of the former viewed with distrust, and even active hostility, what they regarded as the too democratic measures which Knox aimed at carrying out. But one inestimable boon was gained ere they parted, the universal establishment of parish schools.

The semi-republican constitution of the Church, which became more marked after the office of superintendent had been swept away, and the second book of discipline published (the latter event in 1578), created jealousy in the minds of regents and of sovereigns, and four or five generations of Stuart kings put forth long and determined efforts to transform Presbyterianism into Episcopal government. The project cost the lives and liberties of far more people than the short, sharp Reformation struggle had done, and ended at last in failure. The Revolution settlement of 1690, re-established Presbyterianism, and the General Assembly, which had been interrupted for nearly forty years, began again to sit and has done so annually from that time till now. Prior to the union with England in 1707, an Act of Security was passed, designed to preserve the Scotch national church from being overthrown by southern votes.

In 1712 an Act of Parliament re-introduced patronage which had been swept away. The operation of this enactment was one main cause of three secessions: that of the Secession, pre-eminently so called, in 1733; the Relief in 1752; and, the greatest of all, that which created the Free Church in 1843.

The Church of Scotland claims about half the people as at least its nominal adherents. Besides the "General Assembly," it had in 1881 sixteen synods, eighty-four presbyteries, 1,500 churches, including mission-rooms, and 1,660 ministers and probationers engaged in ministerial work. It has missions in India, Africa, and elsewhere. In 1874 the Patronage Act of 1712 was repealed, and each congregation now elects its own pastor. Its chief rivals in Scotland are the Free Church and the United Presbyterians, the latter resulting from a union of the old Secession and Relief Churches.

Church of Rome: For this see ROMAN CATHOLIC CHURCH.

Church and mice: A game of children said to be the same with the *Sow in the Kirk* (q. v.).

These valleys and rocks never heard."

Couper: Verses, supposed to be writt. by Alex. Selkirk.

2. Habitually attending Divine service; regular in attendance at church.

church-government, s. The regulation and ordering of spiritual matters, or those pertaining to the discipline and work of the Church.

¶ Four leading views are at present entertained regarding church government. The first three agree that the rudiments of a scheme of church government are laid down in the New Testament. They differ, however, as to what that scheme is, much the greater number believing it to be *episcopacy*, though one large minority are in favor of *presbyterianism*, and another in favor of *congregationalism*. (See these words.) The fourth view, which has not a large number of advocates, is that no scheme of government was laid down in the New Testament, applicable to all times and places, but that the church has the power of adapting its government to the special circumstances in which it finds itself at any particular time.

church-history, s. The history of any Church, but especially of the Christian Church.

¶ Church history naturally divides itself into four periods: (1) From the advent of Christ to the time of Constantine; (2) From Constantine to Mohammed, or by the arrangement of Mosheim and others, to Charlemagne; (3) From Mohammed, or alternatively from Charlemagne to the Reformation; (4) From the Reformation to the present time.

Period 1. From the advent of Jesus Christ (four years earlier than commonly expressed, or what is known as 4 B. C.), to the Conversion to Christianity of the Emperor Constantine, A. D. 312, or to his establishment of that faith as the state religion, in or before A. D. 321: This period may be naturally divided into three sub-periods, (1) The ministry of Jesus; (2) That of His apostles; and (3) That of the Christian fathers after the last of the apostles had died.

The first sub-period has been already treated of. [CHRIST.] Immediately after the ascension means were taken to fill up by election the vacancy left in the apostolic college by the apostasy and death of Judas (Acts i. 15-26). The descent of the Holy Spirit, which had been promised by Christ (John xiv. 16, 17, and xvi. 7-14, &c.), took place soon afterward on the day of Pentecost, accompanied by the gift of tongues (Acts ii.), and then the apostles were qualified to go forth and carry into effect the Savior's last charge to make disciples of all nations. Under the preaching of Peter and the other apostles, thousands were converted and baptized, and such a spirit of love prevailed among the converts that a Christian socialism sprang up, but ere long it produced an Ananias and Sapphira, and we hear of it no more (Acts iv. 32-37, v. 1-11).

The same jealousy which had prompted the Jewish rulers to seek the death of our Lord, led to the persecution of His followers, and Stephen, stoned to death for alleged blasphemy, was the first of the great army of Christian martyrs. A scattering of the Christians took place, which resulted in the founding of other churches, the chief of which was at Antioch in Syria, where the disciples of Jesus for the first time received the name of Christians (Acts xi. 26.) [CHRISTIAN.]

Previous to this, Peter, moved by a vision, had begun to preach to the Gentiles (Acts xi. 1-18), and not long afterward Saul of Tarsus, once a bitter persecutor of the Christians but now a convert, was sent out as colleague to Barnabas, on a missionary journey chiefly through Asia Minor, and ultimately became the splendidly successful apostle of the Gentiles (Acts xiii. 2, &c.). No complete coalescence ever took place between the Jewish and the Gentile elements in the early church. The Jews, with a few honorable exceptions, imbued with caste pride, attempted to impose a Judaic yoke on their Gentile brethren, and not ultimately succeeding, many of them in the second century withdrew from the church catholic, and formed the two sects of the Nazarenes and the Ebionites, the former of which retained, while the latter rejected, belief in the divinity of Christ. While Jerusalem stood the unconverted Jews lost no opportunity of persecuting Christianity, but their influence was to a large extent swept away by the partial destruction of Jerusalem by Titus in 70 A. D., and its total destruction after the revolt of Barchochab in the second century. Before the first of these events had taken place, persecution on the part of the heathen Romans had begun, and it continued at intervals during the whole of the first period. The Roman persecutions are generally called ten; but if only those which were universal be reckoned, they were fewer than that number, while if those which were local be taken also into account, they were more. After the last and severest of these—called Diocletian's persecution, though its real instigator was his son-in-law Galerius—a convert of high rank, Constantine, was obtained, who became emperor in A. D. 312, and in 321 or earlier established Christianity as the State religion.

Period 2. From the Conversion of Constantine or his establishment of Christianity as the state religion to the rise of Mohammed: While all along there

fāte, fāt, färe, amidst, whāt, fäll, father; wē, wēt, hère, camēl, hēr, thère; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre wōlf, wōrk, whō, sōn; mūte, cūb. cūre. unite, cūr, rāle, füll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

had been a general agreement as to Christian doctrine, the several tenets had not been exactly defined, but when controversy regarding any one of them arose, it was for the first time precisely stated. The question whether our Lord was equal with the Father, and truly and absolutely Divine, or whether, as Arius alleged, he was but the first of created beings, was settled by the Council of Nice in 325 in favor of the former view, and though a long struggle between the Trinitarians and the Arians took place, and though sometimes one and sometimes the other party prevailed, the church ultimately settled into belief in the Three-One God. [ARIANISM.] Other doctrines were settled by the decision of councils. (For these see COUNCIL.) The fall of the Western empire in the fifth century almost dissolved the civil power in Italy and elsewhere, but the church was equal to the crisis, and was ultimately enabled to convert the barbarous nations to the Christian faith. In those ages of political confusion and intellectual darkness, while as yet society was not fully reconstituted, primitive Christianity became considerably modified, and finally in 780 the worship of images was introduced into the church.

In A. D. 569 or 570 Mohammed was born, and when he sought for religious light, his mind revolted from the Arab and all other idolatry. He was opposed also to the doctrines of the Trinity, and of the Sonship of Christ, against which his religion may be considered as a reaction. [MOHAMMEDANISM.] This second period may be made to end with the first preaching of Mohammed about A. D. 611, or with the Mohammedan era—the Hegira, 15th July, 622—preferably the former. Or it might be made to terminate with Charlemagne's donation to the Papacy, or with the separation between the Eastern and the Western Churches, for which see *Period 3*.

Period 3. From the rise of Mohammedanism to the Reformation under Luther, the latter event dating from A. D. 1517: While the Greeks, indulging their natural subtilty, took the lead in hair-splitting definitions of doctrine, the imperial Romans were more practically engaged in building up a world-embracing ecclesiastical power in lieu of the secular empire which they had lost, and from the seventh to the thirteenth century the growth of the Papacy was continuous. In 756 Pepin, having defeated Astulphus, King of the Lombards, compelled him to give to the church and the republic the exarchate of Ravenna and the Pentapolis. In 774 Charlemagne confirmed this cession and enlarged the territory given, thus laying the foundation of the Pope's temporal power. [PAPACY.] In the eighth century a schism took place between the Patriarchs of Constantinople and Rome, and the separation which still exists between the Eastern and Western Churches began. During the early part of this third period the Eastern Church was sorely trampled down by the Mohammedans, and during the twelfth and thirteenth centuries the Western one came into the conflict in hope of recovering the holy sepulcher, but the Christian success was only temporary. [CRUSADES.] During the fourteenth century the Papacy was declining, during the fifteenth it was attempting to put down evidently imminent revolt by cruel persecution, and in the sixteenth the crisis of its fate came.

Period 4. From the commencement of the Reformation under Luther, A. D. 1517, to the present time: For details see REFORMATION, PROTESTANTISM, ROMAN CATHOLICISM, &c. Suffice it here to say that the Reformation struggle continued in one form or other during nearly the whole of the sixteenth and seventeenth centuries. During the eighteenth all the churches which had been engaged in that arduous struggle slept, till rudely awakened by the French revolution of 1789, while the nineteenth century has been mainly a reaction against the irreligion of that revolution and the cruelties of the reign of terror. The Bible and the Tract Societies, as well as the great religious missionary organizations, sprang into life while that revolution was working itself out, and have constituted this century to a certain extent an era of missions. [MISSIONS.]

church-judicatories, *s. pl.* Ecclesiastical courts, especially applied to those of the Presbyterian churches.

church-like, *a.* Fitted for church, or to a minister.

"Nor wear the diadem upon his head,
Whose church-like humors fit not for a crown."

Quarles: *Feast for Worms* (1620), § 2.

***chūrm, *chŷrme**, *v. t. & i.* [CHURM, *s.*]

A. Trans.: To sing in a low tone, to hum; to sing.

"Let me rather, on the heathy hill,
Far frae the busy world, whereon ne'er stood
A cottage, walk, an' churm my Lallan lays."
Davidson: *Seasons*, p. 55.

B. Intrans.: To grumble, or emit a humming sound.

"A cuckoo-clock chicks at one side of the chimney-place, and the curate, smoking his pipe in an antique elbow-chair, churms at the other."—Sir A. Wylie, i. 209.

***chūrme, *chirm, *chirme, *chyrme**, *s.* [A. S. *cirm, cyrm*.] [CHIRM.] A confused noise, a buzzing.

"He was conveyed to the tower, with the churme of a thousand taunts and reproaches."—Bacon.

chūrn, *cherne, *chirne, *chyrne, *kyrne, *scharne (Eng.), **kirn** (Scotch), *s.* [A. S. *ceren, cyrn, cæren* (Somner); O. Icel. *kirna*; O. Sw. *kerna*; Sw. *kärna*; Dan. *kierne*.]

1. *Ord. Lang.*: A vessel in which milk or cream is agitated or beaten in order to effect the separation of the serous parts from the rest; a vessel in which butter is made.

"Chyrne, vesselle. Cimbria, cumbia."—Prompt. Parv

"Her aukward fist did ne'er employ the churn."
Gay: *Pastorals*.

2. *Porcelain*: The block or chuck on a porcelain turner's lathe, on which the thrown and baked articles are turned by thin iron tools to give truth and smoothness to circular articles.

churn-dasher, *s.* The moving agent in a churn, rotary or reciprocating, by which the milk or cream is agitated.

churn-drill, *s.* A large drill used by miners. It is several feet long, and has a chisel-point at each end.

churn-owl, *s.*

Ornith.: A local name for a bird, the Night-jar or Goatsucker, *Caprimulgus europæus*.

churn-power, *s.* A motor for driving churns or churn-dashers to agitate the milk or cream. Animals, such as dogs, sheep, or goats, are employed in treadmills or slatted platforms on endless belts. The power of descending weights, springs, wind or water driven wheels, &c., are used.

churn-staff, *scharnestafe, *s.*

1. *Ord. Lang.*: The staff or implement employed in the operation of churning.

2. *Bot.*: A plant, *Euphorbia helioscopia*.

chūrn, *cherne, *chirne, *chyrne (Eng.), **kirn** (Scotch), *v. t. & i.* [A. S. *ceran* (Somner); O. Icel. *kirna*; Sw. *kärna*, *tjärna*; Dan. *kierne*; Dut. *kernen*; Ger. *kernen*.]

A. Transitive:

† *Generally:*

(1) To agitate or shake violently; to champ, to chew.

(2) To mix or work up together.

2. *Spec.*: To agitate milk or cream in a churn for the purpose of making butter.

B. Intrans.: To perform the operation of churning.

chūrnēd, *pa. par. & a.* [CHURN.]

chūrn'-īng, *pr. par., a. & s.* [CHURN, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act or process of agitating or beating milk or cream in a churn for the purpose of making butter.

"The churning of milk bringeth forth butter."—Prov. xxx. 33.

2. The quantity of butter made at one operation.

Section of Churn.

***chūrr, *churl, *chirle**, *v. i.* [CHIRRE.] To coo, to murmur.

"The churlin moor-cock woes his valentine,
Couring coyish to his sidelin tread."
Davidson: *Seasons*, p. 9.

chūr'-rūs, *s.* [Hindust. *chūrūs*.]

Comm.: The resinous exudation of the leaves and flowers of Indian Hemp, *Cannabis indica* (q. v.). It is used by the natives of India as an intoxicating drug. According to Jaffur Shurreef, a man covers himself with a blanket and runs through a field of hemp early in the morning; the dew and gum of the plant naturally adhering to it are first scraped off and the blanket afterward washed and wrung. Both products are boiled together and an electuary formed. The smoking of five grains of it will produce intoxication.

chūrr'-wōrm, *s.* [A. S. *ceran*=to turn, and Eng. *worm*.]

Entom.: An insect that turns about nimbly; called also a fan-cricket. (Skinner.) (Phillips.) It is the mole-cricket (*Gryllotalpa vulgaris*).

***chūse**, *v. t. & i.* [CHOOSE.]

chūs'-ite, *s.* [Cf. Gr. *chous*, contr. of *choos*=earth heaped up. . . . alluvial earth, with suff. -ite (Min.) (q. v.).]

Min.: A variety of Olivine. Dana considers that it has been derived from chrysolite, the common variety of what he makes the same as Olivine. Chusite is from Limburg, in Brisgau. (Dana, &c.)

chūte, *s.* [Fr. *chute*=a fall.] [SHOOT, *s.*]

Mech.: An inclined trough. On a moderate scale it forms a leader, or feeder for materials or blanks, to machines. On a large scale it leads water from a penstock to a water-wheel, or an inclined plane down which logs are passed from a higher level to a lower one. These are sometimes in mountainous countries for land transportation, and sometimes are the links of a slack-water system, as on the Ottawa; called slides.

chūt'-nēe, chūt'-nēy, *s.* [Maharatta, &c., *chutnee, chutni*.]

Cookery: An acid and highly pungent seasoning, an Indian condiment generally composed partly of sweet fruits, as mangoes and raisins, with acids, such as lemon-juice and sour herbs, to which are added also spices and cayenne pepper.

chŷd'-ōr-ūs, *s.* [From Gr. *hydor*=water.]

Zoöl.: A genus of Entomostraca, of the order Cladocera, and family Lynceidæ. They are nearly spherical; beak very long and sharp, curved downward and forward; inferior antennæ very short. (Griff. & Henfrey.)

chŷ-lā'-ceōūs, *a.* [Eng. *chyl(e)*; -*aceous*.] Pertaining to, or consisting of, chyle (q. v.).

"When the spirits of the chyle have half fermented the chylaceous mass, it has the state of drink not ripened by fermentation."—Floyer: *On the Humors*.

chŷ-lā'-quē-ōūs, *a.* [Eng. *chyl(e)*, and *aqueous*.] Consisting of, or containing, chyle much diluted with water; said of a liquid which forms the circulating fluid of some inferior animals.

chylaqueous canals, *s. pl.*

Zoöl.: A canal system designed for the reception of the Chylaqueous fluid (q. v.).

chylaqueous fluid, *s.*

Zoöl.: A fluid consisting, as its name imports, partly of water and partly of chyle. The former derived from the exterior, and the latter a product of digestion. It is found in the body cavity of many invertebrated animals, such as Annelids, Echinoderms, and Rotifers. (Nicholson.)

***chŷld**, *s. & v.* [CHILD.]

***chŷld'-īng**, *pr. par. & a.* [CHILDING.]

chyle, *chŷ'-lūs, *s.* [Fr. *chyle*; Mod. Lat. *chylus*; Gr. *chylōs*=juice; *cheō*=to pour out.]

Anat.: The fluid of the lacteal vessels; lymph, colored by a finely granular matter, named by Mr. Gulliver the molecular base. Chyle coagulates into a jelly shortly after being withdrawn from its appropriate vessel. There are in chyle, as in lymph, many small globular bodies called capscles. Chyle also has in it more albumen than lymph possesses. It is very rich in alkalies combined partly with albumin, partly with lactic and sebatic acids; the chlorides of sodium and potassium are found in large quantity. It differs from blood by the want of red corpuscles, as also by possessing a smaller proportion of albumen and less of the basis for formation of fibrin.

"Chylus in the stomach. . . ."—Bacon: *Nat. Hist.*, cent. ix., § 837. (Trench.)

chŷ-li-fāc'-tion, *s.* [Eng. *chyle*; Lat. *chylus*, and Eng. *factio*, Lat. *facio*=to make.]

Physiol.: The act or process of the formation of chyle in animal bodies from food.

"Drinking excessively during the time of chylification, stops perspiration."—Arbuthnot: *On Aliments*.

chŷ-li-fāc'-tīve, *a.* [Eng. *chyle*, and *factive* (q. v.).] Having the power or property of forming chyle; chylifactory.

"Whether this be not effected by some way of corrosion, rather than any proper digestion, chylifactive mutation, or alimantal conversion."—Browne: *Vulgar Errors*.

chŷ-li-fāc'-tōr-ŷ, *chŷ-li-fāc'-tōr-ŷ, *a.* [Eng. *chyle*; Lat. *facio*=to make; Eng. suff. -*ory*.] The same as CHYLIFACTIVE (q. v.).

"We should rather rely upon a chylifactory menstruum, or digestive preparation drawn from species or individuals, whose stomachs peculiarly dissolve lapideous bodies."—Sir T. Browne: *Vulgar Errors*.

chŷ-lif'-ēr-ōūs, *a.* [Mod. Fr. *chylifère*; Lat. *chylus*; Gr. *chylos*, and Lat. *fero*=to bear, to produce.] Forming or producing chyle; changing into chyle; chylific.

"Purges clear and empty the lower part of the chyliferous tubes."—Cheyne: *Essay on Regimen*, p. 6.

chyliferous vessels, *s. pl.* Vessels bearing chyle, that is, constructed to afford passage of chyle.

"The chyliferous vessels probably have the same office for the intestinal tissues as the lymphatics in other parts."—Todd & Bowman: *Physiol. Anat.*, vol. ii. (1856), p. 288.

chŷ-lif'-īc, *a.* [Eng. *chyle*; Lat. *chylus*, and *facio*=to make.] Chylifactive. The term is applied to one of the stomachs when a plurality of them exist, as, for instance, in insects.

chŷ-lif'-ī-cā'-tion, *chŷ-lif'-ī-cā'-tion, *s.* [Eng. *chyle*, Lat. *chylus*=chyle, and *facio*=to make.] Chylification. The act or process of making chyle.

"Nor will we affirm that iron is indigested in the stomach of the ostrich; but we suspect this effect to proceed from any liquid reduction, or tendency to chylification, by the power of natural heat."—Browne: *Vulgar Errors*.

chŷ-lif'-ī-cā'-tōr-ŷ, chŷ-li-fāc'-tōr-ŷ, *a.* [Eng. *chyle*; Lat. *chylus*, and *facio*=to make.] Chylifactive, chylific

chŷ-liz'-ā, *s.* [Gr. *chylizō*=to extract or form into juice; *chylos*=juice.]

Entom.: A genus of dipterous insects, belonging to the tribe Muscidæ.

***chylle**, *s.* [Etym. doubtful.] An unidentified plant.

"Chylle, herbe. Cilium vel psillium."—Prompt. Parv.

chŷl'-ō-clā'-dī-ā, *s.* [Lat. *chylus*=chyle; Gr. *klados*=a young branch, a shoot.]

Bot.: A genus of Laurenciaceæ (Florideous Algae), with fronds of small size, composed of a branched, cylindrical, and tubular structure, cut off into chambers within by diaphragms at intervals, and filled with a watery juice.

chŷl'-ō-pō-ēt'-īc, chŷl'-ō-pōl'-ēt'-īc, *a.* [Gr. *chylopoieō*=to make into juice; from *chylos*=juice, *chyle*, and *poieō*=to make.]

Physiol.: Having the power or the office of forming chyle.

". . . between the kidneys and the chylopoietic viscera, . . ."—Owen: *Anatomy of Vertebrates*.

chŷl'-ōūs, *a.* [Fr. *chyleux*.] Consisting of, or of the nature of, chyle.

". . . during a residence of ten years in Barbadoes he saw at least a dozen well-marked examples of chylous urine in negroes."—Watson: *Lectures on the Principles and Practice of Physic*, lect. viii.

chŷme, *s.* [Fr. *chyme*; Lat. *chymus*; Gr. *chymos*=juice, from *cheō*=to pour out.]

Physiol.: A semifluid or pulpy matter into which food is converted after it has been for some time in the stomach and mixed with gastric secretions. It passes into the duodenum from the stomach, and yields chyle by admixture with the biliary secretion.

chyme-mass, *s.*

Zoöl.: The central semifluid sarcode in the interior of an infusorian. (Nicholson.)

***chŷme**, *v. t.* [CHYME, *s.*] To extract by chemical processes. (*Lit. & fig.*)

"What antidote against the terror of conscience can be chymed from gold."—Adams: *Works*, i. 153. (Davies.)

chŷm'-īc, *a. & s.* [CHEMIC.]

". . . an art now utterly lost, or perchance kept up by a few chymics."—Wotton.

chŷm'-īf'-ī-cā'-tion, *s.* [Fr. *chymification*, Lat. *chymus*, and *facio*=to make.] The act or process of forming into chyme.

"The transformation of food into tissue involves mastication, deglutition, chymification, . . ."—Herbert Spencer: *Data of Biology*, § 25.

chŷm'-ī-fīed, *pa. par. or a.* [CHYMFIFY.]

chŷm'-ī-fŷ, *v. t.* [Fr. *chymifier*, Lat. *chymus*, and *facio* (pass. *fio*)=to make.] To form into chyme. (*Quar. Rev.*)

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw

chým'-ist, s. [CHEMIST.]

"Operations of *chymistry* fall short of vital force; no *chymist* can make milk or blood of grass."—*Arbutnot; On Aliments.*

chým'-is-trý, s. [CHEMISTRY.]

"Sometimes she flies like an industrious bee,
And robs the flowers by Nature's *chymistry*."
Dryden: Art of Poetry, Ode c. 2.

chým-ô-car'-pūs, s. [Gr. *chymos*=juice, and *karpos*=fruit.]

Bot. A genus of scandent herbs belonging to the Tropæolaceæ. The sessile three-lobed, three-celled ovary grows into a three-lobed, sweet, fleshy, edible berry, which remains attached to the front of the persistent calyx. This black juice berry, which is not unlike, in appearance and flavor, to the Zante or currant grape, is the most remarkable peculiarity of the genus, which was founded on *Chymocarpus pentaphyllus*. (*Treas. of Bot.*)

chým'-ous, a. [Eng. *chym(e)*; suff. -ous.] Pertaining to, or of the nature of, chyme.

chý-ôm'-e-tēr, s. [Gr. *cheo*=to pour out, and *metron*=measure.] An instrument for measuring liquids.

chýt-rí'-dī-úm, s. [Gr. *chytridion*=dimin. of *chytrós*=a pot, a pitcher.]

Bot. A genus of Unicellular Algæ, consisting of minute, globose, or pyriform, usually colorless cells, operculate at the summit, with a root-like base, attached to Confervoid or allied plants, and penetrating their cell-walls. Zoospores very numerous, globular, with a single very long cilium. (*Griff. & Henfrey.*)

¶ For other words in *chy-* not found here, see under *chi-*.

çī-bār'-ī-ous, a. [Lat. *cibarius*=pertaining to food; *cibus*=food.] Pertaining to or useful for food, edible.

çī-bā'-tion, s. [Fr. *cibation*, from Lat. *cibus*=food.]

Phys. A term for the taking of food; also an alchemical term of various signification having reference to that act.

çīb'-bōls, **çīb'-ōl**, ***çīb-oule**, s. [Fr. *ciboule*; Sp. *cebolla*, from Low Lat. *cepula*, *cepola*, dim. of *cepa*, *cepe*=an onion.] A small variety of onion, *Allium Ascalonicum*.

"Ciboules, or scallions, are a kind of degenerate onions."—*Mortimer.*

çī-bōr'-ī-úm, s. [Lat. *ciborium*; Gr. *kibōrion*=a drinking-cup made of the seed-vessel of the Egyptian bean. In Low Lat. also an arched chamber supported by four columns. In Ital. *ciborio*; Fr. *ciborre*; Sp. *cimborio*.]

1. **Arch.** An insulated erection open on each side, with arches, and having a dome of ogee form, like the bowl of a reversed cup, carried or supported by four columns, the whole covering the altar. It is now called a *baldachino* (q. v.). The earliest known instance of a ciborium appears to have been one in the church of St. George at Thessalonica, supposed to have been in use about A. D. 325. (*Gwilt.*)

2. **Eccles.** The vessel in which the host is placed, instead of on a paten, when many communicants are present.

3. **Conch.** The glossy impression on the inside of valves, to which the muscles of the animals have been attached.

çī-bō'-tī-úm, s. [Gr. *kibōtion*=a little chest, from the form of the indusium.]

Botany:
1. A genus of Polypodiaceous ferns. [AGNUS SCYTHICUS, BAROMETZ.]

2. A noble tree-fern from New Holland. (*McNicol.*)

çī-cā'-dā, s. [Lat. *cicada*; Fr. *cigale*; Ital. *cigala*.] [CICALA.]

Entom. A genus of homopterous insects, tribe Cicadariæ, sub-tribe Stridulantia, or it may be made a family Cicadiidæ. They have three ocelli or simple eyes, with the short antennæ in front. The tarsi are three-jointed. The male has a drum or musical apparatus placed in a cavity on each side of the abdomen, and concealed by scale-like plates. A muscle pulls the drum in and again lets it out with the effect of producing a sharp continuous sound. Familiar in the warmer parts of this country, the south of Europe, in India, in Bermuda, the West Indies, &c. The Greeks, who considered the cicadas happy in having "voiceless wives," called the animal *tettix*. The observation that the female cicadas do not emit the sharp continuous sound described is accurate. The Grasshopper and Cicada, though popularly believed the same, are not even of the same order. The former belongs to the Orthoptera, the latter to the Homoptera. The former possesses mandibles, while the latter has a suctorial apparatus instead. The antennæ of the former are very long, and those of the latter very short. The former emits its voice by night, the latter in the

brightest sunshine. Many other differences between the two exist. One American species of Cicada, *C. Septendecim*, appears only once in seventeen years, hence, it is popularly known as the seventeen-year locust. It is no more akin to the locust than to the grasshopper.

çíc-a-dār'-ī-a, **çíc-a-dār'-ī-æ**, s. pl. [From Lat. *cicada*, and the neut. or the fem. pl. of Lat. suff. -arius.]

Entom. A tribe of the sub-order Homoptera. The tarsi are three-jointed, the antennæ minute, and usually terminated by a bristle, and the wings with many nervures or cells. It contains the families Cercopidæ or Cicadellina, Membracidæ or Membracina, Fulgoridæ, and Cicadiidæ (q. v.).

çíc-ā-dēl'-lā, **çī-cā-dēl'-lī-nā**, s. [A dimin. formation from Lat. *cicada*=a grasshopper.]

Entom. A family of homopterous insects, better called Cercopidæ (q. v.). The name was given because they resemble typical Cicadas, but are much smaller.

çíc-a-dī'-dæ, **çī-cā-dī'-ī-dæ**, s. pl. [From Lat. *cicada* (q. v.), and fem. pl. adj. suff. -idæ, with or without *i* connective.]

Entom. The family of insects of which the cicada is the type. The species, which are large insects with broad heads and breasts, are from the warmer parts of the world. Swainson made the family comprehensive enough to include the frog-hoppers as well as the cicadas proper, calling the latter Cicadinæ (Singing Cicadas), and the former Cercopinæ (Hopping Cicadas), but Cercopinæ are now raised to the family Cercopidæ (q. v.).

çī-cā'-lā, s. [Ital. *cigala*.] [CICADA.] Either a cicada or a grasshopper.

"At eve a dry cicala sung."

Tennyson: Mariana in the South.

çíc'-a-trīçe, s. [CICATRIX.]

çī-cāt'-rīc-le, **çī-cāt'-rī-cule**, ***çíc-a-trīc'-u-lā**, s. [Fr. *cicatrice*, from Lat. *cicatricula*, dimin. of *cicatrix*=a scar.] The germinating or focal point in the embryo of a seed, or the yolk of an egg. (*Craig.*) The opaque spot on the surface of a fecundated yolk or yolk.

çī-cāt'-rī-cōşe, a. [From Lat. *cicatrix* (genit. *cicatricis*) (q. v.), and Eng. suff. -ose.]

Bot. Marked with scars, cicatrised.

***çíc'-a-trīne**, a. [Lat. *cicatr(ix)*, and Eng. suff. -ine.] Scarring, wounding.

"Thy aloe cicatrine tongue."—*Dekker: Satiromastix.*

çī-cāt'-rī-sāte, a. [From Lat. *cicatrix* (genit. *cicatricis*) (q. v.), and Eng. suff. -ate.]

Bot. The same as CICATRICOSE (q. v.).

çíc-a-trī'-sīve, a. [Lat. *cicatrix* (genit. *cicatricis*)=a scar.] Proper or useful to induce a cicatrix.

çíc'-a-trīx, **çíc'-a-trīçe** (pl. **çíc'-a-trīç-ēs**), s. [Lat. *cicatrix* (genit. *cicatricis*)=a scar.]

1. **Ord. Lang. & Med.**

(1) A scar or mark remaining after a wound.

(2) Any mark or impression resembling the scar of a wound.

"Lean out upon a rush,
The cicatrice and capable impressure
Thy palm some moments keeps."

Shakesp. As You Like It, iii. 5.

2. **Bot.** A scar formed by the separation of one part from another.

çíc-a-trīz'-ant, a. & s. [Fr. *cicatrissant*, pr. par. of *cicatriser*=to scar; Lat. *cicatrix*=a scar.]

A. As adj. Healing or tending to heal a wound, or to induce a cicatrix.

B. As substantive:

Med. Any medicine or preparation proper or useful to induce a cicatrix, or heal a wound.

çíc-a-trīz'-ā'-tion, s. [Eng. *cicatrix*, and suff. -ation.]

1. The act or process of inducing a cicatrix, or healing a wound.

"A vein bursted, or corroded, in the lungs, is looked upon to be for the most part incurable, because of the motion and coughing of the lungs tearing the gap wider, and hindering the conglutination and cicatrization of the vein."—*Harvey.*

2. The state of being cicatrized.

"The first stage of healing, or the discharge of matter, is called digestion; the second, or the filling up with flesh, incarnation, and the last, or skinning over, cicatrization."—*Sharpe: Surgery.*

çíc'-a-trīze, v. t. & i. [Fr. *cicatriser*, from Lat. *cicatrix*=a scar.]

1. **Transitive:**

1. To apply or administer medicines or preparations calculated to induce a cicatrix.

2. To heal or induce the skin over a wound.

"We incarnated, and in a few days cicatrized it with a smooth cicatrix."—*Wiseman: On Tumors.*

II. Intrans. To become healed or cicatrized, to become covered with skin.

çíc'-a-trīzed, pa. par. or a. [CICATRIZE.]

çíc'-a-trīz-īng, pr. par., a. & s. [CICATRIZE.]

A. & B. As pr. par. & particip. adj. (See the verb.)

C. As subst. The act or process of healing a wound by inducing a cicatrix; the state of becoming cicatrized.

"... the cicatrizing of these being for the most part the work of the surgeon."—*Wiseman.*

çíc'-a-trōşe, a. [Lat. *cicatricosus*, from *cicatrix*=a scar.] Full of scars or cicatrized wounds; scarry. (*Craig.*)

çíc'-cā, s. [A name of unknown meaning (*Loudon*); said to be a man's name (*Paxton*); but may it not be from Gr. *kiki*=the castor-oil berry, to which the cicca is akin?]

1. **Bot.** A genus of Euphorbiaceæ, species of which have three to five cells, while three is in most of the order the unvarying number. It consists of small trees or shrubs found in the warmer parts of the world.

2. **Med.** The leaves of *Cicca disticha* and *racemosa* are sudorific, and used against syphilis. The root is violently purgative. Its succulent fruit, and that of *C. racemosa*, is subacid, cooling, and wholesome, while the seeds are cathartic.

çíc'-cūs, s. [Lat.]

Entom. A genus of homopterous insects, of the family Cercopidæ.

Çíc'-ēl'-y, s. [Lat. *seseli*, *seselis*; Gr. *seseli*, *seselis*.] [SESELI.]

1. **Ord. Lang.** A proper name.

2. **Bot.** The ordinary name for the genus *Myrrhis*.

¶ *Fool's cicely: Æthusa Cynapium.*

Rough cicely: Torilis Anthriscus.

Sweet Cicely:

1. *Myrrhis odorata.*

"The smell of *Sweet Cicely* attracts bees, and the insides of empty hives are often rubbed with it."—*Loudon: Encyclopedia of Gardening*, § 4,723.

2. A name for *Osmorrhiza*, a genus of Umbelliferæ.

Wild cicely: Anthriscus sylvestris.

çī-gēn'-dī-a, s. [Etym. doubtful. Hooker and Arnott suggest Gr. *kikinnos*=a curled lock, a ringlet, on account of the slender entangled stems and branches.]

Bot. A genus of plants, order Gentianaceæ, sub-order Gentianeæ. It consists of small annual branched herbs. *C. filiformis* is by some botanists called *Exacum filiforme*.

çī'-çēr, s. [Lat. *cicer*=a chick-pea, perhaps from Gr. *kikys*=force or strength, from its nutritive qualities. Possibly the Roman family of Cicero, which produced the world-renowned orator, derived their name from *cicer*, either, as Plutarch says, because one of the family had a flat excrescence like a chick-pea on his nose, or, as Pliny asserts, because the first of the name successfully cultivated vetches.]

Bot. A genus of leguminous plants, sub-order Papilionaceæ, tribe Viciæ. *Cicer arietinum*, the Chick-pea, is a native of Egypt and the Levant. It is cultivated in the south of Europe, in India, and elsewhere. It bears pale solitary violet flowers. A field in full bloom, and glistening with dew, is a beautiful spectacle, but an acid which it contains destroys the boot-leather of any one who, walking over it, treads it down. Anglo-Indians call the seeds, gram. They are used in India for feeding horses.

çíc-ēr-ō'-nē (or as **çīch-ēr-ō'-nē**), s. [Lat. *Cicero*, the Roman orator; so called from the talkativeness of guides.] A guide; one who explains the curiosities and interesting features of a place to strangers.

"He had not proceeded many steps from the monument before he beckoned to our *cicerone*."—*Shenstone.*

çī-çēr-ō'-nī-an, a. & s. [From Cicero.]

A. As adj. Resembling the style of Cicero; an easy, flowing style.

B. As subst. An imitator of the style of Cicero. (*Hallam.*)

çī-çēr-ō'-nī-an-īsm, s. [Eng. *ciceronian*; -ism.] An imitation of or resemblance to the style of Cicero.

"Great study in *Ciceronianism*, the chief abuse of Oxford."—*Sidney.*

***çīch'-līng**, s. [CHICKLING.]

çīch-ōr-ā'-çē-æ, s. pl. [Lat. *cichorium*; Gr. *kichōrion*, *kichorē*=succory, chicory; Lat. fem. pl. adj. suff. -aceæ.]

Bot. A sub-order of Composite plants distinguished by their corollas being slit. The name was given by Jussieu. Lindley, following Decandolle, called it *Ligulifloræ* in his *Vegetable Kingdom*.

bōl, **bōy**; **pōut**, **jōwī**; **cat**, **çell**, **chorus**, **çhin**, **bench**; **go**, **gem**, **thin**, **thīs**; **sin**, **aş**; **expect**, **Xenophon**, **exist**. **ph** = **f**.
-cian, -tian = şan. -ticz. -sion = şhūn: -tion, -şion = zhūn. -tious, -cious, -sious = şhūs. -ble, -dle, &c. = bel, del.

though in his *Natural System of Botany* he had retained the name *Cichoraceæ*. The corolla, as stated before, is ligulate, or strap-shaped; the seeds, which are erect, have no albumen, and the stem has milky juice. [CICHORIUM, LIGULIFLORÆ.]

čich-ör-ä'-čě-ous, *adj.* [Latin *cichor(ium)*; -aceous.] Of the nature of or possessing the qualities and properties of chicory or succory.

"Diuretics evacuate the salt serum; as all acid diuretics, and the testaceous and bitter *cichoraceous* plants."—Floyer.

čich-ör-ä'-üm, *s.* [Fr. *cichorie*. Name, written *chichoreion*, according to Pliny, of Egyptian origin.]

Bot.: Succory or chicory, a genus of Composite plants. *Cichorium Intybus*, distinguished by having the lower leaves runcinate and the heads usually in pairs, is the origin of the cultivated chicory. It is found wild in Europe, in North Africa, in Siberia, and the Northwest of India. The roots are boiled and eaten, or they are dried and used as coffee. (Dr. Joseph Hooker, &c.) *C. Endivia* is the common Endive. It is extensively cultivated in Europe, into which it was introduced from its native country India, in many parts of which it is called Kasnee. Properly speaking, Succory consists of the blanched leaves of *Cichorium Intybus* and Endive those of *C. Endivia*. *C. Endivia*, or Endive, is a wholesome salad, possessing bitter and anodyne qualities.

čich-ör-ý, *s.* [Fr. *cichorie*, from Lat. *cichorium* (q. v.).]

Bot.: The *Chicorium Intybus* or Wild Succory. [CHICORY.]

***čich'-pěa, *cich-pease**, *s.* [CHICK-PEA.]
"A kind of small pulse, called a *Cichpease*."—Touchstone of Complexions, Pref. (Davies.)

čičin-dě'-la, *s.* [Lat. *cicindela*=a glow-worm, from *candela*=a candle. This is not the *cicindela* of modern entomologists. See def.]

Entom.: A genus of coleopterous insects, the typical one of the family Cicindelidæ. They have very prominent eyes. They are of predatory habits, and are sometimes called Tiger-beetles. They are the most highly organized of all the Coleoptera. They can fly as well as run, and all their movements are agile. They are remarkable for the beauty of their colors. The best known is *Cicindela campestris*, which is above half an inch in length, the anterior and posterior margins of the thorax, the basal joints of the antennæ of a rich copper color, the rest of the thorax green, the elytra green, each with six cream-colored spots; the under side of the body glossy bluish-green. The larvæ may be found in cylindrical burrows from six inches to a foot in depth, at the mouth of which they lurk for their prey, and the perfect insect in sandy spots during the summer months.

čičin-dě'-i-dæ, *s. pl.* [Lat. *cicindela*, and fem. pl. suff. -idæ.]

Entom.: A family of carnivorous Coleoptera, section Adephaga, sub-section Geodephaga.

čičin-ōb'-ül-ūs, *s. & a.* [Gr. *kikinnos* = a curled lock, a ringlet, and *obolos*=an old Greek coin worth in our money about three cents.] [OBOLUS.]

cincinobulus fruit, *s.*

Bot.: A peculiar reproductive body in certain Fungals. It is more commonly called a cyst. (Thomé.)

čičin-ür'-ūs, *s.* [Gr. *kikinnos*=curled hair, and *oura*=a tail.]

Ornithology:

1. The long spiral filaments of the extremity of the tail. (McNicol.)

2. A genus of birds belonging to the Paradisadæ, or Birds of Paradise.

čičis'-bē-ism, *s.* [Ital. *cicisbe(o)*, and Eng. suff. -ism.] The conduct of a *cicisbeo*; the practice of dangling after married women. [Usually applied to a single gallant addicted to this conduct, and generally in a spiteful and contemptuous sense, especially by marriageable single women whose charms he ignores.]

čičis'-bē-ō, *s.* [Ital. In Fr. *cicisbée*, *sigisbée*.]

1. **Lit.**: A term applied in Italy to a professed admirer of a married woman; a dangler about women.

†2. **Fig.**: A knot of ribbon attached to a sword-hilt, gun, &c.

***čic'-la-toun, *čic-la-tun, *sic-la-toun**, *s.* [O. Fr. *ciglaton*; Sp. *ciclaton*.]

1. A sort of stuff, made sometimes of silk, sometimes of cloth of gold embroidered.

"Ther was mony gonfanoun,
Of gold, sendel and *ciclatoun*."

Alisaunder, 1,963.

2. A cloak or garment made of such material.

čī-cō'-nī-a (Latin), ***čī-con-ie, *čy-con-ye** (Eng.), *s.* [Lat. *ciconia*=a stork.] [STORK.]

Ornithology:

1. A stork, a member of the family Ciconiidae.

"The somer foul that is clepid *cyconye*."—Wycliffe. *Jeremiah* viii. 7.

2. A genus of Wading Birds, the typical one of the sub-family Ciconiinae. It belongs to the family Ardeidae (Herons). The species have long conical bills, long legs, with the three toes, which point forward, united by a membrane as far as the first joint, the hinder toe on the same level. The wings are of moderate length, the third, fourth and fifth quills largest, the second a little shorter, and the first a little shorter still. [STORK.]

***čī-cō'-nī-an**, *a.* [Lat. *ciconi(a)*, and Eng. adj. suff. -an.] Consisting of or pertaining to storks.

"But when his evening wheels o'erhurling the main,
Then conquest crown'd the fierce *Ciconian* train."
Pope: *Homer's Odyssey*, bk. ix., l. 67, 68.

čī-cō'-nī-ī-dæ, *s. pl.* [Lat. *ciconia*, and fem. pl. adj. suff. -idæ.]

Ornith.: A family of Wading Birds, containing the Storks, &c. More generally, however, it is reduced to a sub-family. [CICONIINÆ.]

čī-cō'-nī-ī-næ, *s. pl.* [Lat. *ciconia*, and fem. pl. suff. -inæ.]

Ornith.: A sub-family of Wading Birds, family Ardeidae. [CICONIA.]

čič'-ō-rý, *s.* [CHICORY.]

¶ **Wild cicory**: *Cichorium Intybus*.

***čic'-u-râte**, *v. t.* [Lat. *cicuratus*, pa. par. of *cicuro*=to tame; *cicuro*=tame, gentle.] To tame, to soften the character of.

***čic'-u-râ-tion**, *s.* [CICURATE.] The act of taming or softening in character.

"This holds not only in domestic and mansuete birds, for then it might be the effect of *cicuration* or institution; but in the wild."—Ray. *On the Creation*.

čī-cū'-ta (Lat.), ***čī-cute** (Eng.), *s.* [Lat. *cicuta*=the hemlock given as poison; Sp., Port., & Ital. *cicuta*; Prov. *ciguda*; Fr. *ciguë*.]

1. **Bot.**: The Water-hemlock, or Cowbane. A genus of plants, order Umbelliferae. It has compound umbels with many rays; few or no bracts, but many small bracteoles. The flowers are white, the fruit orbicular, or broadly ovoid, with solitary vittæ in the interstices of the ridges. The leaves are pinnate or decompound. *Cicuta maculata*, which has doubly serrate lanceolate leaflets, is a tall plant of three or four feet high, found by roadsides or the margins of lakes in this country. It is a deadly poison. It may be the *kōneion* (Hemlock) of the Greeks, which Socrates and others condemned to death were required to drink. It is used in medicine as a narcotic and sedative, being employed more especially in neuralgia and kindred affections.

2. The name for a shepherd's pipe made of the hollow stalks of hemlock. (Buchanan.)

čic'-u-tine, *s.* [Lat. *cicuta*, and Eng. suff. -ine (Chem.).]

Chem.: An alkaloid supposed to exist in Water-hemlock, *Cicuta virosa*.

čid, *s.* [Arab. *seid*=lord.]

1. An Arabian name for a chief or commander; applied specially in Spanish literature to Ruy Diaz, Count of Bivar, the celebrated champion of Christianity in the eleventh century.

"The helmet was down o'er the face of the dead,
But his steed went proud, by a warrior led,
For he knew that the *Cid* was there."
Hemans: *The Cid's Funeral Procession*.

2. The name of a Spanish epic poem, celebrating the exploits of Ruy Diaz.

čī-dar'-ī-dæ, *s. pl.* [From Lat. *cidaris* (q. v.), and fem. pl. adj. suff. -idæ.]

Zoöl.: A family of radiated animals, containing what are termed Sea-eggs. The body is subglobose, and covered with long spines.

čīd'-ar-is, *s.* [Lat., a turban or miter; Gr. *kid-aros*, *kitaris* = a cap of state worn by the Persian kings; Heb. *kether*=a Persian diadem, Esther i. 11, ii. 17, vi. 8; *kathar*=to surround.]

1. **Jew. Antiq.**: A name given to the miter of the Jewish high-priests.

2. **Zoölogy**:

(1) A genus of Echini of hemispherical form, so called from their supposed resemblance to this cap

Ciconia.

of state. Also known as sea-urchins, sea-hedge-hogs, &c. They abound on the coasts of the North Atlantic.

(2) A genus of the Senectinæ or Snake-shells. They are pearly, turbinate, generally smooth, with a round, not oblique aperture.

3. **Palæont.**: *Cidaris* ranges from the Trias to recent times.

***čīd'-ar-ite**, *s.* [Eng. *cidar(is)*, and suff. -ite.]

Palæont.: A fossil specimen of the genus *Cidaris*; a fossil resembling *Cidaris*. The genus *Cidaris* occurs in the secondary strata. *C. florigemma* is a characteristic fossil of the Coral rag.

čī-dēr, *čy-der, *čy-ser, *sy-dir, *si-dir, *s. & a.* [Lat. *sicera*; Gr. *sikera*, from Heb. *shekar*=strong drink; Fr. *cidre*; Sp. *sidra*; Port. *cidra*.]

A. As substantive:

*1. Strong drink; liquor made of the juice of any fruit pressed.

"He schal not drynke wyn and *sydir*."—Wycliffe: *Luke* i. 15.

"... a kind of *oider* made of a fruit of that country."—Bacon.

2. A liquor made from the juice of apples expressed and fermented.

"A flask of *cider* from his father's vats

Prime, which I knew; and so we sat and eat."

Tennyson: *Audley Court*.

¶ To make good *cider* the apples should be quite ripe, as the amount of sugar in ripe apples is 11.0, in unripe apples 4.9, in over-ripe apples 7.95. The fermentation should proceed slowly. The strongest *cider* contains, in 100 volumes, 9.87 volumes of alcohol of 92 per cent., the weakest 5.21 volumes.

B. As adj.: Productive of *cider*; producing *cider*.

"Worcester, the queen of the *cider* land, had but eight thousand."—Macaulay: *Hist. Eng.*, ch. iii.

cider-brandy, *s.* A kind of brandy distilled from *cider*; an English name for the peculiarly American product, Apple-brandy.

cider-mill, *s.* A mill in which apples are ground into pulp for the purpose of making *cider*.

cider-press, *s.* A press in which the juice is expressed from the apples after they have been ground into pulp.

cider-vinegar, *s.* Vinegar made by the fermentation of *cider*.

čīd'-ēr-age (age as *ig*), *s.* [Etym. doubtful.]

Bot.: A plant, *Polygonum Hydropiper*.

***čī-dēr-ist**, *s.* [Eng. *cider*; -ist.] One who makes *cider*.

"When the *ciderists* have taken care for the best fruit, and ordered them after the best manner they could, yet hath their *cider* generally proved pale, sharp and ill tasted."—Mortimer.

čīl'-dēr-kin, *s.* [Eng. *cider*; dimin. suff. -kin (q. v.).] An inferior kind of *cider* made by adding water to the crushed mass of apples remaining after the juice has been pressed out in the manufacture of *cider*.

ci-devant (pron. čē-děv-on), *a. or adv.* [Fr.=hitherto, formerly; from Lat. *hicce*=here, and *de ab ante*=down or of from before.] Former, previous.

čī-ēr'-ge, *cerge, *serge, *s.* [Fr., from Lat. *cereus*=waxen, *cera*=wax.] A wax candle used in the worship of the Roman Catholic Church.

"That beren in heaven her *ciergis* clere."

The Romaunt of the Rose, 6,250.

čī-gar', *se-gar, s. & a. [Fr. *cigare*; Sp. *cigarro*; originally a kind of tobacco in the island of Cuba.

A. As subst.: A small roll of tobacco permeable to the air and used for smoking.

"The fermented leaves being next stripped of their middle ribs by the hands of children, are sorted anew, and the large ones are set apart for making *cigars*."—Ure: *Dict. of Arts*, &c.

B. As adj.: (See the compounds.)

¶ Obvious compounds: *Cigar-box*, *cigar-holder*, &c.

cigar-bundler, *s.* A machine for placing *cigars* in bundles that they may be tied together. It consists of a clamping-press having jaws of such shape and capacity as the size of the *cigar* and the number desired in a bundle may warrant.

cigar-lighter, *s.* A device for lighting *cigars*. It usually consists of a little gas-jet suspended by an elastic tube.

cigar-machine, *s.* A machine for making fillers of *cigars* and wrapping them.

cigar-press, *s.* A press having a motion in two directions, one to compress the *cigars* in their rows, and the other to press them vertically.

cigar-steamer, *s.* A peculiar form of craft, shaped like a spindle, and constructed by Winans, of Baltimore. The first was built in Baltimore—length 635 feet, diameter 16 feet; the second in

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

St. Petersburg—length 70 feet, diameter 9 feet; the third in Havre—length 72 feet, diameter 9 feet; the fourth in Isle of Dogs—length 256 feet, diameter 16 feet. The propeller of the first was placed around the middle of the vessel; the second had a propeller beneath her bottom; the third is fitted for trying propellers in various positions; and the fourth has a propeller at each end.

çig-ar-ët'te, *s.* [A dimin. of Fr. *cigare*.] A small cigar; more generally, a small quantity of fine tobacco rolled in paper and used for smoking.

"We shall celebrate our reconciliation in a cigarette."—Black: *Princess of Thule*, ch. x.

cigarette-filler, *s.* A little implement for introducing the finely-cut tobacco into the paper envelope. It has two forms: a tube and a wrapper. (*Knight*.)

cigarette-machine, *s.* A machine used in the production of cigarettes. Adorno's cigarette-machine uses an endless roll of paper. It cuts, wraps, and folds the paper around a regulated quantity of tobacco, which is supplied at one end of the machine, while the finished cigarettes emerge at the other end. (*Knight*.)

çil'-êr-ÿ, *s.* [From *ciliary* (q. v.), from the resemblance to the hair of the eyelid or eyelashes.] *Arch.*: The drapery or foliage carved on the heads of columns, in Moorish or Spanish architecture.

çil'-i-â, *s. pl.* [Lat. nom. pl. of *cilium*=an eyelash.]

1. *Anat.*: Hair-like processes of extreme delicacy of structure and minuteness of size. They are from 1/1000 to 1/2000 of an inch in length. They are arranged in rows, and are affixed by their bases to the epithelium which covers the surface on which they play. (*Todd & Bowman: Physiol. Anat.*, vol. i., ch. 2, p. 61.)

2. *Bot.*: Long hairs, like eyelashes, situated upon the margins of leaves, &c.

3. *Zoöl.*: Hair-like filaments, which project from animal membranes, and are endowed with quick vibratile motion, as in the infusoria, polypi and sponges.

çil'-i-ar-ÿ, *a.* [Fr. *ciliaire*, from Lat. *cilium*=an eyelash.]

1. *Anat.*: Belonging to the eyelashes.

2. *Zoöl. & Bot.*: Pertaining to the cilia in plants and animals.

ciliary arteries, *s. pl.*

Anat.: The arteries supplying various parts of the eye with blood. They are divisible into three sets, the short, the long, and the anterior ciliary arteries. (*Quain*.)

ciliary body, *s.* That part of the choroid coat of the eye which includes the ciliary muscle and the ciliary processes.

ciliary ganglion, *s.* The same as the ophthalmic or lenticular ganglion. (*Quain*.)

ciliary ligament, *s.*

Anat.: The circular portion dividing the choroid membrane from the iris, and adhering to the sclerotic coat. [*CHOROID*.]

ciliary motion, *s.* A motion of cilia or any part of any organism possessing them. In animals they move like a field of grain agitated by the wind. Ciliary motion exists in man in various parts, as for instance on the mucous membrane of the nasal cavities, on the inner surface of the lachrymal sac and canal, on the membrane of the larynx, trachea, and bronchial tubes. (*Todd & Bowman: Physiol. Anat.*, vol. i., ch. 2, p. 64.)

"The terms vibratory motion and ciliary motion have been employed to express the appearance produced by the moving cilia; the latter is here preferred, but it is used to express the whole phenomenon, as well as the mere motion of the cilia."—Dr. Sharpe, in *Todd's Cyclopædia of Anat. and Physiol.*

ciliary muscle, *s.*

Anat.: A muscle attached to the choroid of the eye.

ciliary nerves, *s. pl.*

Anat.: Two or three nerves situated at the inner side of the optic nerve. Their full appellation is *Long ciliary nerves*. (*Quain*.)

ciliary processes, *s. pl.*

Anat.: White folds at the margin of the uvea in the eye, and proceeding from it to the crystalline lens.

The ciliary processes, or rather the ligaments, observed in the inside of the sclerotic tunics of the eye, do serve instead of a muscle, by the contraction, to alter the figure of the eye."—Ray: *On the Creation*.

ciliary zone, *s.*

Anat.: A term for the appearance which the pigment between the ciliary processes leaves on the hyaloid membrane, like the disk of a flower; also called *Corona ciliaris*.

çil'-i-â-ta, *s. pl.* [Lat. *cili(um)*=an eyelash, and neut. pl. adj. suff. *-ata*.]

Zoöl.: An order of Infusoria, having cilia growing on the margins of certain organs. These cilia are vibratile, and are designed either for locomotion or to aid the animal in obtaining its appropriate food. Genera, *Vorticella*, *Vaginicola*, &c.

çil'-i-âte, **çil'-i-â-téd**, *a.* [Lat. *cili(um)*=an eyelash, and Eng. suff. *-ate*, *-ated*.] Furnished with cilia or fine hair. Used—

1. *Bot.*: Of a leaf with parallel filaments or bristles, resembling fine hairs.

2. *Anat.*: Of a surface covered with filaments.

"But a ciliated surface is not affected at all in its movements."—*Todd & Bowman. Physiol. Anat.*, vol. i., ch. ii., p. 63.

3. *Zoöl.*: Provided with vibratile cilia. (*Owen*.)

çil'-i-â-tô, *in compos.* [Mod. Lat. *ciliat(us)*, with *o* connective.] Having cilia.

ciliato-dentate, *a.*

Bot.: Having teeth, and those ciliated.

ciliato-serrate, *a.*

Bot.: Having serrations, each of which terminates in a hair.

çil'-i-çe, *s.* [Fr. *cilice*; Lat. *cilicium*=a hair-cloth, probably so called from Cilicia, whence they principally came.] Hair-cloth.

"We have heard so much of monks . . . with their shaven crowns, hair cilices, and vows of poverty."—*Carlyle: Past and Present*, bk. ii., o. 1.

***çil'-lî-çil'-oûs**, *a.* [Eng. *cilice*.] A garment of camel's hair, that is, made of some texture of that hair.

"A coarse garment, a cilicious or sackcloth habit."—*Browne: Vulgar Errors*.

çil'-i-êl'-la, *s.* [Lat. *cili(a)*=fine hair, and dimin. suff. *-ella*.]

Entom.: A fringe. (*McNicol*.)

çil'-i-îf-êr-æ, *s. pl.* [Lat. *cilia*=eyelashes; *i* connective, and *fero*=to bear.]

Zoöl.: De Blainville's name for a section of his Microzoaria, now called Infusoria.

çil'-i-î-form, *a.* [Lat. *cilia*=fine hair, and *forma*=form.] Having the form of *cilia*, very fine or slender. Especially applied to the teeth of certain fishes, as of the perch, when very numerous and all equally fine.

çil'-i-ô-brâch-i-â-ta, *s. pl.* [Lat. *cilia*=eyelashes, and *brachiata*, pl. of *brachiatus*=having branches like arms.]

Zoöl.: The class of Polypes in which the arms are provided with vibratile cilia. (*Owen*.) The same as *BRYZOZA* (q. v.).

çil'-i-ô-brâch-i-âte, *a.* [Lat. *cilia*=fine hair; *brachium*=the arm, and Eng. adj. suff. *-ate*.]

Physiol.: Having the arms furnished with cilia, as in *Polyzoa*.

çil'-i-ô-grâ-dâ, **çil'-i-ô-grâ-dî**, *s. pl.* [*CILIOGRADE*.]

Zoöl.: A tribe of *Acalephans* or *Sea-nettles*, comprehending such species as swim by means of cilia. The name was first given by De Blainville. The tribe contains the genera *Beroe*, *Cydippe*, &c.

çil'-i-ô-grâde, *a. & s.* [Fr. *ciliograde*, from Lat. *cilia*=fine hair, and *gradior*=to step.]

A. *As adj.*: Having the power of motion by means of the cilia, as the *Medusæ* (q. v.).

B. *As subst.*: An animal belonging to the order *Ciliograda* (*Owen*, &c.), synonymous with *Ctenophora*, an order of *Actinozoa* (*Nicholson*). [*CTENOPHORA*.]

çill, *s.* [*SILL*.]

Arch.: The timber or stone at the foot of a door, &c.

¶ *Ground-cills* are the timbers on the ground which support the posts and superstructure of a timber building. The name of *cill* is also given to the bottom pieces which support quarter and truss partitions. (*Gwilt*.)

çil'-lô, **çil'-lô-şis**, *s.* [Lat. *cilium*=an eyelash, and suff. *-osis* (*Med.*).]

Med.: A spasmodic trembling of the upper eyelid.

çills, *s. pl.* [*CILL*.] A naval term applied to horizontal pieces of timber to ports or scuttles. Generally pronounced by sailors *sell*, as *port-sell*.

çil'-ma, *s.* [Gr. *kyma*=a wave.] [*CYMA*.]

Arch.: A molding, taking its name from its contour resembling that of a wave, being hollow in its upper part, and swelling below. Of this molding there are two sorts, the *cima* (or *cyma*) *recta*, just described, and the *cima reversa*, wherein the upper part swells and the lower is hollow. By the workmen these are called *ogees* (q. v.). (*Gwilt*.)

çim'-âr, *s.* [*CHIMERE*, *SINAR*.]

***çim'-bâl** (1), *s.* [Ital. *ciambella*.] A kind of confectionery or cake.

***çim'-bâl** (2), ***çim'-bale**, *s.* [*CYMBAL*.]

çim'-bêx, *s.* [Cf. Gr. *kimbix*=a miser.]

Entom.: A genus of hymenopterous insects, family *Tenthredinidæ*. *Cimbex Griffinii* is about an inch long. It is reddish-brown, with a yellow abdomen.

çim'-bî-a, *s.* [Gr. *kymbion*=(1) a small cup, (2) see def., dimin. of *kymbê*=the hollow of a vessel.]

Arch.: A fillet string, list, or cornice.

çim'-brî-an, *a. & s.* [Lat. *Cimbria*.]

A. *As adj.*: Cimbri; pertaining to Cimbria.

"The event commonly called the 'Cimbrian Deluge' is supposed to have happened about three centuries before the Christian era."—*Lyell: Principles of Geology*, ch. xxi.

B. *As subst.*: A native of Cimbria.

çim'-brîc, *a. & s.* [Lat. *Cimbricus*.]

A. *As adj.*: Pertaining to the Cimbri, an ancient tribe inhabiting Northern Germany, and the Chersonese now called *Jutland*.

"On helm and harness rings the Saxon hammer, Through *Cimbria* forest roars the Norseman's song," *Longfellow: The Arsenal at Springfield*.

B. *As subst.*: One of the tribe of the Cimbri; a Cimbrian.

***çim'-êl'-i-arch**, *s.* [Lat. *cimeliarcha*; Gr. *cheimeliarchês*=a treasurer; *cheimêlion*=a treasury, and *archos*=a leader, a chief.]

1. *Eccles.*: A superintendent or keeper of plate and other valuable things belonging to a church.

2. *Arch.*: A name given to the apartment where the plate and vestments are kept in churches. (*Gwilt*.)

çil'-mêx, *s.* [Lat. *cimex* (genit. *cimicis*)=a bug.]

*1. *Ord. Lang.*: A bug.

2. *Entom.*: A genus of hemipterous insects, the typical one of the family *Cimicidæ*. *Cimex lectularius* is the Bed-bug. [*BUG*.] There are analogous species parasitic on pigeons, swallows, and bats.

çim'-îç-îc, *a.* [Lat. *cimex* (genit. *cimicis*)=a bug.] Of or pertaining to the cimex or bug.

cimicic acid, *s.*

Chem.: $C_{15}H_{28}O_2$, a yellow crystallizable acid, having a rancid odor, extracted by alcohol and ether from a kind of bug (*Rhaphigaster punctipennis*).

çim'-î-çil'-dæ, *s. pl.* [Lat. *cimex* (genit. *cimicis*), and pl. adj. suff. *-idæ*.]

Entom.: A family of hemipterous insects, of which *Cimex* is the type. It is of the tribe *Geocores* (Land-bugs). They have a short rostrum consisting of two or three joints only, depressed bodies, and, with the exception of the typical genus *Cimex*, wings. British genera, *Cimex*, *Aneurus*, *Aradus*, *Agramma*, *Tingis*, and *Dictyonota*.

çim'-îç-i-fû'-gâ, *s.* [Lat. *cimex* (genit. *cimicis*)=a bug, and *fugo*=to drive away. So named because in Siberia one of the species is used to drive away bugs and similar insects.]

Bot.: A genus of perennial herbs, with racemes of whitish flowers, and drastic poisonous roots. Order, *Ranunculaceæ*. One of the best-known species, is *Cimicifuga foetida*, the "Stinking Snake-root," or Bug-wort. It is found in the Carpathian Mountains, in Siberia, and on the northwest coast of America. *C. serpentaria*, formerly called *Actæa racemosa*, is the Black Snake-root of this country, supposed to be an antidote to the venom of serpents.

çim'-î-çine, *a.* [Lat. *cimex* (genit. *cimicis*), and Eng. suff. *-ine*.] Smelling of bugs.

çim'-î-têr, ***çim'-ê-têr**, **scÿm'-î-târ**, ***scÿm'-î-têr**, *s.* [Fr. *cimeterre*; Sp. & Port. *cimetarra*; Ital. *scimitarra*, from Biscayan *cimetarra*=with a sharp edge; or corrupted from Per. *schimschir* (*Mahn*).] A short curved sword with a convex edge, used by the Persians and Turks.

"Our armors now may rust, our idle scymiters Hang by our sides for ornament, not use." *Dryden: Don Sebastian*, i. 2.

çim'-mêr'-î-a, *s.* [Lat. *Cimmerius*.] The country or district inhabited by the Cimmerians.

"The dusky nation of *Cimmeria* dwells."

Pope: Homer's Odyssey, xi. 16.

çim'-mêr'-î-an, *a.* [Lat. *Cimmerius*, from Gr. *kimmerios*.]

1. *Lit.*: Pertaining to the Cimerii, a fabulous race stated by Homer to have lived "beyond the ocean stream," and in later ages said to have lived in very ancient times in the Tauric Chersonese (now called the Crimea), in a state of perpetual darkness.

2. *Fig.*: Without any light; intensely and profoundly dark.

"Let cimmerian darkness be my only habitation." *Sidney: Arcadia*, bk. 3.

bôil, bôÿ; pôut, jôw1; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şhün; -tion, -şion = zhün. -tious, -cious, -sious = şhüs. -ble, -dle, &c. = bəl, del.

cim-ōl-ite, *s.* [Fr. *cimolite*, from Gr. *kimōlia*=Cimolian earth, from *Kimōlos*, Lat. *Cimolus*, an island of the Cyclades, distinguished for its chalky soil, now Cimoli or Argentiera.]

Min.: A light gray, white, or reddish silicate of alumina, occurring sometimes massive, or of a slaty texture. It is very soft. Specific gravity, 2.18-2.30. Composition: Silica, 62.30-65.93; alumina, 20.97-24.23; sesquioxide of iron, 0-1.25; water, 9.31-12.34. It occurs at Argentiera; also at Nagore, Central India, and in some parts of Russia. (*Dana*.) The Nagore specimens have been called also Hunterite (q. v.).

cī-mōl-or-nīs, *s.* [Gr. *kimōlia*=Cimolian earth [CIMOLITE], and *ornis*=a bird.]

Palaeont.: A fossil natatorial bird found in the Cretaceous rocks of Europe. It is supposed to have been allied to the Albatross.

cinch, *s.* [Sp. *cincho*.]

1. A strap used for fastening the loop at the end of the girth of a Spanish saddle to the loop on the saddle.

2. A sure grip or hold. (Colloq.)

3. A game of cards similar to pedro.

cinch, *v. t.* [Cinch, *s.*] To fasten a cinch.

cīn-chō-nā, *s.* [Said to have been named in honor of the Countess de Chinchon, vice-queen of Peru, who was cured of a fever, in 1638, by the use of this remedy.]

1. **Bot.** A genus of trees found exclusively on the Andes in Peru, and adjacent countries, and recently introduced into India, producing a medicinal bark of great value known as Peruvian bark, &c. The Jesuits introduced it into Europe. There are many species

Cinchona.

1. Plant. 2. Bud. 3. Flower. 4. Fruit. of the genus.

2. **Med.**: The bark procured from the Cinchona-trees.

cinchona bark, *s.*

Pharm.: The barks of several species of Cinchonaceae are used in medicine, or for the extraction of the alkaloids, quinine, cinchonine, &c., which they contain. The following are the most important: *Chinchona flava* Cortex, Yellow Cinchona Bark, which occurs as quills covered with a brown epidermis, mottled with whitish yellow lichens, and also in flat cinnamon-colored pieces. They break with a fibrous fracture and the escape of a powder. Yellow bark is rich in quinine, and 100 grains should yield not less than two grains of alkaloid. It is derived from *C. Calisaya*, which grows in the peculiar cloudy regions of the Andes. *C. pallidæ* Cortex, Pale Cinchona Bark, from *C. condaminea*. It occurs always in quills, covered with crustaceous lichens. Its fracture is short and not fibrous. It contains chiefly cinchonine. Two hundred grains of the bark yield about one grain of alkaloid. *C. rubræ* Cortex, Red Cinchona Bark. The bark of *C. succirubra*. This species appears to thrive in India. It occurs in flattened, rough-fibrous, dark-brown red pieces, which are covered with a brown-red epidermis. It breaks with a red fibrous fracture. It contains about equal quantities of cinchonine and quinine, and 100 grains of the powdered bark should yield not less than one and one-half grains of alkaloid. The yellow bark is used in the form of decoction, extract, infusion, and tincture. The pale bark is contained in *Tinctura Cinchonæ Composita* and in *Mixtura Ferri Aromatica*. The cinchona barks contain, besides the alkaloids, also certain acids having astringent properties, and are valuable as tonics in cases of great debility. (*Garrod's Mat. Medica*.) For properties of the alkaloids see QUININE and CINCHONINE. Cinchona barks rich in quinine generally contain much lime, and their solutions are precipitated by sodium sulphate. Cinchona barks are examined as follows: 100 grains of the yellow bark are reduced to powder, and are thoroughly exhausted by boiling, maceration, and percolation, with water acidulated with hydrochloric acid. The coloring matter is precipitated from the liquid by adding plumbic acetate, the solution being kept acid. It is then filtered, and to the filtrate caustic potash is added till the precipitate first formed by it is redissolved. This solution is then shaken with successive quantities of ether, till a drop of the ether evaporated to dryness leaves no residue. The ether solutions are then evaporated to dryness, and the residue of alkaloids is

weighed. In testing the pale and red barks use chloroform instead of ether. When a bark containing quinine or cinchonine is heated in a test-tube a characteristic red vapor is given off, condensing to a carmine red liquid. It is also called Jesuit's bark and Peruvian bark.

cinchona bases, *s. pl.*

Chem.: Alkaloids contained in Cinchona bark. These can be separated from each other by adding ether, which dissolves the quinine and amorphous alkaloid, evaporating and dissolving in proof spirit acidulated with one-twentieth of sulphuric acid, and adding alcoholic iodine, which precipitates the quinine as iodo-sulphate, which is dried at 100°. One part equals 0.565 of quinine. To the liquid sulphurous acid is added, neutralized with caustic soda, and the alcohol expelled by evaporating on a water bath; on adding excess of soda the amorphous alkaloid is precipitated. The part insoluble in ether is dissolved in 40 parts of water and a little sulphuric acid, the solution being faintly alkaline. A solution of Rochelle salt $\text{KNaC}_4\text{H}_4\text{O}_6$ is then added, and it is allowed to stand for twelve hours. The cinchonidine is precipitated as tartarate, which is dried at 100°, and one part represents 0.804 of cinchonidine. To the filtrate iodide of potassium is added, which precipitates quinine as hydriodide. One part dried at 100° equals 0.718 of quinine. To the filtrate caustic soda is added, which precipitates the cinchonine, which is dried at 100°. (See *Watts: Dict. of Chem.*)

cīn-chōn-ā-çē-æ, *s. pl.* [Mod. Lat. *cinchon(a)*, and Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: A large order of plants belonging to an alliance called after it, Cinchonales. The calyx, which is simple, is superior, as is the corolla, which is tubular and of regular form. The stamens, which are definite in number, arise from the corolla all on the same line and alternate with its segments; the anthers are straight, bursting longitudinally. The ovary is inferior, usually two-celled, with few or many seeds; the fruit splitting into two cocci, or indehiscent and dry, or succulent. The leaves, which are simple, are opposite or verticillate, with interpetiolar stipules; this last character distinguishing them from the Galiaceae, to which they are much akin. Lindley divides it into two tribes: *Coffeæ*, in which the ovary have only one or two seeds in each cell, and *Cinchonæ*, in which it is many-seeded. (See these words.) In 1845, Lindley enumerated 269 genera, and estimated the known species at 2,500. They are so abundant in tropical countries as to constitute about one twenty-seventh part of the flowering plants. Some are trees, others shrubs, and yet others herbaceous plants. Many are most valuable tonics, febrifuges, emetics, and purgatives. [CINCHONA.] A few are poisonous. Some have eatable fruits, and others are used in making beverages, dyeing, &c.

cīn-chō-nā-çeoūs, *a.* [Eng. *cinchon(a)*, and suff. *-aceous*.]

Bot.: Of, or pertaining to, Cinchona.

cīn-chō-nāds, *s. pl.* [Mod. Lat. *cinchona*, and Eng., &c., suff. *-ads*.]

Bot.: The English rendering or equivalent of the term Cinchonaceae (q. v.).

cīn-chō-nāl, *a.* [Mod. Lat. *cinchona*, and Eng. suff. *-al*.]

Bot.: Pertaining to the alliance Cinchonales, as the Cinchonall alliance.

cīn-chō-nā-lēs, *s. pl.* [Mod. Lat. *cinchona*, and Class. Lat. pl. suff. *-ales*.]

Bot.: An alliance of epigynous exogens, with dichlamydeous monopetalous flowers, and a minute embryo lying in a large quantity of albumen. Lindley includes under it the following orders: Vacciniaceae, Columelliaceae, Cinchonaceae, Caprifoliaceae, and Galiaceae (q. v.).

cīn-chōn-āte, *s.* [Eng. *cinchon(a)*, and suff. *-ate* (Chem.) (q. v.)]

Chem.: A salt of cinchonic acid.

cīn-chō-nē-æ, *s. pl.* [Mod. Lat. *cinchona*, and Class. Lat. pl. suff. *-æ*.]

Bot.: A tribe of Cinchonaceae (q. v.). It contains the families Hamelidæ, Isertidæ, Hedyotidæ, Cinchonidæ, and Gardenidæ (q. v.).

cīn-chō-nī-ā, *s.* The same as CINCHONINE.

cīn-chōn-īc, *a.* [Eng. *cinchon(a)*, and suff. *-ic*.] Of, or derived from, Cinchona (q. v.).

cinchonic acid, *s.*

Chem.: $\text{C}_{11}\text{H}_{14}\text{O}_9$. An acid formed by treating cinchomeronic acid with sodium amalgam $\text{C}_{11}\text{H}_8\text{N}_2\text{O}_6 + 6\text{H} + 3\text{H}_2\text{O} = 2\text{NH}_3 + \text{C}_{11}\text{H}_{14}\text{O}_9$. It forms deliquescent white crystals.

cīn-chōn-ī-çine, *s.* [Eng., &c. *cinchonic*, and suff. *-ine*; or Mod. Lat. *cinchona*; Gr. *eikōn*=figure, image, resemblance (?), and Eng. suff. *-ine*.]

Chem.: $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}$. An alkaloid obtained by heating acid sulphate of cinchonidine for several hours

to 130°. The base is liberated by caustic soda, and taken up by absolute ether; it forms a slightly yellow viscous mass, which melts at 50°. It gives no color with chlorine and ammonia. The hydrochlorate gives a white precipitate with hypochlorite of sodium which distinguishes it from cinchonine, and cinchonidine, which give no precipitate. It forms crystalline salts. It turns the plane of polarization feebly toward the right. (*Watts: Dict. of Chem.*)

cīn-chōn-ī-dæ, *s. pl.* [Mod. Lat. *cinchona*, and fem. pl. adj. suff. *-idæ*.]

Bot.: A family of plants, tribe Cinchonæ.

cīn-chōn-ī-dīne, *s.* [Mod. Lat. *cinchona*, and Gr. *eidos*=form, appearance.]

Chem.: $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}$. An organic alkaloid found in Peruvian bark. It crystallizes from alcohol in anhydrous needles, gives no fluorescence when pure, and no green coloration with chlorine and ammonia. It differs from cinchonine by its turning the plane of polarization powerfully toward the left.

cīn-chōn-in, **cīn-chōn-ine**, *s.* [Eng. *cinchon(a)*; suff. *-in*, *-ine* (Chem.).]

Chem.: $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}$ =cinchonine, an organic alkaloid contained with quinine in Peruvian bark, especially in *Cinchona condaminea*. It is separated from quinine by its sulphate being more soluble. Cinchonine crystallizes in small transparent four-sided prisms. It is slightly soluble in water, but dissolves easily in hot alcohol. It melts at 165°. It is a powerful base, and forms crystalline salts with acids. It turns the plane of polarization powerfully toward the right.

cīn-chō-nīn-īc, *a.* [Eng. *cinchonin*; *-ic*.]

cinchoninic acid, *s.*

Chem.: $\text{C}_{20}\text{H}_{14}\text{N}_2\text{O}_4$. A dibasic acid obtained by the oxidation of cinchonine by nitric acid. Specific gravity, 1.4. It is a white crystalline substance soluble in water; when treated with nitric acid it is converted into quinolic and cinchomeronic acids.

cīn-chōn-īsm, *s.* [Eng. *cinchon(a)*, and suff. *-ism*.]

Pathol.: The disturbed condition of the body caused by overdoses of cinchona.

"The condition here called *cinchonism* is marked by the occurrence of giddiness, deafness, and a sense of buzzing . . . in the ears."—*Watson: Lectures on the Principles and Practice of Physic*, lect. 86.

cīn-chōv-ā-tīne, *s.* [Mod. Lat. *cinch(ona)*; *ovāt(a)*, and suff. *-ine*. The Cinchona ovate being the white quinquina of Condamine, a species of the Cinchona genus.]

Chem.: Aricine, $\text{C}_{23}\text{H}_{26}\text{N}_2\text{O}_4$, occurs with Cuscone in Cusco Cinchona bark, which gives off brown vapors when heated. Aricine crystallizes in white prisms, which melt at 188°.

cīn-cīn-nūs, *s.* [Lat.=a curl.]

Bot.: A cyme developed in a curled manner.

cīn-clīd-ō-tūs, *s.* [Gr. *kingklis*=a lattice, and *odontos*, genit. *odontos*=a tooth.]

Bot.: A genus of Mosses, found floating in streams. Tribe, Evaginulati. The name is derived from the manner in which the cilia of the peristome are united in net-like parcels. *Cinclidotus fontinaloides* grows in tufts on the margin of lakes and rivers, or on stones in the channel of streams.

cīn-clī-næ, *s. pl.* [Gr. *kingklos*=a sort of water-bird, a wagtail or ousel.]

Ornith.: The Dippers, a sub-family of denticulose birds, belonging to the family Merulidæ or Turdidæ. (*Ogilvie*.)

cīn-clīs (*pl. cīn-clī-dēs*), *s.* [Gr. *kingklis*=a lattice.]

Animal Physiol.: One of the openings in the bodies of sea-anemones, probably serving to discharge the thread-cells or cnidæ.

cīn-clō-sō-mā, *s.* [Gr. *kingklis*=a lattice, and *sōma*=the body.]

Ornith.: A genus of birds, closely allied to the Shrikes. They are natives of Australia and the East Indies.

cīn-clūs, *s.* [Gr. *kingklos*=a wagtail or ousel.]

Ornith.: A genus of Formicarinæ or Myotherinæ (Ant-thrushes), belonging to the family Merulidæ or Turdidæ (Blackbirds or Thrushes). They have a very straight slender bill, with a notched lip; wings rounded, of moderate length; a very short even tail, and large exceedingly strong feet.

cīnc-tūre, *s.* [Lat. *cintura*=a girdle, from *cingo*=to gird; Ital. & Sp. *cintura*; Prov. *centura*; Fr. *ceinture*.]

I. Ordinary Language:

1. **Lit.**: A belt, a girdle; something worn round the body, to fasten or confine the dress.

"Such is her sovereign mien: her dress

(A vest, with woolen cincture tied)."

Wordsworth. The White Doe of Rylstone, c. vii.

fāte, **fāt**, **fāre**, amidst, whāt, **fāll**, father; **wē**, **wēt**, hēre, camel, hēr, thēre; **pīne**, **pīt**, **sīre**, **sīr**, marine; **gō**, **pōt**, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

*2. *Fig.*: An inclosure, a ring-fence.

"The court and prison being within the cincture of one wall."—*Bacon: Henry VII.*

II. Arch.: The ring, list, or fillet at the top and bottom of a column, which divides the shaft of the column from its capital and base. (*Gwilt.*)

†*çinç'-türe*, *v. t.* [*CINCTURE*, *s.*] To surround, as with a girdle; to gird, to encircle.

"On high the palms their graceful foliage spread,
Cinctured with roses the magnolia towers."
Hemans: Modern Greece.

çinç'-türed, *a.* [*CINCTURE*, *v.*] Having a cincture or girdle; girded.

çin'-dër, **çyn-dir*, **çyn-dyr*, **syn-der*, **syn-dyr*, *s. & a.* [*A. S. sinder, synder*; *Icel. sindr*; *Sw. sinder*=slag, dross; *Dut. sintels*=cinders; *Dan. sinder*, *sinner*=a spark of ignited iron; *Ger. sinter*=dross of iron, scale; *Icel. sindra*=to glow, to throw out sparks. Not from *Fr. cendre*, which is from *Lat. cinis* (genit. *cineris*)=ashes.]

A. As substantive:

I. Ordinary Language:

1. *Literally*:

(1) The residue of coal after combustion, in which fire is extinct.

"*Syndyr* of the smythys fyre. *Casuma*."—*Prompt. Parv.*

(2) A small piece of coal which has ceased to flame, but still retains heat.

*2. *Fig.*: Applied to the ashes of the dead.

"Beauty, truth, and rarity,
Grace in all simplicity,
Here inclosed in cinders lie."

Shakesp.: The Passionate Pilgrim; Threnos.

II. Metallurgy:

1. The slags or dross produced in the processes of iron manufacture.

2. Scales consisting of oxidized particles thrown off from metal undergoing the forging process.

3. (*Pl.*) Coke. (*Percy in Weale.*)

B. As adj.: (See the compounds.)

cinder-bed, *s.*

Geol.: A bed of oyster shells, of the species *Ostrea distorta*, found in the Middle Purbeck series, so named from its loose structure. Its thickness is about twelve feet.

cinder-dust, *s.*

Metal.: Slag from a refining furnace.

cinder-fall, *s.*

Metal.: The inclined plane on which the melted slag from a blast-furnace descends.

cinder-flue, *s.*

Metal.: The cinder from the re-heating furnace.

cinder-frame, *s.*

Engin.: A framework of wire, &c., in a chimney, or in front of the tubes of a locomotive, to prevent the escape of cinders.

cinder-hole, *s.*

Metal.: The front plate of the hearth of a German refinery-furnace.

cinder-hook, *s.*

Metal.: A hook for drawing off slag.

cinder-notch, *s.*

Metal.: A notch in the upper part of a dam of a blast-furnace through which the melted slag escapes.

cinder-path, *s.* A pathway composed of, or covered with, cinders for the purpose of keeping it dry for foot-races.

cinder-sifter, *s.* A perforated shovel or sieve for sifting cinders.

cinder-tip, *s.* A heap of cinders; a place where cinders are tipped or shot.

cinder-tubs, *s. pl.*

Metal.: A trench of iron constructed for the reception of the metal slag after the latter has flowed from a blast-furnace over the cinder-fall.

**çin'-dër-ouš*, **çin'-droūš*, *a.* [*Eng. cinder*; *-ous*.] Resembling, or composed of, cinders.

"Or of a certain sharp and cindrous humor."
Sylvester: The Magnificence, 436.

†*çin'-dër-ÿ*, *a.* [*Eng. cinder*; *-ÿ*.] Pertaining to, or resembling, cinders; consisting of cinders.

çin'-ë-făc'-tion, *s.* [*Fr.*, from *Lat. cinefactio*, from *cinis*=ashes, and *factio*=a making, *facio*=to make.] The act or process of reducing to ashes, incineration.

çin'-ë-măt'-ic, *çin'-ë-măt'-i-cal*, *kîn'-ë-măt'-ic*, *kîn'-ë-măt'-i-cal*, *a.* [*Gr. kinēma*, genit. *kinēmatos*=a movement, a moving: *kineō*=to move; *Eng. suff. -ic, -ical*.] Pertaining to movement or cinematics.

cinematic curve, *s.* A curve or combination of motions, produced by machinery, so called to distinguish it from mathematical curves.

çin'-ë-măt'-ics, *kîn'-ë-măt'-ics*, *s.* [*CINEMATIC*.] The science which treats of motions apart from their causes; the comparison and relation of motion.

çin'-ë-măt'-ô-grăph, *s.* A device similar to the vitascope (*q. v.*).

çin'-ën-chÿ'-ma, *s.* [*From Gr. kineō*=to set in motion; *engchyma*=infusion; *en*=in, and *cheō*=to pour.]

Bot. Physiol.: A kind of tissue consisting of irregularly branching and anastomosing vessels. They are largest in plants having milky juice, and smallest in those which have transparent juice. It is called also *LATICIFEROUS TISSUE* (*q. v.*).

çin'-ën-chÿ'-ma-toūs, *a.* [*Eng. cinenchyma*; *t* connective; and *suff. -ous*.] Pertaining to, or composed of, cinenchyma; laticiferous.

çin'-ër-â'-çeoūš, *a.* [*Lat. cineraceus*, from *cinis*=ashes.] Like ashes, ash-colored, ash-like.

çin'-ër-âr'-i-ā, *s.* [*Lat. cinerarius*, from *cinis*=ashes. The genus is so called from the ash-colored down covering the surfaces of the leaves.]

Bot.: A genus of plants akin to *Senecio*, or according to Sir Joseph Hooker, ranked under it as a sub-genus. There are endless varieties produced by seed. They are all of various shades of red or blue, with or without white markings.

çin'-ër-â-rÿ, *a.* [*Lat. cinerarius*=pertaining to ashes; *cinis*=ashes.] Pertaining to, or containing, ashes.

cinerary urn, *s.* An urn or vessel used by the ancients to preserve the ashes of the dead; a sepulchral urn.

çin'-ër-ās, *s.* [*Lat. cinis*=ashes.]

Zoöl.: A genus of Barnacles allied to *Lepas*, or forming part of that genus, and belonging to the Cirripeda. (*Craig.*)

**çin'-ër-â'-tion*, *s.* [*Fr. cinération*, from *Lat. cinis* (genit. *cineris*)=ashes.]

Old Chem.: The act or process of reducing to ashes, incineration.

çin'-ër'-ë-ouš, *a.* [*Lat. cinereus*, from *cinis* (genit. *cineris*)=ashes.] Ash-like; of the color of ashes; ashy-gray.]

"The hair is red at the tips, cinereous beneath."—*Pennant.*

çin'-ër-ës'-çënt, *a.* [*Lat. cinerescens*, pr. par. of *cineresco*=to turn to ashes.]

Physical Science: Becoming gray, approaching to a gray color.

çin'-ër-i'-tious, *a.* [*Lat. cineritius, cinericus*, from *cinis* (genit. *cineris*)=ashes.] Having the form, state, quality, or color of ashes; cinereous.

"Broken and burnt rocks, ruins of buildings, and cineritious earth."—*Delany: Revelation Examined with Candor*, ii. 226.

Cineritious substance of the nervous system:

Anat.: A gray substance constituting with a white one the chief material of the nervous system. In the brain it is called also the cortical substance, while the white is denominated the medullary one.

çin'-ë-ti-ca, *s.* [*Gr. kinētikos*=pertaining to motion, from *kineō*=to move.]

Med.: Diseases affecting the muscles, and characterized by irregular action of the muscles, or muscular fibers, commonly denominated spasm. The third order in the class Neurotica of Good. Also agents that affect the voluntary or involuntary motions. (*Dunghlison.*)

Çin'-ga-lê'se, *a. & s.* [*Fr. cingalais*.]

A. As adj.: Of or belonging to Ceylon.

B. As subst.: A native or inhabitant of Ceylon.

çin'-gle, *s.* [*Lat. cingulum*.] [*SURCINGLE*.]

1. A girdle worn by sailors.

2. A girth for a horse.

çin'-gū-lūm, *s.* [*Lat.*=a girdle, from *cingo*=to gird, to surround.]

1. *Med.*: A cincture, a girdle. The part of the body situate below the ribs, to which the girdle is applied; the waist. (*Dunghlison.*)

2. *Zoöl.*: The neck of a tooth, or that constriction which separates the crown from the fang. The term is also used for the transverse series of long bands in the armor of the Armadillo, &c. (*Craig.*)

çin'-i-flōn'-i-dæ, *s. pl.* [*Lat. ciniflo* (genit. *ciniflonis*), and fem. pl. suff. *-idæ*.]

Entom.: A family of Arachnida.

**çin'-i-fÿ*, **çin'-ë-fÿ*, *v. t.* [*Lat. cinis*=ashes, and *facio* (pass. *fio*)=to make.] To reduce to ashes, to incinerate.

çin'-na, *s.* [*Gr. kaiō*=to heat.]

Bot.: A genus of American grasses, allied to *Agrostis*; order, Gramineæ. So called from its heating qualities.

çin'-na-bar, *s. & a.* [*Fr. cinabre*; *Ital. cinabro*; *Sp. & Port. cinabrio*; *Ger. zinnober*, from *Lat. cinabaris*; *Gr. kinnabaris*, from *Pers. qinbar*; *Hind-shangarf*.]

A. As substantive:

1. *Min.*: A rhombohedral mineral, generally of adamantine luster, though in friable varieties dull. Colors: Cochineal red, brownish red, and lead gray, streak scarlet. A native mercuric sulphide, HgS. It has refraction and circular polarization. There are two varieties:

(1) Ordinary cinnabar, crystallized, massive or earthy.

(2) *Hepatic cinnabar*. An impure cinnabar of a liver-brown color and submetallic luster. (*Dana.*) Cinnabar is found in Spain, in Austria, in China and Japan, in California, in Peru, &c.

2. *Comm.*: Red sulphuret of mercury used as a pigment; vermilion. It is prepared artificially by triturating mercury and sulphur together, and heating the black sulphide HgS until it sublimes.

3. *Bot. & Med.*: The red resinous juice of a tree, *Calamus rotang*, a native of the East Indies, formerly called Dragon's blood, and used as an astringent.

B. As adjective:

1. Consisting more or less of the substance described under A.

2. *Bot., &c.*: Colored like it; scarlet with a slight mixture of orange.

cinnabar moth, *s.* *Callimorpha Jacobææ*.

çin'-na-bar'-ic, *a.* [*Eng. cinnabar*; *-ic*.] Pertaining to, or consisting of, cinnabar; cinnabarine.

çin'-na-bar-ine, *a.* [*Fr. cinabarin*.] Pertaining to or containing cinnabar.

çin'-na-mâte, *s.* [*Eng. cinnam(ic)*, and *suff. -ate* (*Chem.*) (*q. v.*)] [*CINNAMIC ACID*.]

çin'-na-mein, *s.* [*Eng. cinnam(on)*, and *suff. -ine* (*Chem.*) (*q. v.*)]

Chem.: $C_7H_7C_6H_5O_2$. Benzyl cinnamate occurs in Peru and Tolu balsams, the produce of species of *Myroxylum* growing in South America. Also prepared by heating sodium cinnamate with benzyl chloride.

çin'-na-mêne, *s.* [*Eng. cinnam(on)*, and *suff. -ene* (*Chem.*)]

Chem.: C_8H_8 or $C_6H_5-CH=CH_2$. Styrolene, styrol, cinnamol, ethenyl-benzene, phenyl-ethylene. An aromatic hydrocarbon, obtained by distilling cinnamic acid with baryta; also by passing the vapor of xylene or a mixture of benzene vapor and ethene through a red-hot tube; also by distilling liquid storax and carbonate of sodium with water; synthetically by heating acetylene C_2H_2 in a glass tube over mercury to the softening point of the glass, four mols. of acetylene being condensed into one mol. of cinnamene. Cinnamene is a colorless oil. Specific gravity, 0.924. It boils at 145°. When heated to 200° in a sealed tube it is converted into a white transparent refractive solid called metacinnamene or metastyrolene, which when distilled yields liquid cinnamene. By the action of hydriodic acid cinnamene is chiefly converted into octane, C_8H_{18} . When cinnamene is agitated with a concentrated solution of iodine in potassium iodide, and the liquid is then diluted with water, crystals of iodide of cinnamene separate out. When cinnamene is oxidized with an alkaline solution of potassium permanganate, it yields benzoic and carbonic acids.

çin'-nām'-ic, *a.* [*Eng. cinnam(on)*, and *suff. -ic*.] Of or pertaining to cinnamon; derived from cinnamon.

cinnamic acid, *s.*

Chem.: Phenyl acrylic acid. Cinnamomic acid, $C_9H_8O_2$ or $C_6H_5-CH=CH-CO\cdot OH$. A monatomic aromatic acid, obtained by the oxidation of cinnamon oil; it occurs in Peru and Tolu balsams. It unites directly with hypochlorous acid, HClO, forming $C_6H_5-CHCl-CH(OH)-CO\cdot OH$, phenyl-chlorolactic acid. It can be extracted by boiling these resins with milk of lime and filtering while hot, and decomposing the calcium cinnamate with hydrochloric acid. It has been formed by heating benzoic aldehyde in close vessels with acetyl chloride. It forms small crystals, which melt at 129°, and boil at 293°. Fused with potash, it yields potassium salts of benzoic and acetic acids, with evolution of hydrogen. It is slightly soluble in water and soluble in alcohol. It forms salts called cinnamates.

cinnamic aldehyde, *s.*

Chem.: C_9H_7OH . An aromatic aldehyde, found in the volatile oils of cinnamon and cassia, which are obtained from the genus *Cinnamomum*, order

bōil, *bōÿ*; *pōūt*, *jōwī*; *cat*, *çell*, *chorus*, *çhin*, *bençh*; *go*, *gem*; *thin*, *thiſ*; *sin*, *aſ*; *expect*, *Xenophon*, *exiſt*. *ph* = *f*.
-*cian*, -*tian* = *ſhan*. -*tion*, -*sion* = *ſhūn*; -*tion*, -*ſion* = *zhūn*. -*tious*, -*cious*, -*sious* = *ſhūs*. -*ble*, -*dle*, &c. = *bēl*, *dēl*.

Lauraceæ. The aldehyde is separated as a crystalline compound with acid potassium sulphite. It is a colorless oil, boiling at 248°, which readily oxidizes into cinnamic acid. When heated with nitric acid it yields benzoic acid and benzoyl hydride, $C_6H_5\cdot CO\cdot H$. By the action of chromic acid it is converted into benzoic and acetic acids.

çin'-na-mide, s. [Eng. *cinn(amon)*, or *cinnamyl*, and *amide*.]

Chem.: $C_9H_7O\cdot H_2\cdot N$. A white crystalline substance, melting at 141.5°. It is obtained by treating cinnamyl chloride with concentrated aqueous ammonia, washing with water, and recrystallizing from boiling water.

çin-na-mô-dên'-drôn, s. [Gr. *kinnamon*, *kinnamon*=cinnamon, and *dendron*=a tree.]

Bot.: A genus of plants, doubtfully referred by Lindley to the order Pittosporaceæ. *Cinnamodendron axillare*, a Brazilian tree, is aromatic. Its bark, which is a tonic and antiscorbutic, is prescribed in low fevers, and is made into gargles used when the tonsils are feeble.

çin-na-mô'-mic, a. [Eng. *cinnamon*; Lat. *cinnamomum*; and Eng. suff. *-ic*.] Pertaining to cinnamon, cinnamic.

cinnamomic acid, s. [CINNAMIC.]

çin-na-mô'-mum, s. [Gr. *kinnamōmon*, *kinnamōmon*=cinnamon.]

1. Bot.: A genus of plants, order Lauraceæ. They have hermaphrodite flowers, with the abortive stamens apparently perfect with four-celled anthers. The leaves, which are three-ribbed, or triple-ribbed, are evergreen, often approaching each other in pairs. Another product of the genus *Cinnamomum* is *CASSIA-BARK* (q. v.). *Cinnamomum Cullawana* yields *Cullawana* bark. Cinnamon proper is from *Cinnamomum zeylanicum*. *C. nitidum* has similar properties, that of Santa Fé from *Nectandra cinnamomoides*, and that of the Isle of France from *Oreodaphne cupularis*. All are of the Laurel order. [CINNAMON, CASSIA.]

2. Palæont.: Two species of *Cinnamomum* are said to exist in the Miocene.

çin'-na-môn, s. & a. [Gr. *kinnamon*, *kinnamōmon*; Lat. *cinnamomum*, *cinnamum*, from a Phœnic. word equivalent to Heb. *qinnamon*, construct. state *qinneman*.]

A. As subst.: An aromatic substance consisting of the bark of a tree or trees. [CINNAMOMUM, CINNAMON BARK.] The Phœnicians, the Arabs, or both, imported the genuine cinnamon into Palestine remotely from Ceylon or the Eastern Archipelago, but probably from some mercantile port much nearer at hand. It is represented, however, as growing in at least one Jewish garden (Song of Solomon, iv. 14), unless, indeed, the whole description be figurative. It was one of the ingredients in the holy anointing oil, which Moses was commanded to make for the anointing of the tabernacle and its furniture (Exod. xxx. 22-29). It was used also for the perfume of beds (Prov. vii. 17). It is mentioned as an article of merchandise also in the mystic Babylon (Rev. xviii. 13).

Wild cinnamon: The genus *Cinnamodendron* (q. v.).

B. As adj.: Bright brown, mixed with yellow and red.

cinnamon bark, s.

Pharm.: *Cinnamomi Cortex*. The inner bark of shoots from the truncated stocks of *Cinnamomum zeylanicum*, order Lauraceæ. It is imported from Ceylon. It occurs in closely rolled, brittle, bright-brown quills having an aromatic odor and warm astringent taste. It is used to prepare *Aqua cinnamomi*, *Tinctura cinnamomi*, and *Pulvis cinnamomi compositus*, compound cinnamon powder. Cinnamon is a stimulant, aromatic, carminative, and is useful in cases of diarrhoea.

cinnamon oil, s.

Pharm.: *Cinnamomi oleum*. An essential oil distilled from cinnamon bark. It is of a bright yellow color, which gradually darkens. It consists chiefly of cinnamic aldehyde (q. v.). When exposed to the air, it gradually absorbs oxygen and forms a resin and cinnamic acid.

cinnamon root, *cinnamom roote, s.

Bot.: The book-name given by Gerard to *Inula Conyza*.

cinnamon sedge, s.

Bot.: An endogenous plant, *Acorus calamus*.

cinnamon-stone, s.

Min.: A mineral of cinnamon-red color, a variety of garnet. The finest specimens are brought from Ceylon. Dana considers it a sub-variety of Garnet, ranking it under his Lime-alumina Garnet, or Grossularite (q. v.).

cinnamon water, s. *Aqua cinnamomi*, a medicinal drink prepared by distilling twenty ounces of cinnamon with two gallons of water till one gallon boils over.

çin-na-môn'-i-trile, s. [Eng. *cinnamo(n)*, and *nitril*.]

Chem.: $C_9H_7\cdot N$. A substance, boiling at 255°, soluble in alcohol. It is obtained by the action of PCl_5 on cinnamon.

çin'-na-myl, çin'-na-mule, s. [Eng. *cinnamon*; Gr. *kinnamon*=cinnamon, and *hylē*=... matter.]

Chem.: $C_9H_7O\cdot$. An aromatic monatomic radical. **cinnamyl chloride, s.**

Chem.: $C_9H_7O\cdot Cl$. Obtained by the action of pentachloride of phosphorus, PCl_5 , on cinnamic acid. It is a heavy oil, boiling at 262°. Heated with cinnamate of sodium, it yields cinnamic anhydride.

cinnamyl hydride, s.

Chem.: $C_9H_7O\cdot H$. [CINNAMIC ALDEHYDE.]

çin'-nyl, s. & a. [Gr. *kinnamon*, and *hylē*=matter as a principle of being.]

Chem.: $C_9H_9\cdot$. A monatomic aromatic hydrocarbon radical.

cinnyl cinnamate, s.

Chem.: $C_{18}H_{19}O_2$. It is contained in liquid storax, which exudes from *Styrax calamita*, a shrub growing in Asia Minor. Distilled with potash it yields cinnyl alcohol and cinnamic acid.

çin-nyl'-ic, a. [Eng. *cinnyl*; *-ic*.]

cinnyl alcohol, s.

Chem.: C_9H_9OH . Cinnyl hydrate, cinnamic alcohol, styryl alcohol, styrene. A monatomic aromatic alcohol, obtained by heating cinnyl cinnamate with caustic alkalies. It crystallizes in soft silky needles, melts at 35°, and is soluble in water. By oxidizing agents it is converted into cinnamic aldehyde and cinnamic acid.

çin-nyr'-i-dæ, s. pl. [Lat. *cinnyris*, the type, and fern. pl. adj. suff. *-idæ*.]

Ornith.: The Sun-birds, a family of birds, some of which have remarkably brilliant plumage. The family is placed by Swainson between the Meliphagidæ, or Honeysuckers, and the Trochilidæ, or Humming-birds. (Craig.)

çin'-nyr'-is, s. [Lat. *cinnaris*.]

Ornith.: The Sun-bird, a genus of birds, the typical one of the family Cinnyridæ.

çinque, *çink, *sink, s. & a. [Fr. *cinq*; O. Fr. *cinque*; Ital. *cinque*; Prov. *cinc*; Sp. & Port. *cinco*, from Lat. *quinque*=five.]

A. As substantive:

1. Ord. Lang.: The number five, specially on dice or in cards.

2. Music (Pl. *cinques*): The name given by change-ringers to changes on eleven bells, probably from the fact that five pairs of bells change places in order of ringing in each successive change. (Troyle, in *Grove's Dict. Music*.)

***Cinque and sice:** A phrase probably meaning fearless, desperate. (Davies.)

"[Mastiffs] for their carelessness of life, setting all at *cinque and sice*."—Dr. Caius, in *English Garner*, iii. 253.

B. As adj.: The fifth.

cinque-cento, s. & a. [Ital.]

A. As substantive:

Arch.: Literally 500, but used as a contraction for 1,500, the century in which the revival of ancient architecture took place in Italy. The term is applied to distinguish the style of architecture which then arose in that country. In France the style, as introduced there, is called *Style Français premier* and *Renaissance*; and in England, the Revival and Elizabethan. (Gwilt.)

B. As adj.: Pertaining to or constructed in the style described in A.

"What is given the student as next to Raphael's work? *Cinque-cento* ornament generally."—*Ruskin*.

cinque-foil, *cynk-foly, s. [O. Fr. *cinque*=five, and *foil*; Fr. *feuille*; Lat. *folium*=leaf.]

1. Botany:

(1) The common name of plants of the genus *Potentilla*, order Rosaceæ, also called Five-finger, from the resemblance of its leaves to the fingers of the hand.

(2) *Onobrachis sativa*.

2. Arch.: An ornament used in the Middle Pointed style of architecture. It consists of five cuspidated divisions or curved pendants inscribed in a pointed arch, or in a circular ring, applied to windows and panels. The cinque-foil, when inscribed in a circle, forms a rosette of five equal leaves, having an open space in the middle, the leaves being formed by the open spaces, and not by the solids or cusps.

Cinque-foil.

3. Her.: This plant, as a charge, answers to the five senses of man, and denotes that the bearer conquers his affections and appetites. (Crabb.)

¶ *March cinque-foil:* A modern book-name for a plant, *Comarum palustre*.

† *cinque-foiled, a.* [Eng. *cinque-foil*; *-ed*.]

Arch.: Furnished with cinque-foils.

***cinque-outposts, s. pl.** The five senses.

"I was fallen soundly asleep: the *cinque-outposts* were shut up closer than usual."—*A Winter Dream*, 1,649 (*Harl. Miscel.*, vii. 203). (Davies.)

cinque-pace, s. A kind of dance (called also *Galliard*), the steps of which were regulated by the number five. Also translated *five-paces*. Sir John Davies thus describes it:

"Five was the number of the music's feet,
Which still the dance did with *five paces* meet."

cinque-port, *sink-pors, s.

1. (Of the form *cinque-port*): A kind of fishing-net having five entrances.

2. (Pl.): Ports, as the latter half of the designation implies, "five" in number, and deemed the five most important ports on the southern coast of England, facing France. At first there were really only five, viz., Dover, Sandwich, Romney, Hastings, and Hythe. Two have since been added, viz., Winchelsea and Rye, and the "Cinque"-ports at present number seven.

***3.** A representative of one of the Cinque-ports.

"A canopy borne by four of the *Cinque-ports*; under it, the queen in her robe . . ."—*Shakesp. Henry VIII.*, iv. 1.

***cinque-posts, *cinq-posts, s. pl.** The same as *Cinque-outposts* (q. v.).

"My *cinq-posts* (my five outward senses) had been trebly lockt up."—*Howell: Parl. of Beasts*, p. 32.

***cinque-spotted, a.** Having five spots.

çin'-tre, s. [Fr.]

Arch.: The same as center or centering (q. v.).

çī'-ôn, s. The soft palate, or uvula. (*Anatomy*.)

çī'-ôn-īs'-tēs, s. [Gr. *kionistēs*=a small pillar.] A genus of Hydroid Polypes belonging to the family Podocorynidæ.

çī'-ôn-ō-tōme, s. [Gr. *kiōn*, genit. *kionos*=(1) a pillar, (2) the uvula; and *tomē*=a cutting, *temnō*=to cut.]

Surg.: An instrument for excising a portion of the uvula.

çī'-ôn-ūs, s. [Gr. *kiōn*=a pillar, . . . a wart (?).]

Entom.: A genus of coleopterous insects, tribe Rhyncophora, family Curculionidæ. They have a long curved rostrum inserted in a groove beneath the thorax, which is small. The elytra are nearly spherical, furnished with velvety tufts. Many species are known. *Cionus verbasci*, of a deep ash color with other parts buff, gray, or yellow, is nearly globular. It is found on *Scrophularia*, *Verbascum*, and other plants.

çī'-phēr, *zi-fer, çy-pher, s. [O. Fr. *cifre*; Fr. *chiffre*, from Low Lat. *cifra*=nothing, from Arab. *sifr*=a cipher (*Skeat*); Sp. & Port. *cifra*; Ital. *cifra*, *cifera*; Ger. *ziffer*.]

A. Ordinary Language:

I. Literally:

1. In the same sense as B. 1.

***2.** A character of any kind used in writing or in printing.

***3. (In pl.):** Shorthand.

"His speeches were much heeded, and taken by divers in *ciphers*."—*Hacket: Life of Williams*, i. 82.

II. Figuratively:

1. A person of no worth or moment.

"If the people be somewhat in the election, you cannot make them nulls or *ciphers* in the privation or translation."—*Bacon*.

***2.** Worthlessness, sham, unreality.

"Mine were the very *cipher* of a function."
Shakesp. Measure for Measure, ii. 2.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wolf, wôrck, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

B. Technically.

1. *Math.*: A mark or character (0) which of itself possesses no value, but when placed after any number increases its value tenfold. In decimal fractions the placing of a cipher before a number decreases its value in the same proportion.

"The cipher of itself implies a privation of value; but when disposed with other characters on the left of it, in the common arithmetic, it serves to augment each of their values by ten; and in decimal arithmetic, to lessen the value of each figure to the right of it, in the same proportion."—*Chambers*.

2. *Engraving*: A combination or interweaving of two or more letters, especially the initials of a name; a monogram.

3. *Corresp.*: A secret or occult code or alphabet used in carrying on correspondence between two parties when it is important that the contents should be unintelligible to any third person into whose hands it might accidentally come, and who did not possess the key.

"This paper was signed in cipher by the seven chiefs of the conspiracy. . . ."—*Macaulay: Hist. Eng., ch. ix.*

*4. *Astrol.*: An occult sign or figure.

"With that he circles draws, and squares,
With ciphers, astral characters."

Butler: Hudibras, ii. 3.

5. *Music*: The sounding of a note on an organ or wind instrument, by an escape of wind through it, without that note having been touched by the player.

cipher-key, s. A key which enables the holder to read writings in cipher.

çî-phêr, v. i. & t. [CIPHER, s.]

A. *Intransitive*:

1. *Ord. Lang.*: To practice arithmetic; to work out sums.

"We have long drawn our supply of roofing-slates from such quarries; school-boys ciphered on these slates. . . ."—*Tyndall: Frag. of Science* (3d ed.), xiv. 409.

2. *Music*: Used of an organ or harmonium, when through some defect the wind escapes and sounds through any note without that note having been touched by the player.

B. *Transitive*:

1. *Lit.*: To write in cipher or secret characters.

"His father engaged him when he was very young to write all his letters to England in cipher."—*Ep. Burnet*.

2. *Figuratively*:

(1) To designate, to characterize, to depict.

"The face of either ciphered either's heart."

Shakesp.: Rape of Lucrece, 1,396.

(2) To decipher, to interpret.

"To cipher what is writ in learned books."

Shakesp.: Rape of Lucrece, 811.

çî-phêr-hood, s. [Eng. cipher; -hood.] The quality or state of being only a cipher; nothingness.

"Therefore God to confute him, and bring him to his native cipherhood, threatened to bring a sword against him."—*Godwin: Works, vol. v., fol. 443. (Rich.)*

çî-phêr-îng, pr. par., a. & s. [CIPHER, v.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As substantive*:

1. Elementary arithmetic; the act or science of doing sums.

2. The act or art of writing in cipher.

çîp-ô-lîn, çî-pô-lîne, çî-pô-lî-nô, s. [Ital. *cipollino* = a small onion; Lat. *cepolâ* = a small onion, a chive, dimin. of *cepa* = an onion.]

Min.: An Italian marble, a variety of calcite, containing a slight admixture of quartz and oxide of iron. Its color is white with pale greenish shadings, and is so called because its veins, like those of onions, consist of different strata, one lying upon another. It does not stand the weather well.

çîp-pêr, s. & a. [Cf. A. S. *cipe* = an onion.] A term occurring only in the subjoined compound.

çipper-nut, s. *Bunium flexuosum*.

çîp-pûs, s. [Lat. *cippus* = a stake, a post.]

Arch.: A small low column, sometimes without a base or capital, and most frequently bearing an inscription. Among the ancients the cippus was used for various purposes; when placed on a road, it indicated the distance of places; on other occasions, cippi were employed as memorials of remarkable events, as landmarks, and for bearing sepulchral epitaphs. (*Gwilt*.)

***çî-pres, *çy-pres, *çy-press, *çy-prus, s.** [CYPRUS, CRAPE.] A thin, transparent stuff, supposed to resemble modern crape. Both black and white were made, but the black was most common, and was used as now for mourning.

"Lawn as white as driven snow,"

Cypres black as e'er was crow."

Shakesp.: Winter's Tale, iv. 3.

¶ The following passage refers to its transparency. (*Nares*.)

"A cypres, not a bosom,

Hides my poor heart."

Shakesp.: Twelfth Night, iii. 1.

çîr-ca, prep. [Lat. = about.] Used to denote an approximation in a date. It is generally contracted to c.

çîr-ca-da, s. [Lat. *circus*.]

Old Eccles. Law: A tribute anciently paid to the bishop or archdeacon for visiting the churches. (*Tomlin: Law Dictionary*.)

çîr-çæ-a, s. [Lat. *Circæus* = pertaining to *Circe*, a fabulous enchantress, in reference to the fruit which, being covered with little hooks, lays hold of the clothes of passengers, as *Circe* is said to have done by her enchantments.]

Botany:

1. *Sing.*: A genus of plants, order Onagraceæ. Calyx-tube ovoid, with a two-parted limb. Petals obcordate, stamens two, ovary 1-2 celled, style filiform, stigma capitate two-leaved. Fruit ovoid or pyriform, 1-2 celled, indehiscent, covered with hooked bristles. Slender erect herbs.

2. *Pl.*: A tribe of Onagraceæ, of which *Circæa* is the type. [CIRCEA.]

çîr-câ-ê-tûs, s. [Gr. *kirkos* = a falcon that moves round in a circle, and *ætos* = an eagle.]

Ornith.: A genus of the Aquilinæ, or Eagles, belonging to the family Falconidæ. *Circæetus cheela* is common in Lower Bengal, where it frequents the margins of tanks to feed upon the frogs which there abound at certain seasons of the year.

çîr-car, s. [Maharatta, Hind., &c., *sûrkar* = the government.] (*Anglo-Indian*.)

Geog. (Pl. Circars): The name formerly given to the Northern Circars, five districts in the Madras presidency. They were Chicacole, Rajahmundry, Ellore, Condapilly, and Guntoor. The Northern Circars were obtained by the French in 1753, and were taken by Clive in 1759. (For other meanings of *Circar* see *SIRKAR*.)

çîr-cās-sî-an, a. & s. [Eng. *Circassi(a)*; -an.]

A. *As adj.*: Pertaining to Circassia.

B. *As subst.*: A native of Circassia.

çîr-cās-sî-ënne, s. [Fr.] A light kind of cashmere. (*Knight*.)

çîr-çê, s. [The mythic daughter of Helios (the Sun) and Perseis, who lived in the island of Æa and was reputed to possess powers of enchantment, by means of which she first charmed her victims, and then changed them into beasts.]

1. *Mythol.*: The fabulous creature described in the etymology.

"Will give thee back to day and *Circe's* shores.

There, pious, on my cold remains attend."

Pope: Homer's Odyssey, bk. xi., l. 86, 87.

2. *Zoöl.*: A genus of mollusks, family Cyprinidæ. The shell is suborbicular and compressed; it is thick, and is often sculptured with diverging striæ. The hinge teeth are 3-3, the lateral ones obscure, the pallial line entire. It ranges from eight to fifty fathoms. There are forty recent species.

3. *Astron.*: An asteroid, the thirty-fourth found. It was discovered by Chacornac, on the 6th of April, 1855.

çîr-çê-an, a. [Lat. *circæus*.] Pertaining to *Circe*; magic, noxious.

çîr-çê-i-dæ, çîr-çê-a-dæ, s. pl. [Lat. *Circe*, and fem. pl. suff. -idæ, -adæ.]

Zoöl.: A division of naked-eyed Medusæ, order Gymnophthalmata. There is only one genus, *Circe* (q. v.).

çîr-çêl-lî-ûm, s. [From Lat. *circellus* = a small ring.]

Zoöl.: A genus of Coleopterous insects. Family, Lamellicornes.

***çîr-çên-sî-âl, çîr-çên-sî-an, a.** [Lat. *circensis* = pertaining to the circus: *ludi circenses* = the games in the Circus Maximus at Rome.] Pertaining to the Circus Maximus, or to the games practiced in the Roman Amphitheater.

çîr-çî-næ, s. pl. [From Gr. *kirkos* = a kind of falcon which flies in wheels or circles. Probably *Accipiter Nisus*, the Sparrow-hawk. This is not the Circus of modern ornithologists.]

Ornith.: A sub-family of Falconidæ, containing the Harriers. [CIRCUS.]

çîr-çîn-âl, a. [Fr. *circinal*; Lat. *circinus*; Gr. *kirkinos* = a circle.]

Bot.: An epithet applied to leaves of plants rolled up in a spiral manner downward, the tip being in the center; used in reference to foliation or leafing, as in ferns. (*Gray*.)

***çîr-çîn-âte, v. t.** [Lat. *circinatus*, pa. par. of *circino* = to make round; Gr. *kirkinos* = a circle.] To form into a circle, to make a circle round, to encircle, to encompass.

çîr-çîn-âte, a. [Lat. *circinatus*, pa. par. of *circino* = to make round.]

1. *Ord. Lang.*: Round, in a circle; encircled.

2. *Bot.*: The same as *Circinal* (q. v.).

"The manner in which the young leaves are arranged within the leaf-bud is called foliation or vernation. . . . The vernation . . . of the ferns and cycads is *circinate*."—*Lindley: Introd. Bot., b. i., sect. 2, § 1.*

***çîr-çîn-â-tion, s.** [Lat. *circinatio*, from *circinus* = a circle, a pair of compasses.] An orbicular motion, a turning round, a measuring with the compasses. (*Bailey*.)

çîr-çî-nûs, s. [Lat. = a circle, a pair of compasses.]

Astron.: The Compasses, a constellation near the South Pole, lying between Norma and Musca Australis.

çîr-cle, *çer-cle, *ser-cle, s. [A. S. *circol*, *circul*; Fr. & Prov. *cercle*, *sercle*; Sp. & Port. *circulo*, from Lat. *circulus*, dimin. of *circus* = a circle; Gr. *kirkos* = a circle, a ring.]

A. *Ordinary Language*:

I. *Literally*:

1. In the same sense as B. 1.

2. A ring, a round figure or mark.

"And eft with water which she kept

She made a *sercle* about him thries."

Gower, ii. 264.

3. A round body, a globe, orb, or sphere.

"It is he that sitteth upon the circle of the earth."—*Isaiah xi. 22.*

*4. A ring, a circlet.

"A golden *cercle* in the noethirlis of a sow."—*Wycliffe: Prov. xi. 22.*

*5. A coronet or band worn round the helmet.

"He carfe away with myght and mayne

The circle that sat upon his crown."

Soudan of Babylon, 1182.

6. A compass, a circuit, an inclosure.

"A great magician obscured in the circle of the forest."—*Shakesp.: As You Like It, v. 4.*

7. A district, a territory.

¶ **Circles of the Holy Roman Empire*: Such provinces and principalities as had a right to be present at the diets. They were ten in number.

8. A number of persons standing or seated in a ring,

" . . . announced to the splendid circle assembled round the font"—*Macaulay: Hist. Eng., ch. xiv.*

9. An assembly generally.

10. Any series ending as it begins, and perpetually repeated; a cycle, a succession.

"There be fruit trees in hot countries, which have blossoms and young fruit, and young fruit and ripe fruit, almost all the year, succeeding one another; but this circle of ripening cannot be but in succulent plants and hot countries."—*Bacon*.

II. *Figuratively*:

1. A sphere of acquaintance; a class or division of society.

"In private society he [Mr. Canning] was amiable and attractive, though, except for a very few years of his early youth, he rarely frequented the circles of fashion"—*Brougham*.

*2. Circumlocution; indirectness of language.

"Has he given the lye

In circle, or oblique, or semicircle."

Fletcher: Queen of Corinth.

B. *Technically*:

1. *Geometry*:

(1) A plane figure defined by a curved line called its circumference, every point in which is equally distant from a certain point within the circle, called its center. [CENTER.] A straight line drawn from the center of a circle to its circumference is called a radius, and a straight line drawn through the center and terminated both ways by the circumference is called the diameter of a circle. The space inclosed within the circumference is called the area of the circle. The circumference of a circle is to its diameter as about 22 to 7 or 3¹⁴²⁸⁵⁷ to 1, involving in its computation a circulating decimal. For the quadrature of the circle see QUADRATURE.

(2) The curved line defining such figure; the circumference.

2. *Logic*: An inconclusive and deceptive line of argument, in which two or more statements are brought forward to prove each other, i. e., the first proposition is assumed as proved by that which follows it, and the second again is assumed from that which precedes it.

3. *Astron.*: As instrument of observation, the limb of which is graduated to 360° and forms a complete circle. There are several kinds: a mural circle, one affixed to a wall; a transit circle, one fitted with a telescope on an axis, and mounted in the plane of the meridian; a reflecting circle, one

working by reflection, as a sextant; a repeating circle, one repeating the angle several times continuously along the limb. (See these words, and also ALTITUDE, AZIMUTH, CIRCUMFERENTOR.)

4. *Archæol.*: The name given to one of the megalithic remains, as at Stonehenge, Avebury, and other places in England. (*Gwilt.*)

5. *Vehicles*: The fifth wheel of a carriage.

¶ (1) *Circle of altitude*:

Astron.: A circle parallel to the horizon, having its pole in the zenith.

(2) *Circle of curvature*: That circle the curvature of which is equal to that of any curve at a certain point. Called also the *Circle of equi-curvature*.

(3) *Circles of declination*: Great circles intersecting each other in the poles of the world.

(4) *Circles of excursion*: Circles parallel to the ecliptic, and at such a distance from it (usually 10°), as that the excursions of the planets toward the poles of the ecliptic may be within them.

(5) *Circle of illumination*: A circle passing through the center of a planet perpendicular to a line drawn from the sun to the respective body. This is supposed to separate the illumined part from the unillumined, which it does nearly.

(6) *Circles of latitude*:

(a) *Astron.*: A great circle perpendicular to the plane of the ecliptic, passing through its poles.

(b) *Spherical projection*: A small circle of the sphere whose plane is perpendicular to the axis.

(7) *Circles of longitude*: Lesser circles parallel to the ecliptic, diminishing as they recede from it.

(8) *Circle of perpetual apparition*: One of the lesser circles parallel to the equator, described by any point of the sphere touching the northern point of the horizon, and carried about with the diurnal motion. All the stars within this circle never set.

(9) *Circle of perpetual occultation*: A lesser circle parallel to the equator, and containing all those stars which never appear in our hemisphere. The stars situated between the circles of perpetual apparition and perpetual occultation alternately rise and set at certain times.

(10) *Circle of the sphere*: A circle upon the surface of the sphere, called a great circle when its plane passes through the center of the sphere; in all other cases a small circle.

A great circle of a sphere is one whose center coincides with that of the sphere, and which therefore divides the sphere into two equal parts.

(11) *Circle of Willis*: An anastomosis between the primary trunks of the arteries of the brain, to equalize and carry on the circulation of blood in the brain when an obstruction to one of the main trunks occurs. It incloses a space somewhat of an oval figure, within which are found the optic nerves, the tuber cinereum, the infundibulum, the corpora mammillaria, and the interpeduncular space.

(12) *Astronomical Circle*:

Astron. Instrum.: The name given to any one of the instruments designed to be used for measuring angles of altitude or zenith distance. [MURAL CIRCLE, TRANSIT CIRCLE, ALTITUDE, and AZIMUTH INSTRUMENT.]

(13) *Diurnal Circles*: Supposed to be described by the several stars and other points in the heavens in their apparent diurnal rotation round the earth.

(14) *Horary Circles (Dialing)*: The lines on dials which show the hours.

(15) *Polar Circles*: Immoveable circles, parallel to the equator, and at a distance from the poles equal to the greatest declination of the ecliptic.

(16) *Reflecting Circle*: [SEXTANT.]

(17) *Repeating Circle*: [REPEATING.]

(18) *Transit Circle*: [TRANSIT.]

¶ Crabb brings into comparison the words a circle, a sphere, an orb, and a globe. Without advert- ing further to his views, it may be simply added that a circle, mathematically viewed, is a plane figure; while a sphere, an orb, and a globe are solids. It is, we think, from arbitrary usage and not for a deeper reason that we speak of the circle of one's friends, and the sphere of one's activity. [GLOBE.]

circle-iron, s.

1. A hollow punch for cutting planchets, wads, wafers, and circular blanks.

2. A fifth wheel of a carriage.

circle-like, *cerclelyk, a. Like or resembling a circle: round, circular.

"Cercleryk shappe is most perfite figure."

Oocleve: *De Reg. Princ.*, 5, 107.

çir'-cle, *cer-clen, *ser-kle, v. t. & i. [Fr. *circuler*; Lat. *circulo*, from *circulus*=a circle.]

*A. Transitive:

1. To move or revolve round anything; to encircle.

"So cerclith it the welle aboute."

Romaunt of the Rose, 1, 619.

2. To surround, to inclose, to encompass as with a circle.

"You heavy people, circle me about."

Shakesp.: *Titus Andronicus*, iii. 1.

B. Intransitive:

I. Literally:

*1. To move round or in a circle.

"Guards as he turns, and circles as he wheels."

Pope: *Homer's Iliad*, viii. 410.

†2. To form a circle round, to encircle, to surround.

"... peers who circled round the King."

Scott: *Lady of the Lake*, v. 24.

†3. To revolve (of time, the seasons, &c.).

"Now the circling years disclose

The day predestin'd to reward his woes."

Pope: *Odyssey*.

†II. Fig.: To spread, to be passed round.

"Thy name shall circle round the gaping throng."

Byron.

¶ To circle in: To confine, to keep together.

"We term those things dry which have a consistence within themselves, and which, to enjoy a determinate figure, do not require the stop or hindrance of another body to limit and circle them in."—Digby: *On Bodies*.

çir'-cled, pa. par. or a. [CIRCLE, v.]

A. As pa. par.: In senses corresponding to those of the verb.

"Or modest Dian, circled with the nymphs."

Shakesp.: *Henry VI.*, Pt. III., iv. 8.

B. As adjective:

1. Having the form of a circle, round.

"O, swear not by the moon, the inconstant moon,

That monthly changes in her circled orb."

Shakesp.: *Romeo and Juliet*, ii. 2.

2. Encircled, surrounded with a circlet, coronet, &c.

*çirc'-lêr, s. [Eng. *circle*(e); -er.]

1. Lit.: One who goes or moves round in a circle.

"Neptune circle of the earth."

Chapman: *Homer's Iliad*, xiii.

2. Fig.: A poor or inferior poet; either from his strolling about as a wandering minstrel, or for the same reason as their name was given to the Cyclic poets. [CYCLIC.]

"Nor so begin, as did that circle late,

I sing a noble war, and Priam's fate."

B. Jonson: *Art of Poetry*.

çirc'-lêt, s. [Eng. *circle*(le); dim. suff. -let.]

†1. A little circle or ring, as of gold, jewels, etc.

"He placed the golden circlet on,

Paused—kissed her hand—and then was gone."

Scott: *Lady of the Lake*, iv. 19.

*2. A round body, an orb.

"Fairer of stars . . . that crown'st the smiling morn

With thy bright circlet."

Milton: *P. L.*, v. 169.

çirc'-lîng, pr. par. or a. [CIRCLE, v.]

A. As pr. par.: In senses corresponding to those of the verb.

B. As adj.: Having the form of a circle; circular, encircling, surrounding.

"Whose towering front the circling realm commands."

Cowper: *Translations of the Latin Poems of Milton*,

Elegy I. To Charles Deodati.

çir'-cô-çêle, s. [SIRSOCELE.]

*çir'-cuat, a. [Lat. *circuitus*.] Encircled, surrounded.

"Ffor the quhilk soume the said vmquhill Schir Wil- liame laide in plege to the said Robert ane garnissing cir- cuat about with perllis, rubeis and diamontis, pertening to our souerane lordis darrest mother."—*Acts Ja. VI.*, 1581 (ed. 1814), p. 219.

*çir'-cûe, v. t. [Lat. *circueo* or *circumeo*=to go round; *circum*=around, about; *eo*=to go.] To make a circuit, to visit.

"He then vysyted and circued his lande in ministryng iustices to all person."—*Fabyan*, i. 34.

çirc'-uit, *çyrc'-ute, s. [Fr. & Prov. *circuit*; Ital., Sp. & Port. *circuito*, from Lat. *circuitus*, from *circueo* or *circumeo*=to go around, from *circum*=around, and *eo*=to go.]

A. Ordinary Language:

I. Literally:

1. The act of revolving or moving round any- thing.

"... carried along with him in his periodical cir- cuit round the sun."—*Watts*: *On the Mind*.

2. The place inclosed in a circle; an inclosure.

"A woody mountain, whose high top was plain,

A circuit wide inclosed." Milton: *P. L.*, viii. 304.

3. Space, extent, circumference.

"This towne is grete in cyrcute and of small defence."—*Berners*: *Froissart*, ii. 52.

*4. That which encircles anything; a ring, a crown.

"Until the golden circuit on my head

Do calm the fury of this mad-brain'd flaw."

Shakesp.: *Henry VI.*, Pt. II., iii. 1.

5. The act of visiting certain places for the pur- pose of inspection. [B. I. (1).]

"He insisted that Portland should make a circuit for the purpose of inspecting some of the superb fortresses of the French Netherlands."—*Macaulay*: *Hist. Eng.*, ch. xxiii.

*II. Fig.: Circumlocution.

"... (as by long circuit of deduction it may be that even all truth out of any truth may be concluded,) ..."—*Hooker*: *Ecol. Pol.*, bk. ii., ch. i., § 2.

B. Technically:

1. Law:

(1) The periodical visitation of the judges of the higher courts—both state and national—for the purpose of hearing causes coming under their juris- diction. The judges holding these courts are called circuit judges.

(2) The district or part of the country thus vis- ited by the judges.

*3. A longer course of proceedings than is actu- ally necessary for the recovery of anything sued for.

2. Path.: The period or course of a disease. (*Dun- glison*.)

3. Elect.: A continuous electrical communication between the poles of a battery. In telegraphy the wires and instruments forming the road for the passage of the current. At its extremities are the terminals, where it joins the instrument. A metallic circuit is when a return wire is used instead of the earth. A short circuit is one having as little resist- ance as possible, nothing but the apparatus and the wire used to connect it with the battery. To short circuit a battery is to connect its poles by a wire. A local circuit includes only the apparatus in the office.

¶ Voltaic or Galvanic Circuit or Circle: A con- tinuous electrical communication between the two poles of a battery; an arrangement of voltaic ele- ments, or couples, with proper conductors, by which a continuous current of electricity is established.

¶ Crabb thus distinguishes between a circuit, a tour, and a round: "A circuit is made for a specific end of a serious kind; a tour is always made for pleasure; a round, like a circuit, is employed in matters of business, but of a more familiar and ordinary kind. A judge goes his circuit at particu- lar periods of time; gentlemen . . . make a tour; tradesmen have certain rounds which they take on certain days." (*Crabb*: *Eng. Synon.*)

circuit-breaker, s.

Telegraphy: An instrument which periodically interrupt an electric current.

circuit-closer, s.

Telegraphy: A device by which an electrical cir- cuit is closed; usually a key, as the telegraph key. In fire-alarms and many automatic telegraphs it consists of a plain metallic disk, with insulated spaces on the rim or edge.

circuit-court, s.

Law: A court (common to most of the states of this country and to the national government) to which the justices sitting make stated visits for the purpose of administering their functions. The powers of the court vary in the different common- wealths and the jurisdiction of each is a matter of state regulation varying largely in results. The national circuit-court has an equity as well as a criminal side. The United States is divided into nine circuits, each one apportioned to two circuit judges, who, with the United States Supreme court judge for that circuit, constitute a circuit court of appeals.

circuit-judge, s.

Law: The justice or judge of a circuit-court.

*çirc'-uit, v. i. & t. [CIRCUIT, s.]

A. Intrans.: To move in a circle, to revolve, to pass round.

"The cordial cup . . . quick circuiting."—*J. Philips*.

B. Trans.: To go or travel round, to visit period- ically for purposes of inspection.

"Geryon, having circuted the air."—*T. Warton*.

*çirc'-uit-êr', v. i. [CIRCUITEER, s.] To go on circuit.

*çirc'-uit-êr', *çir'-cuit-er, s. Eng. *circuit*; -er; -er.]

1. Ord. Lang.: One who travels or goes round on a circle or circuit.

"Like your fellow circuit-er the sun, you travel the round of the earth, and behold all the iniquities under the heavens."—*Pope*.

2. Law: One who goes on circuit.

"Here we drop our circuit-er; which character lasted till his lordship was made Solicitor-General."—*North*: *Life of Lord Guilford*, i. 92. (*Davies*.)

EER, v.]

A *As pr. par.*: (See the verb.)

B *As adj.*: Going round on circuit.

"The big-wigg'd circuiting Judges."

Colman. *Poet. Vagaries*, p. 125.

C *As subst.*: The act or practice of going on circuit.

"Now to return to his lordship, and his circuiting."
—North. *Life of Lord Guilford*, i., 261.

cīrc-u-ī'-tion, *s.* [Lat. *circuitio*, *circumitio*, from *circumeo*=to go round: *circum*=round, *eo*=to go.]

1. *Lit.*: The act of going round or compassing.

2. *Fig.*: Circumlocution, indirectness, or vagueness of language.

cīrc-cū'-it-ōus, *a.* [Low Lat. *circuitosus*, from *circuitus*=a going round.] Having the quality of moving or going round in a circuit; indirect, roundabout. (Burke.)

cīrc-cū'-it-ōus-lŷ, *adv.* [Eng. *circuitous*, -ly.] In a circuitous or indirect manner, in a circuit.

"He seeks circuitously to reach him through the people."—Trench. *Miracles*, No. xx.

cīrc-cū'-it-ŷ, ***cīrc-cu-i-te**, *s.* [Lat. *circuitus*.] [CIRCUIT.]

A *Ordinary Language*:

I *Literally*:

1. The act of moving or going round in a circle.

2. A tendency to assume a circular form or state; the state of being circular.

"The characteristic property of running water is progress, of stagnant is *circuitity*."—Whateley. *Observations on Modern Gardening*, p. 67.

3. Compass, extent, circuit.

"A dominion of much more large and ample *circuit* than the same whiche he was Lorde of before."—Udall. *Apoph. of Erasmus*, p. 220.

II *Fig.*: Circumlocution, a beating about the bush.

"Very clear it is, the prophecy, without all *circuit*, noting, naming, and in a manner pointing to it."—Andréwees. *Sermons*, i. 157.

***B** *Law (circuit of action)*: The taking a longer course than requisite in proceeding to recover anything sued for. (Wharton.)

***cīrc'-u-la-ble**, *a.* [Eng. *circul(ate)*; -able.] That may be circulated; capable of being circulated.

"Bills of exchange, therefore, put in circulation the fixed property of nations. They render the houses and streets of Hamburg, the acres and forests along Susquehanna, *circulable* in London or Amsterdam."—Taylor. *Annual Review*, i. 387.

cīrc'-u-lar, *a. & s.* [Fr. *circulaire*; Prov. *circu-
ar*; Lat. *circularis*, from *circulus*=a little circle.]

A *As adjective*:

I *Ordinary Language*:

1. *Literally*:

(1) Of or pertaining to a circle; of the shape of a circle.

(2) Revolving, moving in a circle, successive, recurring.

"From whence the innumerable race of things
By *circular* successive order springs."

Roscommon.

(3) Cyclic; pertaining to or connected with a cycle of events.

"Had Virgil been a *circular* poet, and closely adhered to history, how could the Romans have had Dido?"—Dennis.

*2. *Fig.*: Perfect, complete.

"In this, sister,
Your wisdom is not *circular*."

Massinger. *Emperor of the East*, iii. 2.

II *Technically*:

1. *Comm. & Diplomacy*: Addressed in identical terms to a circle or number of persons. [CIRCULAR-LETTER.]

2. *Logic*: Returning to the same point; arguing in a circle; inclusive, incomplete.

"One of Cartes's first principles of reasoning, after he had doubted of every thing, seems to be too *circular* to safely build upon; for he is for proving the being of God from the truth of our faculties, and the truth of our faculties from the being of a God."—Baker. *Reflections on Learning*.

B *As subst.*: A letter or communication addressed in identical terms to a circle or number of persons.

"The Government loudly proclaims to Europe reforms for Poland. It informs the various courts of them by diplomatic *circulares*, . . ."—Edwards. *Polish Captivity*, vol. ii., ch. i.

circular-arc, *s.* Any part of the circumference of a circle.

circular-bolt, *s.* A machine employed by the lace-manufacturers in Nottingham in making net. (Knight.)

circular buildings, *s. pl.*

Arch.: Such as are built on a circular plan. When the interior is also circular, the building is called a rotunda. (Gwilt.)

circular canon, *s.*

Music: A canon closing in the key one semitone above that in which it commences. Twelve repetitions of it would take it through all the known keys. (Stainer & Barrett.)

circular crystals, *s. pl.* This term has been applied to the flattened group of radiating, crystalline needles formed by many salts and other crystalline substances. (Micrographic Dict.)

circular file, *s.* A circular saw or serrated disk, adapted to run on a spindle or mandril, and used in cutting the teeth of cogwheels. (Knight.)

circular head, *s.*

Arch.: The arch or bow of a door or window.

circular instruments, *s. pl.* Astronomical, nautical, or surveying instruments, which are graduated to 360°. that is, around the whole circle. (Knight.)

circular iron-clad, *s.*

Naut.: An iron-clad war vessel of circular form. The original suggestion of such a type of vessel was made by Mr. E. J. Reed, formerly constructor of the British navy, but the first actually built was by direction of the Russian Admiral Popoff, and it was called in consequence a Popoffka.

circular-letter, *s.*

1. *Banking*: A letter of credit addressed to several bankers in other countries in favor of a certain person named therein.

"It never was known that *circular letters*,
By humble companions were sent to their betters."
Swift to Sheridan.

2. *Comm. & Diplomacy*: A circular.

circular lines, *s. pl.*

Math.: Lines of sines, tangents, secants, &c.

circular-loom, *s.* A loom in which a shuttle moves in a circular race, and continuously in one direction, through warps arranged in a circle. (Knight.)

circular-micrometer, *s.* An annular form of the micrometer first suggested by Boscovich in 1740, and afterward revived by Olbers in 1798. (Knight.)

circular muscle or circular fibers (of Santorini).

Anat.: A series of circular involuntary muscular fibers wholly surrounding the membranous portion of the urethra.

circular-note, *s.* The same as *Circular-letter* (q. v.).

circular numbers, *s. pl.*

Arith.: Those numbers all the powers of which terminate in the same digits as the numbers themselves. Thus all the powers of 5 terminate in 5.

circular parts, *s. pl.* Five parts of a right-angled or a quadrantal spherical triangle; they are the legs, the complement of the hypotenuse, and the complements of the two oblique angles. (Craig.)

circular polarization, *s.*

Phys.: In the undulatory theory of light a supposed circular rotation of the particles of ether in certain media, when a pencil of plane polarized light is allowed to pass through these media. (Craig.)

circular roofs, *s. pl.*

Arch.: Such as have the horizontal sections circular.

circular-sailing, *s.*

Naut.: The act or system of sailing on the arc of a great circle.

circular-saw, *s.* [SAW.]

circular-shears, *s.* A shears for sheet-metal, consisting of two circular blades on parallel pins.

circular-shuttle box-loom, *s.* A loom having a box with a number of shuttles, and having means for actuating it so as to bring any one of the shuttles into operation as required by the pattern.

circular sinus, *s.*

Anat.: A ring-like sinus placed superficially round the pituitary body in the dura mater of the brain, forming a communication between the two cavernous sinuses. It is also called a Coronary sinus.

circular or cylindro-cylindric work, *s.*

Arch.: A term applied to any work which is formed by the intersection of two cylinders whose

axes are not in the same direction. The line formed by the intersection of the surfaces is termed, by mathematicians, a line of double curvature (Gwilt.)

cīrc-cu-lār'-ī-tŷ, *s.* [Low Lat. *circularitas*, from *circularis*=round, from *circulus*=a circle.]

I *Ordinary Language*:

1. The quality or state of being circular.

*2. That which is circular.

"The heavens have no diversity or difference, but a simplicity of parts, and equiformity in motion, continually succeeding each other; so that, from what point soever we compute, the account will be common unto the whole *circularity*."—Brown.

***II** *Logic*: Reasoning in a circle; incomplete or inconclusive reasoning.

cīrc'-u-lār-lŷ, *adv.* [Eng. *circular*; -ly.]

1. In form of a circle.

2. With a circular or revolving motion.

3. By circular reasoning; indirectly, in a circle.

"To argue *circularly*."—Baaxter. *Inf. Bapt.*, p. 35.

***cīrc'-u-lār-nēss**, *s.* [Eng. *circular*; -ness.] The quality of being circular, roundness, circularity.

"In forme . . . it doth pretend to some *circularness*."—Fuller. *Worthies*; Warwick, ii. 402.

cīrc'-u-lār-ŷ, *a.* [Eng. *circular*; -y.] Circular, ending in itself, inconclusive.

"Which rule must serve for the better understanding of that, which Damascene hath, touching cross, and *circular* speeches, wherein there are attributed to God such things as belong to manhood, and to man such as properly concern the duty of Christ Jesus."—Hooker. *Eccles. Pol.*, v., § 53.

cīrc'-u-lāte, *v. i. & t.* [Lat. *circulatus*, *pa. par.* of *circulo*=to move in a circle.]

A *Intransitive*:

I *Ordinary Language*:

*1. *Lit.*: To move in a circle, to revolve, to move round and return to the same point.

2. *Fig.*: To spread about, to move from place to place, or from person to person, or from hand to hand.

"As the mints of calumny are perpetually at work, a great number of curious inventions, issued out from time to time, grow current among the party, and *circulate* through the whole kingdom."—Addison.

II *Technically*:

1. *Metal.*: To chase, to beat out.

2. *Anat.*: To traverse the arteries and veins of the body. [CIRCULATION.]

B *Transitive*:

I *Ordinary Language*:

1. *Literally*:

(1) To cause to move from place to place, to put into circulation.

"In the Civil War the money spent on both sides was *circulated* at home."—Swift.

(2) To travel or move round.

"May I not conclude for certain that this man hath been in the moon, where his head hath been intoxicated with *circulating* the earth."—Bishop Croft, 1685.

2. *Fig.*: To spread abroad, to disseminate.

"This pointed sentence was fast *circulated* through town and country, and was soon the watchword of the whole Tory party."—Macaulay. *Hist. Eng.*, ch. iv.

***II** *Metal.*: To beat out, to chase.

¶ For the difference between *to circulate* and *to spread*, see SPREAD, v.

cīrc'-u-lāte, *s.* [CIRCULATE, v.]

Arith.: A circulating decimal is sometimes so called. (Buchanan.)

cīrc'-u-lā-tīng, *pr. par., a. & s.* [CIRCULATE, v.]

A *As pr. par.*: (See the verb.)

B *As adjective*:

1. *Ord. Lang.*: Moving in a circle, returning to itself, revolving.

2. *Finance*: Current, passing from hand to hand, constituting currency.

C *As subst.*: The act of passing or the state of being passed from hand to hand or from person to person; circulation.

circulating-decimal, *s.* A decimal which cannot be expressed with perfect exactness in figures, and when to approximate to accuracy the decimal is taken to many places, it is found that the same series of figures is repeated again and again *ad infinitum*. The figures thus repeated are called the period of the circulating decimal. Thus $\frac{1}{3}$ of 1 are .33333, &c., of which the period is 3; and $\frac{1}{4}$ of 1 = .25, &c., of which the period is 2; and $\frac{1}{12}$ of 1 = .08333, &c., of which the period is 3.

"A *circulating decimal* that goes on repeating itself for ever."—London Times, Sept. 9, 1864.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

circulating library, *s.* A library, the books contained in which are circulated by loan among the subscribers. Since books have become so wonderfully cheap, the use of such libraries has decreased, and their number has correspondingly fallen off.

circulating medium, *s.* The medium of exchanges or of sale and purchase, whether it be gold, silver, paper, or any other article. The term, which is used by all economical writers as synonymous with currency, came into common use in the last decade of the eighteenth century. [MEDIUM.]

"Circulating medium is more comprehensive than the term money, as it is the method of exchanges, or purchases, and sales, whether it be gold or silver coin, or any other article."—Wharton: *Law Lexicon*.

circulating-pump, *s.* The cold-water pump, by which condensation water is drawn from the sea, river, or well, and driven through the casing of a surface condenser.

ċirc-ū-lā-tion, *s.* [Fr. *circulation*; Lat. *circulatio*, from *circulatus*, *pa. par.* of *circulo*=to move in a circle; *circulus*=a circle.]

A. Ordinary Language:

I. Literally:

1. Motion in a circle, or in such a course that the moving body returns to the place whence it started; especially used of the circulation of the blood. [B. 1 (2).]

2. The act or process of spreading or causing to pass from hand to hand or from person to person. [B. 3.]

3. The state of being circulated or passed from person to person or from hand to hand. [B. 3.]

4. The extent to which anything is circulated.

"To increase the circulation of money, at least in bank-notes."—Bp. Burnet.

II. Figuratively:

*1. A series, a succession.

"... thou seest fit to deny us the blessing of peace and to keep us in a circulation of miseries."—King Charles.

*2. A reciprocal interchange of meaning.

"The true doctrines of astronomy appear to have had some popular circulation."—Whewell.

3. The act or process of disseminating or spreading abroad.

B. Technically:

1. *Anat., Animal Physiol., &c.*: A movement of the blood throughout the human body. (For details see (2).)

(1) *Hist.*: The Spanish physician and theologian, Michael Servetus, whose end was so tragic, gained in 1553 some glimmering perception of the lesser or pulmonary circulation of the blood. Cæsalpinus in 1569 made a further advance toward the truth, but it was reserved for the immortal Harvey actually to make the great discovery, which he approached in 1615 and published with many details in 1628.

(2) *Physiol.*: The propelling force in the circulation of the blood is that of the heart, which is a hollow muscular organ placed in the center of the sanguiferous system. The blood is driven by the heart into the aorta, and then circulated through the body by a set of vessels called arteries, which ramify into smaller and smaller tubes. [ARTERIES.] On reaching the extremities of the arteries it is driven through excessively fine tubes, called, from their hair-like tenuity, capillaries. These, constituting the connecting channels between the arteries and the veins, afford it a passage into the latter vessels, by which it is conducted back to the heart. The heart is divided internally into four cavities, two at its base called auricles, and two at its body and apex called ventricles. The right is the venous side of the heart; it receives into its auricle the venous blood from every part of the body by the superior and inferior vena cava and coronary vein. In passing from the arteries to the veins, the blood had lost its red color and acquired a dark hue; it is therefore discharged by the right auricle into the right ventricle, and thence transmitted along the pulmonary artery and its branches to the capillaries of the lungs, to be again brought in contact with the oxygen of the air. Returning to the left auricle, it is immediately discharged into the left ventricle, thence to the aorta, to be propelled through the body as before. The current of the blood through the body in general is called the *greater or systemic circulation*; that to and from the lungs the *lesser or pulmonary circulation*. (Quain, &c.) There is a circulation either of blood or of a fluid analogous to it in the inferior animals. (For an example see that under No. 2.)

2. *Veg. Physiol.*: The circulation of plants is not closely analogous to that in animals. Formerly it was believed that there was an ascending current of sap in spring, and a descending one in autumn. It is now found that both an ascending and a descending current coexist, and when need arises these are supplemented by horizontal currents pass-

ing between the tissues. The ascending current enters the leaves, where it is submitted to certain influences which fit it for the nutrition of the plant. The descending carries it thence in an elaborated condition back to the root. (Thomé, Brown, &c.) [CYCLOSIS, ROTATION, &c.]

"The nutritive fluid, however formed, is distributed throughout the textures of the plant, or animal, by vital or physical forces, or by the junction of both; and the function, by which this is effected, is called *Circulation*. In plants this function is very simple and is formed without the agency of a propelling organ; but in the greatest number of animals, such an organ, 'a heart,' is the main instrument in the distribution of the blood. In animals, then, there is a true *circulation*, the fluid setting out from and returning to the same place. But in plants, the fluid is found to circulate or rotate, within the interior of cells, as in *Chara* and *Vallisneria*, the fluid of the cell not communicating with that of the adjacent ones; or to pass up from the spongioles in an ascending current and to descend in another set of vessels. But in many simple animals, some entozoa for example, and polygastrica, there is no good evidence of the existence of any *circulation* at all, their textures imbibing the fluid in which they live."—Todd & Bowman: *Physiol. Anat.*, vol. i., introd., pp. 23, 24.

3. *Finance*: Currency, circulating coin, notes, &c. In its early stages commerce was carried on by a direct exchange of articles which were reciprocally wanted, and in this form it is usually called "barter" or sometimes "exchange." An intermediate merchandise was then introduced, called "money," and transactions in which money is used are not called "barter" but "sales." . . . A transaction in which any commodity or service is exchanged for money, instead of an equivalent, has been called a *demi-exchange*. And the conveniences of this method of conducting commerce so greatly preponderate over those of direct exchange or barter, that commerce is now almost entirely resolved into these demi-exchanges or sales. And this is the proper meaning of the word *circulation*. Barter or exchange is where two services of any kind are exchanged directly. Sale or demi-exchange, or *circulation*, is when any service is exchanged for some intermediate merchandise, which will enable its owner to obtain some service in exchange for it at some future time. (MacLeod: *Dict. of Pol. Econ.*)

"The weekly issue increased to sixty thousand pounds, to eighty thousand, to a hundred thousand, and at length to a hundred and twenty thousand. Yet even this issue, though great, not only beyond precedent, but beyond hope, was scanty when compared with the demands of the nation. Nor did all the newly-stamped silver pass into circulation."—Macaulay: *Hist. Eng.*, ch. xxii.

¶ *Circulation of a newspaper, journal, or magazine*: The number of copies of each issue printed and sold.

ċirc-ū-lā-tive, *a.* [Formed by analogy from Lat. *circulatus*, *pa. par.* of *circulo*.] Circulating; causing or contributing to cause circulation.

"The movements impressed upon it by the circulative powers."—Todd & Bowman: *Physiol. Anat.*, vol. i., ch. iii., p. 76.

Circulative animals:

Zoöl.: The name given by Oken to the Mollusca.

ċirc-ū-lā-tōr, *s.* [Lat. *circulator*=a mountebank, a charlatan.]

I. Ordinary Language:

1. *Lit.*: One who circulates or puts into circulation.

*2. Figuratively:

(1) A mountebank, a juggler, a jester.

"A race of Circulators, Tumblers and Taylers in the Church."—Gauden: *Tears of the Church*, p. 200.

(2) A cheat, an impostor. (Gaulle: *Magastro-mancer*.)

(3) One who or that which circulates or causes circulation.

II. Math.: A circulating decimal.

***ċirc-ū-lā-tōr'-ī-ōūs**, *a.* [Lat. *circulatorius*, from *circulo*=to go in a circle.] Traveling from house to house or from town to town; itinerant.

"Jesus did never make use of such unaccountable methods or instruments, as magical enchanters, diviners, circulatorious jugglers, and such emissaries of the devil, or self-seeking impostors are wont to use."—Barrow: *Serm.*, ii. 20.

ċirc-ū-lā-tōr-y, *a. & s.* [Fr. *circulatoire*, from Lat. *circulatorius*=pertaining to jugglers, mountebanks, &c.]

A. As adjective:

I. Ordinary Language:

1. Circular; circulating, as a circulatory letter.

2. Like a mountebank or quack; wandering, circulatorious.

"Borde's circulatory peregrinations in the quality of a quack doctor."—Warton: *Hist. Eng. Poetry*, iii. 76.

II. Physiol.: Producing or pertaining to the circulation of the blood.

"The circulatory system is far less complex."—S. P. Woodward: *Mollusca*, ed. Tate (1875), p. 358.

B. As substantive:

Physics: A vessel in which the steam which rises from another vessel on the fire is collected, and having been cooled in another vessel attached to the upper portion, is returned to the first vessel.

***ċirc-ūle**, *v. i.* [CIRCLE, *s.*] To move or go in a circle; to revolve.

"To each point of itself so far as 't circuleth."

H. More: *Song of the Soul*, bk. iii. c. 1.

***ċirc-ū-līng**, *s.* [CIRCULE, *v.*] A going round in a circle, a revolution.

"And when it lighteth on advantages,
Its circulings grow sensible."

H. More: *Song of the Soul*, bk. iii. c. 1.

***ċirc-ū-lize**, *v. t.* [Lat. *circul(us)*=a circle, *an* Eng. suff. *-ize*.] To encircle.

"Mother of pearly their sides shal circulize."

Davies: *An Extasie*, p. 93.

ċirc-ū-lūs, *s.* [Lat.]

I. *Ord. Lang.*: A little ring, a circle.

II. Technically:

1. *Anat.*: Applied to any round or annular part of the body, as *circulus oculi*, the orb of the eye. (Craig.)

*2. *Physics*: Applied to an iron instrument, formerly used for dividing circular portions of glass. (Mayne.)

*3. *Surg.*: A name for several circular instruments used by the older surgeons. (Mayne.)

4. *Glass-making*: A tool for cutting off the necks of glassware.

ċir'-cūm, *prep.* [Lat.=around, round, about.] A preposition used as a prefix in many words of Latin origin.

***ċir-cūm-ad-jā-ċent**, *a.* [Lat. *circum*=round, about, and Eng. *adjacent* (q. v.).] Lying near or about, surrounding.

***ċir-cūm-āg-gēr-ā-tion**, *s.* [Lat. *circum*=around, about; *aggeratio*=a heaping up, from *aggero*=to heap up: *ad*=to, and *gero*=to carry, to bear.] A heaping round about. (Phillips.)

ċir-cūm-āg-ī-tāte, *v. t.* [Lat. *circum*=around, and *agito*=to agitate, freq. of *ago*=to drive.] To agitate on all sides, to drive or beat round.

"God hath . . . given to every one of his appointed officers a portion of the fiery matter to circumagitate and roll."—Jeremy Taylor: *Sermons*, iii. 177.

***ċir-cūm-āg-ī-tā-tion**, *s.* [Lat. *circum*=about, around; *agitatio*=a driving.] The act of driving or beating about; a motion in every direction.

"... the cold air rushing in caused a visible circumagitation of a white snowy substance."—Gregory: *Economy of Nature*, i. 139.

***ċir-cūm-ām-bāge**, *s.* [Lat. *circum*=round, about; *ambage*=a going round about, a winding, indirectness.] Indirectness, a beating about the bush.

"The affected slights, the female circumambages, if I may be allowed the words."—Richardson: *Sir C. Grandson*, iii. 165.

***ċir-cūm-ām-bāg-īng**, *a.* [Eng. *circumambag(e)*; *-ing*.] Speaking indirectly or not to the point, beating about the bush.

"If I know anything of this circumambaging sex."—Mrs. Barbauld: *Life of Richardson*, iv. 341.

***ċir-cūm-ām-bā-gī-ōūs**, *a.* [Eng. *circumambag(e)*; *-ious*.] Indirect, beating about the bush, not keeping to the point.

"At times disposed to be circumambagious in my manner of narration."—Southey: *The Doctor*, ch. xl.

ċir-cūm-ām-bī-en-ċy, *s.* [Lat. *circum*=about, around; *ambiens*=moving, going round, *pr. par.* of *ambio*=to move or go round.] The act of moving round or encompassing.

"Ice receiveth its figure according unto the surface it concreteth, or the circumambieny which conformeth it."—Brown.

cīr-cūm-ām-bī-ent, *a.* [Lat. *circum*=about, around, and *ambiens*=moving or going round.] Surrounding, encompassing.

"... that gleams in from the circumambient Eternity, and colors with its own hues our little islet of Time."—Carlyle: *Sartor Resartus*, bk. iii. ch. iii.

ċir-cūm-ām-bū-lāte, *v. i. & t.* [Lat. *circumambulo*, from *circum*=around, and *ambulo*=to walk.]

A. *Intrans.*: To walk or go round about.

B. Transitive:

1. *Lit.*: To walk round.

2. *Fig.*: To go all round, to search thoroughly.

"Why should he circumambulate the vocabulary for another couplet, . . . ?"—Seward: *Letters*, i. 345.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

çîr-cûm-âm-bu-lâ-tîng, pr. par. & s. [CIRCUMAMBULATE.]

A. As pr. par.: (See the verb.)

B. As substantive:

1. Lit.: The act of walking round, circumambulation.

2. Fig.: The act of going round about instead of directly to the point; a beating about the bush.

çîr-cûm-âm-bu-lâ-tîon, s. [Lat. *circum* = around; *ambulatio* = a walking, from *ambulo* = to walk.] The act of walking all round.

*çîr-cûm-âm-bu-lâ-tôr, s. [Eug. *circumambulator*(e); -or.] One who circumambulates or travels round.

"He was determined to obtain the palm of being the first circumambulator of the earth."—Jefferson: *Works*, II 151.

*çîr-cûm-âm-bu-lâ-tôr-ÿ, a. [Eng. *circumambulator*; -y.] Walking round or about, perambulating.

"My privileges are an ubiquitary, circumambulatory immunity over all the privy lodgings."—Carew: *Cælum Brit.*, p. 215. (1640.)

†çîr-cûm-bên-dî-bûs, s. [Lat. *circum* = around, about; and Eng. *bend*, put in an imaginary ablative plural.] A roundabout or indirect way.

"A knave is a fool in *circumbendibus*."—Coleridge: *Table Talk*.

*çîr-cûm-bînd', v. t. [Lat. *circum* = round, about, and Eng. *bind*.] To bind round.

"The fringe that circumbinds it . . ."—Herrick: *Hesperides*, p. 96.

*çîr-cûm-çêl-li-ô-nêg, s. pl. [Low Lat. *circumcellio* = a wandering about from cell to cell, from Lat. *circum* = about, around, and *cella* = a cell.]

Church History:

1. The name given to a sect of the Donatists in Africa during the fourth century, from their habit of roving from house to house plundering. They went about in predatory gangs, consisting chiefly of rustics, pretending to reform public manners and redress grievances. They manumitted slaves without the consent of their masters, forgave debts, &c. In their zeal for martyrdom they courted death by insulting the Pagans at their festivals, and destroyed themselves in various ways.

2. Vagabond monks, censured by Cassian under the name of Sarabaites for roving from place to place. Probably the name was transferred to them from the Donatist fanatics. (Smith & Cheetham: *Dict. of Christian Antiquities*.)

"They look like the old *circumcelliones*, a company of vagrant hypocrites."—Gauden: *Hieraspistes*, p. 98.

3. A vagrant. (Cockeram.)

*çîr-cûm-çêp'-têd, a. [Lat. *circum* = around, about; and *sepitus*, pa. par. of *sepio* = to hedge in, to inclose.] Surrounded.

"So that here we stand like shepe in a folde, *circumcepted* and compassed . . ."—Hall: *Richard III.*, an. 3.

*çîr-cûm-çî'de, *çîr-cûm-sî'de, v. t. [Lat. *circumcido* = to cut round, from *circum* = around, about, and *cado* = to cut.] The older form of *circumcise* (q. v.).

*çîr-cûm-çîse, s. [Lat. *circumcisis*, pa. par. of *circumcido*.] Circumcision.

çîr-cûm-çîse, *çîr-cûm-sîse, v. t. [Lat. *circumcisis*, pa. par. of *circumcido*, from *circum* = round, and *cado* = to cut; Fr. *circoncire*; Ital. *circuncidere*; Sp. *circuncidar*, *circuncisar*.]

1. Lit.: To cut off the prepuce or foreskin of males; also to perform an analogous operation on females.

"Your knauebarnys ye *circumsise*."—Cursor *Mundi*, 2,668.

*2. Figuratively:

(1) Script.: To render spiritual and holy by, as it were, cutting away the sins.

"And the Lord thy God will *circumcise* thine heart, and the heart of thy seed."—Deut. xxx. 6.

(2) To curtail, to cut down.

çîr-cûm-çîsed, *çîr-cûm-sîsed, *çîr-cûm-sys-ede, pa. par., a. & s. [CIRCUMCISE.]

A. & B. As pr. par. & particip. adj.: In senses corresponding to those of the verb.

"I took by the throat the *circumcised* dog."—Shakesp.: *Othello*, v. 2.

C. As subst.: Applied, and generally in contempt or derision, to the Jewish race.

" . . . aiming to strengthen their ronted party by a reinforcement from the *circumcised*."—Swift: *Examiner*.

çîr-cûm-çî-şêr, s. [Lat. *circumcisor*, from *circumcido*.] He who performs circumcision.

çîr-cûm-çî-şîng, pr. par. & s. [CIRCUMCISE.]

A. As present participle: (See the verb.)

B. As subst.: Circumcision.

çîr-cûm-çî-sion, *çîr-cum-cis-iun, *çyr-cum-sy-cyon, *syr-cum-sy-cyon, s. [Lat. *circumcisis*; Fr. & Sp. *circuncision*; Ital. *circuncisione*.]

1. Lit.: The act or rite of cutting off the prepuce or foreskin in males, also an analogous operation on females; a rite practiced not only by the Jews in ancient times, but by the Egyptians, Idumeans, Ammonites, Moabites, and Ishmaelites of the desert. The Jews practice circumcision only on males; the Arabs, Egyptians, and Persians circumcise both sexes.

"Circumsycyon. Circumsicio."—Prompt. Parv.

II. Fig. (Script.):

1. The act of spiritual purification by the cutting away, as it were, of the sins of the flesh.

"Jesus Christ was a minister of the *circumcision* for the truth of God, . . ."—Rom. xv. 8.

2. The Jews, as a circumcised people, in contradistinction to Christians as uncircumcised.

"Where there is neither Greek nor Jew, *circumcision* nor uncircumcision."—Col. iii. 2.

çîr-cûm-çîss'-ile, a. [Lat. *circumcisis* = cut around, and suff. -ilis, in Eng. -ile.]

Bot.: A method of dehiscence occurring in a very few fruits. It occurs by a transverse circular separation. This is complete in the genus *Anagallis*, while in *Jeffersonia* it takes place only half way round the fruit. (Lindley.)

*çîr-cûm-clû'de, v. t. [Lat. *circum* = round about, and *claudo* = to shut.] To shut in.

çîr-cûm-clû'-sion, s. [Lat. *circumclusio*, from *circumcludo* = to shut in all round: *circum* = about, around, and *claudo* = to shut.] The act of shutting in or inclosing on all sides.

*çîr-cûm-cûr-sâ'-tion, s. [Lat. *circumcurso* = to run round, or about: *circum* = around, about; *curso* = to run, frequentat. from *curro* = to run.]

1. Lit.: The act of running about.

2. Fig.: Rambling, undecided language.

"The address of Felicissimus and Fortunatus to Pope Cornelius was but a factious *circumcursion* of desperate wretches."—Barrow: *Serm.* i., p. 252.

çîr-cûm-dûce, v. t. [Lat. *circumduco*, from *circum* = around, and *duco* = to lead.]

1. Lit.: To draw or lead round.

2. Fig.: To annul, to circumduct.

"I must *circumduce* the term."—W. Scott, in Webster.

çîr-cûm-dûct, v. t. [Lat. *circumductus*, pa. par. of *circumduco*, from *circum* = around, and *duco* = to lead.]

*I. Ord. Lang.: To lead about, to lead astray.

II. Technically:

*1. Law: To cancel, to nullify, to annul; to contravene.

"Acts of judicature may be canceled and *circumducted* by the will and direction of the judge" . . .—Ayliffe: *Parergon*.

2. Physiol.: (See extract.)

"A limb is *circumducted* when it is made to describe a conical surface by rotation round an imaginary axis."—Huxley: *Physiology*, p. 174.

*çîr-cûm-dûc'-tile, a. [Lat. *circumductus* = led around, pa. par. of *circumduco*, and suff. -ilis, in Eng. -ile.] Capable of being led about. (Nuttall.)

çîr-cûm-dûc'-tion, s. [Lat. *circumductio*, from *circumduco* = to lead about.]

*I. Ordinary Language:

1. Lit.: A leading about, or astray.

2. Fig.: A leading astray mentally, a circumlocution.

"By long *circumduction* perhaps any truth may be derived from any other truth."—Hooker.

II. Technically:

Anat.: For definition see first extract.

"When these motions [flexion, extension, abduction, adduction, and movement in the intermediate directions] are performed rapidly, one after the other, one continuous motion appears in which the distal extremity of the bone describes a circle indicating the base of a cone whose apex is the articular extremity moving in the joint; this motion is called *circumduction*."—Todd & Bowman: *Phys. Anat.*, vol. i., ch. vi., pp. 135, 136.

" . . . and without any *circumduction* of the limb."—Ibid., p. 145.

Circumcissile Dehiscence.

1. *Anagallis*. 2. *Jeffersonia*.

*çîr-cûm-êr-râ'-tion, s. [From Lat. *circumferro* = to wander round, and Eng. suff. -ation.] The act of wandering about. (Nuttall.)

*çîr-cûm-fêr, v. t. [Lat. *circumfero*, from *cir* = around, and *fero* = to bear.] To lead or carry round (lit. & fig.).

"In philosophy the contemplations of man do either penetrate unto God, or are *circumferred* to nature, or are reflected and converted to himself."—Bacon, i. 93.

çîr-cûm-fêr-ençe, s. [Fr. *circonférence*; Sp. *circunferencia*, from Lat. *circumferentia* = a circumference, circuit, or compass: *circum* = around and *fero* = to bear, to lead.]

I. Ordinary Language:

1. In the same sense as II.

2. The periphery or line which bounds, includes, or surrounds anything.

"This be thy just *circumference*, O world!"

Milton: *P. L.*, vii. 230.

3. The external portion or surface of a spherical body.

"The bubble, being looked on by the light of the clouds reflected from it, seemed red at its apparent *circumference*. If the clouds were viewed through it, the color at its *circumference* would be blue."—Newton: *Optics*.

4. The space contained within any including line.

"He first inclosed for lists a level ground

The whole *circumference* a mile around."

Dryden: *Palamon and Arcite*, ii. 441.

*5. A circle, a sphere.

"His pond'rous shield, large and round,

Behind him cast; the broad *circumference*

Hung on his shoulders like the moon."

Milton: *P. L.*, i. 285.

II. Math.: The curved line which encompasses and contains a circle, and of which every point is equally distant from a certain point within the circle, called the center. [CENTER.]

*çîr-cûm-fêr-ençe, v. t. [CIRCUMFERENCE, s.] To include in a circle or circular space.

"Nor is the vigor of this great body included only in itself, or *circumferenced* by its surface . . ."—Browne: *Vulgar Errors*.

*çîr-cûm-fêr-ençed, a. [Eng. *circumferenc(e)*; -ed.] Confined, circumscribed.

"As . . . his *circumferenced* nature required."—Wright: *Passions of Mind*, bk. v., § 4.

*çîr-cûm-fêr-ent, a. [Lat. *circumferens*, pr. par. of *circumfero* = to lead round: *circum* = around, and *fero* = to lead, to bear.] Surrounding, encircling.

çîr-cûm-fêr-ên'-tiâl, *çîr-cûm-fêr-ên'-çiâl, a. [Lat. *circumferentialis*.]

1. Lit.: Pertaining to, or of the nature of, a circumference; circuitous, circular.

"Now bees, as may be clearly seen by examining the edge of a growing comb, do make a rough, *circumferential* wall or rim all round the comb."—Darwin: *Origin of Species* (ed. 1859), ch. vii., p. 230.

*2. Fig.: Circuitous, indirect.

"He preferred death in a direct line before a *circumferential* passage thereunto."—Fuller: *Worthies*, iii. 406.

çîr-cûm-fêr-ên'-tôr, s. [Lat. *circumferens*, pr. par. of *circumfero* = to lead about.]

1. Surv.: An instrument used by surveyors for taking horizontal angles and bearings. It consists of a horizontal bar of brass with sights at its ends, and in the middle a circular brass box containing a compass divided into 360 degrees, kept in a horizontal position by the aid of two spirit-levels set at right angles. The whole is supported on a tripod.

"About two years before Robert Stephenson's death a workman of Washington village found in a collection of old stores a *circumferentor*, or mining compass. It was unusually large—even for a *circumferentor* made forty years ago."—Jefferson: *Life of Robert Stephenson*, i. 48.

2. Vehicles, &c.: A tire measurer, a tire circle.

*çîr-cûm-flânt, a. [Lat. *circum* = around; *flans* = blowing, pr. par. of *flo* = to blow.] Blowing about or around.

"Overcome by the *circumflant* air."—Evelyn.

*çîr-cûm-flêct, v. t. [Lat. *circumflecto*, from *circum* = around, and *flecto* = to bend.] [CIRCUMFLEX.]

1. Ord. Lang.: To bend round.

2. Gram.: To mark with a circumflex.

çîr-cûm-flêc'-têd, pa. par. or a. [CIRCUMFLECT.]

ċir'-cūm-staņce, ***ċir'-cūm-staņce**, *s.* [Fr. *circumstance*; Sp. & Port. *circunstancia*; Ital. *circostanza*, from Lat. *circumstantia*, neut. pl. of *circumstans*, pr. par. of *circumsto*=to stand round; *circum*=around, and *sto*=to stand.]

I. Literally:

1. That which stands round or is attached to another.

*(1) *Of material things*: An adjunct, an accessory.

"The hollow orb of moving circumstance
Roll'd round by one fix'd law."

Tennyson: The Palace of Art.

(2) *Of immaterial things*: Any matter or fact attending on or connected with another; an attendant state of things.

"That it is a known rule amongst all divines, that no certain argument can be drawn from the circumstances of a parable, but only from the main scope and intention of it."—*Tillotson* (3d ed., 1722), vol. i. Ser. xix.

¶ Hence the phrases:

In (or under) the circumstances: Taking into consideration all matters connected with that in question; all things being considered.

According to circumstances: In a manner varying according to or dependent on attendant matters.

2. A fact, an event, a particular incident or detail.

II. Figuratively:

1. Worldly condition as respects wealth or poverty. (Now only used in the plural.)

"... by the storms of circumstance unshaken,
And subject neither to eclipse nor wane."

Wordsworth: Excursion, bk. iv.

2. With excessive attention to details.

"And therefore, without circumstance, to the point."—*Massinger: The Picture.*

3. Details, minutiae.

"... they are too full of circumstances and details."—*Lewis: Cred. Early Roman Hist.* (1855), ch. xii., pt. i. § 15, vol. ii., p. 56.

¶ (1) Crabb thus distinguishes between a *circumstance* and a *situation*: "*Circumstance* is to *situation* as a part to a whole; many circumstances constitute a *situation*; a *situation* is an aggregate of circumstances. A person is said to be in *circumstances* of affluence who has an abundance of everything essential for his comfort; he is in an easy *situation* when nothing exists to create uneasiness. *Circumstance* respects that which externally affects us; *situation* is employed both for the outward circumstances and the inward feelings. The success of any undertaking depends greatly on the *circumstances* under which it is begun: the particular *situation* of a person's mind will give a cast to his words or actions. *Circumstances* are critical, a *situation* is dangerous."

(2) He thus discriminates between *circumstance*, *incident*, and *fact*: "*Circumstance* is a general term; *incident* and *fact* are species of circumstances. *Incident* is what happens; *fact* is what is done; *circumstance* is not only what happens and is done, but whatever is or belongs to a thing. To everything are annexed circumstances either of time, place, age, color or other collateral appendages which change its nature. Everything that moves and operates is exposed to incidents, effects are produced, results follow and changes are brought about; these are incidents: whatever moves and operates does, and what it produces is done or is a fact. ... *Circumstance* is as often employed with regard to the operations as the properties of things, in which case it is most analogous to *incident* and *fact*: it may then be employed for the whole affair, or any part of it, whatever that can

be distinctly considered. *Incidents* and *facts* either are *circumstances*, or have *circumstances* belonging to them. ... *Circumstance* comprehends in its signification whatever may be said or thought of any thing; *incident* carries with it the idea of whatever may befall or be said to befall any thing; *fact* includes in it nothing but what really is or is done. A narrative therefore may contain many *circumstances* and *incidents* without any *fact*, when what is related is either fictitious or not positively known to have happened: it is necessary for a novel or play to contain much *incident*, but no *facts*, in order to render it interesting; history should contain nothing but *facts*, authenticity is its chief merit." (*Crabb: Eng. Synon.*)

ċir'-cūm-staņce, *v. t.* [CIRCUMSTANCE, *s.*] To place in a certain situation or position relatively to other things.

"I must be circumstanced."—*Shakesp.: Othello*, iii. 4.

ċir'-cūm-staņced, *a.* [Eng. *circumstanc(e)*; -ed.]

1. Situated or conditioned relatively to other things.

"And in two countries very differently circumstanced, individuals of the same species, having slightly different constitutions or structure, ..."—*Darwin: Origin of Species* (ed. 1859), ch. i., p. 38.

2. In a condition as regards wealth or poverty.

ċir'-cūm-stānt, *a. & s.* [Lat. *circumstans*, pr. par. of *circumsto*=to stand round, to surround: *circum*=around, and *sto*=to stand.]

A. *As Adj.*: Placed or being around, surrounding.

"Its beams fly to visit the remotest parts of the world, and it gives motion to all circumstant bodies."—*Digby: On the Soul.*

B. *As subst.*: One who stands by; a bystander.

"When these circumstant shall but live to see ..."
Herrick: Hesperides, p. 82. (*Davies.*)

***ċir-cūm-stān'-tiāble** (tiāble as shāble), *a.* [Eng. *circumstanti(ate)*; -able.] Capable of being circumstantiated. (*Bp. Taylor.*)

ċir-cūm-stān'-tial (tial as shāl), *a. & s.* [Fr. *circumstanciel*; Lat. *circumstantialis* = pertaining to circumstances.]

A. *As adjective*:

I. *Ordinary Language*:

1. *Of things*:

(1) Dependent on circumstances; accidental.

"Would you learn at full
How passion rose thro' circumstantial grades
Beyond all grades developed."

Tennyson: The Gardener's Daughter.

(2) Incidental, accidental, not essential.

(3) Full of small circumstances or minutiae; particular, precise, minute.

"The whole account, from the first appearance of Siccus in the popular assembly, to the trial of the consuls, is given with circumstantial minuteness."—*Lewis: Cred. Early Roman Hist.* (1855), ch. xii., pt. iii., § 43, vol. ii., p. 190.

*(4) Full of pomp or show.

"... and leave all the circumstantial part and pomp of life ..."—*Pope: Letter to H. Cromwell* (1710).

*2. *Of persons*: With an excessive attention to small events and details; precise, punctilious.

II. *Law*: Inferred from circumstances deduced indirectly, not by direct proof.

Circumstantial evidence: Evidence obtained from circumstances, which necessarily or usually attend facts of a particular nature, from which arises presumption; any evidence not direct and positive. A light, *i. e.*, a slight presumption, has no weight or validity. A presumption of any kind is relied on only till the contrary has been proved. Still a probable presumption has considerable weight, and a violent one, that is one in which those circumstances appear which necessarily attend the fact, is in many cases held equal to full proof. (*Blackstone*, bk. iii., ch. 23.)

"... what is popularly known as circumstantial evidence. No doubt, circumstantial evidence, when perfect, is the highest of all evidence."—*London Times.*

¶ Crabb thus distinguishes between *circumstantial*, *particular*, and *minute*: "*Circumstantial* expresses less than *particular*, and that less than *minute*. A *circumstantial* account contains all leading events; a *particular* account includes every event and movement however trivial; a *minute* account omits nothing as to person, time, place, figure, form, and every other trivial circumstance connected with the events. A narrative may be *circumstantial*, *particular*, or *minute*; an inquiry, investigation, or description may be *particular* or *minute*, a detail may be *minute*. An event or occurrence may be *particular*, a *circumstance* or *particular* may be *minute*. We may be generally satisfied with a *circumstantial* account of ordinary events; but whatever interests the feelings cannot be detailed with too much *particularity* or *minuteness*." (*Crabb: Eng. Synon.*)

B. *As subst.*: Anything incidental or not essential to the main subject (generally in the plural).

"Who would not prefer religion that differs from our own in the circumstantial, before one that differs from it in essentials?"—*Addison: Freeholder.* (*Latham.*)

"Let me add another hint concerning the apparatus and circumstantials of your play."—*Pope: To A. Hill* (1738).

ċir-cūm-stān'-tial'-ī-tŷ (tial as shī-āl), *s.* [Eng. *circumstantial*; -ity.]

*1. The quality or state of being circumstantial or dependent on circumstances.

2. Minuteness, extreme attention to details.

*2. An inclosure of whatever kind.

"The narrow *circus* of my dungeon wall."

Byron: *Lament of Tasso*.

3. The performers or troupe in a circus.

"In ancient architecture the *circus* was a straight, long, narrow building, whose length to its breadth was generally as five to one. It was divided down the center

by an ornamented barrier called the *spina*, and was used by the Romans for the exhibition of public spectacles. Several existed at Rome, whereof the most celebrated was the *Circus Maximus*. The spectacles of the *circus* were called the *Circensian Games* . . . (*Gwilt*.) The *circus* was used not only for horse and chariot races, but wrestling, the *cæstus*, and other athletic games. It was noted for being the haunt of fortune-tellers.

"The term *circus* has, in this country, by long usage, been modified to apply to the traveling hippodromes (usually with a menagerie or zoölogical collection attached) which go up and down throughout our territory. Indeed, so generally applied is this term to caravans of the nature above cited that the word, in American usage, is restricted to that meaning.

II. *Med.*: A circular bandage. (*Dunghlison*.)

cir'-cũs (2), s. [In Gr. *kirkos*=a hawk, from its flying in circles.]

Ornith.: The *Harrier*, a genus of birds belonging to the family *Falconidae*, and constituting the typical genus of the sub-family *Circinæ*. çir-rhō-nōs'-ūs, s. [Gr. *kirrhos*=yellow, and *nosos*=a disease.]

Med.: A disease of the foetus in which there is a yellow coloration of the serous membrane. (*Dunghlison*.)

çir'-rhōse, a. [Mod. Lat. *cirrosus*, from Class. Lat. *cirrus*=a curl.] The same as CIRRHOUS (q. v.).

çir-rhō'-sis, s. [Gr. *kirrhos*=yellow, and med. suff. -osis (q. v.).] A yellow coloring matter, sometimes secreted in the tissues, owing to a morbid process. (*Dunghlison*.)

cirrhosis hepatis, s. A disease of the liver, in which it becomes smaller and firmer, commonly called "hob-nailed" or "gin-drinker's" liver.

Cirrhosis of the Lung A disease of the lungs. (*Dunghlison*.)

çir-rhōt'-ic, a. [Formed on analogy of other words from *cirrhosis* (q. v.).] Affected with, or having the character of cirrhosis.

çir'-rhoūs, *çir'-rhōse*, a. [Lat. *cirrus*=a curl, a tendril.]

Bot.: Terminated by a spiral or flexuose, filiform appendage; as the leaf of *Gloriosa superba*. This is due to an elongation of a costa.

çir-rī-bar-bī'-nā, s. pl. [Mod. Lat. *cirribarbus*, and fem. pl. adj. suff. -inæ.]

Ichthy.: A sub-family of *Blennidæ*, distinguished by the lower jaw being larger than the upper. (*Craig*.)

çir-rī-bar'-būs, s. [Lat. *cirrus*=a curl, and *barba*=a beard.]

Ichthy.: A genus of fishes belonging to the family *Blennidæ*, having the head and mouth furnished with numerous cirri. It constitutes the typical one of the sub-family *Cirribarbinæ*.

çir-rīf'-ēr-oūs, *çir-rhīf'-ēr-oūs*, a. [Lat. *cirrus*=a curl, and *fero*=to bear.]

Bot.: Bearing cirri, tendrils, or claspers.

çir'-rī-form, *çir'-rhī-form*, a. [Lat. *cirrus*=a curl, and *forma*=a form.] Having the form of a tendril.

çir-rīg'-ēr-oūs, a. [Lat. *cirrus*=a curl, and *gero*=to bear, to carry.]

1. *Ord. Lang.*: Having the hair curly.

2. *Bot.*, *Zoöl.*, &c.: Having cirri or hair-like appendages.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, thīs; sin, aș; expect, Xenophon, exist. ph = f -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

çir'-rî-grâde, a. & s. [From Lat. *cirrus*=a curl, and *gradior*=to go.]

A. As adj.: Moving by cirri. (Owen.)

B. As subst.: An animal moving by cirri. (Owen.)

çir'-rî-pec'-tûs, s. [Lat. *cirrus*=a curl, and *pectus*=a breast.]

Ichthy.: A genus of fishes belonging to the family Blenniidae, furnished with a semicircle of filaments round the nape.

çir'-rî-pêd, çir'-rî-pêde, s. [Lat. *cirrus*=a curl and *pes* (genit. *pedis*)=a foot.]

Zoöl.: An animal of the sub-class Cirripedia (q. v.).

"... now we come to a most important diversity in the metamorphosis, or rather, to follow Professor Owen, in the metagenesis, of the young cirripede."—Owen: *Lect. on Comp. Anat.*, lect. xii.

çir'-rîp'-êd-a, çir'-rîp'-êd-a, çir'-rîp'-êd-i-a, çir'-rîp'-êd-i-a, çir'-rîp'-êd-i-a, s. [Lat. *cirrus*=a curl, and *pes* (genit. *pedis*); Gr. *pous*=a foot.]

1. *Zoöl.*: A sub-class of Crustacea, unlike as the Barnacles and Acorn-shells ranked under the Cirripedia may appear to an edible crab or a lobster. For a long time indeed zoölogists could not agree where to put the barnacles and acorn-shells till a discovery of their metamorphosis settled, or at least helped to settle, their true situation. On the 23d April, 1826, Mr. V. Thompson, while crossing the ferry at the little town of Passage, 7½ miles E. S. E. of Cork, Ireland, caught by means of a small muslin towing-net, numerous specimens of a small translucent animal about one-tenth of an inch long, which seemed a new species. Others of the same kind were collected on May 1st, 1826, and placed in a glass with salt water. On the 8th, two lost their power of locomotion and their eyes, and became acorn-shells (balani), as did the rest within a few days. In a paper read by Mr. Thompson before the Royal Society on March 5th, 1835, he proved that the Lepades (barnacles proper) underwent an analogous transformation. He considered that these facts proved the acorn-shells and barnacles to be Crustaceans. So also, either before or afterward, did M. Straus Durckheim, and Dr. J. Martin Saint Ange. The degradation of a change which converts a free and eyed animal into one fixed and eyeless has since been called Retrograde Development. The characteristics of the adult cirripedia are these: Adult attached inclosed in an integumentary sac, within which a many-valved shell is typically developed; antennæ modified for adhesion; abdomen free and rudimentary; thoracic segments usually carrying six pairs of forked ciliated limbs. Sexes generally united. The standard work on this sub-class is that by Darwin. He divides it into three orders: (1) Thoracica, including the sessile families Balanidae, Verrucidae, and the pedunculated Lepadidae; (2) Abdominalia; (3) Apoda. The cirripeds exist in nearly all seas. [BARNACLE.]

2. *Palæont.*: Only the Thoracica have been found fossil. As far as yet known the Lepadidae began in the Upper Silurian; Turritellidae, a genus ranked with the Balanidae, but which may be Verrucidae, in the Lias; an unequivocal specimen of the Verrucidae in the Chalk, and undoubted Balanidae in the Eocene and the Tertiaries. Pollicipes occurs in the Rhætic and Stonesfield Slate.

çir'-rô-cû'-m-û-lûs, s. [From Lat. *cirrus*=a curl, and *cumulus*=a heap.]

Meteor.: A kind of cloud, in the main resembling a cumulus, but in certain respects like a cirrus too. It consists of a connected system or series of small roundish clouds placed in order or contact. It resembles the scales of a mackerel. The name was first given by Mr. Luke Howard.

çir'-rô-lite, s. [In Ger. *kirrolith*, from Gr. *kirros*=pale yellow, and Eng. suff. *-ite* (Min.) (q. v.).]

Min.: A mineral consisting of phosphoric acid, 41.17; alumina, 20.1; lime, 32.9; water, 5.3=100. It occurs in an iron mine at Westana in Scania, the southern part of Sweden. (Dana.)

çir'-rôse, a. [CIRRHOS.]

çir'-rôs'-tôm-i, s. pl. [Lat. *cirrus*=a curl; Gr. *stoma*=a mouth.]

Ichthy.: Another name for the Pharyngobranchii (q. v.).

çir'-rô-strâ'-tûs, s. [From Lat. *cirrus*=a curl, and *stratus*=anything strewed, a bed cover for instance.]

Meteor.: A kind of cloud blending the characteristics of the stratus and of the cumulus, the former predominating. It consists of a horizontal or slightly inclined sheet of cloud, with the circumference, which is upward, becoming gradually attenuated, while its lower part is undulated or concave. Groups or patches of cirrostratus are sometimes scattered over the sky near the horizon. The name cirro-stratus was first given by Mr. Luke Howard.

Cirrostratus Cloud.

çir'-rôus, a. [CIRRHOS.]

çir'-rûs, çir'-rhûs (pl. çir'-rî, çir'-rhî), s. [Lat. *cirrus*=a curl, a tendril.]

I. Of both forms:

1. *Bot.*: The thread-like tendrils or filaments by which certain climbing plants attach themselves to trees, stones, &c.; one of the fulcra or props of plants. (Craig, Buchanan.) A cirrus may be on a corolla, a peduncle, a leaf, or a petiole. Examples, the corolla of *Strophanthus*, the peduncle of *Smilax horrida*, the leaf of *Gloriosa superba*, or the petiole of the pea. (Lindley.)

2. *Zoöl.*: A slender, fringe-like appendage in some inferior animals, which aids in locomotion. (Carpenter.)

3. *Ichthy.*: The soft filaments attached to the jaws of certain fishes. (Craig.)

II. Only of the form cirrus:

1. *Palæont.*: A genus of fossil spiral shells. The shell is discoidal and has a large umbilicus; the upper surface bears a row of spines, which in the neighborhood of the aperture are tubular and have their ends perforated. One genus ranges from the Devonian to the Jurassic. (Nicholson.)

2. *Meteorol.*: A form of cloud, composed of thin filaments, the union of which resembles sometimes a brush, sometimes small patches of woolly hair, and again slender network. The cirrus is the feathery or streak-like cloudlet which is highest of all in the heavens.

çir'-sî-ûm, s. [Gr. *kirsos*=a swelled vein.]

Bot.: A genus of Compositæ, supposed to have healing qualities.

çir'-şô-çêle, s. [Gr. *kirsos*=a swelled vein, and *kêlê*=a tumor.]

Med.: The varicose dilatation of the spermatic vein. (Dunghlison.)

çir'-şô-i-dêş, a. [Fr. *kirsos*=a swelled vein, and *eidôs*=resemblance.]

Med.: Varicose or resembling a varix. A term once applied to the upper part of the brain, as well as to the spermatic vessels. (Dunghlison.)

çirs-ôm'-pha-lûs, s. [Fr. *cirsomphale*, from Gr. *kirsos*=a swelled vein, and *omphalos*=the navel.]

Med.: A varicose dilatation of the veins surrounding the navel. (Dunghlison.)

çirs-ôph-thâl'-mî-a, s. [Gr. *kirsos*=a swelled vein, and *ophthalmos*=the eye.]

Med.: A swelled or varicose state of the vessels of the eye.

çirs-ô-tôme, s. [Gr. *kirsos*=a swelled vein; *tomê*=a cutting; *temnô*=to cut.]

Surg.: An instrument used in the extirpation of a varix or varicose vein. (Knight.)

çirs-ôt-ôm-ÿ, s. [Gr. *kirsos*=a swelled vein, and *tomê*=a cutting.]

Surg.: Any operation for the removal of varices by incision. (Dunghlison.)

çis (1), in compos. [Lat.=on this side.] For definition see etymology.

cis-equatorial, s. On this side the equator.

Bot. Geog.: The cis-equatorial region of South America constitutes a distinct botanical province. (Thomé.)

çis (2), s. [Gr. *kis*=the corn-weevil.]

Entom.: A genus of Coleopterous insects, the typical one of the family Cissidae, inhabitants of the fungi growing on trees. Tribe, Xylophagi. (Craig.)

çis-âl'-pine, a. Lat. *cisalpinus*, from *cis*=on this side, and *Alpinus*=Alpine, from *Alpes*=the Alps.] South of the Alps; as regards Rome, the higher side of the Alps; the opposite to Transalpine.

¶ The Cisalpine republic was formed by the French in May, 1797. In 1802 its name was altered to the Italian republic, and in March, 1805, it became the kingdom of Italy, but by no means the ancestor of the kingdom of Italy now existing.

çis-ât-lân'-tic, a. [Formed on analogy of *Cisalpine*, from Lat. *cis*=on this side, and Eng. *Atlantic*.] On this side of the Atlantic.

çis'-cô, s. [Etym. unknown.]

Ichthy.: A name given to several species of hering found in the great freshwater lakes of North America.

çis'-leû, s. [CHISLEU.]

Jewish Months: The same as CHISLEU (q. v.).

çis'-lie, s. [Etym. doubtful. Cf. Eng. *Cicely*.]

¶ *Silken Cistle*: *Vincetoxicum officinale*. (Gerard.)

cis-ma-tan', s. The seed of the plant *cassia absus*, growing in Arabia. It is regarded as the best remedy for Egyptian ophthalmia, and large quantities are imported into Cairo.

çis-môn'-tâne, a. [Lat. *cis*=on this side of; *montanus*=pertaining to the mountains; *mons*=a mountain.] On this side of the mountains.

çis'-pa-dâne, a. [Lat. *cis*=on this side, and *Padanus*=pertaining to the *Padus*=the river Po.] On the south side of the Po; as regards Rome, on the higher side of the Po.

¶ The Cispadane and Transpadane republics were two republics situated on opposite sides of the Po. They were merged in the Cisalpine republic in October, 1797. (Haydn, &c.)

çiss-âm'-pêl-ôs, s. [Gr. *kissos*=ivy, and *ampelos*=a vine, from the plants being like ivy in the green rambling branches, and like the vine in having the fruit in racemes.]

Bot.: A genus of climbing shrubs. Order, Menispermaceæ. It grows in almost every mountainous part of the Cape of Good Hope. The root is used as an emetic and cathartic by the Boers. (Dunghlison & Craig.) *Cissampelos ovalifolia* is used in Brazil; *C. Pareira*, and *C. Caapeba* in the West Indies, and *C. Mauritania* in Madagascar, as tonics and diuretics. *C. glaberrima* and *C. ebracteata* are prescribed in Brazil against serpent-bites. The root of *Cissampelos obtecta*, an Indian species, yields an intoxicating spirit. (Lindley.)

çis'-sî-dæ, s. pl. [From Mod. Lat. *cis* (2) (q. v.), and fem. pl. adj. suff. *-idæ*.]

Entom.: A family of Coleoptera.

çis'-sîn-ûm, s. [Gr. *kission*, from *kissos*=ivy.]

Med.: A name given to a plaster of ivy used in wounds of the nerves or tendons.

çis-sî-têş, s. [Gr. *kissos*=ivy.]

Entom.: A genus of Coleopterous insects, belonging to the section Heteromera, and the tribe Trachelides.

çiss-ôid, s. [Gr. *kissoidês*=like ivy, from *kissos*=ivy, and *eidôs*=appearance, form.]

Geom.: A peculiar curve used by Diocles in solving certain difficult problems in geometry.

çiss-ôid'-al, a. [Eng. *cissoid*; *-al*.] Pertaining to or of the nature of a cissoid.

çiss-ô-pûs, s. [Gr. *kissos*=ivy, and *pous*=a foot.]

Ornith.: Cuvier's name for a genus of Shrikes, considered by Swainson as identical with the sub-genus *Pitylus*, which name should take its place.

çis'-sûs, s. [Gr. *kissos*=ivy.]

Bot.: A genus of vine-bearing plants, belonging to the order Ampelideæ. It is closely akin to *Vitis*, the Vine genus. The leaves of *Cissus cordata* and *C. setosa* are said to possess acrid properties. They are deemed useful in bringing indolent tumors to suppuration. The berries of the latter species are also acrid. Both the leaves and the fruit of *C. tinctoria* abound in a green coloring matter, which on exposure becomes blue; it is used by the Brazilian Indians as a dye for cotton fabrics. (Lindley.)

çist, s. [Fr. *ciste*; Lat. *cista*, from Gr. *kistê*=a box, a chest.]

1. *Arch. & Sculp.*: A chest or basket. A term used to denominate the mystic baskets used in processions connected with the Eleusinian mysteries. It was originally formed of wickerwork, and when afterward made of metal, the form and texture were preserved in imitation of the original material. When sculptured on ancient monuments it indicates some connection with the mysteries of Ceres and Bacchus. (Gwilt.)

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw,

2. *Antiquities*:

(1) In Celtic or Druidical buildings, the chamber formed of laterally recumbent blocks of stone. (*Guillt.*) [CIST.]

* (2) A boxlike excavation.

"These oval pits or *cists* were about four feet long; they were neatly cut into the chalk, and were with the skeletons covered with a pyramid of stones and flints."—*Archeologia*, xx. 340.

çis-tā'-çē-æ, s. pl. [Gr. *kistos*=the *Cistus* or Rock-rose, and Lat. fem. pl. adj. suff. -*aceæ*.]

Bot.: Rock-roses, an order of plants, the typical one of the alliance *Cistales*. It consists of shrubs or herbaceous plants, often with viscid branches. The leaves are entire, opposite or alternate, feather-veined, or more rarely fan-veined. The flowers, which are very fugacious, are generally in unilateral racemes; their color is white, yellow, or red; sepals 3-5, persistent unequal, petals five, rarely three, stamens hypogynous distinct, definite or indefinite in number; ovary one or many-celled, with the style and stigma both simple. Fruit capsular, 3-5 or ten-valved, one-celled, with parietal placentæ, or imperfectly five or ten-celled. They are found chiefly in the South of Europe and the North of Africa. Known genera in 1845, seven; species, 185. For their qualities see COCHLOSPERMUM and LADANUM.

çis-tā'-lēš, s. pl. [From *cistus*, and Lat. fem. pl. adj. suff. -*ales*.]

Bot.: An alliance of plants, placed by Lindley under his Hypogynous Exogens. He includes under it the *Cistaceæ*, *Brassicaceæ*, *Resedaceæ*, and *Capparidaceæ*, though it is hard to believe that *Brassicaceæ* is not entitled to rank as the type of an alliance.

çist'-ēd, a. [CIST, s.] Inclosed in a cist or bag.

çis-tē'-la, *çis-tēl'-la*, s. [Lat. *cistella*=a little chest, dimin. of *cista*=a chest.]

1. *Entom.* (Of the form *Cistela*): A genus of coleopterous insects, the typical one of the tribe *Cistelides*. Sub-section, *Stenelytra*. *Cistela ceramboides* is found on flowers; *C. sulphurea* is confined to the sea-coast.

2. *Bot.* (Of the form *Cistella*): A capsular shield of some lichens. [CISTULA.]

çis-tēl'-i-dēs, s. pl. [Lat. *cistela*.]

Entom.: A tribe of coleopterous insects, of which *Cistela* is the type. Section *Heteromera*, sub-section *Stenelytra*.

Çis-tēr'-cian (cian as *shan*) s. & a. [Low Lat. *Cistercium*; Fr. *Cisteaux*, *Citeaux*, a convent situated near Dijon, in France.]

A. As substantive:

Ch. Hist.: A monastic order in connection with the Roman Catholic Church. In the year 1098, Robert, abbot of Molesme, in Burgundy, having lost hope of inducing the monks, whose chief he was, to live up to the rule prescribed by St. Benedict, retired with twenty associates to Citeaux [see etym.] and founded there a congregation which afterward developed into the order of the Cistercians. It went through the ordinary cycle of such monastic institutions, i.e., at first its members were poor and really holy; then the fame of their sanctity spreading through Europe, branches of the order were established in many places. To aid men so deserving, large contributions were given by pious men and women, and before the twelfth century had run its course, the Cistercian communities were wealthy. With the growth of this wealth, the gradual relaxation of the strict Benedictine rules took place, till finally the Cistercians lost their high reputation and sank to the level of the order against which their secession had been a protest, and to that of the monastic order generally. During the time that the order was rising in importance, it enjoyed the advocacy of the celebrated St. Bernard, of Clairvaux, who is regarded as its second parent and founder, so that it is sometimes called the Bernardine order, or the order of St. Bernard. Between them and the Cluniacensians there was considerable animosity, and even public controversy. (*Mosheim: Church Hist.*, cent. xi., xii.)

B. As adj.: Pertaining to or connected with the order of monks described in A.

çis-tēr'n, **çis-terne*, **sis-terne*, s. & a. [Lat. *cisterna*; O. Fr. *cisterne*; Fr. *citerne*.]

Cistercian Monk.

A. As substantive:

I. Ordinary Language:

1. An artificial receptacle or reservoir for the storage of water.

"From some of these *cisterns* Cæsar's troops were supplied . . ."—*Sharpe: Hist. Egypt*, ch. x.

"There is the *cistern* where Joseph was cast in of his brethren."—*Maundeville*, p. 106.

2. A natural reservoir or place where the drainage of a watershed collects.

"In the wide *cisterns* of the lakes confin'd."

Sir R. Blackmore.

3. A metal or slate vessel for the storage of water or other liquid.

"A *cistern* containing a hundred and twenty gallons of punch was emptied to his Majesty's health . . ."—*Macaulay: Hist. Eng.*, ch. xxi.

The following list of capacities of cisterns applies to cisterns of circular construction and indicates the amount of contents for each ten inches of depth. Hence to find the total contents of a cistern of given diameter multiply the contents for that diameter given here by the quotient of the depth ÷ 10 inches. For each ten inches of depth a cistern 25 feet in diameter contains 3,059 gallons; 20 feet, 1,958 gallons; 15 feet, 1,101 gallons; 14 feet, 950 gallons; 13 feet, 827 gallons; 12 feet, 705 gallons; 11 feet, 592 gallons; 10 feet, 489 gallons; 9 feet, 396 gallons; 8 feet, 313 gallons; 7 feet, 239 gallons; 6½ feet, 206 gallons; 6 feet, 176 gallons; 5 feet, 122 gallons; 4½ feet, 99 gallons; 3 feet, 44 gallons.

II. Technically:

1. *Mining*: A tank in a deep mine-shaft, set upon a scarcement; it serves to receive the water of the pump below, and supply water to the pump above. The usual length for a set of mining-pumps is twenty-five to thirty fathoms. At such intervals cisterns are placed.

2. *Steam-engine*: The vessel inclosing the condenser of a condensing steam-engine, and containing the injection water.

3. *Glass Manuf.*: The receptacle into which glass is ladled from the pots to be poured on the table in making plate glass, or in casting glass.

B. As adj.: (See the compounds.)

cistern-barometer, s.

Meteor. Instrum.: A barometer having the tube immersed below in a cistern of mercury.

cistern-filter, s. A cistern having a permanent chamber, which has filtering material intervening between the supply and discharge.

cistern-pump, s. A small pump, lift, or force for pumping water from the moderate depth of a cistern.

çis-tēr'-nā, s. [Lat.] A term applied to various parts of the body which serve as reservoirs for different fluids. The fourth ventricle of the brain has been so called. (*Dunglison*.)

çis-tō'-gās'-tēr, s. [Gr. *kis*=the corn-weevil, and *gastēr*=the belly, from its inflated abdomen.]

Entom.: A genus of dipterous insects. They belong to the family *Muscidae* and sub-tribe *Athericera*.

çis-tō'-lith, s. [Lat. *cista*=a basket, and Gr. *lithos*=a stone.]

Bot.: An agglomeration of raphides suspended in a sac by a tube, as in *Ficus elastica*. (*Stormonth*.)

çis-tōme (Eng.), *çis-tō-mā* (Mod. Lat.), s. [Gr. *kistē*=a small box or chest, and *stoma*=a mouth.]

Bot.: A funnel-shaped prolongation of the cuticle into the openings of the stomata. It is called also the Ostiole.

çis-tōp'-tēr-is, *çys-tōp'-tēr-is*, s. [Gr. *kistos*=a bladder, and *ptēris*=a fern.]

Bot.: A species of fern, so called from the indusium being shaped like a bladder.

çis-tū'-dā, s. [From Lat. *cista*=a box, and *testudo*=tortoise (?).]

Zoöl.: The Box Terrapins, a genus of the *Emydæ* or River Turtles in which the two divisions of the carapace, or dorsal shell, are movable on the same axis, and can be so closed as entirely to conceal the inclosed animal.

çis-tū'-lā, s. [Dimin. of Lat. *cista*=a box.]

1. *Zoöl.*: A sub-genus of Mollusks, genus *Cyclostoma*. About seventy species are known from the West Indies and tropical America.

2. *Bot.*: A cell-shaped shield found in some lichens. [CISTELLA.]

çis-tūs, s. [Lat. *cistus*; Gr. *kistos*=a rock-rose.]

Bot.: The Rock-rose, a genus of elegant shrubs, with beautiful large red or white flowers, resembling a wild rose. Order, *Cistaceæ*. It has an imperfectly five or ten-celled capsule, a character distinguishing it from the *Helianthemum*, of England, which has but three cells. The species are fine showy shrubs with gaily colored but fugaceous

flowers. London (ed. 1880) enumerates twenty-seven species as cultivated. The resinous balsamic substance called *ladanum* is obtained from *Cistus creticus*, *ledon* and *ladaniferus*. [LADANUM.] The latter two are sometimes called Gum Cisti.

cist'-vaen, s. [Wel. *cistfaen*=a British monument consisting of four flat stones placed at right angles with a fifth on the top.]

Antiq.: Stone receptacles found in ancient barrows, containing the bones of persons interred there.

çit, s. [A contracted form of *citizen* (q. v.).] An inhabitant of a city, a townsman, a cockney. Used in disparagement or contempt.

"Bernard, thou art a *cit*."—*Pope: Satires*, iii. 89.

çit'-a-ble, a. [Eng. *cit(e)*; -*able*.] Capable of being cited. (*Gent. Magazine*.)

**çit-tā'-çion*, s. [CITATION.]

çit'-a-dēl, s. [Fr. *citadelle*; Ital. *cittadella*, dimin. of *città*=a city; Dan. *citadel*; Ger. *citadelle*; M. Sp. *ciudadela*, dimin. of *ciudad*=a city.] A castle or fortified place in a city, intended for the storage of arms, &c., and as a last point of defense.

çit'-tal, s. [Eng. *cit(e)*; -*al*.]

1. A summons to appear before a superior or a judge, a citation.

2. A reproof or impeachment.

3. A quotation, a recital.

"He made a blushing *cital* of himself,
And chid his truant youth."

Shakesp.: Hen. IV., Pt. I., v. 2.

çit-tā'-tion, **çit-tā'-çion*, **çit-tā'-çion*, s. [Fr. *citation*; Ital. *citazione*; Lat. *citatio*, from *cito*=to summon to appear.]

I. Ordinary Language:

1. A summons. [II. 1.]

2. A quotation of the words of another; the bringing forward another as authority for a statement.

"The letter-writer cannot read these *citations* without blushing, after the charge he hath advanced."—*Bishop Atterbury*.

*3. An enumeration, mention or recital.

" . . . there remains a *citation* of such as may produce it in any country."—*Harvey: On Consumption*.

II. Law:

1. The act of summoning or citing a person to appear before a judge, especially of an ecclesiastical court.

"The ecclesiastical courts proceed according to the course of the Civil and Canon Laws, by *citation*, libel, &c."—*Jacob: Law Dict.*

2. The official summons or notice to appear served on any person.

"That in the *londe citatoun* non nere
Thurf bulle of the pope of Rome."

Life of Becket, 615.

3. A reference to decided cases or books of authority to prove a point in law.

çit-tā'-tōr, s. [Lat.] One who gives citations of cases in point.

çit-tā'-tōr-ŷ, a. [Lat. *citatorius*=summoning or pertaining to a summons; *cito*=to cite, to summon to appear.] Pertaining to, in the form, or of the nature of, a citation.

" . . . letters *citatory* affixed on the doors of Rochester Cathedral, three miles off, were torn down and burned."—*Milman: Hist. Lat. Christianity*, bk. xii., ch. vii.

çite, v. t. [Fr. *citer*; Sp. & Port. *citar*; Ital. *citare*; Lat. *cito*, intens. form of *cio*=to put in motion, to excite.]

*1. To call upon authoritatively, to enjoin, to summon or urge to an action.

"I speak to you, Sir Thuriog;
For Valentine, I need not *cite* him to it."

Shakesp.: Two Gent. of Ver., ii. 4.

2. To summon officially to appear in a court.

"He held a late court, to which
She oft was *cited* by them, but appear'd not."

Shakesp.: Hen. VIII., iv. 1.

3. To quote, to adduce as an authority.

"The devil can *cite* Scripture for his purpose."

Shakesp.: Mer. of Venice, i. 3.

" . . . looked and spoke as if when *citing* a section he was making a discovery."—*Lord Brougham: Hist. Sketches*; *Sir V. Gibbs*.

4. To bring forward or adduce as an example.

*5. To enumerate, to recount.

"We *cite* our faults."

Shakesp.: Two Gent. of Ver., iv. 3.

*6. To argue, prove, or evidence.

"Aged honor *cites* a virtuous youth."

Shakesp.: All's Well, i. 3.

¶ (1) Crabb thus distinguishes between *to cite* and *to quote*: "*To cite* is employed for persons or things; *to quote* for things only: authors are *cited*,

bōil, *bōy*; *pōūt*, *jōwl*; *cat*, *çell*, *chorus*, *çhin*, *bençh*; *go*, *gem*; *thin*, *thiŷ*; *sin*, *aŷ*; *expect*, *Xenophon*, *exist*. *ph* = *f*.
-*cian*, -*tian* = *shan*. -*tion*, -*sion* = *shūn*; -*tion*, -*çion* = *zhūn*. -*tious*, -*çious*, -*sious* = *shūs*. -*ble*, -*dle*, &c. = *bēl*, *dēl*.

passages from their works are quoted; we cite only by authority; we quote for general purposes of convenience. Historians ought to cite their authority in order to strengthen their evidence and inspire confidence; controversialists must quote the objectionable passages in those works which they wish to confute; it is prudent to cite no one whose authority is questionable; it is superfluous to quote anything that can be easily perused in the original."

(2) He thus discriminates between to cite and to summon: "The idea of calling a person authoritatively to appear, is common to these terms. Cite is used in a general sense, summon in a particular and technical sense: a person may be cited to appear before his superior; he is summoned to appear before a court; the station of the individual gives authority to the act of citing; the law itself gives authority to that of summoning. When cite is used in a legal sense, it is mostly employed for witnesses, and summon for every occasion: a person is cited to give evidence, he is summoned to answer a charge." (Crabb: Eng. Synon.)

cit'-éd, *pa. par. or a.* [CITE.]

"Forthwith the cited dead,
Of all past ages, to the general doom
Shall hasten." Milton: P. L., iii. 327.

***cī-tēe'**, *s.* [Eng. cit(e); -ee.] A person cited or summoned to appear before a judge.

cī-tēr, *s.* [Eng. cit(e); -er.]

1. One who cites or summons another to appear before a court.

2. One who cites or quotes; a quoter.

"I must desire the citer henceforward to inform us of his editions too."—Atterbury.

cīt'-ēss, *s.* [Eng. cit, and fem. suff. -ess.] A female cit or townswoman. (The word is peculiar to Dryden.)

"Cits and citesses raise a joyful strain;
'Tis a good omen to begin a reign."
Dryden: Prol. to Albion and Albanus.

cīth'-ā-rā, *s.* [Lat., from Gr. *kithara*=a harp.] [CIT-TERN.]

1. Music: A musical instrument resembling the harp.

2. Zool.: A genus of mollusks, family Conidae (Cones). About fifty species were discovered by Mr. Cuming in the Philippine Islands. (S. P. Woodward.)

cīth-ar-ēx'-yīl-ūm, *s.* [Gr. *kithara*=a lyre, and *xylon*=wood.]

Bot.: The fiddle-wood, a genus of West Indian trees and shrubs. Order, Verbenaceae. The term fiddle-wood naturally suggests that it is used in the manufacture of violins, which is not the case, as it is a corruption of the French word *fidele*=faithful, this complimentary word having been applied because the wood, which is very hard, is trustworthy for carpentry or for building purposes.

cīth-ar-ī-nūs, *s.* [Mod. Lat. *citharinus*, from Class. Lat. *cithara* (q. v.).]

Ichthy.: A genus of Salmonidae containing species found in the Nile.

cīth-ar-īst, *s.* [Lat. *citharista*=a harper; *cithara*=a harp.] A harp.

"The Psaltry, the Citholis, the soft Citharist,
The Croude, and the monycordis, the gythornis gay."
Houlate, iii. 10.

cīth-ar-īs-tīc, *a.* [Gr. *kitharistikos*=pertaining to the lyre or harp; *kithara*=a lyre or harp.] Relating to or adapted from the cithara.

cīt'-ī-çīsm, ***cīt'-y-çīsm**, *s.* [Eng. cit or city, and -cism.] The manners of a citizen or townsman.

"Although no bred courtling, yet a most particular man, of goodly havings—reformed and transformed from his original citycism."—B. Jonson: Cynthia's Revels.

cīt'-ied, *a.* [Eng. city; -ed.] Belonging to or containing a city or cities; resembling a city.

"From villages replete with ragged and sweating clowns
And from the loathsome air of smoky citted towns."
Drayton: Polyolbion, Song xlii.

cīt'-ī-grāde, *a. & s.* [Fr. *citigrade*, from Lat. *citus*=swift; *gradus*=a step, from *gradior*=to walk.]

A. As adj.: Swiftly moving.

B. As substantive:

Zool. (pl.): A tribe of the Arachnidans or Spiders, so named for their nimbleness.

"A spider which was about three-tenths of an inch in length, and which in its general appearance resembled a Citigrade."—Darwin: Voyage round the World (ed. 1870), ch. viii., p. 160.

***cīt'-in-ēr**, ***çyt-ten-ere**, *s.* [Fr. *citoyen*=a citizen, and Eng. suff. -er.] A person bred in a city a cockney, a citizen.

"Hec civis, a cyttener."—Wright: Vocab., p. 211.

"Oure souerane lord—disponis to ane reuerend father in God Petir bischope of Dunkeld, and to the citineris of the towne of Dunkeld, the privilege and liberties grantit to the bischoppis of Dunkeld and citineris thair of befoir, . . ."—Acts Ja. VI., 1606 (ed. 1814), p. 313.

cī-tīng, *pr. par., a. & s.* [CITE.]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *subst.*: The act of summoning to appear before a judge or court.

cīt'-ī-zen, ***cīt-e-sein**, ***cīt-i-zein**, ***cīt-e-sain**, ***cīt-e-zein**, ***cīt-e-seyn**, *s. & a.* [O. Fr. *citeain*, *citain*, *citein*; Fr. *citoyen*; Ital. *cittadino*, from *cittā*=a city; Sp. *ciudadano*, from *ciudad*=a city.]

A. As substantive:

1. A member of a state or community, an inhabitant of any state or place.

¶ The "civis Romanus," or Roman citizen, had various and high privileges over foreigners. (Acts xvi. 37-38; xxii. 25-29.) [CIVIS.]

2. A freeman of a state or city (opposed to a foreigner or a slave). [FREEMAN.]

"All inhabitants within these walls are not properly citizens, but only such as are called freemen."—Raleigh: History of the World.

"All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside."—Constitution of the United States, Art. xiv., Sec. 1.

3. An inhabitant of a city or town (opposed to one living in the country or engaged in agriculture).

4. A tradesman.

"When he speaks not like a citizen
You find him like a soldier."
Shakesp.: Coriol., iii. 3.

B. As *adj.*: Pertaining to, consisting, or having the qualities of, a citizen or citizens.

"So sick I am not, yet I am not well;
But not so citizen a wanton, as
To seem to die ere sick."
Shakesp.: Cymbeline, iv. 2.

citizen-soldier, *s.* A volunteer; one who is at the same time a citizen and a soldier.

cīt'-ī-zen-ēss, *s.* [Eng. citizen; fem. suff. -ess.] A female citizen. (Booth.)

***cīt'-ī-zen-ize**, *v. t.* [Eng. citizen; -ize.] To make into a citizen; to admit to the rights and privileges of a citizen.

"Talleyrand was citizenized in Pennsylvania."—T. Pickering.

***cīt'-ī-zen-rŷ**, *s.* [Eng. citizen; -ry.] The body of citizens collectively, the townspeople.

"He sided with the magistracy, not with the citizenry."—Taylor: Survey of German Poetry, i. 185. (Davies.)

cīt'-ī-zen-ship, *s.* [Eng. citizen; -ship.]

1. State, condition, or quality of a citizen; the state of being vested with the rights and privileges of a citizen.

"Admission to citizenship will expose them at court."—Palfrey.

2. English Polit. Econ.: The freedom of a city. It was obtained by descent from a citizen, by being apprenticed to one, or by purchase; it might and may still be conferred by vote on distinguished persons. [FREEDOM.]

***cīt'-ōle**, ***cīt-hill**, ***cīthole**, ***çytole**, *s.* [O. Sp. *citola*=cithern.]

Music: A musical instrument, perhaps a dulcimer.

"A citole in hire right hand hadde sche,
And on hir heed, ful semely on to see."
Chaucer: C. T., 1,961-2.

cīt-ra-cōn'-īc, *a.* [Eng. citr(ic), and aconitic (q. v.).] Derived from the genera citrus and aconitum.

citraconic acid, *s.*

Chem.: Pyrocitric acid C₅H₆O₄ or $\begin{array}{c} \text{CH}_3 \\ | \\ \text{C}-\text{CO.OH} \\ | \\ \text{C}-\text{CO.OH} \end{array}$

A diatomic bibasic acid, isomeric with itaconic and mesaconic acids obtained by distilling citric acid; water is first given off at about 175°, vapors of acetone and CO, then the residue consists of aconitic acid; on continuing the distillation CO₂ is given off and itaconic acid is formed; afterward water is given off, and an oily mass is left in the retort, consisting of citraconic anhydride, which, when exposed to the air, absorbs moisture and crystallizes into citraconic acid, which melts at 80°. It unites readily with bromine, forming dibromopyrotartaric acid C₅H₆Br₂O₄. By the action of sodium amalgam, a solution of citraconic acid is converted

into pyrotartaric acid C₅H₆O₄. When citraconic acid is subjected to electrolysis, it gives off 2CO₂ and 2H, and yields allylene CH₂=C=CH. By the action of hypochlorous acid HClO, citraconic acid is converted into chlorocitraconic acid C₅H₇ClO₅.

cīt-rā-māl'-īc, *a.* [Eng. citric, and malic.] Having the citric and malic acids in its composition.

citraconic acid, *s.*

Chem.: C₅H₆O₅. A dibasic acid obtained by the action of zinc on an aqueous solution of chlorocitraconic acid.

cīt-rā-mīde, *s.* [Eng. citr(ic), and amide (q. v.).]

Chem.: N₃(C₆H₅O₄)'''H₆. A crystalline compound, slightly soluble in water. Obtained by the action of alcoholic ammonia on citric ethers.

cī-tra-tar-tār'-īc, *a.* [Eng. citric and tartaric.] **citrataric acid**, *s.*

Chem.: C₅H₆O₆, a syrupy, deliquescent, dibasic acid obtained by heating chlorocitraconic acid in a sealed tube, with water, acetone CH₃.CO.CH₃, hydrochloric acid and carbon dioxide being also formed.

cī'-trate, *s.* [From citr(ic); -ate (Chem.) (q. v.).] [CITRIC ACID.] Citrate of calcium occurs in onions and in potatoes, citrate of potassium in artichokes and in potatoes.

cīt'-rē-an, *a.* [Lat. *citre(um)*=a citron, and Eng. adj. suff. -an.] The same as CITRINE (q. v.).

cīt'-rēne, *s.* [Eng. citr(ic), and suff. -ene.]

Chem.: C₁₀H₁₆. An aromatic hydrocarbon, boiling at 168°. It is obtained from the rind of Citrus Limonum.

cī'-trē-ōus, *a.* [Lat. *citreus*=pertaining to the citron.] Lemon-colored, citrinous.

cīt'-rīc, *a.* [Fr. *citrique*; Lat. *citrus*=the citron-tree.]

Chem.: Of or pertaining to an acid obtained from the juice of the lemon and other fruits.

citric acid, *s.*

1. Chem.: C₆H₈O₇ or HOC-CO.OH A tetra-

tomic tribasic acid, which is found in the juice of lemons, also in gooseberries, currants, &c. It is obtained by allowing the juice to undergo an incipient fermentation, filtering and neutralizing by means of powdered chalk, after which milk of lime, the insoluble calcium citrate, is precipitated, and is then decomposed by dilute sulphuric acid. It forms white crystals, soluble in water, and has an acid taste. It is used in dyeing and in calico-printing, and in the preparation of effervescent summer beverages. Citric acid fused with potash is decomposed into oxalic and acetic acids, thus C₆H₈O₇ + H₂O = C₂H₂O₄ + 2(CH₃.CO.OH). Citric acid forms ethers. Citric acid has been formed synthetically from glycerin CH₂OH.CHOH.CH₂OH, by converting it into symmetrically formulated dichlorhydrin, CH₂Cl.CHOH.CH₂Cl by oxidizing this into dichloracetone CH₂Cl.CO.CH₂Cl, which forms with strong hydrocyanic acid an addition compound, cyanodichloracetone, which by the action of HCl and H₂O

is converted into $\begin{array}{c} \text{HO} \quad \text{CO.OH} \\ \diagup \quad \diagdown \\ \text{C} \end{array}$ =dichloracetonic

acid. This is neutralized by Na₂CO₃, and heated with two mols. of KCN cyanide of potassium, which replaces the 2Cl by 2CN, forming sodium dicyanacetate; the solution is then saturated with HCl and heated in a water bath, and the citric acid precipitated by milk of lime as calcium citrate. Citric acid forms three series of salts with the alkalies, called citrates. It gives no precipitate with potassium acetate. Citrates of calcium, lead, and silver are insoluble. Citric acid, added to a solution in excess, prevents the precipitation of ferric oxide and of alumina by ammonia.

2. Pharm.: Citric acid acts as a refrigerant, and allays thirst and irritation of the skin. Citrate of ammonium increases the secretions. Citrate of iron and ammonia is found in thin transparent deep-red scales, soluble in water, but almost insoluble in rectified spirit. It acts as a tonic, and is not astringent, and is given to restore the blood to a healthy condition. Citrate of iron and quinine is found in greenish-yellow deliquescent scales, soluble in water. It combines the therapeutic properties of iron and of quinine. Citrate of potassium, a white deliquescent powder, acts as a diuretic.

cīt'-rīl, *s. & a.* [From Lat. *citrus* (q. v.).] A term signifying yellow, citron-colored. It occurs only in the subjoined compound.

citril finch, *s.* A finch, *Fringilla citrinella*, found in Italy, where it is prized for its song. It must not be confounded with the Yellow Hammer, *Emberiza citrinella*, though both have a yellow breast.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wūre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

çit-rin-â-tion, ***çit-rin-â-çion**, s. [Low Lat. *citrinatio*.] A process by which anything takes the color of a lemon or orange, the state so induced, yellowness. Originally a term used in alchemy, but still used in medicine.

"Our silver *citrination*,
Our cementing and fermentation."

Chaucer: C. T., 16, 284.

çit-rine, ***çit-rÿn**, ***çyt-ryne**, a. & s. [Fr. *citrin*; Lat. *citrinus*, from *citrus* = the citron-tree.]

A. As adj.: Resembling a citron or lemon; lemon-colored, of a greenish-yellow color.

"His nose was heigh, his eyen were *cytryne*."

Chaucer: C. T., 2, 169.

B. As substantive:

1. **Ord. Lang.**: A greenish-yellow or lemon color.
2. **Min.**: A yellow pellucid variety of quartz.

"A species of crystal of an extremely pure, clear, and fine texture, generally free from flaws and blemishes. It is ever found in a long and slender column, irregularly hexangular, and terminated by an hexangular pyramid. It is from one to four or five inches in length. This stone is very plentiful in the West Indies. Our jewelers have learned to call it *citrine*; and cut stones for rings out of it, which are mistaken for topazes."—Hill: *On Fossils*.

citrine-lake, s. A pigment prepared from the quercitron bark. It is a brown pink, which is durable and dries well. (Weale.)

citrine ointment, s.

Med.: A mercurial ointment, composed of four parts of mercury, twelve of nitric acid, fifteen of prepared lead, and thirty-two of olive-oil.

çit-tri-noûs, a. [From Mod. Lat. *citrinus* = citron-colored or yellow.] Lemon-colored, citreous.

çit-rôn, s. & a. [Fr. *citron*; Low Lat. *citro*, from Gr. *kitron*; Lat. *citreum* (*malum*) = a citron or lemon; *citrus* = the lemon-tree.]

A. As substantive:

Botany:

1. The citron-tree (q. v.).
2. The fruit of the citron-tree, resembling a lemon, but less acid in taste. It is a native of Asia.

B. As adj.: Pertaining to, derived from, or having the qualities of the citron.

citron-shadow, s. A shadow cast by a citron-tree.

"The fragrant, glistening deeps, and clove
The *citron-shadows* in the blue."

Tennyson: *Recollections of the Arabian Nights*.

citron-tree, s.

Botany:

1. The tree, *Citrus medica*, which produces the citron. It has short and stiff branches, oblong toothed leaves, flowers purple externally, and fruit generally large, warted, and furrowed, having a protuberance at the apex, with a very thick spongy adherent rind and a subacid pulp. The Romans brought it from Media, where, however, it is not now, if it ever was, indigenous. It is at present cultivated in gardens in the warmer parts of both hemispheres. It furnishes oil of citron and oil of cedra.

2. A genus of plants of which the lemons, citrons, and oranges are species. Order, Aurantiaceæ. (Craig.)

Fingered citron: A citron with a remote resemblance to the human fingers. It constitutes the genus *Sarcodactylis*.

citron-water, s. A water distilled from the rinds of citrons.

çi-trô-nêl-lâ, s. [Mod. Lat. dimin. of Eng., &c., *citron* (q. v.).]

Bot.: A species of grass, *Andropogon citratus*. It yields an essential oil used in perfumery. It is cultivated in Ceylon.

çi-trôn'-êl-lôl, s. [From Mod. Lat. *citronella* (q. v.), and Class. Lat. *oleum* = oil.]

Chem.: $C_{10}H_{18}O$, boiling point 220° . It is isomeric with camphor, and is the chief constituent of oil of citronella. Citronellol unites with bromine, forming a dibromide $C_{10}H_{18}Br_2O$, which when heated splits up into water hydrobromic acid HBr and cymene $C_{10}H_{14}$.

çi-trôn-wôrts, s. pl. [Eng. *citron*; -worts.]

[WORT, suff.]

Bot.: The English name given by Lindley to the order Aurantiaceæ.

çit-rûl, **çit-rûle**, s. [Fr. *citrouille* = a pumpkin; Ital. *citruilo*, *cetruilo* = a cucumber; Low Lat. *cit-reolus*, from *citreum* = a citron.]

Bot.: The water-melon or pumpkin, so named from its yellow color.

çit-rûl-lûs, s. [A dimin. from Lat. *citrus*, so named from the color of the fruit when cut.]

Bot.: A genus of plants belonging to the order Cucurbitaceæ. *Citrullus colocynthis* furnishes the drug *Colocynth* (q. v.).

çit-rûs, s. [Lat. *citrus*; Gr. *kitros*.]

Bot.: A genus of trees, the typical one of the order Aurantiaceæ. The leaves, which theoretically are compound, are reduced to a single leaflet, jointed to a leaf-like petiole. The stamens are numerous, and irregularly grouped into several parcels; the fruit, a hesperidium, has a leathery rind formed of the epicarp and mesocarp, which can easily be separated from the pulp below. The endocarp sends prolongations inward, forming triangular divisions, in which pulpy cells are developed, so as to surround the seeds which are attached to the inner angle. The appropriate seat of the genus is believed to be the inferior ranges of hills in Nepaul and the sub-Himalayas, from which it may extend also into China. How many species are distinct is doubtful. There are various distinct forms in the genus *Citrus*, whether species or varieties, viz., the Citron, already mentioned, the Orange (*Citrus Aurantium*), the Lemon (*C. Limonum*), the Lime (*C. Limetta*), the Shaddock (*C. decumana*). Other varieties or sub-varieties are the Seville or Bitter Orange, sometimes called the Bigarade (*C. Bigaradia*), the Bergamot (*C. Bergamia*), the Mandarin Orange (*C. nobilis*), &c. [BERGAMOT, CITRON, ORANGE.]

çit-rÿl, s. [Eng. *citr*(ic), and suff. -yl (Chem.) (q. v.).]

Chem.: A name given to the triatomic radical ($C_6H_5O_4$) contained in citric acid. The symbol Ci''' is often used to express this radical, as in Citric acid, $Ci'''(OH)_3$.

çit'-têrn, ***çith-êrn**, ***git-tern**, s. [The *n* is excrescent, the word being derived from A. S. *cytere*; Ger. *cither*, *zitter*; Lat. *cithara*; Gr. *kithara* = a lyre or harp; Ital. *chitarra*, *citara*; Prov. *cithara*, *cidra*; Sp. *citara*, *quitarrâ*.] [GUITAR.] A musical instrument, resembling a guitar, but strung with wire instead of gut.

"For grant the most barbers can play on the *cittern*."
B. Jonson: *Vision of Delight*.

cittern-head, s. A blockhead, a dunce, so called from the cittern usually having a head grotesquely carved at the extremity of the neck and finger-board.

***çi-tur**, ***çy-tyr**, s. [Lat. *citrus*.] A citron.

"Çytyr tre. *Citrus*."—Prompt. Parv.

"Now plaunted I scions of *citur* tree."

Palladius, viii. 8.

çit-ÿ, ***çete**, ***çite**, ***çitee**, ***çitle**, ***çitty**, ***syte**, ***çyte**, s. & a. [O. Fr. *cite*; Fr. *cité* = a town; Ital. *città*; Sp. *ciudad*, from Lat. *citatem*, an abbreviated form of *civitatem*, acc. of *civitas* = a city, a state, from *civis* = a citizen.]

A. As substantive:

1. **Ord. Lang.**: A large town or collection of houses; a community.
2. **Spec.**: In this country, any town incorporated and governed by a mayor and corporation. In England, a large town corporate, which is the see of a bishop and contains a cathedral church.
3. The inhabitants of a town collectively.

"The whole *city* came out to meet Jesus."—Matt. viii. 34.

"What is the *city* but the people?"

Truly the people are the *city*."

Shakespeare.

B. As adj.: Of or pertaining to a town or city.

"In thee no wanton ears, to win with words,
Nor lurking toys, which *city* life affords."

Lodge: *Pleasant History of Glaucus*, &c. (1610.)

† Obvious compounds: *City-born*, *city-dame*, *city-gate*, *city-life*, *city-woman*, &c.

city-article, s. In newspapers the editorial summary of and remarks on the financial and commercial events and transactions of each day.

city-avens, s. A book-name for *Geum urbanum*, of which it is simply a translation.

city-council, s. The legislative body of a city, usually consisting of the mayor, a board of aldermen and common councilmen.

city-court, s. The municipal court of a city. A court presided over by a city magistrate; a police court.

city-editor, s. The editor of that part of a newspaper containing the city-articles.

city-hall, s. A building in which the municipal offices of a city are usually located and in which the city-council meets.

city-ward, s.

1. A subdivision of a city set apart for purposes of forming a district of representation by an alderman or councilman; an election-district of a municipality.

Cittern. (17th Century.)

*2. A watchman of a city.

"Marry, sir, the *city-ward*, the park-ward, every way, old Windsor way, and every way but the town way."—Shakesp.: *Merry Wives of Windsor*, iii. 1.

city-ward, adv. In the direction of the city.

çiv'-êr-ÿ, s. [Etym. doubtful.]

Arch.: A bay or compartment of a vaulted ceiling. (Knight.)

çiveş, s. pl. [Fr. *cive*, from Lat. *cepa*, *cæpa*, *cæpe* = an onion.] [CHIVES.]

çiv'-êt (1), s. [Fr. *civette*; Ital. *zibetto* = civet, or a civet-cat; Gr. *zapetion*, from Per. *zabâd* = civet; Ar. *zubad* and *zabbâd* = the froth of milk or water, civet.]

1. **Comm.**: A resinous substance, of an odor like musk, obtained from several species of carnivorous animals of the genus *Viverra*, especially the civet, or civet-cat. The substance is secreted in a pouch, near the anus of the animal. It is used for a perfume.

"This substance approaches in smell to musk and ambergris; it has a pale yellow color, a somewhat acrid taste, a consistence like that of honey, and a very strong aromatic odor. It is the product of two small quadrupeds of the genus *Viverra*, of which one inhabits Asia, the other Africa. They are reared with tenderness, especially in Abyssinia. The *civet* is contained in a sac situated between the anus and the parts of generation in each sex. . . . According to M. Boutron-Chalard, it contains a volatile oil, to which it owes its smell; some free ammonia, resin, fat, extractiform matter, and mucus. It affords by calcination an ash, in which there is some carbonate and sulphate of potash, phosphate of lime, and oxide of iron."—Ure: *Dict. of Arts, Manufactures, and Mines*.

2. **Zoöl.**: The same as CIVET-CAT (q. v.). *Viverra civetta*, an animal of the family Viverridae, of which it is the type. It is found in North Africa. It climbs trees with facility. Its food consists of small mammals, reptiles, and birds, as well as roots and fruits. It is sometimes kept in the region which it inhabits for the sake of the perfume which it furnishes. There is an allied species, *Viverra Rasse*, in Java.

civet-cat, s.

1. **Literally**:

Zoöl.: The animal that produces civet.

*2. **Fig.**: A bescented dandy, a fop.

"So does Flatt'ry mine;

And all your courtly *Civet-cats* can vent,

Perfume to you, to me is Excrement."

Pope: *Epilogue to the Satires*, Dial. ii. 182-4.

çiv'-êt (2), s. [Etym. unknown.] In old cookery, a dish prepared with venison, chicken, &c.

çi'-vêt (3), s. [Fr. *cive*, *civette*.] [CHIVE.] A plant, *Allium Schœnoprassum*.

çiv'-êt, v. t. [CIVET (1), s.] To scent with civet.

çiv'-êt-êd, pa. par. or a. [CIVET, v.]

"Civeted fellows, smelt ere they are seen."

Couper: *Tirocinium*, 830.

çiv'-ic, ***çiv'-ick**, **çiv'-ic-al**, a. [Fr. *civique*; Ital. *civico*; Lat. *civicus* = pertaining to a citizen; *civis* = a citizen.] Pertaining to a city, or to its inhabitants, government, or customs.

"At *civis* revel, pomp, and game."

Tennyson: *Death of Wellington*.

"In the *civic* acceptance of the word I am a merchant."

—Theodore Hook: *Gilbert Gurney*, vol. iii., ch. ii.

civic-crown, s.

1. **Rom. Ant.**: A crown or garland of oak-leaves and acorns, given as a mark of public approbation to any soldier who had in battle saved the life of a comrade. It was considered more honorable among the ancient Romans than any other crown.

"Behind, Rome's genius waits
with *civic-crowns*,
And the great father of his
country owns."

Pope: *Temple of Fame*, 242.

2. **Arch.**: A garland of oak-leaves and acorns often used as an architectural ornament. (Gwilt.)

çiv'-il, ***çiv'-ile**, ***çiv'-ill**, a. Civic-crown.

[Fr. & Sp. *civil*; Ital. *civile*, from Lat. *civilis* = pertaining to a citizen; *civis* = a citizen.]

A. Ordinary Language:

I. Literally:

1. Of or pertaining to a city or state, or the members and inhabitants thereof collectively.

"God gave them laws of *civil* regimen, . . ."—Hooker: *Ecclies. Polity*, bk. iii., § 11.

2. Pertaining to any individual member of a community or city.

" . . . either out of your natural, or out of your *civil* power."—Jeremy Taylor.

Civic-crown.

3. Pertaining to persons or actions relating to private life, as distinguished from those connected with war.

"Fair shine his arms in history enroll'd;
Whilst humbler lyres his *civil* worth proclaim."
Shenstone.

4. Pertaining to matters or persons connected with secular matters, as distinguished from ecclesiastical.

"Unto whom the chief government of all estates of this realm, whether they be ecclesiastical or *civil*, doth appertain."—*Articles of Religion*, art. 37.

*5. The same as CIVIC (q. v.).

"With *civile* crownis."

Douglas: Virgil, bk. vi.

II. Figuratively:

1. Having the manners or habits of a member of a civilized community; civilized, not rude.

"That wise and *civil* Roman . . ."—*Milton: Areopag.*

2. Courteous, affable, obliging in manners or speech.

3. Courteous, not coarse or rude (applied to speech or actions).

*4. Sober, grave, serious.

"A *civil* habit

Oft covers a good man."

Beaum. and Flot.: Beggar's Bush.

*5. Subdued, calm, quiet.

"Once I sat upon a promontory,
And heard a mermaid on a dolphin's back
Uttering such dulcet and harmonious breath
That the rude sea grew *civil* at her song."

Shakesp.: Midsummer Night's Dream, ii. 1.

B. Technically:

1. *Mil.*: Intestine; applied to a war waged between citizens of the same country, and not with foreigners. [CIVIL WAR.]

"Prosper this realm, keep it from *civil* broils."

Shakesp.: Henry VI., Pt. I., i. 1.

2. *Polit.*: Connected with, or pertaining to, the internal or domestic government of a state. [CIVIL LIST, CIVIL SERVICE.]

Law:

(1) Pertaining to an action in a private suit, as distinguished from a criminal trial.

(2) Not natural, but only so far as relates to the rights or privileges of any person as a citizen.

"In case any estate be granted to a man for his life generally, it may determine by his *civil* death; as if he enter into a monastery, whereby he is dead in law."—*Sir W. Blackstone*.

(3) (See extract.)

"*Civil* law is defined to be that law which every particular nation, commonwealth, or community, has established peculiarly for itself . . . now more properly distinguished by the name of municipal law, the term *civil* law being chiefly applied to that which the old Romans used."—*Wharton*.

¶ (1) Crabb thus distinguishes between *civil* and *polite*: "These two epithets are employed to denote different modes of acting in social intercourse: *polite* expresses more than *civil*; it is possible to be *civil* without being *polite*; *politeness* supposes *civility* and something in addition. *Civility* is confined to no rank, age, condition, or country; all have an opportunity with equal propriety of being *civil*, but not so with *politeness*, that requires a certain degree of equality, at least the equality of education; it would be contradictory for masters and servants, rich and poor, learned and unlearned, to be *polite* to each other. . . . *Civility* is rather a negative than a positive quality, implying simply the absence of rudeness. *Politeness* requires positive and peculiar properties of the head and heart, natural and acquired. . . . The term *civil* may be applied figuratively, but *politeness* is a characteristic of real persons only."

(2) He thus distinguishes between *civil*, *obliging*, and *complaisant*: "*Civil* is more general than *obliging*; one is always *civil* when one is *obliging*, but one is not always *obliging* when one is *civil*; *complaisance* is more than either, it refines upon both; it is a branch of *politeness* (v. *Civil*, *polite*). *Civil* regards the manner as well as the action, *obliging* respects the action, *complaisant* includes all the circumstances of the action; to be *civil* is to please by any word or action; to be *obliging* is to perform some actual service; to be *complaisant* is to do that service in the time and manner that is most suitable and agreeable; *civility* requires no effort; to be *obliging* always costs the agent some trouble; *complaisance* requires attention and observation; a person is *civil* in his reply, *obliging* in lending assistance, *complaisant* in his attentions to his friends. One is habitually *civil*; *obliging* from disposition; *complaisant* from education and disposition; it is necessary to be *civil* without being free, to be *obliging* without being officious, to be *complaisant* without being affected." (Crabb: *Eng. Synon.*)

civil-architecture, s. The branch of architecture which is employed in the construction of buildings for the purposes of civil life, such as private houses, warehouses, churches, &c., in distinction from military and naval architecture.

¶ For the different orders of architecture, see ORDER. See also COLUMN, CORINTHIAN, DORIC, IONIC, &c.

civil death, s. [CIVIL, B. 3. (2).]

civil-engineer, s. One who follows the art or science of civil-engineering.

civil-engineering, s. The science or art of constructing machinery for manufacturing purposes, constructions, and excavations, for general transit, as canals, docks, railroads, &c. It is so called in contradistinction to military engineering, which is confined to war. Other branches of engineering are *mechanical engineering* and *sanitary engineering* (q. v.).

***civil gown**, s. The dress of a citizen or civilian.

civil law, s. The law of a state, city, or country; appropriately the Roman law comprised in the Institutes, Code, and Digest of Justinian, and the Novel Constitutions. (Blackstone.) [ROMAN LAW.]

civil list, s.

I. In the United States:

*1. A list of the entire expenses of the civil government.

2. The revenue appropriated to support the civil government.

3. The officers of the civil government who are paid from the public treasury.

II. In England: The three meanings given above have become more limited in their extent till now they are confined to the list of expenses, the revenues and the dependents of the crown instead of the country.

¶ Originally it embraced the list of expenses of the crown, what now would be called the civil service, the army, the navy—everything.

civil remedy, s.

Law: That given to a person injured by action, as opposed to criminal prosecution.

civil servant, s. A non-military servant of the government.

civil service, s.

1. That branch of the public service which includes the non-military servants of the government.

2. The body of civil servants collectively.

civil-service estimates, s. Include the National expenses for Public Works; Salaries; Law; Education, Science and Art; Consular Service, Pensions and miscellaneous items.

civil-service examination, s. [See civil-service reform (*infra*) for definition and application of this term.]

civil-service reform, s. The appointment of a vast number of public servants devolving entirely upon the President of the United States and being subject to no regulation other than his will, had become a source of danger to the continuance of Republican institutions in this country. To meet such a condition of affairs and to render the petty office holder independent of party affiliations for tenure of his office, the people of the country demanded a reform in the method of supplying the numerous petty positions to be filled by government appointees. In accordance with this demand an arrangement was made whereby candidates for government positions are subject to competitive examinations, and the fittest candidate (irrespective of party affiliation) is supposed to receive the appointment to the position to be filled, and to remain in such position during good behavior. In theory at least this plan divorces politics from the civil service.

civil state, s. The entire body of the laity or citizens, as distinct from the military, ecclesiastical, and maritime. (Craig.)

civil suit, s.

Law: A suit for a private claim or injury.

***civil-suited**, a. Modestly, not gaudily arrayed.

"Thus, night, oft see me in thy pale career,

Till *civil-suited* morn appear."

Milton: Il Penseroso, 121.

civil war, s. A war between citizens of the same country.

¶ The passage of the Rubicon by Julius Cæsar, which commenced the civil war between him and Pompey, took place in January, 49 B. C. The battle of Pharsalia, which decided its issue, was on August 9, 48 B. C. The assassination of Julius Cæsar, which led to the immediately succeeding civil war, was on March 15, 44 B. C., and the sea-fight of Actium, which finally decided its issue, on September 2, 31 B. C.

In England, the first battle of St. Albans, the earliest in the wars of the Roses, was in A. D. 1455. That civil war may be supposed to have extended to the battle of Bosworth, August 22, 1485, and the accession of Henry VII., in whom the Houses of Lancaster and York, the antagonists in the late strife, were united. The first battle in the civil war which produced the

Commonwealth and the Cromwellian Protectorate was that of Edgehill, October 23, 1642; that of Naseby, which decided the issue, was on June 14, 1645, though the struggle cannot be said to have finally terminated earlier than the accession of Charles II., who was proclaimed king on May 8, 1660.

In this country, the capture of Fort Sumter, at Charleston, in South Carolina, by the Secessionists, the first military operation in the American civil war, was on April 13, 1861. The surrender of General Lee to General Grant, on April 9, 1865, and that of General Kirby Smith, commandant of Galveston, on June 5 of the same year, were its final scenes.

civil year, s. The legal year, or annual account of time which a government appoints to be used in its own dominions, as distinguished from the solar year, measured by the revolution of certain of the heavenly bodies. (Whewell.)

çiv-vil'-i-an, s. & a. [CIVIL.]

*3. A civil office; one pertaining to a civilized state.

"If there were nothing in marriage but mere *civility*, the magistrate might be met to be employed in this service."—*Bp. Hall: Cases of Conscience*, iv. 8.

4. Politeness, courtesy, good breeding, and manners toward others.

5. (Pl.): Acts of politeness and courtesy; the rules and practice of polite society.

"Love taught him shame; and shame, with love at strife,
Soon taught the sweet *civilities* of life."

Dryden: Cymon and Iphigenia, 133-4.

¶ For the difference between *benefit*, *favor*, *kindness*, and *civility*, see BENEFIT.

†çiv'-i-li-zā-ble, a. [Eng. *civiliz(e)*; -able.] Capable of being civilized. (Chambers.)

çiv-il-i-zā'-tion, s. [Fr. *civilisation*.]

I. Ordinary Language:

1. The act or process of civilizing.

¶ Not used in Johnson's time in the sense in which we now employ it. The only meaning assigned to it in the edition of his dictionary published in 1773, the last which received his corrections, is the legal definition given below. [II.]

"It had the most salutary consequences in assisting that general growth of refinement and the progression of civilization."—*T. Warton*.

2. The state of being civilized; refinement.

" . . . occupied with taming the wild earth, and performing the functions of pioneers of civilization . . ."—*Sir G. C. Lewis: On the Influence of Authority in Matters of Opinion*, ch. iii.

¶ Civilization consists in what may be broadly called culture in a nation; and a nation may be considered as civilized when a large proportion of those belonging to it have their intellectual and moral faculties and all their higher nature in large measure developed and becoming increasingly so with the advance of years. Before this can take place, a considerable amount of material prosperity must have been achieved, between which and the culture already described there are continual action and reaction.

At present barbarism, semi-civilization, and civilization are seen contemporaneously existing in the world, and the question suggests itself, How has

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sire, sîr, marîne; gô, pôť, or, wôre, wolť, wôrť, whô, sôn; mûte, cûb. cûre. unite, cûr, rûle, fûll; trŷ, Sŷrian. æ, œ = ē: ey = â. qu = kw.

this phenomenon been produced? In solving it, inquiry needs to be made as to the original state of man. Individuals can move backward as well as forward in culture, and it is axiomatic that those aggregations of individuals called nations or races can do the same. The mass of men in this country believe Scripture to have decided that the present population of the earth has sprung from Noah's family, and that he and his household were far removed from barbarism. The contrary view that the original state of man was a barbarous one, an opinion generally held by the old Romans, has of late been revived, and has been embraced by many Darwinians and others.

Regarding progression in material prosperity, certain stages tend to occur: (1) a barbarous one, in which one feeds on roots, fruits, and fishes, when these last can be caught without effort; (2) the state of a hunter; (3) that of the shepherd, in which, to avoid the uncertainty of the result in hunting, wild animals are domesticated; (4) the agricultural state, and (5) that of manufactures and commerce. Regarding mental advance, M. Auguste Comte, in publications issued between 1830 and 1854, maintained that nations necessarily passed through a theological, a metaphysical, and a positive or scientific stage. Littfré in France (1845), and Buckle in England (1857-1861), ably and earnestly supported the same view.

***II. Law:** A law, act of justice, or judgment, which renders a criminal process civil; which is performed by turning an information into an inquest, or the contrary. (Harris.)

¶ For the difference between *civilization* and *cultivation*, see CULTIVATION.

That marks the daughters of the great."

Scott; Rokeby, v. 25.

3. To seek for, not as a right or as a due, but as promised or assured.

"I *claim* the promise of her heavenly picture."

Shakespeare.

¶ Crabb thus distinguishes between to *ask* or *ask for*, to *claim*, and to *demand*. "Ask, in the sense of *beg*, is confined to the expression of wishes upon the part of the *asker* without involving any obligation on the part of the person *asked*; all granted in this case is voluntary or complied with as a favor; but *ask for*, in the sense here taken, is involuntary, and springs from the forms and distinctions of society . . . To *ask for* denotes simply the expressed wish to have what is considered as due; to *claim* is to assert a right or to make it known; to *demand* is to insist on having without the liberty of a refusal . . . *Asking for* supposes a right not questionable; *claim* supposes a right hitherto unacknowledged; *demand* supposes either a disputed right [not always] or the absence of all right, and the simple determination to have." (Crabb: Eng. Synon.)

clāim, ***clame**, ***clayme**, s. [O. Fr. *claim*; Low Lat. *clameum*, from Lat. *clamo*=to call or cry out.]

"The brightest gold that e'er I saw

Was grippit in the *clams*."

Shirrefs: Poems, p. 360.

clān, ***clach-in** (*ch* guttural), ***clahynnhe**, *s.* [Gael. *clann*=offspring, descendants; Ir. *cland*, *clann*=children, a clan.]

1. A tribe or number of families, bearing the same surname, claiming to be descended from the same ancestor, and united under a chieftain representing that ancestor. The clan system is essentially the same as that existing among the Arabs, the Tartars, and tribes similarly situated. The clan system was said to have sprung up in Scotland about 1008, while Malcolm II. was reigning, but it may have been of greater antiquity. In the Act 20 Geo. II. c. 43, passed in 1747, the legal authority of the chiefs over their followers was abolished as a punishment for the part which the former had taken in the insurrection which ended in 1745 at Culloden. While the clans flourished they were divided into two, the clans of the borders and those of the highlands.

*2. Any number of persons united in a common cause.

"They around the flag
Of each his faction, in their several *clans*,
Swarm populous, unnumbered."

Milton: P. L., ii. 901.

*3. A body or sect of persons, a clique (used in contempt).

"Each bumpkin of the *clan*,
Instead of paying what he owes,
Will cheat him if he can."

Cowper: The Yearly Distress.

†**clān**, *v. t.* [CLAN, *s.*] To join or band together for a common purpose. (*Marvel: Rehearsal Transposed*.)

***clān'-cū-lar**, *a.* [Lat. *clancularius*.] Clandestine, secret, obscure.

"Let us withdraw all supplies from our lusts, and not by any secret reserved affection give them *clancular* aids to maintain their rebellion."—*Decay of Piety*.

***clān'-cū-lar-lŷ**, *adv.* [Eng. *clancular*; -ly.] In a clandestine or secret manner.

"Judgments should not be administered *clancularly*, in dark corners, . . ."—*Barrow: Sermon*, ii. xx.

clān-dēs-tī-nā, *s.* [Lat., fem. of *clandestinus*=secret, hidden.]

1. *Bot.*: A genus of plants, order Orobanchaceæ.

2. *Chem.*: A crystalline substance extracted by ether from the flowers of *Clandestina rectiflora*, a plant growing in the lower Pyrenees. It is insoluble in water and dilute acids, but is soluble in alcohol and in ether.

clān-dēs-tīne, *a.* [Fr. *clandestin*; Lat. *clandestinus*=clandestine, secret; which Skeat suggests is for *clam-dies-tinus*=hidden from daylight: *clam*=secretly.] Secret, hidden, private, underground; kept back from public view or knowledge for a bad purpose.

¶ Crabb thus distinguishes between *clandestine* and *secret*: "*Clandestine* expresses more than *secret*. To do a thing *clandestinely* is to elude observation; to do a thing *secretly* is to do it without the knowledge of any one: what is *clandestine* is unallowed, which is not necessarily the case with what is *secret*. With the *clandestine* must be a mixture of art; with *secrecy*, caution and management are requisite: a *clandestine* marriage is effected by a studied plan to escape notice; a *secret* marriage is conducted by the forbearance of all communication." (*Crabb: Eng. Synon.*)

clān-dēs-tīne-lŷ, *adv.* [Eng. *clandestine*; -ly.] In a clandestine manner, secretly, privately, not openly.

clān-dēs-tīne-nēss, *s.* [Eng. *clandestine*; -ness.] The quality of being clandestine; secrecy, privacy, concealment.

***clān-dēs-tīn'-ī-tŷ**, *s.* [Lat. *clandestinus*=clandestine.] Clandestineness, secrecy, concealment.

"Clandestinity and disparity do not void a marriage, but only make the proof more difficult."—*Ep. Stillfleet: Miscell. Speech* in 1682, p. 87.

Her.: The title of the second king-at-arms, ranking next to Garter king-at-arms. His duties comprise the arrangement and marshaling of the funerals of all baronets, knights, and esquires south of the river Trent. He was formerly called Surroy (southern king) as opposed to Norroy, the northern king-at-arms.

"All the fantastic pomp of heraldry was there, *Clarenceux* and *Norroy*, *Portcullis* and *Rouge Dragon*, the trumpets, the banners, the grotesque coats embroidered with lions and lilies."—*Macaulay: Hist. Eng.*, ch. x.

Cläre, s. [For etym. see def.]

Church History:

1. *Sing.*: A nun belonging to the order of St. Clare [2].

2. *Pl.*: A sisterhood founded by St. Clare and St. Francis d'Assissi in Italy about 1212. Pope Urban, in the same century, modified their original title, on which account they were sometimes called Urbanists. They were sometimes called Poor Clares. Blanch, queen of Navarre, wife of the Earl of Lancaster, brought them to England about 1293. After this they acquired the additional name of *Minoreesses*, as the house without Aldgate in which they were settled that of the *Minories*.

clăr'-et, s. & a. [Fr. *clair*, from *clair*; Lat. *clarus*=clear; Ital. *clareto*.]

A. As substantive:

1. *Lit.*: A name originally given to wines of a light-red color, but now applied in England to the red wines imported from France, chiefly from Bordeaux. These wines vary in composition according to the locality, season, and age, but the produce of each vineyard usually retains its own peculiar characteristics. The most esteemed are those produced at the vineyards of Lafitte, Latour, Chateau Margaux, and others. Many of the clarets formerly sold in this country were nothing more than the *vin ordinaire* used by the French peasants and working classes, but since the development of the California grape industry, as good domestic claret can be obtained in this country as anywhere. A genuine claret should contain from 16 to 20 per cent. of proof-spirit. Fictitious clarets were sometimes prepared by mixing a rough cider with a cheap French wine, and coloring with cochineal, logwood, elderberry, hollyhock, indigo, litmus, red cabbage, beet-root, or ros-aniline. To detect these coloring matters a red wine has been artificially prepared. Make a jelly by dissolving five grammes of gelatine in 100 cubic centimeters of warm water, and pour it into a square flat mold. From this cake of jelly cubes about three-quarters of an inch square are cut with a sharp wet knife, and are immersed in the wine; they are taken out after twenty-four to forty-eight hours, washed slightly, and sections cut in order to see how far the coloring matter has penetrated. If the wine is pure, the color will be confined to the edges of the slice, or will not have penetrated more than one-eighth of an inch. The coloring matters mentioned above permeate rapidly, and color the jelly. For other adulterations of wine, &c., see *Blyth's Manual of Practical Chemistry*.

" . . . hangings on the walls, and claret in the cellars."—*Macaulay: Hist. Eng.*, ch. xvi.

2. *Fig.*: Blood. (*Slang*.)

"If you spill one drop of his claret."

†**B. Intrans.:** To cling.

"Direct

The *clasping* ivy where to climb."

Milton: P. L., ix. 216.

† Crabb thus distinguishes between to *clasp*, to *hug*, and to *embrace*: "All these terms are employed to express the act of inclosing another in one's arms: *clasp* marks the action when it is performed with the warmth of true affection; *hug* is a ludicrous sort of *clasping*, which is the consequence of ignorance or extravagant feeling; *embrace* is simply a mode of ordinary salutation. . . . In the continental parts of Europe, embracing between males as well as females is universal on meeting after a long absence, or taking leave for a length of time." (*Crabb: Eng. Synon.*)

clasped, pa. par. or a. [CLASP, v.]

clasp-ēr, s. [Eng. *clasp*; -er.]

I. Ord. Lang.: One who or that which clasps or embraces anything.

class, s. & a. [Fr. & Ital. *classe*; Sp. *clase*, from Lat. *classis*=a number of people, a fleet.]

A. As substantive:**I. Ordinary Language:**

1. A number of persons ranked together as being distinguished by the same characteristics, or coming under the same natural conditions and circumstances.

"Segrais has distinguished the readers of poetry, according to their capacity of judging, into three *classes*."—Dryden.

2. A number of persons temporarily classed together for the purpose of instruction, or as the result of examination. [CLASS-MAN.]

3. A variety; a kind or description.

"She had lost one *class* of energies, and had not yet acquired another."—Macaulay: *Hist. Eng.*, ch. iv.

II. Technically:

1. *Roman Archæol.*: Any one of six divisions of the people made by Tullius Servius, about B. C. 573.

2. *Eccles.*: The same as CLASSIS (q. v.).

3. *Math. Geom.*: The class of a curve is the number of tangents which can be drawn to it from any point. Thus, if five tangents can be drawn to the curve, it is said to be of the fifth class.

4. *Zoöl. & Bot.*: See CLASSIFICATION.

¶ Crabb thus distinguishes between *class*, *order*, *rank*, and *degree*: "*Class* is more general than *order*; *degree* is more specific than *rank*. *Class* and *order* are said of the persons who are distinguished; *rank* and *degree* of the distinction itself; men belong to a certain *class* or *order*; they hold a certain *rank*, they are of a certain *degree*. Among the Romans all the citizens were distinctly divided into *classes* according to their property; but in the modern constitution of society *classes* are distinguished from each other on general, moral, or civil grounds; there are reputable or disreputable *classes*; the laboring *class*, the *class* of merchants, mechanics, &c. *Order* has a more particular significance; it is founded upon some positive civil privilege or distinction; the general *orders* are divided into higher, lower, or middle. . . . [Though we say the lower *orders* or *classes*, yet the expression the upper *classes* and the middle *classes* is the common one, and the term *orders* is rarely used of them.] *Rank* distinguishes one individual from another; it is peculiarly applied to the nobility and the gentry, although every man in the community holds a certain *rank* in relation to those who are above or below him. *Degree*, like *rank*, is applicable to the individual; but only in particular cases; literary and scientific *degrees* are conferred upon superior merit in different departments of science. There are likewise *degrees* in the same *rank*, whence we speak of men of high and low *degree*." (Crabb: *Eng. Synon.*)

B. As adj.: (See the compounds.)

class-fellow, s. One who is for the time a member of the same class or group united for purposes of instruction.

class-man, s. A term in use at Oxford University, England, for one who is placed by the examiners in an honor class, as opposed to passmen, who are not classified at all.

class-mate, s. A class-fellow.

"He was always among the leaders of his *class-mates*."—Trans. Amer. Philos. Soc., 1873, vol. xiii, p. 183.

class, v. t. & i. [CLASS, s. In Fr. *classer*.]

A. Transitive:

1. To arrange in a class; to group according to different characteristics or natural distinctions.

"I considered that, by the *classing* and methodizing such passages, I might instruct the reader."—Arbuthnot: *On Coins*.

2. To form into or place in a class, or number of persons temporarily associated for purposes of instruction.

3. To assign a certain standing or position to, after examination.

***B. Intrans.:** To be grouped or arranged in a class; to fall naturally into a certain division or group.

¶ Crabb thus distinguishes between to *class*, to *arrange*, and to *range*: "The general qualities and attributes of things are to be considered in *classing*; their fitness to stand by each other must be considered in *arranging*; their capacity for forming a line is the only thing to be attended to in *-ranging*. *Classification* serves the purposes of science; *arrangement* those of decoration and ornament; *-ranging* those of general convenience: men are

classed into different bodies according to some certain standard of property, power, education, occupation, &c.; furniture is *arranged* in a room according as it answers either in color, shade, convenience of situation, &c.; men are *ranked* in order whenever they make a procession. . . . When applied to spiritual objects, *arrangement* is the ordinary operation of the mind, requiring only methodical habits: *classification* is a branch of philosophy which is not attainable by art only; it requires a mind peculiarly methodical by nature, that is capable of distinguishing things by their generic and specific differences; not separating things that are alike; nor blending things that are different: books are *classed* in a catalogue according to their contents; they are *arranged* in a shop according to their size or price; they are *ranked* in a counter for convenience." (Crabb: *Eng. Synon.*)

classed, pa. par. or a. [CLASS, v.]

†class-ī-ble, a. [Eng. *class*; -able.] Capable of being classed or assigned to a certain group or division. (*Eclect. Rev.*)

cläss'-īc, a. & s. [Fr. *classique*; Ital. *classico*; Lat. *classicus*=belonging to a *classis* or division of the Roman people, and especially to the first division. The Roman citizens were divided into several classes, a man of the highest of all being emphatically called *classicus*, that is, of the class pre-eminently so designated—the highest in the scale. (*Trench: On the Study of Words*, pp. 196-7.)]

cläss'-ī-çīst, s. [Eng. *classic*; -ist.] One skilled or learned in the classics. (*Hallam*.)

cläss'-ī-fī-ā-ble, a. [Eng. *classify*; -able.] Capable of being classed or arranged according to classes.

"These changes are *classifiable* as the original sensations are."—J. S. Mill: *System of Logic*, i. 295.

cläss'-īf-īc, a. [Lat. *classis*=a class, and *facio* (pass. *fio*)=to make.]

1. Consisting of or constituting a class or division.

2. Relating to classification.

cläss'-īf-ī-cā-tion, s. [Formed on analogy from *classif* (q. v.).]

1. *Ord. Lang.*: The act of bringing into or arranging in classes or orders.

"In the *classification* of the citizens, the great legislators of antiquity made the greatest display of their powers."—*Burke*.

2. *Nat. Science*: Animals, plants and minerals are carefully classified by naturalists. Though the use of the term classification may seem to imply that these are placed in classes only, yet these are only one of the numerous designations of the several categories in which they are placed. Linnæus arranged all natural objects in the earth under the head *Imperium Naturæ* (the Empire of Nature). He divided it into *Regnum animale* (the Animal Kingdom), *Regnum vegetabile* (the Vegetable Kingdom), and *Regnum lapideum* (the Stony or Mineral Kingdom). Each is next divided by him into *Classes* (Classes), *Ordines* (Orders), *Genera* and *Species*, what are now called varieties being occasionally discriminated. His categories, larger or smaller, were consequently seven: Empire, Kingdom, Class, Order, Genus, Species, Variety. The expression Empire of Nature is now rarely used, though it is tacitly assumed. Subordinate to it is Kingdom, then Sub-kingdom, Class follows next, then in some cases Sub-class, then Order, occasionally Sub-order or Tribe, and, if necessary, Sub-tribe; then Family, Sub-family, Genus; if necessary, Sub-genus, then Species, and finally Variety or Sub-species, and if need be Races and Sub-varieties. Synonymous terms, such as group, section, sub-section, &c., are sometimes used in lieu of some of those given above. In our terminology zoölogical families are generally made to end in *idæ*, and sub-families in *inæ*, and in botany alliances end in *ales* and orders as a rule in *aceæ*. Uniformity in such terminology is very desirable. The classification of animals has been brought more nearly to perfection than that of plants.

¶ For the difference between natural and artificial systems of classification, see SYSTEM. For particular systems, now obsolete, which have received names, see BINARY and QUINARY. As bearing on present views of the philosophy of classification, see also DARWINISM, SPECIES, &c.

In classifying animals or plants, care must be taken to distinguish between *analogy* and *affinity* (see these words). It is only when there is affinity between two species, two genera, &c., that they should be put together. A linear classification is not conformable to nature. For the binomial method of naming objects of natural science, see NOMENCLATURE.

cläss'-ī-fī-cā-tōr-ŷ, a. [Formed by analogy from Eng. *classification* (q. v.).] Pertaining to classification.

" . . . but to inquire what is the value of the differences between them under a *classificatory* point of view."—*Darwin: Descent of Man* (1871), pt. i., ch. vii., vol. i., p. 214.

cläss'-ī-fīed, pa. par. or a. [CLASSIFY.]

cläss'-ī-fī-ēr, s. [Eng. *classify*; -er.] One who classes, or arranges things in classes or divisions.

"If man had not been his own *classifier*, he would never have thought of founding a separate order for his own reception."—*Darwin: Descent of Man* (1871), pt. i., ch. vi., vol. i., p. 191.

cläss'-ī-fŷ, v. t. [Lat. *classis*=a class, and *facio* (pass. *fio*)=to make.]

clāv'-ī-čēps, s. [Lat. *clava*=club; *caput*=a head.]

Bot.: A genus of Ascomycetous Fungi, also called Cordiceps (q. v.). *Claviceps purpurea* is the Ergot of grasses. An ascomycetous fungus is one which has its fruit in small *asci* or hyaline sacs.

clāv'-ī-chord, **clāv'-ī-cord**, s. [Fr. *clavicorde*; Ital. *clavicordio*, from Lat. *clavis*=a key, and *chorda*=a chord.]

Music: A keyed and stringed instrument, not now in use, being superseded by the pianoforte; a clari-chord. [CLARICHORD.]

"Its form is that of a small pianoforte: it has no quills, jacks, or hammers. The strings are all muffled . . . and the tone is produced by little brass wedges, placed at the ends of the keys, which, when pulled down, press against the middle of the strings, acting as a bridge to each. . . . We had in 1772 the extreme pleasure of hearing the incomparable Emanuel Bach touch his favorite *clavicord* at Hamburg."—Rees: *Cyclopædia*.

clāv'-ī-cle, s. [Lat. *clavicula*, dimin. of *clavis*=a key.]

Anat.: The collar-bone. It extends transversely outward, with an inclination backward from the summit of the sternum to the acromion process of the scapula. It connects the upper limb with the trunk. The corresponding bone in birds is the one popularly called the Merrythought.

"The scapula and *clavicle* are the media through which the bones of the arm are united to the trunk."—Todd & Bowman: *Physiol. Anat.*, vol. i., ch. vi., p. 147.

"In those animals that employ the anterior extremity only as an instrument of progressive motion there is no *clavicle*: hence this bone is absent from the skeletons of Pachydermata, Ruminantia, Solipeda, and the motions of the shoulder are only such as may be required for the flexion and extension of the limb."—*Ibid.*

clāv'-ī-cornſ, **clāv'-ī-cōr-nēs**, s. pl. [From Lat. *clava*= . . . a club, and *cornu*=a horn.]

Entom.: The name given by Latreille to a subsection of the section Pentamera. The antennæ are thickened at the end, or club-shaped. There have been included under it the families Scydmenidae, Histeridae, Silphidae, Scaphididae, Nitidulidae, Dermestidae, and Byrrhidae (q. v.).

clā-vīc'-ū-lar, a. [From Lat. *clavicul(a)*=the collar-bone, and Eng. suff. -*ar*.]

Anat.: Pertaining to the clavicle; as the *clavicular artery*.

"The posterior (*clavicular*) nerves pass downward and outward over the outer third of the clavicle."—N. Ward, in Todd's *Cyclopædia of Anat. and Physiol.*

***clāv'-ī-cule**, s. [Lat. *clavicula*, dimin. either from *clavis*=a key, or *clavus*=a club.]

Conchol.: The upper portion of a spiral shell.

clāv'-ī-čŷ-līn'-dēr, s. [Lat. *clavis*=a key; Eng. *cylinder*.]

Music:

1. An instrument in the form of tubes or cylinders of glass, invented by Chladni.

2. An instrument made of plates of glass of graduated lengths, the tone of which was produced by hammers set in motion by a key-board. (Stainer & Barrett.)

clāv'-ī-čŷm'-bal, s. [Lat. *clavis*=a key, and Eng. *cymbal*.]

Music: An instrument described by Prætorius in the sixteenth century. It resembled a prostrate harp, or a great piano without legs. Its compass was four octaves, with nineteen notes in each octave. (Knight.)

clāv'-ī-čŷ-thēr'-ī-ūm, s. [Lat. *clavis*=a key, and *cithara*=a lute.]

Music: An upright musical instrument used in the sixteenth century. It is believed to have been akin to the harpsichord. (Stainer & Barrett.)

clā-vī-dæ, s. pl. [Lat. *clava* (q. v.), and fem. pl. adj. suff. -*idæ*.]

Zoöl.: A family of Hydroid Polypes, containing species which have the polypes claviform or fusiform with scattered tentacula. (Griffith & Henfrey.) [CLAVA.]

clāv'-ī-ēr, s. [Fr. *clavier*.]

Music: The key-board of an organ, harmonium, or pianoforte.

clāv'-ī-form, s. [Lat. *clava*=a club; *forma*=form.] Club-shaped, clavate.

***clāv'-ī-gēr** (1), s. [Lat. *clavis*=a key; *gero*=to carry.] One who carries the keys of any place; a warder.

"The prince of that bottomless pit, whereof they were the *clavigers*, held their bridles while they rode in procession."—Christian Religion's Appeal to the Bar of Reason, p. 58.

***clāv'-ī-gēr** (2), s. [Lat. *clava*=a club; *gero*=to carry.]

1. **Ord. Lang.**: One who carries a club; a club-bearer.

2. **Entom.**: A genus of Coleoptera, family Pselaphidae.

clāv'-īg'-ēr-ōūs, a. [Lat. *clava*=a stick, a club, and *gero*=to carry.]

Nat. Science: Club-bearing.

clāv'-ī-glīs-sān'-dō, s. [Ital.]

Music: An instrument with a key-board, invented by C. W. Le Jeune, which is intended to combine the properties of the violin and small organ—of the violin in obtaining a slide or portamento, and the organ in the capability of imitating the tones of various wind instruments. (Stainer & Barrett.)

clāv'-ī-ōle, s. [Lat. *clavis*=a key, and Eng. *viol*; Ital. *viola*.]

Music: A finger-keyed viol. (Knight.)

clāv'-ī-pālps (Eng.), **clāv'-ī-pāl'-pī** (Lat.), s. pl. [Lat. *clava*= . . . a club, and *palpi*, pl. of Mod. Lat. *palpus*=a feeler.]

Entom.: Latreille's name for a family of coleopterous insects, which have the terminal joint of the palpi large. The antennæ constitute a perfoliate club. Genera *Erotylus*, *Phalacrus*, &c.

***clav-o-let**, s. [A dimin. formed from Lat. *clava*=a club.]

Entom.: The club-shaped end of the antennæ of beetles.

clāv'-ū-lā, s. [Lat. dimin. of *clava*=a club.]

Bot.: The receptacle of certain fungi.

clāv'-ūs, s. [Lat. = a nail.] The disease produced in grains of rye, &c., when they change to a brown or blackish color by the action of the early state of the parasitical fungus *Cordiceps* (or *Claviceps*) *purpurea*. [ERGOT.] (Ogilvie.)

clāv'-ŷ, **clāv'-ēl**, s. [Fr. *claveau*=the center-piece of an arch.] A mantel-piece.

clāw, ***clawe**, ***clauwe**, ***clau**, ***cle**, ***clée**, ***clowe**, ***klee**, s. [A. S. *clawu* (pl. *clawe*), *clā*, *clēa*, *clēo*; O. H. Ger. *chlawa*, *chlōa*; M. H. Ger. *klā*; O. S. *klawa*; O. Fris. *klewe*; Dut. *klauw*; Dan. *klo*; Sw. *klo*; Ger. *klawe*, cogn. with *cleave* (q. v.).]

A. Ordinary Language:

I. Literally:

1. The sharp-hooked nail of a bird or beast.

"Claw or cle of a beste. *Ungula*."—*Prompt. Parv.*

" . . . his hairs were grown like eagles' feathers, and his nails like birds' claws."—Dan. iv. 33.

2. The whole foot of any animal furnished with sharp nails; the pincers or holders of a crab, lobster, &c.

"Alle beestis that hav the clec dyuydid."—*Wycliffe*: *Levit.* xi. 3.

"He over him did hold his cruell *clawes*,
Threatning with greedy gripe to doe him dye."
Spenser: *F. Q.*, II. vii. 27.

II. Figuratively:

1. Anything resembling the claw of a bird or beast.

[CLAW-HAMMER.]

2. The hand (used in contempt).

3. A grasp or clutch.

"What's justice to a man, or laws,
That never comes within their *claws*?"

Butler: *Hudibras*, pt. ii., c. iv.

B. Bot.: The narrow part of a petal which takes the place of the foot-stalk of a leaf, of which it is a modification.

claw-bar, s. A lever or crowbar with a bent bifurcated claw for drawing spikes.

claw-hammer, s.

1. **Carpentry**:

(1) A hammer with a bent and split peen to draw nails.

(2) A little split tool for drawing tacks.

2. **Nautical**, &c.:

(1) The bent and bifurcated end of a crowbar.

(2) A bent hook on the end of a hoisting chain; a grapple for suspending tackle.

3. **Locksmithing**: A spur or talon projecting from a bolt or tumbler.

claw-wrench, s. A wrench having a loose pivoted jaw which binds of itself.

claw, *clawen, *clawe (pa. tense *clew, *clewe, clawed), v. t. & i. [A. S. *clavian*; O. H. Ger. *klawjan*; Dut. *klaauwen*; Dan. *klæ*.]

A. Transitive:

I. Literally:

1. To tear or scratch with the claws or nails.

"He [the cat] wol greven us alle,
Cracchen us or clawen us."

Langland: *P. Plowman*, 306.

*2. To scratch, to tickle.

"Right as a man is esed for to feele
For ach of hed to clawen hym on his heele."

Chaucer: *Troilus*, iv. 699.

"Prince: Look, whether the withered elder hath not
his poll claw'd like a parrot."—Shakesp.: *Hen. IV.*, Pt. II., ii. 4.

*3. To inflict corporal punishment on.

II. Figuratively:

*1. To pull away or off, to get rid of, to tear away.

"I am afraid we shall not easily claw off that name."—South.

*2. To flatter, to curry favor with. [CLAWBACK.]

"Rich men they claw, soothe up and flatter,
The poor they contemn and despise."—Holland.

*3. To canvass strictly, to examine thoroughly, to pull to pieces.

"They for their own opinions stand fast,
Only to have them clawed and canvast."

Butler: *Hudibras*, pt. ii., c. ii.

†4. To grasp, to seize.

"For Age with stealing steps
Hath claw'd me with his crutch."

Old Ballad in Lord Surrey's Poems.

B. Intransitive:

*1. *Lit.*: To grasp at, as though trying to seize with the claws; to clutch at.

Fig.: To clutch at, to grasp after.

† *Claw me and I'll claw thee*: Help or stand by me and I will stand by thee.

*To claw away: To rail at, to abuse, to blame.

"You thank the place where you found money; but the jade Fortune is to be clawed away for 't, if you should lose it."—L'Estrange.

To claw favor: To curry favor. (Scott.)

To claw off:

*1. *Ord. Lang.*: To revile, to blame, to rail at.

"Mr. Baxter takes great pains to unite the classical and congregational brethren, but claws off the episcopal party as a set of Cassandrian priests."—Bp. Nicolson: *To Mr. Yates*.

2. *Naut.*: To turn and beat to windward to avoid drifting on a lee shore.

†To claw one's back:

1. To flatter or court one; to curry favor with any one.

2. To promote one's interests. (Ross.)

To claw upon: To flatter, to court.

To claw up one's mittens: To give one the finishing stroke. (Scott.)

*claw'-bäck, *claw-backe, s. & a. [Eug. *claw*; back.]

A. As subst.: A flatterer, a sycophant.

"And I had clawbackes even at court full rife,
Which sought by outrage golden gaines to winne."

Mirror for Magistrates, p. 73.

B. As adj.: Flattering, wheedling.

"Like a clawback parasite."—Bp. Hall: *Sat.*, vi. 1.

*claw'-bäck, v. t. [CLAWBACK, s.] To flatter. (Warner.)

clawed, pa. par. & a. [CLAW, v.]

A. As pa. par.: (See the verb.)

B. As adj.: Bearing or furnished with claws.

"Among quadrupeds, of all the clawed, the lion is the strongest."—Grew: *Cosmologia*.

claw'-ër, s. [Eng. *claw*; -er.]

1. One who claws.

*2. A flatterer.

"The scopes of all such clawers."—Davies: *Muse's Teares*, p. 9. (Davies).

claw'-ing, pr. par., a. & s. [CLAW, v.]

A. & B. As pr. par. & particip. adj. In senses corresponding to those of the verb.

C. As subst.: The act of tearing or scratching with the claws; the act of flattering or wheedling; flattery.

clawing-off, s.

Naut.: The act or process of beating to windward to avoid drifting on a lee shore.

*claw'-ing-lý, adv. [Eng. *clawing*; -ly.] In a flattering or parasitical manner.

claw'-kër, s. [Etym. doubtful.]

Knitting-machine: A feed-pawl or hand for a ratchet.

claw'-less, a. [Eng. *claw*; -less.] Devoid of or unprovided with claws.

*clawre, s. [CLAW, s.] A claw.

"With fulgrymme clawres, that were croked and kene."
E. Eng. Allit. Poems; Cleanness, 1696.

claw'-sick, a. [Eng. *claw*, and *sick*.] Suffering from clawsickness, or foot-rot.

claw'-sick-ness, s. [Eng. *clawsick*; -ness.] The foot-rot, a disease in cattle and sheep.

clay, *clai, *clei, *clei, s. & a. [A. S. *clæg*; O. Fris. *klai*; Dan. *klæg*, *kleg*; Ger. & Dut. *klei*. Cogn. with *clog* and *cleave*.]

A. As substantive:

I. Ordinary Language:

1. *Lit.*: Any earth which possesses sufficient ductility, when kneaded up with water, to be fashioned like paste by the hand or by the potter's lathe. (Lyll.) Clays when burned acquire a siliceous hardness, as in the manufacture of bricks, tiles, and earthenware. Clays which form infusible bricks are called Fire-clays.

"Clays are earths firmly coherent, weighty and compact, stiff, viscid, and ductile to a great degree while moist; smooth to the touch, not easily breaking between the fingers, nor readily diffusible in water; and when mixed, not readily subsiding from it."—Hill: *On Fossils*.

2. Figuratively:

Poetry:

(1) Earth in general; the terrestrial element.

"Why should our clay

Over our spirits so much sway?"—Donne.

(2) The human body dead; a corpse.

"And, without sorrow, will this ground receive
That venerable clay."

Wordsworth: *Excursion*, bk. vii.

(3) The human body alive; human nature.

"So man and man should be;

But clay and clay differs in dignity."

Shakesp.: *Cymbeline*, iv. 2.

II. Technically:

1. *Min.*: Clay is composed of hydrous silicate of aluminum, usually with a mechanical admixture of sand, iron oxides, and other substances. In the earlier mineralogies clay figured under that simple name as a mineral genus with many species under it, or as a species with many varieties. Thus in the second edition of Phillips' "Mineralogy" eighteen minerals figure as kinds of clay. In the fourth edition (1837)—that by Robert Allan, F.R.S.E., &c.—these are reduced to thirteen, viz: (1) Slate-clay or shale, (2) Adhesive Slate, (3) Polishing Slate, (4) Lithomarge, (5) Fuller's Earth, (6) Tripoli, (7) Bole, (8) Lemnian Earth, (9) Cimolite, (10) Mountain Meal, (11) Black Chalk, (12) Pipe-clay, and (13) Potter's Clay. In Dana, clay of different kinds figures simply as a synonym of various minerals. A great many minerals have more or less of alumina in their composition; its presence may often be detected by the peculiar smell which the mineral emits when breathed upon. The color of clay chiefly depends upon its containing the iron in a ferrous or a ferric state. Some of the dark-colored oolitic clays contain large quantities of a bituminous matter; these clays give off a most offensive odor when burnt into bricks.

2. *Chem.*: Clay is principally hydrous silicate of aluminum, $Al_2O_3 \cdot 2SiO_2 \cdot 2H_2O$. The purest clay is called Kaolin (q. v.). Clays generally contain much free silica, also calcium carbonate, calcium sulphate, oxide of iron, magnesium carbonate, and small quantities of alkaline salts, phosphates, and iron pyrites. Fire-clay is more refractory the greater the percentage of alumina which it contains in proportion to the fluxes (alkalies, alkaline earths, and ferrous oxide), and the smaller the quantity of the silica in proportion to the silicate of aluminum. Clay possesses the property of absorbing ammonia and organic matter, &c., from liquid sewage applied to its surface, and thus not only promotes the growth of agricultural crops, but also purifies water percolating slowly through it. (For analysis of Fire-clay, see Watts' *Dict. of Chem.*, 2d Supt., p. 335.)

3. *Geol. & Palæont.*: Clay is simply mud produced by the wearing down of rocks. If a stream bring down sediment into still water, the heavier bowlders fall first, the pebbles next, then gravel, after which little remains but fine silt, which makes the water look turbid for a time, but gradually settles down at the bottom, and becomes mud or clay. Clay suspended in water is precipitated by the addition of sea-water. Sterry Hunt made experiments on the water of the Mississippi. (*Chem. News*, xxx., p. 97.) Hence the deposits of mud formed at the entrance of the river into the Gulf of Mexico. When hardened into a thinly laminated rock, and perhaps colored black by carbonaceous matter, it becomes shale. A form of it called Fire-clay exists in the coal measures just beneath each seam of coal; it constituted the vegetable soil in which the ancient forest, the remains of which have been transformed into coal, grew. While sandstone is,

as a rule, too porous to retain fossils uninjured, clay, shale, or anything equivalent does so admirably, and a palæontologist should give particular attention to every finely laminated stratum which he may see in any series of rocks which he proposes to examine.

B. As adj.: Composed of or pertaining to clay.

*clay-brained, *clay-brayned, a. Stupid, idiot.

"Why, thou clay-brayned guts."

Shakesp.: *Hen. IV.*, Pt. I., ii. 4.

clay-built, a. Constructed of or with clay. (Darwin.)

clay-clot, *clei-clot, s. A clot or lump of clay.

"Nu lidh the clei-clot al so the ston."—Reliq. Antiq., p. 73.

*clay-cold, a. Cold and lifeless as a lump of clay.

"His clay-cold limbs."

Pope: *Homer's Iliad*, xviii. 369.

*clay-daubed, *clai-daubed, a. Daubed or smeared over with tempered clay.

"In that cofer that watz clay-daubed."

E. Eng. Allit. Poems; Cleanness, 492.

clay-ground, s. Ground or land of a clayey nature, clay-land.

"The king cast them in the clay-ground."—1 Kings vii. 46.

clay-iron ore, s. The same as CLAY-IRONSTONE (q. v.).

clay-ironstone, s.

1. *Min. & Geol.*: A mineral or rock occurring generally in the form of bands or nodules in the carboniferous series of beds. It consists of carbonate of iron mechanically mingled with earthy matter, the metallic carbonate having been produced by the action of decaying vegetable matter on any protoxide of iron in solution with which it may have been brought in contact. (Lyll.) Occurs principally in the coal measures.

2. *Palæont.*: Nodules of clay-ironstone often inclose shells, encrinites, ferns, and other organisms.

clay-kiln, s. A kiln or stove for burning clay.

clay-land, clay-soil, s. Ground or land composed to a great extent of clay.

clay-loam, s. Clay mixed with sand, chalk, and organic matter. It is generally very fertile.

clay-marl, s. Marl with the argillaceous element abnormally abundant in it. It is generally white and chalky; marl is a mixture of clay and chalk.

clay-mill, s.

Brick-making: A pug-mill; a mill for mixing and tempering clay.

clay-pipe, s. A tobacco pipe made of clay, burnt.

clay-pit, s. A pit whence clay is dug.

"'Twas found in a clay-pit."—Woodward: *On Fossils*.

clay-process, s. A process by which clay is substituted for plaster in making stereotype molds. The face of the type is forced into the clay by pressure. (Knight.)

clay-pulverizer, s. A machine for grinding dry clay to render it more homogeneous previous to pugging. (Knight.)

clay-screening, a. Screening or designed to screen clay.

Clay-screening machine: A machine for sifting pulverized clay, so as to prepare it for some of the finer ceramic manufactures. (Knight.)

clay-slate, s.

1. *Geol.*: A rock, called also Argillaceous Schist. It is often exceedingly fissile, cleaving in directions across the planes of stratification. Its colors vary from greenish or bluish-gray to a leaden hue. It is composed of indurated clay which has been subjected to great pressure. Sometimes particles of mica impart to it a shining and silky luster. The yellow cubical mineral of metallic luster often scattered through it is iron pyrites. A great part of it is metamorphic, but some is fossiliferous.

2. *Comm.*: It is the common roofing slate, for which its fissile character renders it well adapted. It is used also for school-boys' slates. Good slates should not imbibe water, if they do so, they will soon be decomposed by the weather.

clay-stone, s. & a.

A. As substantive:

Geol.: A felstone of granular texture, and not containing any imbedded crystals. It is of igneous origin. It varies much in color, being flesh-tinted, brown, brownish-yellow, green, &c. Formerly, specimens of it were often designated, compact felspar. It constitutes the paste, matrix, or basis of the subjoined porphyry.

boil, boy: pout, jowl: cat, çell, chorus, çhin, bench; go, gem, thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şün; -tion, -şion = zhün. -tious, -cious, -sious = şüş. -ble, -dle, &c. = bel. de-

B. As adj.: Having clay-stone, &c., as its basis.

Clay-stone porphyry:

Geol.: An igneous rock consisting of clay-stone with imbedded crystals.

clāy, v. t. [CLAY, s.]

1. *Ord. Lang.:* To cover or dress with clay.

"This manuring lasts fifty years; then the ground must be clayed again."—*Mortimer: Husbandry.*

2. *Sugar-making:* To perform the operation of claying (q. v.).

clāy'-bānd, s. & a. [Eng. clay, and band.]

A. As substantive:

Mining: A stratum or band with clay in its composition. Used chiefly in the compound which follows.

B. As adj.: Composed of such a rock.

clayband ironstone, s.

Mining: An earthy variety of Chalybite, constituting one of the most common ores of iron.

clāyed, pa. par. or a. [CLAY, v.]

1. *Ord. Lang.:* Covered or dressed with clay.

2. *Sugar-making:* Purified by means of water percolating through a layer of clay spread over the surface. [CLAYING.]

"Syrup intended for forming clayed sugar must be somewhat more concentrated in the treacle; and run off into a copper cooler, capable of receiving three or four successive skippings. . . . Clayed sugars are sorted into different shades of color according to the part of the cone from which they were cut. The clayed sugar of Cuba is called Havannah sugar. . . . Clayed sugar can only be made from the ripest cane-juice; for that which contains much gluten would be apt to get too much burnt by the ordinary process of boiling, to bear the claying operation."—*Ure: Dict. of Arts, Manufactures, and Mines; Sugar.*

***clāy'-en, *cleien, *cleyene, a.** [Mid. Eng. *clei*, *cley*=Eng. *clay*; Mid. Eng. adj. ending -en.] Composed of or built with clay.

"These that dwellen [in] cleyene housis."—*Wycliffe: Job iv. 19.*

clāyes, s. [Fr. *clai*=a hurdle.]

Fort.: Wattles made with stakes interwoven with osiers to cover lodgments; hurdles to form blinds for working parties. When reinforced with earth they become gabions. (*Knight.*)

clāy'-ēy, *cley-i, *cley-ye, a. [Eng. *clay*; -y.]

1. Consisting of or of the nature of clay.

"The kyng yetide hem in the cleye erthe."—*Wycliffe: 3 Kings xii. 14.*

2. Bedaubed with clay. (*Carlyle.*)

clāy'-īng, pr. par., a. & s. [CLAY, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. *Ord. Lang.* The act of covering or dressing land with clay.

II. Technically:

1. *Sugar-making:* An operation by which sugar is purified.

"The claying now begins; which consists in applying to the smoothed surface of the sugar at the base of the cone a plaster of argillaceous earth, or tolerably tenacious loam, in a pasty state. The water diffused among the clay escapes from it by slow infiltration, and descending with like slowness through the body of the sugar, carries along with it the residuary viscid syrup, which is more soluble than the granulated particles. Whenever the first magma of clay has become dry it is replaced by a second, and this, occasionally, in its turn by a third, whereby the sugar cone gets tolerably white and clean."—*Ure: Dict. of Arts, Manufactures, and Mines; Sugar.*

2. *Mining:* The act of lining the blast-hole with clay to prevent the explosive becoming damp.

claying-bar, s.

Mining: A cylindrical bar for driving tenacious clay into the crevices of a blast-hole to prevent percolation of water on the charge.

claying-house, s.

Sugar-making: A house for the operation of claying.

"The cones remain twenty days in the claying-house before the sugar is taken out of them."—*Ure: Dict. of Arts, Manufactures, and Mines; Sugar.*

clāy'-ish, a. [Eng. *clay*; -ish.] Of the nature of clay; containing an admixture of clay.

"Small beer proves an unwholesome drink; perhaps, by being brewed with a thick, muddy, and clayish water, which the brewers covet."—*Harvey: On Consumption.*

clāy'-ite, s. [From the Hon. J. R. Clay, United States Minister at Peru, and suff. -ite (*Min.*) (q. v.).]

Min.: A mineral from Peru, occurring crystallized and as a crust on quartz, a sulpharsenite of copper with sulphantimonites of copper and lead. Luster, metallic. Hardness, 2.5. Melts before the blowpipe.

clāy'-mōre, *glāy'-mōre, s. [Gael. *claidheamh mor*=a great sword, a broadsword. Cf. Wel. *clleddyf*, *clleddeu*; Lat. *gladius*=a sword.]

1. A Scottish broadsword; a two-handled sword used by the Scotch Highlanders.

2. A basket-hilted broadsword. (*Knight.*)

3. *By metonymy:* A soldier armed with a broadsword.

"His army was rapidly swollen to near double the number of claymores that Dundee had commanded."—*Macaulay: Hist. Eng., ch. xiii.*

clāy-tō'-nī-a, s. [Named after John Clayton, who collected plants in Virginia.]

Bot.: A genus of plants, order Portulacaceæ (*Purslanes*). *Claytonia perfoliata*, a North American species, is anti-scorbutic. The tuberous roots of *C. tuberosa* are eaten in Siberia.

clāy'-wēed, s. [Named from the partiality of the plant to clay soils.]

Bot.: A composite plant, *Tussilago Farfara*.

***cle, *clea, *clee, s.** [CLAW.]

clēach'-īng, a. [Etym. doubtful.] A term occurring only in the subjoined compound.

cleaching-net, s. A hand net with hoop and pole. (*Knight.*)

clead, cleed, s. [CLOTHE.] Dress.

"That canty knap, tho' in its brawest clead,
Goups infant proud abeen' the decent mead."
Tarras: Poems, p. 4.

clēad'-īng, s. [A Scotch pron. of *clothing*.] [CLOTHING.]

1. *Ord. Lang.:* Dress, clothing.

" . . . what's in either face or cleading,
Of painted things."
Ramsay: Poems, i. 30.

II. Technically:

1. *Mach.:* The outer covering or jacket of the cylinder of a steam-engine, or of the boiler of a locomotive; a timber casing inclosing the boiler and firebox of a locomotive; the casing of hair-felt wrapped round steam-pipes to prevent the radiation of heat. It is called also logging.

2. *Building, Eng., &c.:* Any kind of plank-covering, such as the slating-boards of a roof, the boards of a floor, the plank-lining of a pit-shaft, the plank-lining of a copper-dam, &c. (*Ogilvie.*)

3. *Mining:* The boarding which lines a shaft or tunnel.

clēan, *clene, *clane, *cleane, a. & adv. [A. S. *clāne, clene*; Wel. *glain, glan*; Ir. & Gael. *glan*, all =clear, bright; G. H. Ger. *chleini*; M. H. Ger. *kleine*; Ger. *klein*=small, fine, excellent.]

A. As adjective:

I. Ordinary Language:

1. *Literally:*

(1) Free from dirt or any filth.

"Heo wesse her fet al clene."
Rob. of Glouc., p. 435.

"They make clean the outside of the cup and of the platter, but within they are full of extortion and excess."
—*Matt. xxiii. 23.*

(2) Free from any injurious ingredient or admixture; pure, undefiled.

"His maydenes broughte hire clene water."

5. *Machines*: The amount of play between the meshing-teeth of cog-wheels, to avoid a jamb. (*Knight*.)

clearing-beck, s.

Dyeing: A vat in which cottons printed with certain colors are scoured with soap and water.

clearing-house, s.

Comm.: An establishment where the process of clearing is carried on. [See illustration.]

In the old days before the American clearing-houses were established, Bank No. 1 sent a runner to Bank No. 2 with the check to get it cashed; and if No. 2 had a check on No. 1, it sent its runner over; and so on all through all the banks. But now each morning the clearing-house clerks of a bank report at the clearing-house, and make out a list of all the checks payable to that bank by or through other banks; then the clearing-house people take these lists and compare them. They find, for instance, that Bank A owes B \$1,000 and C \$500; that B owes A \$500 and C \$1,000, and that C owes A \$500 and B \$500. Comparing these, we see that A owes B \$500 clear of what B owes A, and that A and C stand off; that B owes nothing to A, and owes \$500 to C; and that C owes nothing to A, and is owed \$500 by B. That is, that A owes B \$500, and B owes C \$500. Then if A pays C \$500, \$4,000 of mutual debts is settled for \$500. When this settlement is worked out, the clearing-house clerks report back to their banks, and before 1 o'clock sums of money are sent from each bank to the clearing-house in settlement of balances, and the checks drawn on each bank are returned to it, to be charged against the different individual depositors. Of course, in the clearing-house there are many times the number of banks we use in our illustration, and the operations are much more complicated, but the principle is the same. The London clearing-house for bankers was instituted in 1775. By its means bankers obtained a settlement of all bills or checks due for collection between one another, a check on the Bank of England being received or paid in settlement of all differences of account.—*Gaskell*.

clearing-nut, s. The nut of *Strychnos potatorum*, which is used in India for clearing water from sediment. The natives prefer pond or river water to clear well water, but purify what they take by rubbing the inside of the unglazed earthen vessel for a minute or two with the seed of the clearing-nut. The impurities in a short time fall to the bottom, and the water becomes clear.

clearing-pan, s.

Sugar-manufact.: The same as CLARIFIER.

clearing-screw, s.

Weapons: A screw in some fire-arms, at right angles to the nipple, and affording a communication with the chamber.

clearing-stone, s.

Curriery: The fine stone on which a currier's knife receives its final whetting.

clēar'-lŷ, *cler-li, *clere-li, *cler-liche, *clere-liche, *cler-ly, *cler-lyche, *cler-liche, adv. [Eng. *clear*; -ly; Mid. Eng. *cler, clere, &c.*; and *liche, li*=Eng. -ly.]

I. *Lit.*: Brightly, luminously.

II. *Figuratively*:

1. Plainly, without impediment or hindrance.

2. Plainly, evidently, in a manner free from doubt, obscurity, or perplexity.

"... then shalt thou see clearly to cast out the mote out of thy brother's eye."—*Matt*. vii. 5.

3. With acuteness or discernment; in a manner free from embarrassment or entanglement.

"... he that divideth too much, will never come out of it clearly."—*Bacon: Essays*.

4. Audibly, plainly.

"The sownde was herde into the citee clerly."—*Merlin*, I. ii. 207.

*5. Without deduction or abatement.

*6. Honestly, unreservedly, openly, without evasion or reservation.

"He ssel zigge his zennes clyerliche and nakedliche."—*Ayenbite*, p. 174.

¶ Crabb thus distinguishes between *clearly* and *distinctly*: "That is seen *clearly* of which one has a clear view independent of anything else; that is seen *distinctly* which is seen so as to distinguish it from other objects." (*Crabb: Eng. Synon.*)

clēar'-nēss, *cler-ness, *clere-ness, *cler-nes, *cleer-ness, s. [Eng. *clear*; -ness.]

I. *Literally*:

1. The quality of being clear or bright; brightness.

"Thei upon the walles of the town saugh the clernesne of the light half a myle longe."—*Merlin*, I. ii. 210.

"It may be, percolation doth not only cause cleanness and splendor, but sweetness of savor."—*Bacon: Nat. Hist.*

2. A luster or splendor.

"Love, more clear than yourself, with the cleanness, lays a night of sorrow upon me."—*Sidney*.

II. *Figuratively*:

1. Distinctness, plainness, freedom from obscurity or doubt.

"... it is of the utmost importance in science to aim at perfect cleanness in the description of all that comes, or seems to come, within the range of the intellect."—*Tyndall: Frag. of Science* (3d ed.), x. 253.

*2. Uprightness, straightforwardness, plain dealing, sincerity.

"... cleanness of dealing, ..."—*Bacon*.

*3. A freedom from blame or imputation.

4. Distinctness of tone, audibility.

5. *Of the weather*: Brightness, serenity, freedom from clouds.

"Clerenesse of wedyr. Serenitas."—*Prompt. Parv.*

*6. Glory, honor.

"I take not clerlesse of men."—*Wycliffe: John*, v. 41.

*7. Beauty, handsomeness.

"In the clerles of his concubines and curious wedez."—*E. Eng. Allit. Poems; Cleanness*, 1,353.

¶ Crabb thus distinguishes between *clearness* and *perspicuity*: "*Clearness* respects our ideas, and springs from the distinction of the things themselves that are discussed; *perspicuity* respects the mode of expressing the ideas, and springs from the good qualities of style. ... *Clearness* of intellect is a natural gift; *perspicuity* is an acquired art; although intimately connected with each other, yet it is possible to have *clearness* without *perspicuity*, and *perspicuity* without *clearness*." (*Crabb: Eng. Synon.*)

clēar-stōr'-ī-al, clēre-stōr'-ī-al, a. [Eng. *clear-story*, and suff. -al.] Of, or pertaining to, or of the nature of, a clear-story.

clēar'-wēed, s. [Eng. *clear*, and *weed*.] An American name for *Pilea pumila*, an urticaceous plant.

clēat, s. [From Provenc. Eng. *cleat*=a piece of iron worn on the shoes by country people (*Mahn*). [CLAMP.] Cf. also Dut. *kloet*=a boat-hook, a pole; A. S. *clate*=a bur, a cloth-bur; Dut. *kliis* and Ger. *klette*=a bur.]

1. *Carp.*: A strip of wood secured to another one to strengthen it, as a batten placed transversely on the back of several boards which are jointed or matched together.

2. *Naut.*: A belaying-piece consisting of a bar with two arms fastened to a post or stanchion by a bolt passing through its stem.

clēat, v. t. [CLEAT, s.] To fasten or strengthen with a cleat.

clēav'-a-ble, a. [Eng. *cleav(e)*; -able.] Capable of being cleft or divided.

"In the one case it is the molecules arranging themselves according to organic laws which produce a cleavable structure, ..."—*Tyndall: Frag. of Science* (3d ed.), xiv. 408.

clēav'-age (age as īg), s. & a. [Eng. *cleav(e)*, and suff. -age.]

A. *As substantive*:

1. *Crystallography*:

(1) The act of cleaving or splitting a crystal in a certain direction in which it is easy to do so; the state of being so cleft. This line of easy fissure, as a rule, is parallel to one or more of the faces of the crystal. Cleavage tends to reduce a mineral to the form of its primary or primitive crystal.

(2) The line along which such splitting takes place.

"In building up crystals these little atomic bricks often arrange themselves into layers which are perfectly parallel to each other, and which can be separated by mechanical means; this is called the cleavage of the crystal."—*Tyndall: Frag. of Science* (3d ed.), xiv. 407.

"For the sake of completeness I may say that many crystals cleave with unequal facility in different directions: heavy spar presents an example of this kind of cleavage."—*Ibid.*

2. *Geology*:

(1) The act or capability of cleaving certain slaty rocks into an indefinite number of thin laminae, parallel to each other but not parallel to the planes of stratification (*Lyell*); the state of being so cleft.

(2) The cleft or fissure which is thus produced. Cleavage is divided into laminar fission, or *Flaggy* Cleavage, coincident with bedding planes, and Slaty Cleavage, deviating from the direction of the bedding planes. Slaty cleavage is a fissile structure in certain slaty or other rocks distinct from both stratification and joints, though in some cases liable to be mistaken for one or other of these. It most frequently occurs in clay-slate, or other argillaceous rock, next in frequency to which it is found in gneiss, mica-schist, hypogene limestone, &c. Murchison, in his "*Siluria*," shows that slaty cleavage exists in the Silurian and other older rocks, and in those of Devonian age. It is not uncommon in the carboniferous rocks of Ireland, but less so in that formation generally. Slaty cleavage, or slaty texture, has been superinduced by the rock having been subjected to great pressure, which also affects any fossils which the rock may contain, squeezing and distorting them to a considerable extent. Flaggy cleavage has been produced by the regular deposition of thin layers of sediment one upon another. Slaty cleavage is seldom met with in rocks of eruptive origin, except in beds of volcanic ash, and occasionally in some of the older lavas. A structure, called Foliation, resembling laminar fission, is found in altered sedimentary rocks. It is due to the segregation of any one mineral component of the rock along a more or less regular plane, and thus differentiating the rock into a series of alternating layers of different mineral composition. (*Lyell, Murchison, Rutley: On Rocks, &c.*)

B. *As adjective*:

Crystallog.: Along which a mineral may be easily cleft.

cleavage-planes, s. pl.

Crystallog.: Planes along which a mineral may be most easily cleft

"What will he clem me and my followers? Ask him an' he will clem me."—*B. Jonson: Poetaster.*

2. To stop a hole by compressing it, or by means of lime, clay, &c.

B. *Intrans.*: To starve, to perish from hunger.

"Hard is the choice, when the valiant must eat their arms, or clem."—*B. Jonson: Every Man Out of His Humor.*

clê-mât'-ê-sâ, *s. pl.* [Lat. *clematis* (q. v.), and fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Ranunculaceæ, consisting of species with a valvate or induplicate calyx. Type, *Clematis*.

clê-m'-a-tis, *s.* [Lat. *clematis*; Gr. *klêmatis*=(1) brush-wood, faggot-wood, (2) various plants with long, lithe branches, spec. the clematis (see def.), and the periwinkle. Dimin. from *klêma*=(1) a short twig broken off, a slip, a cutting, (2) a vine twig, which the clematis resembles in its trailing habit; *klâô*=to break.]

Bot.: Traveler's Joy, or Virgin's Bower, a genus of plants, order Ranunculaceæ, tribe Clemateæ. Sepals, 4-6; petals, none; stamens and styles many; achenes terminated by a long, generally feathery awn. The species are numerous. *Clematis Vitalba*, the Common Traveler's Joy or Virgin's Bower, is a climbing plant with pinnate leaflets, twining petioles and greenish-white flowers. It occurs wild in the middle and south of England. *C. Gouriana* and *C. Wightiana* are not uncommon in India, on the Western Ghauts, in the Deccan, &c., and there are other Indian species. On the continent of Europe, *C. erecta* and *C. flammula* are used by beggars to produce artificial ulcers on their limbs, while in America, according to Geyer, the root of a clematis is employed by the North American Indians as a stimulant to horses which fall down at their races. The scraped end of the root is held to the nostrils of the fallen animal, which begins to tremble, and then rising is conducted to water to refresh itself. Various species of clematis are found in English gardens and greenhouses.

clematis-camphor, *s.*

Chem.: When the young branches of *Clematis flammula*, &c., are distilled with water, an acid pungent liquid is obtained, which reddens the skin; when kept in closed vessels it deposits white scales and flocks of clematis-camphor.

clê-m'-a-tî'-tîn, *s.* [Mod. Lat. *clematit(is)*, and Eng. &c., suff. -in.]

Chem.: C₉H₁₀O₆. A bitter substance obtained from the root of *Aristolochia Clematidis*.

clēm-en-çy, ***clēm-ençe**, s. [Fr. *clémence*; Sp. *clemencia*; Ital. *clemenza*, from Lat. *clementia*=mildness, gentleness; *clemens*=mild, gentle.]

1. Of persons:

(1) Mildness of temper and disposition; gentleness, kindness, compassion, humanity.

"It was not the clemency of an ostentatious man, or of a sentimental man, or of an easy-tempered man."—Macaulay: *Hist. Eng.*, ch. xv.

(2) Mercy, a willingness to forgive, a pardon.

"It was even suspected that he sent some persons to the gibbet solely because they had applied for the royal clemency through channels independent of him."—Macaulay: *Hist. Eng.*, ch. v.

†2. Of the elements: Mildness, softness.

"Then in the clemency of upward air."—Dryden.

† Crabb thus distinguishes between *clemency*, *lenity*, and *mercy*: "*Clemency* and *lenity* are employed only toward offenders; *mercy* toward all who are in trouble, whether from their own fault or any other cause. *Clemency* lies in the disposition; *lenity* and *mercy* in the act; the former as respects superiors in general, the latter in regard to those who are invested with civil power: a monarch displays his *clemency* by showing *mercy*; a master *lenity* by not inflicting punishment where it is deserving. *Clemency* is arbitrary on the part of the dispenser, flowing from his will independent of the object on whom it is bestowed; *lenity* and *mercy* are discretionary, they always have regard to the object and the nature of the offense, or misfortunes; *lenity* therefore often serves the purposes of discipline, and *mercy* those of justice by forgiveness, instead of punishment; but *clemency* [sometimes] defeats its end by forbearing to punish where it is needful." (Crabb: *Eng. Synon.*)

clēm-ent, a. [Lat. *clemens*=mild, gentle.]

1. Of persons: Mild, gentle, forgiving, compassionate.

†2. Of the elements: Mild, soft.

Clēm-en-tine, a. & s. [From the proper name Clement, which is derived from Lat. *clemens* (genit. *clementis*)=mild, calm, soft, gentle. See def.]

A. As adj.: Pertaining to Clement of Rome (Clemens Romanus), one of the five apostolic fathers; to Clement of Alexandria (Clemens Alexandrinus); to one of the fourteen Clements who filled the Popedom; or to any other person of the same name.

"The Clementine Constitutions, or decrees of Clement V., were in like manner authenticated in 1317 by his successor, John XX."—Blackstone: *Comment.*, introd., § 3.

B. As substantive:

I. Bibliography:

1. Pl. (The Clementines): Certain Christian compositions long attributed to the apostolic father, Clement of Rome, but now held to have been composed after his death, probably by one of the Ebionite sect.

2. A collection of decretals and constitutions of Pope Clement V., published in A. D. 1308. They were regarded as the seventh book of Decretals (q. v.). (See also CANON LAW.)

II. Ch. Hist.: The followers of Clement VII., who was held by most of the French, the Scotch, &c., to have been legitimately elected to succeed Pope Gregory XI., while the Italians, the English, &c., deemed him an antipope, and held that the holy father legitimately elected was Urban VI. This schism began in A. D. 1378, and ended in 1409. The scandal which it caused weakened the prestige of the Papacy, and helped the church a certain distance forward toward the Reformation. [SCHISM.]

***clēm-ent-ly**, adv. [Eng. *clement*; -ly.] In a clement or forgiving manner, kindly, mildly.

of the priestly office being chosen by lot, as in the case of the disciple Matthias thus chosen to succeed Judas. Or it may have arisen from the fact that a portion of the property of the church was allotted for their support.

II. Technically:

1. Theology:

(1) The chief New Testament passages to which the word clergy is ultimately traceable back are two. One is 1 Pet. v. 3, where the elders are exhorted not to be lords over God's "heritage" (Auth. Vers.), or lordship it over the "charge allotted to you" (Revised Vers.). The words in the Greek are *ton klērōn*, the genit. pl. of *klēroi*, the same word which is used by the Greek ecclesiastical writers for clergy. In the passage in St. Peter it obviously means the whole body of believers in any particular congregation, or in the church collectively viewed as "God's heritage," or as a pastor's charge. The word "God" in the Authorized Version was, as its being spelled in italics shows, inserted by King James' translators; it is not in the original. In the second passage, Acts i. 15-26, the word *klēros* is used of the apostolate from which Judas fell, and to which Matthias was elected (versus 17, 25), and the plural *klēroi*, of the lots cast to decide his election (v. 26).

(2) The verse in St. Peter [No. (1)] doubtless alludes to a multitude of Old Testament passages in which the Israelites are described as the inheritance or heritage of God (Deut. xxxii. 9, Psalms xxviii. 9, lxxviii. 71, Jer. x. 16, Joel ii. 17, &c., &c.); as also is the country of Canaan (1 Sam. xxvi. 19, 2 Sam. xxi. 3, Psalm lxxviii. 9, &c., &c.). The word in these and various other passages is *klēronomia*, a derivative of *klēros*. Its primary etymological meaning is *lot* (see etym.), and it is used with tacit reference to the distribution to the several tribes of their respective possessions by lots (Num. xxvi. 52-56, Joshua xiv. 1-3, xv. 1, xvi. 1, &c., &c.). When the distribution took place, the Levites received no territory as a heritage, God being their inheritance (Num. xviii. 20, Deut. x. 9, xviii. 1, 2), as was also the priesthood of some of them (Joshua xviii. 7); the sacrifices of Jehovah made by fire (Joshua xiii. 14), and tithes (Num. xviii. 21-24, Deut. xiv. 28, 29). Reciprocally God claimed them as his special servants, taking them in lieu of the first-born devoted to him when the Egyptian first-born were slain (Exod. xiii. 11, 12, 13, 15, Num. iii. 12, 45, vii. 11-22). He said of them "The Levites shall be mine." An analogy being drawn between the special position of the Levites and that of the Christian ministry as alike ordained to spiritual functions, the word *klēroi*, used originally by St. Peter of all church members, became limited to their spiritual chiefs.

2. Church History:

(1) *In the Early Church*: St. Paul accepted scarcely anything from those to whom he ministered (Acts xx. 33, 34, and 2 Cor. xi. 9), his general practice being to support himself by tent-making (Acts xviii. 3), but he let it be understood that as a rule those who preached the gospel should live of the gospel (1 Cor. ix. 13, 14). This support enabled the pastors of the several churches at a very early period of Christianity to withdraw from secular occupations and give their whole time to their sacred calling.

(2) *In mediæval times*: Century by century almost to the time of the Reformation, or at least till about 1300 A. D., the power and influence of the clergy went on to increase. As every instance of notorious vice on the part of one discharging sacred functions weakens the order to which he belongs, while every case of conspicuous virtue increases it, the clergy never could have obtained the influence which they did unless at least a vast section of their number had been really spiritual men. They had other advantages of no mean kind. The only educated class [BENEFIT OF CLERGY]; members of an international society existing wherever Christianity had rooted itself; the sole administrators of the sacraments, and in confraternity with a chief believed to have the keys of the kingdom of heaven, the clergy had every opportunity of rising to transcendent power over the imagination, the consciences, and ultimately the earthly possessions of men. Availing themselves of these advantages they actually rose to a pitch of authority which perhaps no other priesthood except that of the Indian Brahmins ever rivaled. Their rule was for a time an advantage to Europe. It was knowledge ruling over ignorance, at least partial refinement holding in control lawless violence; a ladder by which the humblest could climb to great heights of society, while outside the church genius of humble birth was prevented from rising, being held down by the weight of feudal chains. But not even a sacred order of men are to be trusted with nearly absolute power, and at length the pretensions of the clergy converted most civil governments into their thinly disguised foes. [GUELPHS, GIBELLINES, &c.] Means were taken to abridge their power, each new scheme being, as Blackstone shows, ingeniously evaded, and finally their tyranny and rapacity,

rather than their doctrinal views, excited a great part of Europe against them, and brought on the great revolt against their domination known as the Reformation. During the mediæval period the monastic orders were looked upon as belonging to the clergy. Abbots, priors, monks, &c., were known as the regular clergy; and bishops, deans, priests, &c., as the secular clergy.

(3) *Post-reformation times*: The civil governments on one hand, and the lay members of the several churches on the other, gained back from the clergy, in countries where the Reformation was successful, a great part of what they had lost during times of greater ignorance. For details see REFORMATION, ROYAL SUPREMACY, &c.

***clēv-ēr, *clev-ere**, *s.* [CLEAVER.]

"A *Clevere: Fissor.*"—Cathol. *Anglicum*.

clēv'-ēr, *a.* [The etymology is doubtful. Mahn suggests A. S. *gleaw*=wise, skillful; O. H. Ger. *glaw*, *glao*; Low Ger. *glau*; Goth. *glaggous*. Wedgwood thinks the word was "probably derived from the notion of seizing, as Latin *rapidus* from *rapiō*; Scotch *gleg*=quick of perception, clever, quick in motion, expeditious, from Gaelic *glac*=to seize, to catch. The Scotch has also *cleik, clek, cleuck, cluke, clook* (identical with English *clutch*)=a hook, a hold, claw, or talon; to *clek* or *cleik*=to catch, snatch, and hence *cleik, cleuch*=lively, agile, clever, dexterous, light-fingered. One is said to be *cleuch* of his fingers who lifts a thing so cleverly that bystanders do not observe it. (Jamieson.) Now the Old English had a form *cliver*=a claw or clutch, exactly corresponding to the Scotch *cleik, cluk*. Hence the Old English to *clever, Dutch klaveren, klavern*=to claw one's self up, climb, scramble; and hence also he believes is formed the adjective *clever* in the sense of snatching, catching, in the same way as the Scotch *cleik, cleuch*, above mentioned. Dut. *kleverig*=sticky; Low Ger. *klevisk, klefsk; klefske finger*=thievish fingers, to which everything sticks." But the most probable derivation is that it is a modification of Mid. Eng. *deliver*=nimble, active.] [DELIVER, *a.*]

1. Dexterous, skillful, expert; possessing skill and talent (of persons).

"... yet no country in Europe contained a greater number of *clever* and selfish politicians."—Macaulay: *Hist. Eng.*, ch. xiii.

2. Showing skill and talent, skillful, ingenious (of things).

"It was the *cleverer* mockery of the two."—Sir R. L'Estrange.

*3. Neatly made, well shaped, handsome, well proportioned.

"... the girl was a tight *clever* wench as any was."—Arbuthnot.

*4. Fit, apt, proper, suitable.

5. In this country colloquially in the sense of "good nature," while in England it means "handy," "skillful." The American term "smart" is almost an equivalent for the English word "clever."

¶ Crabb thus distinguishes between *clever, skillful, expert, dexterous*, and *adroit*: "*Clever* and *skillful* are qualities of the mind; *expert, dexterous*, and *adroit* refer to modes of physical action. *Cleverness* regards in general the readiness to comprehend; *skill* the maturity of the judgment; *expertness* a facility in the use of things; *dexterity* a mechanical facility in the performance of any work; *adroitness* the suitable movements of the body. A person is *clever* at drawing who shows a taste for it, and executes it well without much instruction; he is *skillful* in drawing if he understands it both in theory and practice; he is *expert* in the use of the bow if he can use it with expedition and effect; he is *dexterous* at any game when he goes through the maneuvers with celerity and an unerring hand; he is *adroit* if by a quick, sudden, and well-directed movement of his body, he effects the object he has in view. . . . *Cleverness* is rather a natural gift; *skill* is *cleverness* improved by practice and extended knowledge; *expertness* is the effect of long practice; *dexterity* arises from habit combined with agility; *adroitness* is a species of *dexterity* arising from a natural agility." (Crabb: *Eng. Synon.*)

***clēv'-ēr**, *s.* [CLEAVER, *s.*]

***clever grass**, *s.*

Bot.: *Galium Aparine*. It is not a grass but a monopetalous exogen.

***cli-măc-tër'-i-an**, s. [Eng. *climacter*; -ian.] One fond of a climax.

"We shall find him on many occasions a great climacterian."—North: *Examen*, p. 23. (Davies.)

cli-măc'-tër-ic, ***cli-măc'-ter-ick**, a. & s. [Eng., &c., *climacter*; -ic.]

A. As *adj.*: Critical, dangerous; pertaining to the great climacteric [B.], or to any one of lesser peril.

B. As *subst.*: One of certain periods of a man's life in which his constitution is said to undergo great changes, involving him in danger till they are over. They are multiples of 7 or of 9, as 35, 49, &c. The most perilous of these, called by way of eminence the grand climacteric, is his 63d year—for $9 \times 7 = 63$. The 7th year of life is also dangerous. The grand climacteric of life is said to have been recognized by Hippocrates.

Climacteric disease:

Med.: A disease affecting both men and women, but more obvious in the former. It may be looked for about the 63d year of age, but varies in the time of its coming according to the constitution of the individual, the limits being in the one direction 50, and in the other 75. Its most common predisposing cause is mental anxiety or suffering. The expression of the countenance alters for the worse, the pulse becomes accelerated, the flesh wastes away without obvious cause; there are sleepless nights, and wandering pains flit through the head and chest, and sleep is either deficient or brings little refreshment. After a time recovery as a rule takes place, but the countenance never recovers its former aspect, or the constitution its vigor.

cli-măc-tër'-i-cal, a. [Eng. *climacteric*; -al.] The same as *climacteric* (q. v.).

"One of these, an elderly man, who confessed to having passed the grand climacterical year (9 multiplied into 7) of 63, though he did not say precisely by how many years . . ."—De Quincey: *Works* (ed. 1863), vol. ii., p. 147.

***cli-măc'-tër-y**, s. [Eng. *climacter*; -y.] The working up to a climax.

"He is an artist at disposition and climactery."—North: *Examen*, p. 478. (Davies.)

†**cli-mă-tal**, a. [Eng. *climat(e)*; -al.] Pertaining to or dependent on climatic changes.

" . . . the sixteen years selected appear to complete two climatal cycles."—Ansted: *The Channel Islands*, p. 133.

cli-mă-tăr'-chic, a. [Gr. *klima*, genit. *klimatos* = a climate; *archō* = to rule, to govern.] Presiding over or regulating the climates.

cli-mă-te, ***cli-mat**, ***cly-mat**, ***cly-mate**, s. [Gr. *klima*; *klinō* = to cause to bend or slant. (1) The inclination or slope of ground; (2) a slope imagined by the ancients of the globe from the equator to the poles; (3) a zone or a parallel of latitude, the space between these parallels of latitude held to be synonymous with a climate.]

I. Ordinary Language:

*1. In the Greek sense:

"Climate, a portion of the earth contained between two circles parallel to the equator."—Phillips: *The New World of Words*.

"The superficialtee of the Erthe is departed in 7 parties, for the 7 Planetes; and the parties ben clept clymates."—Maunderville, p. 186.

2. In a sense intermediate between the Greek one and that presently in use: A country, a region.

"The climate of Gaul [Galliarum plagam] is inclosed on every side with fences that environ it naturally."—Holland: *Reminiscences*, p. 47.

3. In the same sense as II.

II. Meteorology:

(1) *Present climate of the several parts of the world*: The most potent causes regulating climate are latitude on the one hand, and elevation above the sea level upon the other, the former cause producing perpetual snow and ice around the North and South Poles, and the latter acting with similar effect on the summits of such mountain chains as the Himalayas or the Andes. Were these the sole causes, lines of equal temperature, or, as they are technically called, Isothermallines, would coincide with circles of latitude; instead of doing this, however, they are parallel neither to the equator nor to each other. [ISOTHERMAL.] In addition to the two above-mentioned causes, must be reckoned also the position and direction of the several continents and islands, the position and depth of the seas, and the direction of currents and winds. The normal type of climate, that existing on continents, is called excessive; in it a great difference exists between the temperature of summer and that of winter, as well as between that of the night and that of the day. Asia and North America are the best existing examples of excessive climates. In Great Britain an east wind, blowing in winter over the frozen steppes of Russia, is cold and dry; a south wind in summer coming over the continent of Europe, if even remotely from the Sahara, is hot

and dry, while a southwest wind, bringing heat, moisture, "depressions" innumerable, and in some cases even spent cyclones from the warm surface of the Atlantic, is the parent of heat, rain, and storm.

(2) *Past climate of the several countries of the world*: There is distinct geological evidence that the climate of the world has oscillated in time past, being, in Europe and North America at least, higher at one time and at another lower than now. During the carboniferous period the vegetation and the animal life too were so uniform from the Arctic zone to the equator, that the temperature must have varied little in different latitudes, and little also between summer and winter. The temperature of the Permian is doubtful; during a portion of it there may have been a glacial period. The stony corals of the oolite naturally suggest a tropical or all but tropical climate. The temperature of the eocene was high. It slowly fell, however, during the miocene and the older pliocene, till in the upper pliocene it was for a time absolutely glacial. Since that comparatively recent geological event, it has risen to what we have it now. Sir Charles Lyell considered that bygone changes were probably produced by different distributions of land and water over the globe, a glacial period coming when a great deal of land, and that high land, was round the poles, and one of great heat when most of the land was round the equator. Mr. Croll, on the contrary, following in a direction in which Sir John Herschell led the way, believes that minute alterations on the ellipticity of the earth's orbit will produce oscillation of temperature in one direction for 10,500 years, and then in the other for the same lengthened period of time. [GLACIAL PERIOD.]

" . . . the inordinately great change of climate, on the prodigious lapse of time, all included within this same glacial period."—Darwin: *Origin of Species* (ed. 1859), ch. ix., p. 294.

cli-mă-te, v. i. [CLIMATE, s.] To inhabit, to dwell.

"Leon. The blessed gods

Purge all infection from our air, whilst you
Do climate here!"—Shakesp.: *Winter's Tale*, v. 1.

cli-mă-t'ic, **cli-mă-t'-i-cal**, a. [Eng. *climat(e)*; -ic, -ical.] Pertaining to a climate, dependent on or limited to a climate.

"In the extreme north of the island, the peninsula of Jaffna and the vast plains of Neura-kalawa, and the Wanny form a third climatic division."—Sir J. E. Tennent: *Ceylon*, pt. i., ch. ii.

cli-mă-tiç'-i-tÿ, s. [Eng. *climatic*; -ity.] The act or process of climatizing.

cli-mă-tion, s. [Eng. *climat(ize)*; -ation.] Acclimatization. (*Hortic. Regist.*)

cli-mă-tō-grăph'-i-cal, a. [Eng. *climatograph(y)*; -ical.] Pertaining to or connected with climatology.

cli-mă-tōg'-ra-phÿ, s. [Gr. *klima*, genit. *klimatos* = a climate; and *graphē* = a writing, a discourse, from *graphō* = to write.] A description of or treatise on climates.

†**cli-mă-tō-lōg'-i-cal**, a. [Eng. *climatolog(y)*; -ical.] Of, or pertaining to, climatology.

"This . . . group . . . embraces populations actually affiliated to each other, rather than populations exhibiting the common effects of common social or climatological condition."—Latham: *Varieties of Man*.

cli-mă-tōl'-ō-gist, s. [Eng. *climatolog(y)*; -ist.] One who makes a study of and is skilled in climatology.

cli-mă-tōl'-ō-gÿ, s. [In Fr. *climatologie*, from Eng., &c., *climat(e)*; o connective, and Gr. *logos* = . . . a discourse.] The science which describes the climates of the several countries of the world now and in bygone times, and attempts to trace the phenomena observed to their causes. (For details see CLIMATE.) (*Brande*.)

***cli-mă-türe**, s. [Fr. *climature*.] The same as CLIMATE (q. v.).

"Such harbingers preceding still the fates,
Have heaven and earth together demonstrated
Unto our climatures and countrymen."
Shakesp.: *Hamlet*, i. 1.

cli-măx, s. [Lat. *climax*, from Gr. *klimax* = a ladder, a staircase, from *klinō* = to bend, to slope, to incline.]

1. Literally:

Rhetoric: Gradation, ascent; a figure in which the sense rises gradually step by step in a series of images, each exceeding its predecessor in force or dignity.

"Some radiant Richmond every age has grac'd,
Still rising in a climax, till the last,
Surpassing all, is not to be surpast."—Granville.

2. *Fig.*: The highest or greatest point, the extreme.

"But we have not as yet touched on the climax of the difficulty."—Darwin: *Origin of Species* (ed. 1859), ch. vii., p. 238.

1. An ascent; the act of climbing or ascending. (*Sat. Review*, Feb. 17, 1883, p. 209.)

2. The place climbed or ascended.

climb (b silent), ***clembe**, ***climme**, ***clymyn**, ***clymbe**, ***clym**, ***clyme**, ***clemenben**, ***climben** (pa. t. **clam*, **clumbe*, **clamb*, **clemde*, **clomb*, **cloumb*, *climbed*; pa. par. **clomben*, **cloumben*, **clumben*, **iclumben*, **iclemde*, *climbed*), v. i. & t. [A. S. *climban* (pa. t. *clamb*; pl. *clumbon*), *clym-mian*; O. H. Ger. *chlimban*; M. H. Ger. *klimmen*; Dut. *klimmen*.] [CLAMBER.]

A. Intransitive:

I. Literally:

1. To ascend by means of the hands and feet, to clamber up, to mount with difficulty (generally with *adv. up*).

"Sche clambe up to the walle one night."

Perceval, 1,223.

2. To creep up or ascend by means of tendrils, or by twining the stalk or leaves round any support. (*Said of plants*.)

II. Figuratively:

1. To ascend or rise to a higher point in any way; to mount.

"Where entrance up from Eden easiest climbs,
Cherubic watch . . ."—Milton: *P. L.*, bk. xi.

*2. To reach to, to attain.

"Bowling his head against the steepy mount
To climb his happiness."—Shakesp.: *Timon*, i. 1.

B. *Trans.*: To ascend by means of the hands and feet, to mount.

"The screaming peacock chased in hot pursuit,
And climbed the garden trellises for fruit."
Longfellow: *Tales of a Wayside Inn*; *The Student's Tale*, *The Falcon of Ser Federigo*.

¶ Crabb thus distinguishes between to *arise* or *rise*, to *mount*, to *ascend*, to *climb*, and to *scale*: "The idea of going upward is common to all these terms; *arise* is used only in the sense of simply getting up, but *rise* is employed [either in that sense or] to express a continued motion upward: a person *arises* [or *rises*] from his seat or bed; a bird *rises* in the air, the silver [quicksilver] of the barometer *rises*; the three first [first three] of these terms convey a gradation in their sense; to *arise* or *rise* denotes a motion to a less elevated height than to *mount*, and to *mount* that which is less elevated than *ascend*: a person *rises* from his seat, *mounts* a hill, and *ascends* a mountain. *Arise* and *rise* are intransitive only; the rest are likewise transitive . . . *Climb* and *scale* express a species of rising; to *climb* is to rise step by step by clinging to a certain body; to *scale* is to rise by an escalade or species of ladder employed in mounting the walls of fortified towns; trees and mountains are *climbed*; walls are *scaled*." (Crabb: *Eng. Synon*.)

†**climb'-a-ble** (b silent), a. [Eng. *climb*; -able.] Capable of being climbed or ascended.

climbed (b silent), pa. par. or a. [CLIMB, v.]

clō-ä-cä (pl. **clō-ä-çæ**), *s.* [Lat.]

I. Ordinary Language:

1. A sewer, an underground drain or conduit. ¶ The Roman Cloaca Maxima (the greatest or main sewer) is said to have been constructed, or at least commenced, under the auspices of King Tarquinius Priscus, about B. C. 588. It is still used in the drainage of Rome.

2. A privy, a house of office.

II. Technically:

1. **Anat.**: A part of the intestine in which the intestinal, ovarian, and urinary outlets terminate. This structure exists in birds, in reptiles, in the amphibia, and in the mammalian order Monotremata. In the rotifera also the perivisceral cavity terminates in a dilatation or cloaca, which forms the common outlet for the digestive, generative, and water-vascular systems. There is a cloaca also in insects, and one also in tunicated mollusks. The latter is sometimes called the atrial chamber.

In the embryonic development of man there is a period during which a cloaca, like that of the inferior animals, exists.

2. **Pathol.**: The opening, in cases of mortification, of the bones leading to the inclosed dead bone.

clō-ä-cal, *a.* [Lat. *cloacalis*=pertaining to a cloaca.] Pertaining to or of the nature of a cloaca.

"... the excreta are voided through a *cloacal* passage..."—Darwin: *Descent of Man* (1871), pt. i., ch. i., vol. i., p. 16.

clōak, **†cloke**, *s.* [O. Fr. *cloque*, *cloke*, *clocke*; from Low Lat. *cloca*=(1) a bell, (2) a horseman's cloak.]

1. **Lit.**: A loose wide outer garment worn over the other clothes; a mantle.

"Then give him, for a soldier meet,
A soldier's cloak for winding-sheet."

Scott: *Rokeby*, vi. 33.

2. **Fig.**: A disguise, a blind, a cover; anything used as a means of concealing one's thoughts or plans.

"Not using your liberty for a cloak of maliciousness."—1 Peter ii. 16.

¶ Crabb, after showing that *cloak*, *mask*, *blind*, and *veil*, when used figuratively, are all employed in a bad sense, thus discriminates between them: "The *cloak*, as the external garment, is the most convenient of all coverings for entirely keeping concealed what we do not wish to be seen; a good outward deportment serves as a *cloak* to conceal a bad character. A *mask* only hides the face; a *mask* therefore serves to conceal only as much as words and looks can effect. A *blind* is intended to shut out the light and prevent observation; whatever, therefore, conceals the real truth, and prevents suspicion by a false exterior, is a *blind*. A *veil* prevents a person from seeing as well as being seen; whatever, therefore, obscures the mental sight acts as a *veil* to the mind's eye." (Crabb: *Eng. Synon.*)

***cloak-bag**, *s.* A bag in which cloaks and other clothes were carried; a portmanteau, a traveling-bag.

cloak-pins, *s. pl.*

1. Large pins used to fasten a cloak.

2. The pegs affixed to a rail, on which to hang up cloaks, coats, &c.

"A huge pair of stag's antlers, which . . . served what we vulgarly call *cloak-pins*."—Scott: *Monastery*, ch. xiii.

cloak-room, *s.* A room or office at places of public resort, as a railway station, &c., where cloaks, small parcels, &c., can be left in charge for a time.

clōak, **†cloke**, *v. t.* [CLOAK, *v.*]

1. **Lit.**: To cover or dress with a cloak.

2. **Fig.**: To hide, to conceal, to cover over.

"She by creation was, till she did fall;
Thenceforth she sought for help to *cloke* her crime withall."

Spenser: *F. Q.*, II., vii. 45.

***clōak'-age** (age as *ig*), *s.* [Eng. *cloak*; -age.]

The act of covering with a cloak. (Worcester.)

clōaked, *pa. par. or a.* [CLOAK, *v.*]

clōak'-ēd-lŷ, ***clōk-yd-ly**, *adv.* [Eng. *cloaked*; -ly.] In a concealed or underhand manner; secretly, not openly; as a blind or cover.

"*Clokydly* without thei obey very mych,
And inwardly the most mayster wer no brych."

Songs and Carols, p. 66.

"The French ambassador came to declare, first how the emperor . . . did *cloakedly* begin war."—K. Edward VI. Journal: Burnet's *Hist. Ref.*, ii.

†clōak'-ēr, *s.* [Eng. *cloak*; -er.] One who cloaks or conceals.

clōck (1), ***clōke**, ***clōk**, ***clōkke**, *s. & a.* [A. S. *cluccga*; Icel. *klukka*, *klocka*; Sw. *klocka*; Dan. *klokke*; Wel. *clōch*; Fr. *clōche*; Dut. *klok*; Ger. *glocke*; Ir. *clog*; all=a clock, a bell. The origin of the word is doubtful, but it is probably connected with *clack* (q. v.).]

A. As substantive:

I. Ordinary Language:

1. **Literally:**

(1) In the same sense as II.

"When the *clock* stroke twelf."—Towneley *Myst.*, p. 115.

"The *clock* has stricken twelve upon the bell."

Shakesp.: *Comedy of Errors*, i. 2.

(2) A watch, especially one which strikes the hours.

(3) The striking or strokes of a clock.

"I told the *clocks* and watch'd the wasting light."

Dryden.

(4) *The clock of a stocking*: Flowers or figured work about the ankle, probably because used originally of bell-shaped ornaments.

"His stockings with silver *clocks* were ravished from him."—Swift.

(5) The balloon-like fruit of the Dandelion, *Leontodon Taraxacum*. Named from the practice of children, who playfully blow away the feathery globe to ascertain "what o'clock it is."

*2. **Fig.**: A guide, a monitor.

"His equal had awaked them; and his honor,
Clock to itself, knew the true minute, when
Exception bid him speak, and, at this time,
His tongue obey'd his hand . . ."

Shakesp.: *All's Well that Ends Well*, i. 2.

¶ *O'clock*=of the clock, is used as equivalent to *by the clock*; as, *what o'clock is it?*=*what time is it by the clock?*

"What is't o'clock? Upon the stroke of four."—Shakesp.: *Richard III.*, iii. 2.

II. Technically:

1. **Horol.**: An instrument differing from a watch in not being adapted to be carried on the person, and having a motive weight or spring, a train of gearing, index hands, and figured dial, and a pulsative device to determine the rate at which the mechanism shall move.

(1) **Hist.**: The dial was an early invention for keeping time. [DIAL.] The clepsydra followed next. [CLEPSYDRA.] One of these latter instruments, that of Plato, B. C. 372, was made to sound upon organ-pipes the hour of the night when the dial could not be seen. Wheel-work set in motion by springs and weights was known in the time of Archimedes, 287-212 B. C., and applied to mechanical engines and toys. Two other appliances were needful to make a clock, viz., to join the wheels to a pointer which traversed the dial, and to contrive a mode of regulating the speed of the going-works. When these features were united to complete the mechanism of a clock is not known. About A. D. 1000 Ebu Junis, of the Saracenic University of Cordova, in Spain, had a pendulum clock, to which it is thought that Gerbert, a student at that seat of learning, and afterward Pope Sylvester II., added the escapement. In A. D. 1288 a clock was placed in the palace yard, London, and shortly after that date they began to be supplied to cathedrals, churches, palaces, town halls, &c., till at length they became numerous everywhere.

(2) **Kinds of clocks now in use:**

(a) A *church clock* is called in the trade a tower clock; its external appearance is familiar to everyone.

(b) A *chiming clock*, sometimes called a musical clock, is one in which the hours or fractions are marked by a carillon. These instruments were first made in Germany as early as A. D. 1580.

(c) A *regulator* is a watchmaker's clock of superior quality for regulating time-pieces.

(d) An *astronomical clock* is one which has a compensating pendulum, and is otherwise of marked high quality; it is used in determining time when astronomical observations are being taken.

(e) An *electric clock* is one whose movements are regulated by electro-magnetic devices.

2. **Astron.**: [1. *Horol.*]

3. **Elect.**: [1. *Horol.*]

"In working through the bone, the teeth of the saw will begin to clog."—*Sharp*: *Surgery*.

2. To coalesce, to form into a clod or clot; to become clotted or lumpy.

"Move it sometimes with a broom, that the seeds clog not together."—*Evelyn*.

†*Crabb* thus distinguishes between to *clog*, to *load*, and to *encumber*: "*Clog* is figuratively employed for whatever impedes the motion or action of a thing, drawn from the familiar object which is

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

used to impede the motion of animals; *load* is used for whatever occasions, an excess of weight or materials. A wheel is *clogged*, or a machine is *clogged*; a fire may be *loaded* with coals, or a picture with coloring. . . . *Clog* and *encumber* have the common signification of interrupting or troubling by means of something irrelevant. Whatever is *clogged* has scarcely the liberty of moving at all; whatever is *encumbered* moves and acts but with difficulty." (*Crabb: Eng. Synon.*)

clög, *clogge, s. & a. [Scotch *clag*; A. S. *clæg*=clay; Dan. *klæg, kleg*=(s.) clay, loam; (a.) loamy.] [CLAY.]

A. As substantive:

2. Arch.: The square space attached to a regular monastery or large church, with a peristyle or ambulatory round, and usually with a range of buildings over it. The cloister is perhaps *ex vi termini*, the central square shut in or closed by the surrounding buildings. Cloisters are usually square on the plan, having a plain wall on one side, a series of windows between the piers or columns on the opposite side, and arched over with a vaulted or ribbed ceiling. It mostly forms part of the passage of communication from the church to the chapter-house, refectory, and other parts of the establishment. In England nearly all the cathedrals, and most of the collegiate churches and

abbeys, were provided with cloisters. On the continent they are commonly appended to large monasteries, and are often decorated with paintings and contain tombs. (*Gwilt.*)

"Prince Henry. Here it reigns forever!
The peace of God, that passeth understanding,
Reigns in these cloisters and these corridors."
Longfellow: The Golden Legend, iv.

*II. Fig.: Any place in which one is shut up, specially the womb.

"As he brak not Maries cloister whanne that she was maad with childe."—*Wycliffe: Select Works*, i. 318.

¶ Crabb thus distinguishes between a *cloister*, a *convent*, and a *monastery*: "The proper idea of *cloister* is that of seclusion; the proper idea of *convent* is that of community; the proper idea of a *monastery* is that of solitude. One is shut up in a *cloister*, put into a *convent*, and retires to a *monastery*." (*Crabb: Eng. Synon.*)

***cloister-garth, s.** [Eng. *cloister*, and Mid. Eng. *garth*=garden.] The court of a religious house with the arcades attached.

clōis'-tēr, v. t. [CLOISTER, s.]

1. Lit.: To shut up in a cloister or religious house; to shut up in seclusion from the world.

Shakesp.: Twelfth Night, i. 1.

clōn'-īc, a. [In Fr. *clonique*; Low Lat. *clonicus*, from Gr. *klonos*=any violent confused motion, the throng of battle, spec. the battle-rout . . . (*Med.*) a tumult in the bowels.]

Med.: Any tumultuary inordinate interrupted motion within the bodily frame. It is used specially of the epileptic and convulsive motions. Dr. Cullen and his followers applied the term *clonic convulsions* to what he deemed spasms characterized by involuntary alternate motions of contraction and relaxation such as may be seen in hysteria, and *tonic convulsions* to those characterized by contractions not quickly succeeded by alternate relaxations. Of this class the chief example is tetanus. This terminology is now abandoned.

"In the other form of spasm, the contractions of the affected muscles take place repeatedly, forcibly and in quick succession; and the relaxation, of course, is as sudden and frequent. This has been named *clonic spasm*."—*Watson: Lectures on the Principles and Practice of Physic*, lect. xxxii.

***clōom, v. t.** [CLAM.] To smear over or stop up with any viscid or tenacious substance.

"Rear the hive enough to let them in, and cloom up the skirts, all but the door."—*Mortimer: Husbandry*.

clōot, clute, s. [CLEAVE.] A divided or cloven hoof. (*Scott.*)

¶ *Cloot and cloot*: Every one, every bit.

***clooth, s.** [CLOTH.]

***clōot'-īe, s.** [Eng. *cloot*; -ie=y.] An old name for the devil. (*Scott.*)

"O thou! whatever title suit thee,
Auld Hornie, Satan, Nick, or Clootie."
Burns: Address to the Deil.

clort, s. [CLART.]

1. Any miry or soft substance, especially that which is adhesive and contaminating.

"Clort, a lump of soft clay, mire, leaven, any thing that sticks to and defiles what it is thrown upon."—*Gl. Surv. Nairn*.

2. The thick bannocks baked for the use of the peasantry.

clort'-ŷ, a. [CLARTY.] Dirty, filthy.

clōse, *closen, *closyn, v. t. & i. [O. Fr. *clos*, pa. par. of O. Fr. *clere*=to inclose, to shut in; from Lat. *clausus*, pa. par. of *claudo*=to shut, to shut in; O. H. Ger. *sluzan, sliozan*; M. H. Ger. *sliezen*; Ger. *schliessen*=to close.]

A. Transitive:

I. Literally:

"Intire cowardice makes thee wrong this virtuous gentlewoman, to close with us."—*Shakesp.: Hen. IV., Pt. II., ii. 4.*

(2) To agree to or accept terms proposed, to accede to.

*(3) To agree or assent to.

*(4) To unite, to coalesce.

"This spirit, poured upon iron, lets go the water; the acid spirit is more attracted by the fixed body, and lets go the water, to close with the fixed body."—*Sir I. Newton: Optics.*

(5) To grapple with, to engage in a hand-to-hand fight, to join battle.

"If I can close with him, I care not for his thrust."—*Shakesp.: Hen. IV., Pt. II., ii. 1.*

6. To close with the land:

Naut.: To come near to the land.

¶ Crabb thus distinguishes between to *close* and to *shut*: "*Close* is to *shut*, frequently as the means to the end. To *close* signifies simply to put together; to *shut* signifies to put together so *close* that no opening is left. The eyes are *shut* by *closing* the eyelids; the mouth is *shut* by *closing* the lips. The idea of bringing near or joining is prominent in the signification of *close*; that of fastening or preventing admittance in the word *shut*. By the figure of metonymy, *close* may be often substituted for *shut*; as we may speak of *closing* the eyes or the mouth; *closing* a book or a door in the sense of *shutting*: but they are, notwithstanding, very distinct. Many things are *closed* which are not to be *shut*, and are *shut* which cannot be *closed*. Nothing can be *closed* but what consists of more than one part; nothing can be *shut* but what has or is supposed to have a cavity. A wound is *closed*, but cannot be *shut*; a window or a box is *shut*, but not *closed*. When both are applied to hollow bodies, *close* implies a stopping up of the whole, *shut* an occasional stoppage at the entrance. What is *closed* remains *closed*; what is *shut* may be opened. A hole in a road, or a passage through any place is *closed*; a gate, a window, or a door, is *shut*."

(2) He thus discriminates between to *close*, to *finish*, and to *conclude*: "To *close* is to bring to an end; to *finish* is to make an end: we *close* a thing by ceasing to have anything more to do with it; we *finish* it by really having no more to do with it. We *close* an account with a person with whom we mean to have no farther transactions; we *finish* the business which we have begun. It is sometimes necessary to *close* without *finishing*, but we cannot *finish* without *closing*. The want of time will compel a person to *close* his letter before he has *finished* saying all he wishes. . . . *Close* and *finish* are employed generally, and in the ordinary transactions of life; the former in speaking of times, seasons, periods, &c., the latter with regard to occupations and pursuits; *conclusion* is used particularly on moral and intellectual operations. A reign, an entertainment, an age, a year, may have its *close*; a drawing, an exercise, a piece of work, may be *finished*; a discourse, a story, an affair, a negotiation, may be *concluded*." (*Crabb: Eng. Synon.*)

(3) For the difference between to *close* and to *end*, see EDE.

Shakesp.: King John, iv. 2.

(22) Close-fisted, parsimonious, near.

II. Technically:

1. *Her.*: Applied to a bird represented with the wings folded closely to the body.2. *Phonetics*: Applied to a vowel pronounced with a diminished opening of the lips.

¶ Crabb thus distinguishes between the adjectives *close* and *compact*: "Proximity is expressed by both these terms, the former in a general and the latter in a restricted sense. Two bodies may be *close* to each other, but a body is *compact* with regard to itself. Contact is not essential to constitute *closeness*; but a perfect adhesion of all the parts of a body is essential to produce *compactness*. Lines are *close* to each other that are separated but by a small space: things are rolled together in a *compact* form that are brought within the smallest possible space." (*Crabb: Eng. Synon.*)

B. As adverb:

1. Literally:

(1) Near, close to, in proximity to.

"Behind her Death
Close following pace for pace, not mounted yet
On his purple horse." *Milton: P. L., x. 588.*

"Openliche nought so *cloos*."—*Trevisa, i. 241.*

(3) Constantly, always, by a slight transition from the use of the term in English: as, "Do you ay get a present when you gang to see your auntie?" "Aye, *close*." (*Scotch.*)¶ To keep *close* to a point: Not to wander from the matter or subject in question.

¶ Crabb thus distinguishes between *close*, *near*, and *nigh*: "*Close* is more definite than *near*; houses stand *close* to each other which are almost joined; men stand *close* when they touch each other; persons are *near* each other when they can converse together. *Near* and *nigh*, which are but variations of each other in etymology, admit of little or no difference in their use; the former, however, is the most general. People live *near* each other who are in the same street; they live *close* to each other when their houses are adjoining. *Close* is annexed as an adjective; *near* is employed only as an adverb or preposition. We speak of *close* ranks or *close* lines; but not *near* ranks or *near* lines." (*Crabb: Eng. Synon.*)

¶ Obvious compounds: *Close-barred*, *close-clasped*, *close-folded*, *close-pent*, *close-ranged*, *close-woven*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

close-quarters, s. pl.

1. *Literally*:

Naut.: Certain strong bulkheads or barriers of wood, also called *close-fights*, formerly stretching across a merchant-ship in several places. They were used for retreat and shelter when a ship was boarded by an adversary, and were therefore fitted with loopholes. Powder-chests were also fixed upon the deck, containing missiles which might be fired from the close-quarters upon the boarders. The old slave-ships were thus fitted, in case of the negroes rising, and flat-headed nails were cast along the deck to prevent them walking with bare feet. In the navy the term is used to describe the position of two or more ships in action, with yard-arm and yard-arm touching.

B. Parliamentary Rules: The power in certain circumstances of terminating a debate in a legislative body, although there are members anxious to carry it on for an indefinite period. The British House of Commons is the model on which all similar deliberative assemblies have been formed; yet sooner or later everyone of these finds it impossible to carry on the business brought before it unless it assumes the power of deciding when a debate has lasted long enough, and should terminate. Many years went by, and still the good sense and moderation of the successively defeated minorities in the British House of Commons rendered it unnecessary to take any steps for the curtailment of superfluous debate. Not till nearly four-fifths of the nineteenth century had run its course, was any serious desire felt on either side of the House to alter this happy state of things. Shortly before that time, however, the device of obstructing simply for obstruction's sake, began to be cultivated as an art, and was brought in a brief period to high perfection. Day by day time was intentionally wasted by small minorities of the house, and oftener than once when the members wished to go home, a section of the Irish representatives forced upon them "an all-night sitting." In these circumstances Hon. W. E. Gladstone, then Prime Minister, took steps to grapple with the difficulty, and commenced the parliamentary session of 1882 with new rules for the conduct of business, which he believed would preserve the rights both of majorities and minorities, while materially diminishing obstruction. The first rule gave permission to the Speaker, or to the Chairman of a Committee of the whole house, to close debate and go on to vote on a question if, when a motion to that effect was carried by a majority, its supporters appeared to amount to 200, or, in the event of the minority being less than 40, to amount to more than 100. The proposed system was at first called the *clōture* [CLOTURE], but was afterward exchanged for its equivalent, *closure*.

In the Congress of the United States the practice has been to allow unlimited debate, and it is for this reason that we have so many instances of obstructive tactics being resorted to by a minority to delay the passage of a measure. These tactics have been given the general name of "filibustering," and include almost every expedient known to parliamentary tacticians, not even omitting serious breaches of decorum. The rule of closure as adopted by the British Parliament may prove a welcome addition to Congressional rules of order, as many instances are on record where tardy legislation due to failure to effect closure has operated disastrously on the interests of the country, in no instance, probably, to a greater degree than in the one referred to in the illustration *infra*:

"It is feared that closure cannot be brought about, as the custom of the Senate is to allow full debate, and especially so on the question of the repeal of the Sherman Silver Bill."—*Chicago Tribune*, Sept. 25, 1893.

Under a cloud: In temporary disgrace or misfortune.

"Gentlemen that are under a cloud."—*Fielding: Amelia*, bk. v., ch. 4.

B. Technically:

1. *Botany*: Cloudberry (*Rubus chamaemorus*).

2. *Meteorology*:

(1) *Composition of clouds*: A cloud is a mass of vapor condensed into minute drops or vesicles, and differing from fog chiefly in this respect, that fogs occupy the lower while clouds float in the upper regions of the atmosphere. Both derive their origin from vapors which rise from the sea, from fresh water, or from the moist earth.

(2) *Different kinds of clouds*: In 1803, Mr. Luke Howard divided clouds into four principal kinds, the Cirrus, the Cumulus, the Stratus and the Nimbus. Two of these are frequently combined: hence he added to the former list of clouds the three following: Cirro-cumulus, Cirro-stratus, and Cumulo-stratus. The Cirrus is a small fibrous or wisp-like cloud, composed of what are popularly called "Mares'-tails," so high in the heavens that they are probably frozen. Their appearance in numbers often precedes a change of weather. The Cumulus, resembling great mountains of wool, is not so high. Several large ones are often seen on a summer morning. If these diminish during the day, the probability is in favor of fine weather, but if they multiply, and become surmounted by Cirri, the indication is of approaching storm. Cumuli in winter are not so frequent or well marked. The Stratus is a large and continuous sheet of dark cloud, seeming to rest on the horizon at sunset, and often vanishing at sunrise. The Stratus is frequent in autumn and rare in spring. The foregoing three all melt into one to form the fourth, viz., the Nimbus, or rain-cloud. Its appearance is familiar to all. The Cirro-cumulus is, as its name imports, a combination of the Cumulus and the Cirrus. It consists of a series of small round masses. The sky covered with them is popularly known as a "Mackerel" sky. It is best seen in warm and dry summer weather. In the Cirro-stratus the Cirri have descended from their airy height and become horizontal. The aspect is like that of shoals of fish. The Cumulo-stratus is like a cumulus flattened at the top and overhanging its base. Its tendency is to spread, settle down into a nimbus, and ultimately disappear in rain.

(3) *Height of clouds in the sky*: The mean height of clouds in winter is from 1,300 to 1,500 yards, and in summer 3,300 to 4,400. M. D'Abbadie observed a cloud in Ethiopia only 230 yards above the ground; and when Gay Lussac ascended in a balloon to a height of 7,650 yards, there were cirri overhead apparently at a much greater elevation.

(4) *Theories of the formation and suspension of clouds*: According to Hutton, while the temperature of a stratum of air saturated with moisture diminishes in an arithmetical progression, the capacity of retaining the moisture in the form of invisible vapor diminishes in a geometrical one: hence, when the temperature of a saturated stratum of air falls, the formerly invisible vapor takes the aspect of a cloud. There are various opinions as to why it floats. Halley and Saussure considered that each vesicle of water in the sky was hollow, and that consequently it floated like a balloon; a more modern view is that the vesicles are carried upward by ascending currents of air. Clouds also which appear stationary are really descending slowly; but their lower part being dissipated by more heated strata of air, and their upper parts increased by fresh condensation, their descent is disguised so that they appear stationary. (*Ganot, &c.*)

(5) *Electricity of clouds*: As a rule the clouds are all electrified, some positively and others negatively: in some there is more, in others less, of tension.

† Compounds of obvious signification: *Cloud-break, cloud-covered, cloud-dispelling, cloud-fenced, cloud-girt*.

I. Ord. Lang.: One of the laminæ of a head of garlic.

II. Hort.: The name given by gardeners to new bulbs developing in the axils of the scales of older ones, at the expense of which they grow, with the effect of ultimately destroying them.

clōv'-en (1), pa. par. [CLEAVE (1), v.]

"In no other form, humanly speaking, would they have struck so deep into the mind and heart of man, or cloven to it with such inseparable tenacity."—*Milman: Hist of Jews*, 3d ed., pref., p. xiii.

†clōv'-en (2), pa. par. or a. [CLEAVE (2), v.]

cloven-footed, a.

1. Of mammals: Having the hoof divided in the center. This structure exists in the Ruminantia.

"Whatsoever parteth the hoof, and is clovenfooted, and cheweth the cud, among the beasts, that shall ye eat."—*Lev. xi. 3.*

*2. Of birds: Having the feet without webs.

"Great variety of water-fowl, both whole and cloven-footed, frequent the waters."—*Ray: On the Creation*.

3. Of Satan: Having, according to popular assumption, the feet cloven like those of a ruminant.

"The cloven-footed fiend is banish'd from us."—*Dryden*.

cloven-hoof, s. Such a divided hoof as is possessed by the ruminant animals. It being of old assumed that Satan has a cloven hoof, the expression "to show the cloven hoof" means to permit diabolical intentions to become visible.

cloven-hoofed, a. The same as CLOVEN-FOOTED, in the senses 1 & 3.

"There are the bilsulous or cloven-hoofed; as camels and beavers."—*Browne: Vulgar Errors*.

I. Ordinary Language:

1. A trefoil, especially if used for fodder. [TRIFOLIUM.]

2. The name given to various plants more or less resembling the common trefoils.

II. Technically:

1. Agric.: Of the several kinds grown, the common red clover (*Trifolium pratense*) is a biennial, and may be sown with barley, oats, or other grain sufficiently advanced in growth not to be suffocated by it. In the second year it gives a full crop.

The white, called also Dutch clover, is a perennial, and is sown with various grasses when it is intended as permanent pasture for sheep. French clover (*Trifolium incarnatum*) is ripened early; it is only an annual. Rye-grass in small quantity is often sown along with clover. A crop of clover, if mown and carried away as hay, so impoverishes the land that it should not be repeated for some years, but if it is eaten off the land by sheep fed on oil-cake it is generally grown every four years. [ROTATION OF CROPS.]

2. Chem.: The addition of lime and gypsum to the soil greatly promotes the growth of clover. The ash of clover contains 24.9 potash, 3.0 soda, 12.2 magnesia, 34.9 lime, 7.35 phosphoric acid, 3.7 sulphuric acid, 1.3 silica, 1.5 peroxide of iron, 11.1 chloride of sodium. The dried plants yield 10.53 per cent. of ash. Clovers contain about 80 per cent. of water.

III. In special phrases:

1. To live in clover: To live luxuriously.

"Well, Laureat, was the night in clover spent?"
Ozell.

2. To go from clover to rye-grass: To exchange better for worse (applied to second marriages).

clūb, **clobb*, **clobbe*, **clubbe*, *s.* [Icel. *klubba*, *klumba*; Sw. *klubba*; Dan. *klub*=a club; *klump*=a clump, a lump.]

I. Literally:

1. A heavy staff or stick, now generally of wood, thicker at one end than the other, and fitted to be carried in the hand and used as a weapon of defense if need be.

"But make you ready your stiff bats and clubs,
Rome and her rats are at the point of battle." Shakespeare.

2. One of the four suits at cards, representing a trefoil or clover-leaf.

¶ The name is a translation of the Span. *bastos*=cudgels or clubs, which is the Spanish name for the suit. The figure by which the clubs are denoted on a card is a trefoil: the Fr. name being *trèfle*=(1) trefoil, (2) a club (at cards). Cf. Dan. *kløver*=(1) clover, (2) a club (at cards); Dut. *klaver*=(1) clover, (2) a club (at cards). (*Skeat*.)

3. A round, solid mass; a knot, used of a fashion of dressing the hair.

4. An association or number of persons combined for the promotion of some common object, whether political, social or otherwise. The use of the word in this sense probably comes from the preceding one, as meaning a knot or gathering of men. Another definition, interesting at all events, is suggested by Carlyle in the extract given below.

¶ The earliest London club of any celebrity was established about the beginning of the 17th century, at the Mermaid Tavern, Friday street. Among its members were Shakespeare, Sir Walter Raleigh, Beaumont, Fletcher, and Selden. Ben Jonson figured at another club, which met at the Devil Tavern, near Temple Bar. Of other clubs, the literary one, established in the year 1764, had among its members Johnson, Boswell, Burke and Goldsmith.

Toward the close of the 18th century, the French political clubs gained world-wide notoriety from the active part which they took in the first French revolution. The most celebrated was the Jacobin Club, founded at Versailles in 1789, and called originally the Breton Club. This and other political French clubs were abolished on September 4, 1797. They were revived in 1848, but were suppressed again in 1849 and 1850.

"Bodies of Men uniting themselves by a Sacred Vow, 'Gelübde';—which word and thing have passed over to us in a singularly dwindled condition: 'Club' we now call it; and the vow, if sacred, does not aim very high."—Carlyle: *Fred. Great*, bk. ii., ch. 6.

5. An association or society of a number of persons for the purpose of providing such of its members as may require it with a temporary residence or resort in a house maintained and reserved for the sole use of such members.

6. The house in which such an association or society of persons meet. [CLUB-HOUSE.]

¶7. The scot, subscription, or share of expense paid or payable by each member of such an association or society.

"A fuddling couple sold ale; their humor was to drink drunk, upon their own liquor; they laid down their club, and this they called forcing a trade."—*L'Estrange*.

8. An association or society of baseball players.

*II. Figuratively:

1. A combination, a union.

"He's bound to vouch them for his own,
Tho' got b' implicit generation,
And general club of all the nation." Hudibras.

2. A clown, a rustic.

club-foot, *s.*

1. A short, deformed foot; some form of *Talipes*.

¶ In 1831 Dr. Stromeyer cured a gentleman of this defect by dividing the tendons of the contracted muscles with a very thin knife.

"There are three principal forms of distortion to which the foot is congenitally subject: 1. When the foot is turned inwards. . . . 2. When it is turned outwards. . . . 3. When the patient can only put the toes on the ground. Almost all the varieties of club-foot may be referred to one of these species."—A. T. S. Dodd: *Abnormal Conditions of the Foot*, in *Todd's Cyclopædia of Anatomy and Physiology*.

2. A person so deformed.

club-footed, *a.* Having a club-foot.

club-grass, *s.*

1. A general name for the genus *Scirpus*.

"Their sovereign nostrum is a *clumsy* joke

On pangs enforced with God's severest stroke."

Cowper: Retirement, 313.

† Crabb thus distinguishes between *awkward* and *clumsy*: "These epithets denote what is contrary to rule and order in form or manner. *Awkward* respects outward deportment, *clumsy* the shape or make of the object; a person has an *awkward* gait, is *clumsy* in his whole person. *Awkwardness* is the consequence of bad education; *clumsiness* is mostly a natural defect. . . . They may be both employed figuratively in the same sense and sometimes in relation to the same objects; when speaking of *awkward* contrivances or *clumsy* contrivances, the latter expresses the idea more strongly than the former." (Crabb: *Eng. Synon.*)

*clūnch, v. t. [CLENCH, CLINCH.]

Dr. H. More: Song of the Soul; Infinity of Worlds.

Clā-nī-āc, a. & s. [Lat. *cluniacensis*.]

A. As adj.: Of or pertaining to Cluny, a com-

mune and town of France, in the department of the Saône-et-Loire, 200 miles S.S.E. of Paris, and seat of the monastery described under B.

B. As subst.: A monk belonging to the monastery founded at Cluny, or the order which subsequently developed from it. In 910, Guillaume (William) I., Duke of Aquitaine and Count of Auvergne, and Bern or Berno, Abbot of Gigniac, under his auspices, founded in Cluny, then a mere village, an abbey of Benedictine monks. In the 10th century, Odo, a French nobleman, being made Abbot of Cluny about 927, rendered the discipline of the monastery more strict. Many other monasteries followed the example, and the Cluniacians became celebrated through Europe, and soon acquired great wealth and power. In the 11th century they founded a community or congregation, separate from that of the ordinary Benedictines. In the 12th century they were corrupted by the wealth they had acquired, and their discipline became greatly relaxed.

About 1077 or 1078, William, Earl of Warren, son-in-law of the Conqueror, brought Cluniac monks into England, and erected for them a house at Lewes, in Sussex. In 1525, Cardinal Wolsey dissolved four houses of Cluniacs. The monastery at Cluny itself was three times plundered by the Huguenots, and during the French revolution of 1793 it was almost entirely destroyed.

Clā-nī-a-čēn'-sī-āns, s. pl. [Lat. *cluniacenses*, pl.] [CLUNIAC.] The same as Cluniacs. [CLUNIAC, s.]

clūnk, s. [From the sound.] A noise such as is made when a cork is extracted from a bottle.

clūnk, v. i. [From *clunk*, s. (q. v.).] To emit a hollow and interrupted sound, like that made by a cork suddenly extracted from the neck of a bottle.

***clūnk-ēr, s.** [Perhaps the same as *clinker* (q. v.).]

1. A tumor, a bump.

"He has a clunker on his crown,
Like half an errack's egg—and yon
Undoubtedly is Duncan Drone."

Piper of Peebles, p. 18.

2. Pl. (*Clunkers*): Dirt hardened in clods so as to make a pavement unequal.

***clūnt-ēr, v. i.** [? CLUNCH.] To clod or coagulate; to become lumpy.

clū-pē-a, s. [Lat. = a small river fish supposed by some to be the lamprey (*Petromyzon fluviatilis*).] *Ichthy.*: A genus of fishes, the typical one of the family Clupeidae (q. v.). The maxillaries are arched in front, and divided into three pieces; the intermaxillaries narrow and short; the upper jaw entire; the teeth minute or wanting; the body compressed and covered with large scales. Yarrell enumerated five species, viz., *Clupea pilchardus* (the Pilchard, or Gipse Herring); *C. harengus* (the Herring); *C. Leachii* (Leach's Herring); and *C. alba* (the White-bait), but there is reason to believe that the last so-called species is only the young of the herring.

clū-pē'-ī-dæ, s. pl. [Lat. *clupea* (q. v.), and fem. pl. adj. suff. -īdæ.]

1. *Ichthy.*: The herring tribe, a family of fishes belonging to Cuvier's order Malacopterygii Abdominales. Now they are placed under the order Teleostei, and the sub-order Malacopteri. The dorsal fin is single; there is no adipose fin; the upper jaw is composed of the intermaxillary bones in the middle and the maxillaries at the sides, and the body is covered with scales. The following genera are represented in the North Atlantic—*Clupea*, *Alosa*, and *Engraulis* (q. v.).

2. *Palæont.*: The family appears to have had representatives as early as the chalk. [CLUPEOID.]

clū-pē-ōid, s. [Lat. *clupea* (q. v.), and Gr. *eidos* = . . . form, appearance.]

Palæont.: Any fossil fish bearing a close resemblance in character to a modern Clupea.

"The Clupeoids seem also to be represented by allied forms at this comparatively early period."—*Nicholson: Palæont.* (ed. 1879), ii. 125.

***cluse, v. t.** [CLOSE.]

"Heo clused in ther withinnen alle heore wintunnen." *Layamon*, iii. 233.

***cluse, s.** [CLOUSE, CLOW.] A sluice, a weir.

"As me dedh water et ter mulne cluse."—*Ancren Riwe*, p. 72.

clū-sī-a, s. [Named after Carolus Clusius (Charles de la Cluse), who was born at Antwerp on February 13, 1526, became one of the greatest botanists of the sixteenth century, and died, professor of botany at Leyden, on April 4, 1609.]

Bot.: Balsam-tree, a genus of plants, the typical one of the order Clusiaceæ (Guttifers), and the tribe Clusiæ. The flowers are usually polygamous, calyx consisting of four imbricate permanent sepals, colored, the outer pair smallest, often bracteate at the base. Petals 4-6, deciduous; stamens in the male flowers many and free, in the female ones few, sterile, and connected, all glutinous; stigmas 5-12, radiately peltate, glutinous; ovary surrounded by a staminiferous ring; capsule fleshy, 5-12 celled. The species are trees or shrubs, often parasitic. *Clusia rosea* is a beautiful tree growing on rocks; its fruit divides into eight portions, with scarlet seeds like those of the pomegranate. *C. alba* is an elegant tree of great thickness of trunk, yet, strange to say, parasitic upon other trees.

"Parasites advance their pride
Against the power that bred them."

C. flava resembles the former one. These plants found their way from the gardens of this country to the greenhouses of England. Endlicher thinks that Hog-gum is produced by *C. flava*. A resin "wept" by the disk and stamens of *C. insignis* is rubbed down with the butter of the chocolate-nut and used by Brazilian women to alleviate the pain of sore breasts.

clū-sī-ā'-čē-æ, s. pl. [Mod. Lat. *clusia*, and fem. pl. adj. suff. -aceæ.]

Bot.: An order of plants, the type of the alliance Guttiferales, that term implying that they secrete "gutta," i. e., drops of resin. Lindley calls the Clusiaceæ themselves Guttifers. They have coriaceous leaves, which are simple, opposite, and without stipules, the midrib being generally prominent, and parallel veins at times running conspicuously to the margin. The flowers are symmetrical, with equilateral petals, adnate, beakless anthers, solitary, or few seeds and sessile radiating stigmas. The order consists of trees often parasitical. They are found in the tropics, their metropolis being South America; a few are from Madagascar or from the Continent of Africa. Many secrete an acrid purgative yellow gum-resin. The gamboge of commerce is furnished by *Garcinia*, which is a Guttifer. The order contains four tribes: Clusiæ, Moronobæ, *Garciniæ*, and *Calophylleæ*. Lindley enumerated thirty genera, and estimated the known species at 150.

clū-sī-ād, a. & s. [Mod. Lat. *clusia* (q. v.), and suff. -ad.]

A. As adj.: Pertaining to the genus *Clusia* or the order Clusiaceæ.

B. As subst.: A plant belonging to one or another of these.

clū-sī-ē-æ, s. pl. [Mod. Lat. *clusia*, and fem. pl. adj. suff. -eæ.]

Bot.: The typical tribe of the order Clusiaceæ (q. v.).

cōaḥ'-mān-shīp, s. [Eng. *coachman*; *-ship*.] The craft or skill of a coachman; skill in driving coaches.

"His skill in *coachmanship*, or driving chaise."

Cowper: *Tirocinium*, 291.

***cō-āct', *co-act-it, a.** [Lat. *coactus*.] [COACT, *v.*] Forced, constrained.

"I think my Lordes exposition *coact*, in that he will admit none to have brought forth the bread and wine, but Melchisedec alone."—*Reassoning betwix Crostraguell and J. Knox*, F. iij, a.

***cō-āct** (1), *v. t.* [Lat. *coacto*=to force, intens. of *cogo* (sup. *coactum*)=to drive together, to force; contracted from *co=con*, and *ago*=to drive.] To drive, to force together, to compel.

"In conclusion, both garrisons and the inhabitants . . . were *coacted* to render the city."—Hale.

***cō-āct'** (2), *v. i.* [Pref. *co=con*=with, together; and Eng. *act* (q. v.).] To act together or in concert; to unite.

"But, if I tell how these two did *coact*, Shall I not lie in publishing a truth?"

Shakesp.: *Troilus*, v. 2.

***cō-āct'-ēd, a.** [COACT (1), *v.*] Forced, constrained.

cō-āc-tion, s. [Lat. *coactio*=(1) a driving together, (2) a compelling; *coacto*=to compel, to force.] [COACT.]

1. **Compulsion, force.**

"Feede the flock of Christ, as much as in you lyeth, not taking care thereof by *coaction*, but willingly."—Bishop Wootton: *Christian Manual*, D. ii., 1576.

2. **A bringing or joining together.**

"... forbidding all men firmly to make any law of *coaction* or of separation, . . ."—Bale: *Acts of English Votaries*, i. 16 (1560).

cō-āc-tive (1), *a.* [Lat. *coactus*, pa. par. of *cogo*=(1) to drive together, (2) to compel.] Having a restraining or impelling power; compulsory, restrictive.

"The Levitical priests, in the old law, never arrogated unto themselves any temporal or *coactive* power."—Raleigh.

***cō-āc-tive** (2), *a.* [Pref. *co=con*=with, together, and Eng. *active* (q. v.).] Acting together or in union.

"With what's unreal thou *coactive* art, And fellow'st nothing . . ."

Shakesp.: *Winter's Tale*, i. 2.

cō-āc-tive-lŷ, adv. [Eng. *coactive* (1); *-ly*.] In a coactive manner, by compulsion or restriction. (Bp. Bramhall.)

cō-āc-tiv'-i-tŷ, s. [Eng. *coactiv(e)* (2); *-ity*.] A working or acting together; unity of action.

"... that vital sympathy and *coactivity*, that transmits objects in their exact circumstances to the common percipient."—More: *Philosophical Writings*; Preface.

cō-ād-āp-tā-tion, s. [Pref. *co=con*=with, together, and Eng. *adaptation* (q. v.).] Mutual adaptation or suitability.

"... to acquire that perfection of structure and *coadaptation* which most justly excites our admiration."—Darwin: *Origin of Species* (ed. 1859); *Introd.*, p. 3.

cō-a-dāp-tēd, a. [Pref. *co=con*, and Eng. *adapted* (q. v.).] Adapted to one another; mutually adapted or suited. (Owen.)

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

***cō-ad-hēr-ent**, *a. & s.* [Pref. *co=con*, and Eng. *adherent* (q. v.).]

A. As adj.: Clinging together, adhering, adherent.

B. As substantive:

1. *Ord. Lang.:* An adherent, a supporter.

2. *Shipbuilding:* The fayed piece called bilge-keel. (*Smyth.*)

†**cō-ad-jā-çence**, *s.* [Pref. *co*, and Eng. *adjacence* (q. v.).] The quality or state of being coadjacent; nearness, closeness of things to each other.

"By similarity, by contrast, by coadjacence in space."
—*Pop. Encycl.* (*Ogilvie.*)

†**cō-ad-jā-çent**, *a.* [Pref. *co*, and Eng. *adjacent* (q. v.).] Mutually adjacent, close to each other.

†**cō-ad-jū-mēnt**, *s.* [Pref. *co=con*; Lat. *adjuvmentum*, for *adjuvimentum*=help; *adjuvo*=to help, to aid.] Mutual help or assistance.

cō-ad-jūst, *v. t.* [Pref. *co=con*, and Eng. *adjust* (q. v.).] To adjust by mutual adaptation.

cō-ad-jūs-tēd, *pa. par. or a.* [COADJUST.]

cō-ad-jūst-mēnt, *s.* [Eng. *coadjust*; -*ment*.] The act or process of coadjusting; the state of being mutually adjusted or adapted.

cō-ad-jū-tant, *a. & s.* [Pref. *co=con*, and Lat. *adjutans*=helping, assisting.]

A. As adj.: Co-operating, assisting.

"Thracius coadjutant, and the roar
Of fierce Euroclydon." *Philips.*

B. As subst.: An assistant, a co-operator.

"Oates or some of his coadjutants."—*North: Examen*, p. 198.

***cō-ād-jū-tā-tōr**, *s.* [Pref. *co=con*, and Lat. *adjutor*=a helper.] An assistant, a coadjutor.

"I do purpose to act as a coadjutor to the law."—*Smollett: Lancelot Greaves*, ch. ii.

***cō-ad-jū-tīng**, *a.* [Pref. *co=con*, and Lat. *adjuvo*=to help.] Mutually assisting or aiding; co-operating.

"Those higher hills to view, fair Love that stand,
Her coadjuting springs with much content behold,"
Drayton: Polyolbion, iii.

cō-ad-jū-tīve, *a.* [Pref. *co=con*; Lat. *adjuvo*=to help; Eng. suff. -*ive*.] Co-operating; rendering mutual aid.

"There is no mischief we fall into but that we ourselves are at least a coadjutive cause."—*Feltham: Resolves*.

cō-ad-jū-tōr, *s.* [Lat., from *co=con*, and *adjuvo*=to help, to aid.]

I. Ordinary Language:

1. An assistant or helper; a co-operator.

"... my predecessors the poets, or their seconds or coadjutors the critics."—*Dryden*.

2. One authorized, empowered, or appointed to perform the duties of another.

II. Eccles. (Roman Catholic Ch.): The assistant of a bishop or other prelate, who from age or infirmity is not able fully to do his own duty.

"A bishop that is unprofitable to his diocese ought to be deposed, and no coadjutor assigned him."—*Ayliffe*.

¶ Crabb thus distinguishes between a *coadjutor* and an *assitant*: "A coadjutor is more noble than an *assitant*: the latter is mostly in a subordinate station, but the former is an equal; the latter performs menial offices in the minor concerns of life, and a subordinate part at all times; the former labors conjointly in some concern of common interest and great importance." (*Crabb: Eng. Synon.*)

cō-ad-jū-tōr-ship, *s.* [Eng. *coadjutor*; -*ship*.]

*1. *Ord. Lang.:* Co-operation; joint assistance.

"I would have tried to fix a day, to meet you at Sir R. W—'s, with his permission and your coadjutorship."—*Pope: To Fortescue*, letter 34.

2. *Eccles. (Roman Catholic Ch.):* The position, state, or rank of an assistant to a bishop or other prelate.

cō-ad-jū-trīx, **cō-ad-jū-trēss**, *s.* [Lat. *co=con*; *adjutrix*=a female helper.] A female assistant.

"Bolingbroke and his coadjutrix insinuated that the treasurer was biased in favor of the dissenters."—*Smollett: Hist. Eng.*, bk. i., ch. ii., § 40. (*Latham.*)

cō-ād-jū-van-çy, *s.* [COADJUVANT.] Mutual or concurrent help; co-operation; contribution of help. (*Browne.*)

cō-ād-jū-vant, *s. & a.* [Pref. *co=con*, and Lat. *adjuvans*, pr. par. of *adjuvo*=to help.]

A. As substantive:

Med.: An ingredient in a prescription designed to aid or co-operate with another.

B. As adj.: Assisting, helping, co-operating.

cō-ād-nāte, †**cō-ād-ū-nāte**, *a.* [Lat. *coadunatus* (pa. par. of *coaduno*); from *cō=con*, and *aduno*=to unite.] [ADUNATION.]

Bot.: United at the base, soldered together. The same as *CONNATE* (q. v.).

¶ Linnæus, in his attempt at a natural system of botanical classification, had an order *Coadunatæ*, which he made to include the *Anona*, the *Magnolia*, *Thea*, &c.

cō-ād-ū-nā-tion, †**cō-ād-ū-nī-tion**, *s.* [Pref. *co=con*, and Eng. *adunation* (q. v.).] A bringing together of different things so as to form one body; union, consistency.

"Bodies seem to have an intrinsic principle of, or corruption from, the coadunition of particles endued with contrary qualities."—*Hale: Origin of Mankind*.

cō-ad-vēn-ture (ture as *tshēr*), *s.* [COADVENTURE, *v. i.*] An adventure in which two or more take a share; a joint risk or venture.

***cō-ad-vēn-ture** (ture as *tshēr*), *v. i.* [COADVENTURE, *s.*] To share in a venture or speculation.

"The prince holdeth it no disparagement to coadventure and put in his stake with the merchant."—*Howell: Foreign Travel*, vii.

cō-ad-vēn-tū-rēr (or *turer* as *tshēr-ēr*), *s.* [Eng. *coadventur(e)*; -*er*.] A fellow-adventurer; one who partakes in the same risk or venture.

"There is a worthy captain in this town, who was coadventurer in that expedition."—*Howell: Lett.*, ii. 61.

cō-æ-val, *a.* [COEVAL.]

cō-af-fōr-ēst, *v. t.* [Pref. *co=con*, and Eng. *afforest* (q. v.).] To convert ground into forest, and add it to ground already afforested.

"Henry Fitz-Empresse (viz., the second) did coafforest much land, . . ."—*Howell: Lett.*, iv. 16.

cō-ā-gēn-çy, *s.* [Pref. *co=con*, and Eng. *agency* (q. v.).] Joint agency; an acting in common or in partnership.

"Acting as a coagency with unresisted grief."—*De Quincey: Autobiog. Sketches*, i. 22. (*Davies.*)

cō-ā-gēnt, *s.* [Pref. *co=con*, and Eng. *agent* (q. v.).] An associate; one co-operating with another in any act or work.

"... this coagent of your mischiefs,"
Beaum. & Flet.: Knight of Malta.

***cō-āg-ī-tāte**, *v. t.* [Pref. *co=con*=with, together, and Eng. *agitate* (q. v.).] To shake, move, or agitate together.

***cō-āg-mēnt**, *v. t.* [Lat. *coagmento*=to join or cement together; from *co=con*, and *agmen*=a collected multitude moving forward, *ago*=to drive.] To collect or heap together.

***cō-āg-mēn-tā-tion**, *s.* [Lat. *coagmentatio*, from *coagmento*=to join or cement together.] The act of collecting or heaping together; combination, conjunction.

***cō-āg-mēnt-ēd**, *pa. par. & a.* [COAGMENT.]

cō-āg-ūl-a-bīl-ī-ty, *s.* [Eng. *coagulable*; -*ity*.] The quality of being coagulable, or capable of being coagulated.

†**cō-āg-ū-lā-ble**, *a.* [Eng. *coagul(ate)*; -*able*.] Capable of being coagulated or concreted.

"An effusion of coagulable material."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. iii., p. 79.

cō-āg-ū-lant, *s.* [Lat. *coagulans*, pr. par. of *coagulo*=to coagulate, to concreate.] A substance which coagulates or produces coagulation. (*Dun-glison.*)

cō-āg-ū-lāte, *v. t. & i.* [Lat. *coagulo*, from *coagulum*=a means of coagulation, from *cogo* (sup. *coactum*)=to drive together; It. *cogulare*, *quagliare*, and *cagliare*; Sp. *coagular*; Fr. *coaguler* and *cailler*.]

A. Transitive:

1. To curd, to clot; to change into a curd-like state.

"The mineral acids have the power of coagulating albumen."—*Todd & Bowman: Physiol. Anat.*, vol. i., introd., p. 36.

*2. To crystallize. (*Ogilvie.*)

B. Intransitive:

1. To congeal, to thicken, to become clotted or curded.

"If the dark rays were absorbed in a high degree by the humors of the eye, the albumen of the humors might coagulate along the line of the rays."—*Tyndall: Frag. of Science*, 3d ed., viii., 9, p. 194.

*2. To become crystallized.

"Spirit of wine combined with milk, a third part spirit of wine, and two parts milk, coagulateth little, but minglith; and the spirit swims not above."—*Bacon*.

***cō-āg-ū-lāte**, *a.* [Lat. *coagulatus*, pa. par. of *coagulo*.] The same as *COAGULATED* (q. v.).

cō-āg-ū-lā-ted, *pa. par. & a.* [COAGULATE.] Congealed, concreted, curded.

cō-āg-ū-lā-tīng, *pr. par., a. & s.* [COAGULATE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

"So perfect is the coagulating power of rennet, that not a particle of casein in milk submitted to its action will remain uncoagulated."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. i., p. 39.

C. As subst.: The act or process of congealing, clotting, or curding; the state of becoming coagulated.

cō-āg-ū-lā-tion, *s.* [Lat. *coagulatio*, from *coagulo*=to coagulate.]

1. The act or process of being coagulated, or of changing from a liquid to a curd-like semi-solid state, produced without evaporation and without crystallization. It differs from congealing in not being attended by a fall of temperature in the substance coagulated.

¶ *Coagulation of the blood:*

Anat. & Physiol.: When blood is drawn and allowed to stand it emits a "halitus" or exhalation, which has a faint smell. In three or four minutes a film overspreads the liquid, commencing at the circumference and gradually spreading to the center. Two or three minutes later the lower part of the blood, in contact with the vessel, becomes solidified, and then the whole mass, only about eight or nine minutes being needful for the whole process from first to last. In about fifteen or twenty minutes a thin serum begins to exude from it, and goes on to do so for two or three days. (*Quain.*)

"Acetic acid, which will not precipitate albumen, causes the coagulation of casein."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. i., p. 39.

"Fibrine is distinguished from the other proximate principles by its remarkable property of spontaneous coagulation."—*Ibid.*, p. 37.

*2. The process of becoming crystallized; crystallization.

3. A concretion; a body or substance formed by coagulating.

"As the substance of coagulations is not merely saline, nothing dissolves them but what penetrates and relaxes at the same time."—*Arbuthnot: On Aliments*.

†**cō-āg-ū-lā-tīve**, *a.* [Lat. *coagulat(us)*, pa. par. of *coagulo*=to coagulate; Eng. suff. -*ive*.] Having the power or quality of coagulating; causing coagulation or concretion; coagulating.

"To manifest the coagulative power, we have sometimes in a minute arrested the fluidity of new milk, and turned it into a curdled substance, . . ."—*Boyle*.

cō-āg-ū-lā-tōr, *s.* [Eng. *coagulat(e)*; -*or*.] That which coagulates or has the power or quality of coagulating.

"Coagulators of the humors are those things which expel the most fluid parts, . . ."—*Arbuthnot*.

cō-āg-ū-lā-tōr-y, *a.* [Eng. *coagulat(e)*; -*ory*.] Causing coagulation; coagulative.

"Coagulatory effects."—*Boyle*.

cō-āg-ū-lūm, *s.* [Lat.]

I. Ordinary Language:

1. A coagulated or concreted mass, as curd, &c.

"From the clarified juices of cauliflower, asparagus, mangel-wurzel or turnips, a *coagulum* is formed, which cannot be distinguished from the coagulated albumen of serum or the egg."—*Todd & Bowman: Physiol. Anat.*, vol. i., ch. i., p. 40.

2. Any substance or preparation which coagulates or causes coagulation; a coagulant.

II. Med. & Chem.: A blood-clot. Substances containing albumen, as the white of egg, are coagulated by heating.

cō-āid, *s.* [Pref. *co=con*, and Eng. *aid* (q. v.).] An assistant, one who joins in any act, a co-operator.

"Paris, Deiphobus, Aeneas, join
(Coaids and captains of the Trojan line)." *Pope: Homer's Iliad*, bk. xiii.

cō-āi-ta, *s.* [QUATA.] The French name for the Quata, a South American monkey, *Ateles paniscus*, very common in the woods of Surinam and Brazil.

cōak, *s.* [COLK.]

1. Carpentry:

(1) A projection of the nature of a tenon from the general face of a scarfed timber. It occupies a recess or mortise in the counterpart face of the other timber. It is called also a tabling, and the mortise a *sunk-coak*.

(2) A joggle or dowel by which pieces are united to prevent them slipping past each other, or to fasten them together.

2. *Mach.:* The hole guarded by metal in a sheave through which the pin goes.

3. *Naut.:* A small perforated triangular bit of brass inserted into the middle of the shiver (now called *sheave*) of a block, to keep it from splitting and galling by the pin whereon it turns. Called also *bush*, *cock*, or *cogg*, and *dowel*. (*Smyth.*)

cōak, *v. t.* To join with a coak.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite. cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

coak'ing, *s.* [COAK, *v.*] Uniting pieces of spar by means of tabular projections, formed by cutting away the solid of one piece into a hollow, so as to make a projection in the other fit in correctly; the butts, the pieces from drawing asunder.

cōal, ***coale**, ***col**, ***cole**, ***coole**, ***coylle**, ***coll**, ***coyle**, ***coll** (*sing.*), ***colis**, ***colys** (*pl.*), *s.* & *a.* [A. S. *col*; O. H. Ger. *chol*, *cholo*; M. H. Ger. *kol*; Ger. *kohle*; Dut. *kool*; Sw. *kol*; Dan. *kul*; L. Ger. *kaal*.]

A. As substantive:

I. Ordinary Language:

1. The word originally signified what was afterward known as charcoal, as "coals of fire," "fire of coals," &c., in the English Bible, and as "colewood," "colliers' lane," &c., in the country.

"Sharp arrows of the mighty, with coals of juniper."—*Ps. cxx. 4.*

2. In the same sense as II. 1.

¶ **Pit-coal** (Germ. *Steinkohl*=stone-coal) (*Speed, Wallis, &c.*); *Sea-coal* (*Shakesp.*); *Ship-coal* (old charters); *Carbo maris*, *Carbo fossilis*, &c., used as distinctive terms.

¶ **To blow a coal**: To fan a quarrel.

"I do believe

You are mine enemy, and make my challenge
You shall not be my judge: for it is you
Have blown this coal betwixt my lord and me;
Which God's dew quench!"

Shakesp.: Hen. VIII., ii. 4.

(1) **Precious coals!** An exclamation of surprise. (*Nares.*)

"Let me see how the day goes (hee pulls his watch out): precious coales, the time is at hand . . ."—*Returne from Parnassus* (1606).

(2) **To haul over the coals**: To reprove for some act, usually one which the reprov'd knew better than to commit, or could by him have been avoided.

(3) **To carry coals**: To put up with insults, to submit to any degradation. The origin of the phrase is this: that in every family the scullions, the turnspits, the carriers of wood and coals were esteemed the very lowest of menials. The latter in particular were the drudges of all the rest. (*Nares.*)

"Gregory, o' my word, we'll not carry coals."—*Shakesp.: Rom. & Jul., i. 1.*

(4) **To carry coals to Newcastle**: To do anything superfluous or unnecessary.

II. Technically:

1. **Min.**: A carbonaceous mineral substance, black, shiny or dull, easily broken, often splintery, inflammable, and used for fuel. It is composed of carbon (75 per cent.), hydrogen, oxygen, and some nitrogen, with siliceous and other earthy impurities (ash). It consists of compressed and chemically altered vegetable matter, chiefly extinct kinds of lycopodiaceous trees. As the successive jungle-growths [COAL-MEASURES] accumulated their stems, leaves, and spores, hydrogen and oxygen were evolved with some of the carbon. The relative proportion of carbon in the mass was increased, the woody fiber reduced in volume to one-ninth, or even one-fifteenth, of its original bulk, and the mass became black, shiny hydrocarbons, with imbedded charcoal ("mother-coal"), due to decomposition of trees lying exposed to the air, or dull black hydrocarbons, resulting from the consolidation of decomposed vegetable pulp, like soft peat.

¶ Dana divides what may be called the species, termed by him Mineral Coal, into the following varieties: (1) Anthracite, (2) Native Coke, (3) Caking Coal, (4) Non-caking Coal, (5) Cannel Coal (Parrot Coal), (6) Torbanite, (7) Brown Coal (Lignite), (8) Earthy Brown Coal, (9) Mineral Charcoal. The first variety has only 3-46 per cent. of bituminous matter, the second has none, and the rest vary in this respect.

2. **Geol.**: Geologically coal occurs as a stratified rock, interbedded with clays, iron-stones, sandstones, and limestones, in what are termed coal-measures. The best coals belong to the Carboniferous series of the Palæozoic system; but much coal of later (Neozoic) ages is found in various parts of the world, though, in that case, either mixed with or passing into lignite, a far less valuable fossil fuel, because little of the hydrogen, oxygen, and nitrogen has been eliminated by chemical change, and thus as much as 30 per cent. of water remains in lignite, while good coal has seldom more than 5 per cent. When lateral pressure has come into operation on the coal-measures, more hydrogen (with some carbon) has been driven off, and the coal metamorphosed into anthracite, which has 90 per cent. of carbon. Some coals have become merely anthracitic. Other coals have had very much carbon ("mother-coal") in them originally. Hence the conditions producing "Steam-coal," that is, either

(1) coal good for raising steam quickly, or (2) smokeless coal, suited for the steam-navy. According to the decomposition of the vegetable matter, and the resulting combinations of carbon and hydrogen, fossil fuel is more or less bituminous when burnt.

A mass of coal when broken splits in three directions: (1) Along the planes of bedding, commonly presenting dull black surfaces which soil the fingers. (2) Vertically across the stratification; the broken surfaces are bright and smooth, and do not soil the fingers; the direction along which these joints run is known as the "face" of the coal. (3) A third set of planes at right angles to both of the other sets, and less perfect, so that the fracture here is more irregular; this direction is called the "end" of the coal. Thus it yields blocks more or less regular in shape, and roughly resembling cubes or dies. (*Huxley: Physiography*, ch. xiv., p. 238, 3d ed.)

B. As adj.: Consisting of coal; in any way pertaining or relating to coal. (See the compounds.)

¶ Compounds of obvious signification: *Coal-barge*, *coal-fire*, *coal-mine*, *coal-sack*, *coal-shed*.

coal-backer, *s.* A man employed to carry coals from a ship to the wagons. (*Mayhew.*)

***coal-basket**, *s.* A basket or scuttle for carrying coals.

coal-basin, *s.*

Geol.: A basin-shaped depression with coal-beds deposited in it. It has been almost always produced by subsidence of the strata previous to the deposition of the coal.

coal-bed, *s.*

Geol.: A bed of coal.

coal-black, ***cole-blacke** ***cole-blak**, *a.*

1. **Ord. Lang.**: As black as coal; jet-black.

"He hadde a bere's skin *cole-black* for old."

Chaucer: C. T., 2,144.

2. **Bot.**: Black a little verging upon blue.

coal-boring bit, *s.* A bit with an entering point and a series of cutting edges of steps of increasing radius. (*Knight.*)

***coal-box**, *s.* A box for carrying coals to the fire; a coal-scuttle.

"Leave a pail of dirty water, a *coal-box*, a bottle, broom, and such other unsightly things."—*Swift.*

coal-brand, *s.* A name for smut in wheat.

coal-brass, *s.*

Mining: A popular name given to the iron pyrites found in the coal-measures. It contains no brass, but only sulphur and iron. [IRON PYRITES.]

coal-breaker, *s.* A machine for crushing lump-coal as taken from the mine. Also adapted to cleanse and assort it. (*Knight.*)

coal-breaking, *s. & a.* (See the compound term.)

¶ **Coal-breaking jack**:

Mining: A jack or wooden wedge used for breaking down coal. Jacks are inserted in a small recess in the seam, a few feet of tubing are used to connect this with an adjacent pump, and great pressure being obtained by means of a lever, the coal is brought down in quantities. (*Knight.*)

coal-bunker, *s.*

Naut.: The closed room around the boiler and engine-room of a steam vessel for keeping the fuel. (*Knight.*)

coal-car, *s.* A freight-car designed specially for coal; a coal-truck or coal-wagon.

coal-cart, *s.* A cart used in conveying coals.

coal-chute, *s.* A spout by which coal in bunkers or elevated boxes is loaded into carts or cars. (*Knight.*)

coal-crimp, *s.* A factor or middleman who sells ship-loads of coals on commission to wholesale dealers.

coal-cutting, *s. & a.* (See the compound term.)

Coal-cutting machine: A machine for undercutting coal seams in the mine or at the bank.

coal-drop *s.* A broad, shallow inclined trough, down which coals are discharged into the hold of a vessel. (*Ogilvie.*)

coal-dumping, *s.* The act of loading coal or other vessels from a cart. The cart is made to descend by a rail so as to enter the vessel, when it is of course easy to discharge its contents into the hold. (*Knight.*)

coal-dust, *s.* Small fine coal, the siftings of coal.

"It has been attempted . . . to make the *coal-dust* into bricks which can bear carriage."—*Ansted: Short Trip in Hungary and Transylvania*, p. 194.

coal-elevator, *s.* A storehouse for coals, furnished with machinery for expeditiously loading and unloading carts, wagons, or cars of coal.

coal-eyed, *s.* Black-eyed.

coal-field, *s.*

1. **Ord. Lang.**: A bed of coal.

2. **Ord. Lang. & Geol.**: A district where coal abounds, or which is worked for coal; a number of coal mines worked.

American Coal Fields: First coal-fields worked in America were the bituminous fields at Brighthope, Chesterfield Co., Va., near Richmond, discovered in 1750. This coal was used at Westham, on the James river, to make shot and shell during the War of Independence. The first use of anthracite coal was in 1768-69. First used for smithing purposes in 1790. First used to burn in a common grate in 1808. First successful use of anthracite coal for the smelting of iron was in 1839, at the Pioneer Furnace, at Pottsville, Pa. It had been tried on the Lehigh in 1826, but was unsuccessful. The great shaft of the Philadelphia and Reading Iron Company has been sunk to a depth of 1,569 feet from the surface to the great mammoth coal vein which attains a thickness of 25 feet, in that distance passing through no less than fifteen coal seams, of which six are workable and have an average thickness together of 64 feet. Even then there are a number of coal-seams underlying these.

Coal Fields of the World: United States, 200,266 square miles; Continental Europe, 34,000 square miles; Great Britain, 6,195 square miles; British America, 2,200 square miles.

coal-fish, *s.*

Ichthy.: A species of Gadus or Cod, a native of the Baltic, Northern and Mediterranean Seas. It is a coarse fish, deriving its name from the dusky pigment which tinges the skin, and which soils the fingers like moist coals. (*Baird.*)

"The *coalfish* is most decidedly a northern fish, but being a hardy species is not without a considerable range to the southward. It was the only fish found by Lord Mulgrave on the shores of Spitzbergen. . . . This fish has more provincial names than any other species, some of which only refer to it when of a peculiar size. Among the Scotch islands the *coalfish* is called sillock, piltock, cooth or kuth, harbin, cudden, sethe, sey, and gray-lord. In Edinburgh and about the Forth, the young are called podleys; at Newcastle the fry are called *coalsey* (? *coalzie*), and when twelve inches long poodlers."—*Yarrell: British Fishes.*

coal-fitter, *s.* A middleman who acts as agent in the sale of coal between the owner of a pit and the shipper.

coal-formation, *s.*

1. **Geol.**: The same as the CARBONIFEROUS FORMATION (q. v.).

2. The same as the COAL-MEASURES.

coal-gas, *s.* A mixture of gases produced by the destructive distillation of coal at regulated temperatures. It is used in lighting streets, houses, &c., and for cooking and heating purposes. Coal-gas is colorless and has a disagreeable smell. It is purified from H₂S by ferric hydrate, which is moistened with FeSO₄ and H₂SO₄ to remove ammonia. The carbon disulphide can be removed by passing it through an iron tube filled with iron turnings and heated to redness. Coal-gas consists of a mixture of hydrogen, 40 to 50 per cent., carbon-monoxide about 5 per cent., marsh gas (CH₄) about 40 per cent., which contribute nothing to the illuminating power of the gas; it depends upon the presence of heavy hydrocarbons, principally C₂H₄ ethene, ordinary gas containing about 4 per cent., and canal gas about 8 per cent. Coal-gas also contains small quantities of acetylene, butylene, &c., and aromatic hydrocarbons, as benzene, &c. The percentage of nitrogen is very variable. When gas is burnt a large quantity of water is formed, hence, if a gas stove is used to dry a room there must be sufficient ventilation to carry off the aqueous vapor. The sulphur in coal-gas is converted into sulphuric acid when burnt, which greatly damages books, furniture, &c. The escape of coal-gas from pipes into the soil is very injurious to the roots of trees and shrubs. The admixture of a very small quantity of air greatly impairs the illuminating power of coal-gas. Three causes are capable of decreasing the luminosity of flames, viz.: (1) withdrawal of heat; (2) dilution; and (3) oxidation of luminous material.

coal-gum, *s.* The dust of coal.

coal-head, *s.*

Ornith.: The Cole-tit, or Cole-titmouse, *Parus ater*; also called Coal-mouse (q. v.).

coal-heaver, *s.* A porter employed to carry coal, and especially to discharge it from ships.

"I went to the Jerusalem Coffee House . . . I there saw my captain, who looked as much like a captain as he did like a coal-heaver."—*Theodore Hook: Gilbert Gurney.*

†**coal-hod**, *s.* A scuttle to hold coals.

coal-hole, *s.* A hole or cellar where coals and cinders are placed.

" . . . the types were flung into the *coalhole*, and covered with cinders."—*Macaulay: Hist. Eng.*, ch. xvi.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tjon, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

coal-hood, coally-hood, coal-hoodie, s.

Ornithology:

1. A name given to the Bullfinch, *Pyrrhula vulgaris*, from his coal-black hood or cap.
2. The Black-headed Bunting, *Emberiza schæniclus*.

coal-house, s. A house in which coals are stored.

"Bonner's conscience made his palace a coal-house, and a dungeon."—*Junius: Sin Stigmatized*, p. 812.

coal-man, s. A miner or a dealer in coal.

coal-measure, s.

1. *Ord. Lang. (Sing.)*: The measure used in ascertaining the quantity of coal.
2. *Geol. (Pl.)*: Strata of coal with the attendant rocks. If the great Carboniferous formation be separated into three divisions, these, in the descending order, are (1) the Coal-measures, (2) the Millstone-grit, and (3) the Mountain or Carboniferous Limestone. If by the omission of the Millstone-grit they be reduced to two, then the Coal-measures constitute, with the Mountain Limestone already mentioned, the whole Carboniferous formation.

coal-merchant, s. One who trades in coal.

coal-meter, s. An official appointed to measure coal.

coal-miner, s. One who works in a coal-mine; a collier.

coal-mining, a. & s.

A. As adj.: Adapted for or occupied in mining.

B. As subst.: The act or process of mining for coals.

Mining: Coal-beds usually lie at a slight slope, and, when reached from the surface by shafts, are dug out together with sufficient of the upper and under strata to allow of vertical room for the miner. At the foot of the pit long galleries (boards) are cut to the extent of the property, then cross galleries (narrows), marking out square spaces or districts (panels). These are dug away, and the coal picked out and removed; the solid intervals, gradually reduced to walls and pillars, are ultimately removed, wooden props supporting the roof until it is allowed to fall in. This is called the "pillar and stall," or "board and pillar," working, and was invented in the beginning of this century. Formerly the coal was removed from the sides of intersecting galleries at the beginning of the mine, on the "rise end" of the seam; and great pillars were left behind comprising nearly sixty per cent. of the coal. Sometimes the hewing is begun at the "rise end" of the "winning," in a gallery all along the edge or face of the coal-seam, which is then cut gradually away, and the roof of the hollow behind is partly supported by stones and timber for roadways, and partly allowed to fall in. This is the "long-way," or "long-wall," plan. The methods and terms vary in different coal-fields. Ventilation is secured by a second shaft (engine-pit or upcast-pit), and by longitudinal divisions (brattices), making double currents, in shafts and galleries; by stoppings and trapdoors regulating the direction of the draught, and by other appliances. Mines are termed "fiery" when carburetted-hydrogen gas issues from the coal. This is frequently continuous; sometimes, when reservoirs are opened, sudden, and then, if the miner has a naked light instead of a Davy or safety lamp, the usual accidents take place.

coal-mouse, colemouse, s.

Ornith.: A small species of titmouse, with a black head; the Cole-tit (*Parus ater*).

coal-naphtha, s. An oily liquid obtained by the distillation of coal-tar. It is sold as benzole (q. v.). It is purified by agitating with caustic soda to extract the phenol and cresols; then rectified, by which it is separated into a heavy oil containing much naphthalene, and a liquid which is purified by agitation with sulphuric acid and redistilled. By fractional distillation it yields first a mixture of benzene and carbon disulphide, and olefines, &c., at 80° chiefly benzene C₆H₆, about 113° toluene, at 142° xylene, and at 170° impure cumene.

coal-oil, s. A common name in this country for kerosene.

coal-passer, s. One who passes on or supplies coal to the furnace of a steam-engine.

coal-pipe, s.

1. The carbonized bark of a fossil plant.

2. **Mining:**

(1) The cylindrical cast of a tree formed of solid sandstone, its mass increasing gradually toward the base, and with no branches left to support it in its position. When cohesion of the external layer, which alone holds it up, is overcome by the force of gravity, the "coal-pipe" falls perpendicularly or obliquely, often crushing unhappy miners at work below. (*Lyell*.)

"These fossil stumps are not uncommon in the roofs of the coal-seams. In some places they are known to the miners as 'coal-pipes.'"—*Dawson: Earth and Man*.

(2.) A very thin seam of coal.

coal-pit, s.

1. A coal-mine; a pit sunk in the earth for the purpose of digging out coals. [**COAL-MINING.**]

"A leaf of the polypody kind, found in the sinking of a coal-pit."—*Woodward*.

2. A place where charcoal is manufactured.

coal-plants, s. pl.

Geol.: Plants, the remains of which are found in the strata of the coal-formation, and from the stems, leaves, roots, &c., of which coal itself has been produced. Brongniart has figured upward of 300 species. They are often in a state of high preservation, exhibiting the most delicate nervures of the leaves, and cortical markings of the stems.

¶ Of the most common coal plant-remains, *Stigmara* was conjectured by Prof. Brongniart and Sir William Logan to have a relation to *Sigillaria*, and Mr. Binney proved it to be the roots of that plant by finding the two in actual continuity. Mr. Richard Brown, of Nova Scotia, also saw a probable *Sigillaria* with *Stigmara* roots. What *Sigillaria* itself is has been a matter of dispute. Brongniart, Göppert, and Unger consider it as probably a cycad. Principal Dawson, of Montreal, thinks that this may be its affinity, or that it may be a connecting link between the *Gymnosperms* and the higher *Acrogens*. Mr. William Carruthers, F. R. S., &c., of the British Museum, on the contrary, considers it one of the *Lycopodiaceæ*, and consequently an *Acrogen*. He places *Calamites* under the *Equisetaceæ*, and thinks that *Asterophyllites*, *Annularia*, and *Sphenophyllum* are the leaves of three species. Akin to it is the genus *Volkmanina*. It is generally agreed that *Lepidodendron* should be placed under the *Lycopodiaceæ*. Among the plants of undisputed affinity are ferns of various genera: *Sphenopteris*, *Pecopteris*, *Neuropteris*, *Cyclopteris*, &c., but with the fructification as a rule destroyed. There are also genuine *Conifers* in the Coal-measures which probably grew upon the hills while the plants previously described had their habitat on the plains.

coal-rake, *cole-rake, *colrake, s. An instrument used for raking out the ashes of a furnace.

"*Colrake; trulla, verriculum.*"—*Cathol. Anglicum*.

coal-screen, s. A sifter for coal. (*Knight*.)

coal-scuttle, s. A box or utensil for holding coals for present use.

Coal-scuttle bonnet: A bonnet so called from its resembling a coal-scuttle in shape.

"Glancing from the depths of her coal-scuttle bonnet . . ."—*Dickens: Nich. Nickleby*, ch. xxiii.

coal-shaft, s. The shaft forming the entrance to a coal-mine. [**SHAFT.**]

coal-ship, s. A ship employed in carrying coal; a collier.

"The pirate never spends his shot upon coal-ships, but lets fly at the rich merchant."—*Junius: Sin Stigm.*, p. 389.

coal-slack, s. Dust or grime of coal; fine coal.

coal-smut, s. The same as **COAL-SLACK** (q. v.).

coal-stalk, s.

1. A name given to the vegetable impressions found on stones in coal-mines. (*Scotch*.)

"Those impressions abound in coal countries; and are, in many places, not improperly known by the name of *Coal-stalk*."—*Ure: Hist. Rutherglen*, p. 302.

2. Extended, in its application, to the effects of recent vegetation.

coal-tar, s. Tar produced in the destructive distillation of bituminous coal. It is a thick, sticky, dark-colored substance, and is used in the manufacture of printer's ink, for asphalt pavements, coating ships, &c. The composition of coal-tar varies according to the temperature at which the coal is distilled, the higher the temperature the larger being the yield of solid bodies. Coal-tar when distilled first gives off gas, then water containing ammoniacal salts, then a brown light oil which, when purified, is called coal-naphtha (q. v.); at higher temperatures a yellow, heavy, foetid oil called dead-oil (q. v.), or creasote oil, then naphthalene (q. v.); afterward the black residue in the retort solidifies on cooling and forms pitch, which is used to form asphalt, and a black varnish to protect iron from rust. If the distillation is continued

Coal-plants.

the pitch yields a yellow substance like butter, containing anthracene, phenanthrene, fluorene, &c.; afterward, at red heat, a bright orange powder, consisting chiefly of pyrene C₁₆H₁₀ and chrysene C₁₈H₁₂; the residue forms a hard, porous coke.

Coal-tar colors: Dyes prepared from aniline (q. v.), naphthalene, phenol (q. v.), and other compounds contained in coal-tar.

coal-tit, s.

Ornith.: A species of titmouse (*Parus ater*), also called coal-head and coal-mouse (q. v.).

coal-tongs, s. pl. A pair of tongs for grasping coal in lumps.

coal-trimmer, s. One who is employed to trim and stow the coal for the fires of marine steam-engines.

coal-under-candlestick, s. A Christmas game mentioned in the "Declaration of Popish Impostures," 1603. (*Nares*.)

coal-viewer, s. An overseer or superintendent of a coal-mine.

coal-washer, s. A machine in which coal which has been broken and assorted is finally washed. (*Knight*.)

coal-whipper, s. One who raises coal out of the hold of a ship.

"Here were colliers by the score and score with the coal-whippers."—*Dickens*.

coal-whipping, s. The act or occupation of raising coals from the holds of ships.

coal-working, s. A place where coal is worked; a coal-mine, a colliery.

"At last we reached the coal-workings."—*Ansted: Short Trip in Holland and Transylvania*, p. 124.

coal-works, s. A colliery, with the necessary machinery appertaining to it.

"There is a vast treasure in the old English, from whence authors may draw constant supplies; as our officers make their surest remits from the coal-works and the mines."—*Felton*.

coal-yard, s. An inclosure set apart for the deposit or sale of coal.

coal, v. t. & i. [**COAL, s.**]

A. Transitive:

*1. To burn, char, or reduce to charcoal.

"In fetching [the wood] when it is *coaled*."—*Carew: Survey of Scotland*.

2. To supply with coal.

"A steam-vessel is said to be *coaled* when she has received on board the necessary fuel for any voyage."—*Young: Nautical Dict.*

*3. To write, mark, or delineate with charcoal.

"Marvailing, he *coaled* out rhimes upon the wall, near to the picture."—*Camden*.

B. Intrans.: To take in a supply of coals.

"A good pier has lately been built, alongside of which vessels may lie and coal with great facility."—*Macdonald: British Columbia and Vancouver's Island*, p. 360.

***coal-ēr-y, s.** [*Eng. coal; -ery.*] A coal-pit, a coal-mine: now superseded by *colliery* (q. v.).

"Two finestalactitæ were found hanging from a black stone, at a deserted vault in Berwell coalery."—*Woodward*.

cō-a-lēs'ce, v. i. & t. [*Lat. coalesco*=to grow together, to coalesce, to unite: *co=con; alesco* (incept. of *alo*)=to nourish.]

A. Intransitive:

I. Lit.: To grow together; to unite in masses or groups spontaneously.

"When vapors are raised, they hinder not the transparency of the air, being divided into parts too small to cause any reflection in their superficies; but when they begin to *coalesce*, and constitute globules, those globules become of a convenient size to reflect some colors."—*Newton*.

II. Figuratively:

1. To combine, to join, to agree.

"Mathematics and physics have been long accustomed to coalesce."—*Tyndall: Frag. of Science*, 3d ed., vol. vi., p. 110.

2. To join a party, to become one of a party.

"He had imagined that, as soon as he chose to *coalesce* with those to whom he had recently been opposed, all his followers would imitate his example."—*Macaulay: Hist. Eng.*, ch. xvi.

3. To unite in society in a more general sense; to become incorporated with.

"The Jews were incapable of *coalescing* with other nations."—*Campbell*.

***B. Trans.:** To cause to unite or join.

¶ Crabb thus distinguishes between to *add*, to *join*, to *unite*, and to *coalesce*: "We *add* by putting a part to any body so as to form a whole; we *join* by attaching two whole bodies to each other; we

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

unite by putting two bodies to or into one another, so that they become one body; things *coalesce* when their parts mingle together so as to form one substance. . . . *Adding* is opposed to subtracting or diminishing; *joining* to separating, *uniting* to dividing, and *coalescing* to falling asunder." (Crabb: *Eng. Synon.*)

cō-a-lēs'-ced, *pa. par. or a.* [COALESCE, *v.*]

cō-a-lēs'-çence, *s.* [Lat. *coalescens*, *pr. par. of coalesco*=to coalesce, to unite.] The act or process of coalescing or combining; union, concretion, combination.

"Like that of salts with lemon juice,
Which does not yet like that produce
A friendly coalescence."

Cowper: *Friendship.*

***cō-a-lēs'-çen-çy**, *s.* [Eng. *coalescence*; *-y.*] The same as COALESCENCE (*q. v.*).

"By a happy diffusion and holy coalescency."—Gauden: *Tears of the Church*, p. 34. (Davies.)

†cō-a-lēs'-çent, *a. & s.* [Lat. *coalescens*, *pr. par. of coalesco*=to coalesce, to unite.]

A. As *adj.*: Growing together, uniting, combining, coalescing.

"The human and divine nature of Christ being *coalescent* into one person."—Annot. on *Glanville's Lux Orient.*, 1682, p. 159.

B. As *subst.*: One who or that which coalesces.

cō-a-lēs'-çing, *pr. par., a. & s.* [COALESCE.]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *subst.*: The act of combining or growing together; coalescence.

cōal'-ing, *pr. par., a. & s.* [COAL, *v.*]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *substantive*:

1. The act of supplying or providing with coals.

2. The act of taking in a supply of coals.

***coalise**, *v. i.* [COALESCE.]

"... will lead *coalised* armies."—Carlyle: *Fr. Rev.*, pt. ii., bk. ii., ch. 5.

***cō-al-ite**, *v. i. & t.* [Lat. *coalitum*, *sup. of coalesco*=to coalesce, to unite.]

A. Intrans.: To unite, to coalesce.

"Let the friends of liberty lay aside the groundless distinctions which are employed to amuse and betray them; let them continue to *coalite*."—Bolingbroke: *On Parties*, Let. 19.

B. Trans.: To unite, to cause to coalesce.

"Time has by degrees in all other places and periods blended and *coalited* the conquered with the conquerors."—Burke: *To Sir H. Langrishe*.

cō-al-i'-tion, *s.* [Fr. *coalition*; Low Lat. *coalitio*, from *coalitum*, *sup. of coalesco*=to coalesce, to unite.]

1. *Ord. Lang.*: A union or coalescing of separate bodies into one body or mass.

"The world's a mass of heterogeneous consistencies, and every part thereof a *coalition* of distinguishable varieties."—Granville.

2. *Polit.*: A combination for temporary purposes of persons, parties, or states having different interests.

"... the only effect of a *coalition* between them must have been that one of them would have become the tool of the other."—Macaulay: *Hist. Eng.*, ch. xiii.

3. *French Law*: An unlawful agreement among several persons not to do a thing except upon some conditions agreed upon. The most usual coalitions are:

(1) Those which take place among master workmen to reduce, diminish, or fix at a low rate the wages of journeymen and other workmen.

(2) Those among workmen or journeymen not to work except at a certain price. The offense is punishable by fine and imprisonment. In this country these combinations of employers and employes have been unnoled until a recent decision of the United States court seemed to fix upon them the stigma of conspiracy and unlawfulness.

cō-al-i'-tion-ēr, *s.* [Eng. *coalition*; *-er.*] The same as *coalitionist* (*q. v.*). (Byron.)

cō-al-i'-tion-ist, *s.* [Eng. *coalition*; *-ist.*] One who promotes or joins a coalition.

†cōal'-lēss, *a.* [Eng. *coal*; *-less.*] Wanting or destitute of coal.

***cō-al-lied**, *pa. par. or a.* [COALLY, *v.*]

***cō-al-lī'**, *v. t.* [Pref. *co*=*con*, and Eng. *ally*, *v.* (*q. v.*)] To join or associate together.

"Such civil society can never secretly or honorably act with a total disregard to that *coalited* religion."—Warburton: *Divine Leg.*; *Dedic.*

***cō-al-lī'**, *s.* [Pref. *co*=*con*; *ally*, *s.* (*q. v.*)] An ally, a co-operator, an assistant.

cōal'-sēy, *s.* [Probably a dimin. from *coal*.] The fry of the coal-fish. (See example under *coal-fish*.)

cōal'-y, *a.* [Eng. *coal*; *-y.*]

1. Of or pertaining to coal, of the nature of or resembling coal.

2. Full of or discolored by coal; black.

"Or rocky Avon, or of sedgy Lee,
Or *coaly* Tyne, or ancient hallowed Dee."

Milton: *Vacation Exercise.*

cōam'-ing, *s. pl.* [COMBINGS.]

Naut.: Certain raised work, rather higher than the decks, about the edges of the hatch-openings of a ship, to prevent the water on deck from running down. (Smyth.)

"... I threw my legs over the *coamings* . . ."—*London Daily Telegraph*.

cō-an-nēx', *v. t.* [Pref. *co*=*con*, and Eng. *annex* (*q. v.*)] To annex with or attach to something else.

***cō-ap-pēar'**, *v. i.* [Pref. *co*=*con*, and Eng. *appear* (*q. v.*)] To appear at the same time with.

"Heaven's scornful flames and [thine] can never *coappear*."—Quarles: *Emblems*.

***cō-āp-prē-hēnd'**, *v. t.* [Pref. *co*=*con*, and Eng. *apprehend* (*q. v.*)] To apprehend with another, to comprehend.

"They assumed the shapes of animals common unto all eyes, and by their conjunctions and compositions were able to communicate their conceptions unto any that *coapprehended* the syntaxis of their nature."—Browne: *Vulgar Errors*, bk. v., p. 263.

***cō-āpt'**, *v. t.* [Lat. *coapto*=to fit.] To adapt, to make fit or suitable.

cō-āp-tā'-tion, *s.* [Lat. *coaptatio*, from *coapto*=to fit or join together; from *co*=*con*, and *apto*=to adapt, to fit; *aptus*=fit.]

1. *Ord. Lang.*: The adaptation or adjustment of parts to each other.

"The same method makes both prose and verse beautiful, which consists in the judicious *coaptation* and ranging of the words."—Broome.

2. *Anat.*: A form of angular movement, in which, as in the movement of the patella on the femur, the articular surface of one bone travels over that of another so as to bring different parts of the surface successively into contact in the manner of a wheel rolling on the ground, this movement being usually accompanied by a certain amount of gliding.

cō-āp-tā'-tōr, *s.* [Lat.]

Surgery: An apparatus for fitting together the ends of a fractured bone, and holding them in position while the bony junction is proceeding.

cō-arct', *v. t.* [Lat. *coarcto*; from *co*=*con*, and *arcto*=to draw or press close together; from *arctus*=narrow, strait; *arceo*=to shut up, to inclose.]

1. To confine, to inclose in a narrow compass; to contract, to restrain.

2. To constrain, to restrain, to confine.

"If a man *coarcts* himself to the extremity of an act, he must blame and impute it to himself, that he has thus *coarcted* or straitened himself so far."—Ayliffe.

***cō-arc'-tāte**, *v. t.* [COARCTATE, *a.*] The same as COARCT (*q. v.*).

"They *coarctate* the breast, and astringe the belly."—Venner: *Via Recta ad Vitam Longam*, p. 132.

cō-arc-tā'te, ***cō-arc-tā'-tēd**, *a.* [Lat. *coarctatus*, *pa. par. of coarcto*.] [COARCT.]

1. *Ord. Lang.*: Pressed together; straitened, confined, shut in.

II. *Technically*:

1. *Bot.*: Contracted, drawn closely together.

2. *Entom.*: A term used in the following compound.

Coarctate Metamorphosis:

Entom.: Such metamorphosis as occurs in the Diptera, in which the larva sheds its last skin before the growing legs and wings have impressed their forms upon it, and the exuvium constitutes an egg-shaped horny case, upon which there is not the least indication of the parts of the perfect insect. (Owen.)

***cō-arc-tā'-tion**, *s.* [Lat. *coarctatio*, from *coarcto*=to restrain, to confine; *co*=*con*, and *arctus*=narrow, strait; *arceo*=to restrain.]

I. *Literally*:

1. The act of confining, contracting, or restraining within a narrow space.

2. The state or condition of being confined or restrained.

3. The act of contracting, straitening, or narrowing; that which contracts, straitens, or narrows.

II. *Fig.*: A restraint or restriction of liberty.

"Election is opposed not only to coercion, but also to *coarctation*, or determination to one."—Bramhall.

***cō-arc'-tēd**, *pa. par. or a.* [COARCT.]

cō-arc-tūre, *s.* [From Lat. *coarcto*=to press together.] The neck of a plant.

cōarse, ***course**, ***cowrse**, *a.* [Etymology doubtful. Probably it is a contraction for *in course*=in an ordinary manner; hence, ordinary, common.] [COARSE.]

I. *Literally*:

1. Unrefined, impure, containing impurities or baser parts.

"I feel

Of what *coarse* metal ye are molded."

Shakesp.: *Henry VIII.*, iii. 2.

2. Large in size or texture; composed of large or rough particles; not fine or soft.

"In cloth is to be considered wool, the matter of it, whether it be *coarse* or fine."—Scott: *Essay on Drapery*, p. 5. (1635.)

II. *Figuratively*:

1. *Of persons*:

(1) Rude, rough, uncivil, unpolished in manners.

"Oh why were farmers made so *coarse*,

Or clergy made so fine?"

Cowper: *The Yearly Distress*.

(2) Inexpert, inexperienced; uninstructed in art or learning.

"Practical rules may be useful to such as are remote from advice, and to *coarse* practitioners, which they are obliged to make use of."—Arbutnot.

2. *Of language, manners, &c.*: Gross, inelegant, rude, unpolished, unfinished.

"... the libels on William's person and government were decidedly less *coarse* and rancorous during the latter half of his reign than during the earlier half."—Macaulay: *Hist. Eng.*, ch. xxi.

3. *Of things generally*:

(1) Gross, rough, unrefined.

"'Tis not the *coarser* type of human law

That binds their peace." Thomson: *Spring*.

(2) Mean, disagreeable; not delicate.

"From this *coarse* mixture of terrestrial parts,

Desire and fear by turns possess their hearts."

Dryden: *Virgil's Æneid*.

¶ (1) Crabb thus distinguishes between *coarse*, *rough* and *rude*: "These epithets are equally applied to what is not polished by art. In the proper sense *coarse* refers to the composition and materials of bodies, as *coarse* bread, *coarse* meat, *coarse* cloth; *rough* respects the surface of bodies, as *rough* wood and *rough* skin; *rude* respects the make or fashion of things, as a *rude* bark, a *rude* utensil. *Coarse* is opposed to fine, *rough* to smooth, *rude* to polished. In the figurative application they are distinguished in a similar manner: *coarse* language is used by persons of naturally *coarse* feeling; *rough* language by those whose tempers are naturally or occasionally *rough*; *rude* language by those who are ignorant of any better." (Crabb: *Eng. Synon.*)

(2) For the difference between *coarse* and *gross*, see GROSS.

coarse-grained, *a.*

1. *Lit.*: Having a coarse grain, as wood.

2. *Fig.*: Wanting in refinement, rude; coarse in disposition.

coarse-haired, *a.* Having coarse hair.

"... long-haired and *coarse-haired* animals are apt to have, as is asserted, long or many horns . . ."—Darwin: *Origin of Species* (ed. 1859), ch. i., p. 12.
